2/4/94

On leaving for lunch at 12:00 PM I noticed the flow line had an avacado green color to it. The flow line runs to the north about fifty feet from my office.
On checking the source of the green fluid it was found to be coming from our neighbor to the south (Somitex)

2/4/94 At 12 30 P.M.

While checking the 516 Back yard I noticed a greenish color water coming from the Somitese Property onto Utility & Property

A Sample was taken by Tony Esnaust.

Tony Ouey

8/4/94

At 12:30 PM on the above date I observed a "green" colored water running down our drainage conduit. After following the path to the origin, I observed it coming from Lomitex property. At this time I sampled the flow with the following persons:

Wesley West, Harry Dewey and Bob Ojeda.

After sampling, Wesley West, Bob Ojeda and I observed the flow coming down the drainage swale of Lomitex on their east side of their plant. Also noticed small lime color residue along their fence line at two points. (Marked on attached map)

Wesley West and I took several pictures of the greenish run-off from Lomitex and the lime color residue.

I took the samples taken to Chemical Consultants at approx 3:45 PM.

METHOD OF SHIPMENT

2/4/94 - DK green discharge from Somitex Tony collected sample ✓ w/ him

Have documentation

2 samples
-001
-002

(8010 8020 pH) PO C-31372 Somitex / C-31373 storm water

2/11 ✓ w/ Cathy Doub
- analysis pH, 8010, 8020
- narrative on sample condition/preservation
✗ COC

→ Chem Consultants rcvd sample

Told her to analyze today 2/11/94

→ Grant verbal statement is that discharge was visible along N boundary of Somitex & in depression prior to entering UTM drainage channel. Get this in statement. Also was raining, Somitex lot was empty - shut down for maintenance?

Need statement from Tony, shop superintendent ✓ & union rep ✓ ✓ only if discharge s. HVOCs

- Took samples, refrigerator, transport in personal motor home in refrigerator
