Subject: Phase I Environmental Site Assessment and
Document Review
151 Long Lane
City of Industry, California

Dear Mr. Radecki:

In accordance with the contract dated August 12, 2010, Ardent Environmental Group, Inc. has performed a Phase I Environmental Site Assessment (ESA) and Document Review for the subject property (site). The following report documents our findings and provides opinions, conclusions, and recommendations regarding the environmental status of the site. We appreciate the opportunity to be of service to you on this project.

Sincerely,
Ardent Environmental Group, Inc.

Connie Lizarraga

EXECUTIVE SUMMARY

Ardent Environmental Group, Inc. (Ardent) was retained by Richards Watson & Gershon, on behalf of their client, Industry Urban-Development Agency (Agency) to perform a Phase I Environmental Site Assessment (ESA) and Document Review for the property located at 151 Long Lane in the City of Industry, California ("site" or "subject property"). As discussed below, the site was formerly part of a larger property that included the parcel immediately northeast of the site (referred to herein as the "larger property"). In approximately 2006, the adjacent parcel was segregated from the site and redeveloped as a commercial building. It is our understanding that the Agency is considering purchasing the property, razing the on-site structures, and preparing the site for redevelopment. Site assessment activities for this report were conducted between August 12, 2010 and September 2, 2010.

In summary, the following items were noted:

- From at least 1928 through the late 1960s, the site vicinity was used for agricultural purposes or vacant land. From at least 1972 to approximately 2005, the site was part of a larger property that was located immediately northeast of the site. During this time, the larger property was used as a lumber yard; the site was used for milling. In approximately 2006, the northeastern portion of the larger property was segregated from the site and redeveloped as a commercial building. The site was used from at least 2007 as a semi-truck maintenance facility and as a parking lot to temporarily store trailers for semi-trucks. At the time of this assessment, the site was being used as a parking lot for semi-truck trailers (no maintenance was being completed). One small canopy structure was located on-site.

- Based on our review of regulatory agency files, little to no chemical uses were reported at the site during the time the property was occupied as a lumber yard. During the short period of time the site was occupied by a semi-truck maintenance business, small quantities of waste oil and diesel fuel were reportedly stored on the site in 55-gallon drums. The location of these drums was undocumented. No violations for dumping or mishandling chemicals were reported in regulatory files. Based on the small quantities and type of chemicals used, there is a low likelihood, in our opinion, that a significant release has occurred, and therefore, these former features would not be considered an environmental concern to the site.

- Depth to groundwater at the site is expected to be 45 to 55 feet below ground surface (bgs) and flow in a northwesterly direction. The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the National Priority List (NPL), or Superfund Site. The site is located within the Puente Valley Operable Unit of the San Gabriel Valley Groundwater Basin. Portions of the Puente Valley Operable Unit are impacted with volatile organic compounds (VOCs), namely the

chlorinated solvents trichloroethene (TCE) and tetrachloroethylene (PCE), which were historically used by the commercial and industrial facilities located in this area. Based on our review of groundwater plume maps provided by the EPA, groundwater beneath the site has been impacted with chlorinated solvents. Based on information obtained during this assessment, there is a low likelihood that chlorinated solvents have been used at the site. In addition, the site has not been listed on the EPA database as a Responsible Party (RP).

- As part of this assessment, Ardent completed a Tier 1 screening study of vapor encroachment conditions related to the site. As noted above, groundwater beneath the site is possibly impacted with chlorinated solvents from the surrounding land uses. Due to the possible groundwater contamination beneath the site and based on the American Society for Testing and Materials (ASTM) standards, the site would be considered a potential health risk to future occupants due to vapor intrusion.

- Two short railroad spurs are located on the western portion of the site. It has been our experience that ballast materials beneath railroad spurs sometimes contain petroleum hydrocarbons and Polynuclear Aromatics (PNAs). Based on this information, the railroad spurs would be considered an environmental concern to the site.

- Based on the date of construction (early 1970s) of the on-site structure, asbestos-containing materials (ACMs) and lead based paint (LBP) are likely present. During our site reconnaissance, peeling paint was noted on the on-site structure.

- No off-site environmental concerns were noted in the site vicinity.

Ardent has performed this Phase I ESA in general conformance with the scope and limitations of the ASTM Practice E 1527-05, the ASTM Practice E 2600-10, and the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquires (AAI), Final Rule (40 CFR, Part 312), for the property located at 151 Long Lane in the City of Industry, California. Any limitations or exceptions encountered during completion of this report are stated in Section 1.4. No evidence or indication of RECs, or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property has been revealed, except for the possible risk of vapor intrusion into future on-site buildings and the possible contaminants associated with the railroad spurs. Although not considered an REC in accordance with ASTM Standards, ACMs and LBP may have been used on the on-site structure.

Based on the findings of the Phase I ESA, Ardent recommends the following:

- A soil gas survey should be completed throughout the site to assess whether off-gassing from the regional groundwater VOC issue may threaten human health of future occupants due to possible vapor intrusion. The results should be compared to Cal-EPA's California Human Health Screening Levels (CHHSLs). If elevated concentrations are discovered, a limited human health risk assessment should be completed to further evaluate whether a possible human health risk is present. If necessary, future buildings could be constructed with engineering controls to limit vapor intrusion.

- Soil samples should be collected beneath the railroad spurs to assess whether elevated concentrations of petroleum hydrocarbons and PNAs are present.

- Prior to demolition of the on-site structure, a comprehensive Hazardous Building Material Survey should be conducted to assess the extent and quantity of hazardous building materials. If present, these materials should be removed from the building prior to demolition.

1 INTRODUCTION

Ardent Environmental Group, Inc. (Ardent) was retained by Richards Watson & Gershon, on behalf of their client, Industry Urban-Development Agency (Agency) to perform a Phase I Environmental Site Assessment (ESA) and Document Review for the property located at 151 Long Lane in the City of Industry, California ("site" or "subject property"; Figure 1). Work was conducted in general accordance with the contract dated August 12, 2010, between Richards Watson & Gershon and Ardent. As discussed below, the site was formerly part of a larger property that included the parcel immediately northeast of the site (referred to herein as the "larger property"). In approximately 2006, the adjacent parcel was segregated from the site and redeveloped as a commercial building. It is our understanding that the Agency is considering purchasing the property, razing the on-site structures, and preparing the site for redevelopment. The following sections identify the purpose, the involved parties, the scope of work, and the limitations and exceptions associated with the Phase I ESA.

1.1 Purpose of Phase I ESA

In accordance with the American Society for Testing and Materials (ASTM) E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard E 1527-05), the objective of the Phase I ESA was to identify, to the extent feasible pursuant to ASTM Standard E 1527-05, recognized environmental conditions (RECs), which are defined by ASTM as "the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property."

As part of this Phase I ESA, Ardent also assessed whether a vapor encroachment condition (VEC) exists at the site. The study was completed following the ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM Standard E 2600-10). The objective of this work was to evaluate whether possible

contaminants (e.g. volatile organic compounds [VOCs]) were present in soil and/or groundwater in the site vicinity which might pose a possible vapor intrusion into existing or future buildings at the site.

The United States Environmental Protection Agency (EPA) has stated that ASTM Standard E 1527-05, is consistent with the Standards and Practices for All Appropriate Inquires (AAI), Final Rule (40 Code of Federal Regulations [CFR], Part 312) and is compliant with the statutory criteria for all appropriate inquires. All appropriate inquires, as defined in the AAI Final Rule, must be conducted by persons seeking the landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) prior to acquiring a property or seeking or receiving federal Brownfields grants under the authorities of CERCLA. The purpose of AAI, as defined in the AAI Final Rule, was to identify releases and threatened releases of hazardous substances which cause or threaten to cause the incurrence of response costs.

1.2 Involved Parties

Mr. Paul Roberts and Ms. Connie Lizarraga of Ardent conducted the historical research, site reconnaissance, regulatory inquiries, and document review. Mr. Roberts meets the definition of an *environmental professional* as set forth in the AAI Final Rule.

1.3 Scope of Work

Ardent's scope of work for this Phase I ESA is consistent with ASTM Standard E1527-05 and included the activities listed below.

- **Review of User Provided Information** – Review of information regarding title and judicial records for environmental liens or activity and use limitations, recorded environmental liens, actual or specialized knowledge or commonly known information regarding environmental conditions at the site, the relationship of the purchase price of the property to the fair market value, readily available maps, environmental reports, and other environmental documents pertaining to the site, as available and obtained from the user/client.

- **Records Review** – Acquisition and review of records, including federal, state, tribal, and local regulatory agency databases, for the site and for properties located within a specified radius of the site; local regulatory agency files for the site and selected nearby properties of potential environmental concern; physical setting sources, including topographic maps, geologic maps, and geologic and hydrogeologic reference documents; and historic land use information including aerial photographs, historical fire insurance rate maps, building department records, and city directories, as necessary, that are reasonably ascertainable, publicly available, can be obtained within reasonable time and cost, and are practically reviewable.

- **Vapor Encroachment Condition (VEC)** – Review available regulatory and client provided data to assess Tier 1 non-numeric screening for the site. Ardent will evaluate whether contaminants are present in soil and/or groundwater in the site vicinity which might pose a VEC at the site.

- **Site Reconnaissance** – Performance of a site reconnaissance to visually observe the site and any structure(s) located on the site to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying RECs in connection with the site, including the general site setting, site usage, use and storage of hazardous materials and petroleum products, disposal of waste products and materials, sources of polychlorinated biphenyls (PCBs), and evidence of releases and possible risks of contamination from activities at adjacent properties.

- **Interviews** – Interviews with site representatives, including owners, occupants, and site managers, regarding the environmental condition of the site to the extent necessary and such persons are available. Interviews with state and/or local government officials as necessary.

- **Report** – Evaluation of the information and data obtained by the Phase I ESA process outlined above and preparation of this Phase I ESA report documenting findings and providing opinions and conclusions regarding possible environmental impacts and RECs at the site.

1.4 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard-of-care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ardent should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ardent has no control. Ardent cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5 Special Terms and Conditions

As indicated in Section 13.1.5 of ASTM Standard E 1527-05, the following, which is not intended to be all inclusive, represents out-of-scope items with respect to a Phase I ESA: asbestos-containing materials (ACMs), radon, lead-based paint (LBP), lead in drinking water, wetlands, regulatory compliance, cultural and historic risk, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, and mold. As part of our agreement with the client, Ardent visually assessed site buildings (if present) for possible ACMs, LBP, and mold. In addition, ASTM Standard E 2600-10 supplements the ASTM Standard E 1527-05 to include evaluation of VEC using Tier 1 screening.

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, Ardent did not address interpretations of zoning regulations, building code requirements, or property title issues.

1.6 User Reliance

This report, and the information, data, and the conclusions contained herein regarding the environmental condition of the site may be relied upon by the Industry Urban-Development Agency, the City of Industry (the "City") and their successors, and their respective program managers, attorneys, consultants, and appraisers of the site, as well as the designed developer of the site, and may be submitted and relied upon by: 1) the Regional Water Quality Control Board, Los Angeles Region (RWQCB), 2) the EPA, 3) the County of Los Angeles, 4) the City, 5) the Department of Toxic Substances Control (DTSC), and 6) other state, federal, and local governmental agencies and entities, as part of their evaluation of the risk associated with the development or use of the site, and for the purpose of assessing the environmental condition of the site, issuing permits, licenses, and other authorizations to develop the site, and determining whether further environmental review or study is necessary, and that the Industry Urban-Development Agency, the City and Richards Watson & Gershon, and, ultimately, the designed developer of the site can conduct construction and related activities on and develop the site.

1.7 Physical Limitations

During the site reconnaissance, a roll-off storage bin was located on the northwestern side of the property. The bin was locked and the site representative did not have the key. According to the site representative, the bin contained tools. No hazardous materials or wastes were reportedly located within the storage bin. Based on our professional opinion, the lack of access into the storage bin would not be considered a data gap.

1.8 Data Gaps

No significant data gaps were noted during the preparation of this Phase I ESA report.

2 GENERAL SITE CHARACTERISTICS

The following sections describe the location and the current uses of the site. The uses of adjacent properties are also described.

2.1 Location and Legal Description

The site is located at 151 Long Lane in the City of Industry, Los Angeles County, California (Figure 1). The site is located on the northwest side of Long Lane, approximately 350 feet southwest of the intersection of Nelson Avenue and Long Lane (Figure 2). As previously discussed, the site was historically part of a larger property that included the parcel immediately northeast of the site. During this time, the former occupants (a lumber yard) were issued the address 14166 Nelson Avenue. During this assessment, Ardent inquired with regulatory agencies using both the historical (14166 Nelson Avenue) and current (151 Long Lane) addresses.

The site comprises approximately 1.80-acre and has been assigned the Tax Assessor's Parcel Number (APN) 8202-033-015. A legal description of the site is presented in the Preliminary Title Report in Appendix C.

2.2 Site Description and Current Site Uses/Operations

The following paragraphs present a description of the structures present at the site, the tenants currently occupying the site, the activities being conducted on-site, the heating and cooling systems utilized in the site building, the sewage disposal system, and the potable water provider for the site, if any.

2.2.1 Site Description and Current Occupants

The site is a generally rectangular-shaped property that comprises approximately 1.80-acres. The site is currently used as a parking lot to temporarily store semi-truck trailers. A wooden canopy, roll-off storage bin, two portable restrooms, and a security office trailer occupy the site (Figure 2).

2.2.2 Heating and Cooling Systems

Heating or cooling systems do not exist at the site. Southern California Gas Company and Southern California Edison Company supply natural gas and electricity, respectively, to properties in the City of Industry.

2.2.3 Sewage Disposal/Septic Systems

Currently, the site is not connected to the municipal sewer system. Two portable restrooms are used at the site. There has been no indication that septic systems have been used at the site.

2.2.4 Potable Water

Currently, potable water is not available to the site. Potable water is provided to the City of Industry by six different water purveyors, including San Gabriel Valley Water, Suburban Water Systems, Rowland Water Systems, La Puente Valley Water District, City of Industry Water Works, and the Walnut Valley Water District. No water supply wells were noted at the subject property.

2.3 Adjacent Properties

In general, the site vicinity is occupied by industrial/commercial and residential properties. Following division of the site, the property immediately northeast of the site was redeveloped with a commercial building. Although the building is currently occupied, there was no labeling on the building indicating the business occupying the property. This property now uses the address 251 Long Lane (formerly 14166 Nelson Avenue). Further north and northeast are residences and the Hacienda La Puente Adult Education center.

Southwest of the site is the Commercial Lumber and Pallet Company, which uses the property to construct pallets Northwest of the site is Brighton Inc., a company that manufactures women's accessories, fur, and leather goods. Immediately southeast of the site and beyond Long Lane is Fresh Point, a food service distributor.

No 55-gallon drums, aboveground storage tanks (ASTs), evidence of underground storage tanks (USTs), or possible hazardous materials or wastes were noted being stored by these off-site facilities along the property line with the site. Based on the information obtained during this assessment and as presented herein, these off site facilities would not be considered an environmental concern to the site.

3 USER PROVIDED INFORMATION

The following sections summarize information provided by the user to assist the environmental professional in identifying the possibility of RECs in connection with the subject property, and to fulfill the user's responsibilities in accordance with Section 6 of ASTM Standard E 1527-05. A copy of the user questionnaire as completed by Mr. Kevin Radecki of the Agency is presented in Appendix B.

3.1 Current Title Information

A Preliminary Title Report for the site was provided by the client to Ardent for review. The title report was prepared by First American Title Insurance Company and dated August 16, 2010. According to the Preliminary Title Report, the current owner of the site is "Richard G. Lapin" A copy of the Preliminary Title Report is provided in Appendix C.

3.2 Environmental Liens or Activity and Use Limitations

Our review of the preliminary title report did not reveal records of environmental liens or activity and use limitations (AULs) associated with the subject property. In addition, Mr. Radecki was not aware of any environmental liens or AULs against the subject property that are filed or recorded under federal, state, or local law.

3.3 Specialized Knowledge

Mr. Radecki indicated that, for purposes of this assessment, the client has no specialized knowledge or experience pertaining to the site or the adjacent properties that is material to RECs in connection with the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information pertaining to the site that is material to RECs in connection with the subject property was noted by Ardent, or communicated to us in writing, in person, or during phone conversations for purposes of this assessment.

3.5 Valuation Reduction for Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to fair market value of the property if the property was not affected by hazardous substances or petroleum products. Mr. Radecki indicated the purchase price reflects fair market value.

3.6 Reason for Performing Phase I ESA

Ardent was retained by Richard Watson & Gershon, on behalf of their client, the Agency, to perform the Phase I ESA as part of the real estate due diligence activities.

3.7 Other User Provided Information

No other information regarding the site was provided to Ardent.

4 PHYSICAL SETTING

The following sections include discussions of topographic, geologic, and hydrogeologic conditions in the vicinity of the site based upon Ardent's document review and our visual reconnaissance of the site and adjacent areas.

4.1 Site Topography

The site is generally flat with a gentle slope to the northwest. Based on the review of the United States Geological Survey (USGS) 7.5 Minute Series, Baldwin Park, California, Topographic Quadrangle Map, dated 1981 and photorevised from 1966, the site has an approximate elevation of 296 feet above mean seal level (MSL).

4.2 Geology

The site is located in the Transverse Ranges Province. The backbone of the province, in its central and eastern parts is formed by the San Gabriel and San Bernardino Mountains. The province extends eastward about 275 miles from Point Arguello into the Mojave Desert. The site is more specifically located in the southeastern San Gabriel Valley. Native soils in the vicinity of the site have been observed to consist of interbedded silts, silty clays, and silty sands.

4.3 Site Hydrology

The following sections discuss the site hydrology in terms of both surface waters and groundwater.

4.3.1 Surface Waters

Surface water runoff from the subject property is via sheet flow to the curb and gutter system at Long Lane. Surface water runoff in the site vicinity generally follows surface topography toward the northwest. No natural surface water bodies, including ponds, streams, or other bodies of water are present on or adjacent to the site. The nearest surface water body is Puente Creek located approximately 1-mile southwest of the site.

4.3.2 Groundwater

No groundwater information (such as depth and direction of flow) was available for the site in regulatory agency files. To obtain additional information, Ardent reviewed the State Water Resources Control Board (SWRCB) GeoTracker website for groundwater information on properties in the site vicinity. Groundwater information was available on the GeoTracker website for a facility located approximately 0.5-mile west northwest of the site. Based on regional groundwater information available on the GeoTracker website, the depth to groundwater at the site is expected to be approximately 45 to 55 feet below ground surface (bgs). Groundwater in the site vicinity flows to the northwest.

The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the National Priority List (NPL), or Superfund Site. The site is located within the Puente Valley Operable Unit of the San Gabriel Valley Groundwater Basin. Portions of the Puente Valley Operable Unit are contaminated with VOCs, namely the chlorinated solvents trichloroethene (TCE) and tetrachloroethylene (PCE), which were historically used by the commercial and industrial facilities located in this area. Based on our review of groundwater plume maps provided by the EPA, groundwater beneath the site has been impacted with chlorinated solvents. Based on information obtained during this assessment, there is a low likelihood that chlorinated solvents have been used at the site. In addition, the site has not been listed on the EPA database as a Responsible Party (RP).

5 HISTORICAL LAND USE

Ardent conducted a historical land use record search for the site and surrounding areas. This included a review of one or more of the following sources that were found to be both reasonably ascertainable and useful for the purposes of this Phase I ESA: historical aerial photographs, historical fire insurance maps, historical city directories, building permits and plans, topographic maps, property tax records, and zoning/land use records.

5.1 Summary of Historical Land Use of the Property

From at least 1928 through the late 1960s, the site vicinity was used for agricultural purposes or vacant land. From at least 1972 to approximately 2005, the site was part of a larger property that was located immediately northeast of the site. During this time, the larger property was used as a lumber yard; the site was used for milling. In approximately 2006, the northeastern portion of the larger property was segregated from the site and redeveloped as a commercial building. The site was used from at least 2007 as a semi-truck maintenance facility and as a parking lot to temporarily store trailers for semi-trucks. At the time of this

assessment, the site was being used as a parking lot for semi-truck trailers (no maintenance was being completed). One small canopy structure was located on-site.

5.2 Summary of Historical Land Use of Adjoining Properties

From approximately 1928 through 1952, the site vicinity was used for agricultural purposes. From 1968 to 1977 a few scattered commercial buildings and/or warehouses were constructed in the site vicinity and residential properties were constructed further northeast of the site. By 1990, most of the site vicinity appeared to have been developed for industrial/commercial and residential purposes. By 2002, the site vicinity appeared fully developed as it exists today.

5.3 Historical Aerial Photographs

Historical aerial photographs for selected years between 1928 and 2005 were provided by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. A 2010 photograph was provided by the Google Earth website. The following presents a summary of our review.

- **1928, 1938, 1949, and 1952** – The site and adjacent properties appeared to be used for agricultural purposes. The existing railroad tracks were present southwest of the site. Small structures, possibly farm residences appeared sparsely throughout the site vicinity with a notable increase southwest of the site by 1952.

- **1968** – The larger property, the property located immediately southwest of the site, and the property located immediately southeast of the site were vacant land. Long Lane had not yet been constructed. Properties further northeast of the site appeared to be fully developed for residential purposes.

- **1977** – The site appeared developed with several structures as part of an adjacent lumber yard located northeast of the site. Surrounding properties appeared developed for industrial/commercial purposes while some vacant land remained sparsely located throughout the site vicinity.

- **1990, 1994, 2002, and 2005** - The site remained similar to the 1977 aerial photograph. Properties in the surrounding site vicinity appeared fully developed for industrial/commercial purposes and residential purposes.

- **2010** – The site appeared to be used as a parking lot to store semi-trailer trucks. One remaining structure, the existing canopy, was noted on the northwestern side of the property. Adjacent properties to the northeast appeared redeveloped with a new industrial/commercial building. The surrounding properties remained similar to earlier photographs.

5.4 Historical Topographic Maps

Ardent obtained historical topographical maps for the site and site vicinity from EDR. The maps were dated 1901, 1904, 1912, 1927, 1953, 1966, 1972, and 1981. The maps dated 1901, 1904, and 1912 had large scales and did not show site specific details. In the 1927, 1953, and 1966 maps, the site appeared to be vacant. In the 1966 map, properties northeast of the site were designated as urban development. In the 1972 and 1981 maps, the site appeared developed with two buildings possibly associated with the former lumber yard. The site vicinity appeared similar to that observed in historical aerial photographs.

5.5 Land Title Records

The client provided Ardent with a Preliminary Title Report prepared by First American Title Insurance Company dated August 16, 2010. According to the report, no environmental liens, land use restrictions, or other possible environmental issues were noted.

5.6 Fire Insurance Rate Maps

Ardent requested fire insurance maps (Sanborn Fire Insurance Maps) from EDR. According to EDR, no maps were available for the site.

5.7 Building Permits

Building permits for the site were reviewed at the Los Angeles County Department of Building and Safety in La Puente, California. Ardent reviewed building permits for 151 Long Lane and the historical address of the larger property (14166 Nelson Avenue).

Building permits for 151 Long Lane were dated from 1990 through 2005 and included miscellaneous electric, plumbing, fire sprinklers, and mechanical permits associated with the

former lumber yard located at the property. An air quality permit checklist dated August 17, 2004 for non-residential permits provided by the South Coast Air Quality Management District (SCAQMD) indicated that no air quality permit was necessary. No other permits of environmental concern were noted in the file.

Building permits regarding historical address 14166 Nelson Avenue included office addition plans for Mercury Hardwood dated 1972. No other permits were noted in the file.

5.8 City Directories

Ardent requested historical city directories from EDR for the site and site vicinity. Selected city directories dated 1972 through 2008 were reviewed for the site and properties in the site vicinity. A copy of the city directory report is provided in Appendix C. The site (151 Long Lane) was listed as Accurate Planning Mill, High Sierra Lumber, and Boyce Forest Product from 1972 through 1990. The site was not listed in 1994, 2000, and 2008. Properties in the site vicinity along Long Lane were listed as a lumber and pallet company from 1980 through 2008 and as a Panel Tex company. These finding coincide with the site reconnaissance and our review of other historical data.

5.9 Oil and Gas Maps

Based on a review of the Division of Oil, Gas, and Geothermal Resources (DOGGR) Regional Wildcat Map W1-5, the site does not lie adjacent to or in an active oil filed and no oil wells have been drilled on the site or in the immediate site vicinity.

5.10 Interviews

Interviews were conducted by Ardent with key site personnel (e.g., past and present owners, operators, and/or occupants), with the objective of obtaining information indicating RECs in connection with the subject property. The following are the site personnel interviewed for purposes of this assessment, and a summary of their comments with regards to site conditions.

5.10.1 Interview with Owner

The owner of the site was not available for interview.

5.10.2 Interview with Site Manager

Mr. Kent Valley and Mr. Terry Baker of Majestic Realty were available to interview. Results of these interviews are presented throughout this report.

5.10.3 Interviews with Occupant

A representative of the property owner was present during the site reconnaissance. The individual would not provide his name, but indicated that the property owner allowed trucks to park on his land.

5.10.4 Interviews with Local Government Officials

Local government officials were interviewed. Results of these interviews are presented throughout this report.

5.10.5 Interviews with Others

No other interviews were conducted.

5.11 Previous Reports and Documents

As presented in Section 3.7, the client did not provide previous reports or documents. However, some environmental reports were available in regulatory files. These reports are summarized herein.

6 SITE RECONNAISSANCE

On August 25, 2010, Ms. Connie Lizarraga of Ardent conducted a site reconnaissance. Mr. Kent Valley and Mr. Terry Baker of Majestic Realty provided site access; a site attendant was also present, although he did not provide Ardent with his name. The reconnaissance involved a walking tour of the site and visual observations of adjoining properties. At the time of the site reconnaissance, the site was being used as a parking lot to store semi-trailer trucks. The site atten-

dant indicated truck maintenance was not conducted at the property. A canopy used for parking and storage purposes was located on the northwestern side of the property. Based on historical aerial photographs, this canopy was initially constructed at the time the site was used as a lumber yard. A roll-off storage bin reportedly used to store tools was located on the northwestern side of the property. A security office trailer was located near the site entrance on the southeastern side of the property. At the time of the site reconnaissance, the weather was sunny and clear. Selected photographs taken during the site reconnaissance are included in Appendix A.

6.1 Use and Storage of Hazardous Substances and Petroleum Products

No use or storage of hazardous substances or petroleum products was noted at the site. The site attendant indicated that no truck maintenance is conducted at the site however, various empty oil cans were observed along the northwestern property line.

6.2 Storage and Disposal of Hazardous Wastes

No storage or disposal of hazardous wastes was noted at the site.

6.3 Unidentified Substance Containers

No unidentified containers were noted at the site.

6.4 Aboveground and Underground Storage Tanks (ASTs and USTs)

No ASTs or evidence of USTs (e.g., fill pipes, vent pipes, and emergency power generators) were observed on or adjacent to the boundaries of the site. Mr. Valley indicated that he was not aware of any ASTs or USTs at the site.

6.5 Evidence of Releases

Evidence of chemical releases on the site, such as odors, stressed vegetation, stains, leaks, pools of liquids, and spills, was not observed during the site reconnaissance.

6.6 Polychlorinated Biphenyls (PCBs)

Historically, PCBs (a group of hazardous substances and suspected human carcinogens) were widely used as an additive in cooling oils for electrical components. Typical sources of PCBs can include electrical transformers. No electrical transformers were observed at the site.

6.7 Suspect Asbestos Containing Materials (ACMs)

The manufacture of most ACMs was phased out in the 1970s, ending in 1980. Previously manufactured ACMs that were in stock continued to be used through approximately 1981. Some non-friable ACMs are still manufactured (e.g. roofing mastics). In general, buildings constructed after 1981 have a negligible potential to contain friable ACMs and a low potential for most non-friable ACMs, with the exception of roofing materials. Based on the age of the canopy (early 1970s), friable ACMs are likely present.

6.8 Suspect Lead-Based Paint (LBP)

The manufacture of LBP was phased out in approximately 1978. In general, buildings or structures constructed after 1980 have a negligible potential to contain LBP. Based on the date of construction of the existing canopy (early 1970s), LBP was likely used. During the site reconnaissance, peeling paint was noted on the canopy.

6.9 Wastewater Systems

No wastewater systems were noted at the site.

6.10 Storm Water Systems

Storm water generally flows via sheet flow to the curb and gutter system on Long Lane. No drywells or catch basins were observed on or adjacent to the site.

6.11 Wells

Wells, such as water supply or groundwater monitoring wells, were not observed at the site.

6.12 Water Damage or Mold Growth

No visual indications of water damage or mold growth were observed on the canopy.

6.13 Other Issues

Two short railroad spurs are located on the western portion of the site. It has been our experience that ballast materials beneath railroad spurs sometimes contain petroleum hydrocarbons and Polynuclear Aromatics (PNAs). No other on- or off-site issues of environmental concern were noted in the site vicinity.

7 ENVIRONMENTAL DATABASE SEARCH

A computerized environmental information database search was performed by EDR for this Phase I ESA on August 17, 2010. The database search included federal, state, local, and tribal databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted facilities of environmental concern is presented in Appendix D. In addition, a description of the assumptions and approach to the database search is provided in Appendix D. The review was conducted to evaluate whether the site or properties within the vicinity of the site have been reported as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

Nineteen unmapped properties were identified in the database report due to poor or inadequate address information. However, based on the information provided for these properties, and/or the types of databases on which the properties are listed, there is a low likelihood that the environmental integrity of the site has been adversely impacted by these off-site sources.

The following paragraphs describe the databases that contain noted properties of environmental concern, and include a discussion of the regulatory status of the facilities and potential environmental impact to the subject site.

7.1 Federal National Priorities List (NPL): Distance Searched – 1 mile

The NPL is the USEPA's database of uncontrolled or abandoned hazardous waste properties identified for priority remedial actions under the Superfund program. This database includes proposed NPL listings.

The site was not listed on this database. The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the NPL, or Superfund Site. The site is located within the Puente Valley Operable Unit of the San Gabriel Valley Groundwater Basin. Portions of the Puente Valley Operable Unit are contaminated with VOCs, namely the chlorinated solvents TCE and PCE, which were historically used by commercial and industrial facilities located in this area. Based on our review of groundwater plume maps provided by the EPA, groundwater beneath the site has been impacted with chlorinated solvents. Based on information obtained during this assessment, there is a low likelihood that chlorinated solvents have been used at the site. In addition, the site has not been listed on the EPA database as an RP.

7.2 Federal Delisted NPL: Distance Searched – 1 mile

This database contains delisted NPL properties under the Superfund program. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the USEPA uses to delist properties from the NPL. In accordance with 40 Code of Federal Regulations (CFR) 300.425. (e), properties may be delisted from the NPL where no further response is appropriate.

Neither the site nor properties located within a 1-mile radius from the site were listed on this database.

7.3 Federal NPL Liens: Distance Searched – Site

This list identifies properties that have liens filed against real property by the EPA in order to recover remediation action expenditures.

The site was not listed on this database.

7.4 Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List: Distance Searched – 0.5 mile

The CERCLIS database contains properties which are either proposed or on the NPL and properties which are in the screening and assessment phase for possible inclusion on the NPL. This database also includes properties listed as No Further Remedial Action Planned (NFRAP).

The site was not listed on this database. The San Gabriel Valley Groundwater Basin was listed on this database. As discussed in Section 7.1, the site lies within the Puente Valley Operable Unit of the San Gabriel Valley Basin.

7.5 Federal Corrective Action Report (CORRACTS): Distance Searched – 1 mile

The USEPA maintains this database of Resource Conservation and Recovery Act (RCRA) facilities that are undergoing corrective action. A corrective action order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.

Neither the site nor properties located within a 1-mile radius from the site were listed on this database.

7.6 Federal Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities List: Distance Searched – 0.5 mile

The RCRA TSD database (non-CORRACTS) is a compilation by the EPA facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste.

Neither the site nor properties located within a 0.5-mile radius were listed on this database.

7.7 Federal RCRA Generators List: Distance Searched – Site and Adjoining Properties

This list identifies sites that generate hazardous waste as defined by RCRA. Inclusion on this list is for permitting purposes and is not indicative of a release.

Neither the site nor adjoining properties were listed on this database.

7.8 Federal Institutional Control/Engineering Control Registries: Distance Searched – Site

These lists identify properties with engineering and/or institutional controls. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on the site. Deed restrictions are generally required as part of the institutional controls.

The site was not listed on this database.

7.9 Federal Emergency Response Notification System (ERNS) List: Distance Searched – Site

The ERNS database, maintained by the USEPA, contains information on reported releases of oil and hazardous substances.

The site was not listed on this database.

7.10 Federal Brownfield List: Distance Searched – 0.5 mile

The USEPA Brownfield database, entitled Targeted Brownfield's Assessments (TBA), lists properties for which the USEPA is providing funding and/or technical support for environmental assessments and investigations. The objective of the TBA is to promote cleanup and redevelopment of undesirable properties with environmental issues.

Neither the site nor properties located within a 0.5-mile radius from the site were listed on this database.

7.11 Federal Toxic Release Inventory Database (TRIS): Distance Searched – Site

The Community Right to Know Act (SARA Title III) required the USEPA to establish this inventory of toxic chemical emissions from certain facilities.

The site was not listed on this database.

7.12 State Calsites Database (Calsites) or State-Equivalent CERCLIS: Distance Searched – 1 mile

The Calsites database, also known as the State-equivalent CERCLIS, is maintained by the Cal-EPA, DTSC. This database contains information on AWP and both known and potentially contaminated properties. Two-thirds of these properties have been classified, based on available information, as needing NFA by the DTSC. The remaining properties are in various stages of review and remediation to determine if a problem exists. These properties are presented by EDR on the Historical Cal-Sites database and the Envirostor databases.

The site was not listed on these databases. No facilities were listed on the Calsites database. Three facilities located between 0.43-mile and 0.61-mile hydraulically cross and downgradient from the site were listed on the Envirostor database. Based on the distance and direction of the facilities from the site, these facilities would not be considered an environmental concern to the site.

7.13 State Solid Waste Landfill Sites (SWLF): Distance Searched – 0.5 mile

The SWLF database consists of open and closed solid waste disposal facilities and transfer stations. The data comes from the Integrated Waste Management Board's Solid Waste Information System (SWIS) and the State Water Resources Control Board's (SWRCB) Waste Management Unit Database (WMUD) database.

The site was not listed on this database. One facility located approximately 0.26-mile west and hydraulically crossgradient from the site was listed twice on this database. Based on the distance and direction of groundwater flow, this facility would not be considered an environmental concern to the site.

7.14 State Leaking Underground Storage Tank (LUST) Lists: Distance Searched – 0.5 mile

The EDR database of LUST information system is obtained from by the SWRCB and the RWQCB. Ardent also reviewed the SWRCB GeoTracker website.

The site was not listed, although the larger property was listed on this database at 14166 Nelson Avenue (Mercury Hardwood). As noted in Section 9.5, the LACDPW maintained a file regarding this release. Based on our review, a former gasoline UST was located on the adjacent property. The UST and impacted soils were removed in 1989, and further investigations were completed in 1992. Based on the results, the LACDPW issued a No Further Action (NFA) letter dated December 14, 1992. Ardent reviewed these files and concurs with the LACDPW that no further work is necessary. Based on the distance of the former UST from the site (approximately 150 feet northeast) and the mitigation measures completed, there is a low likelihood, that residual contaminants would be considered an environmental concern to the site.

Six facilities located within a 0.5-mile radius from the site were listed. Five of the six facilities were listed as closed cases with the regulating agency. The remaining facility was listed as an open case approximately 0.26-mile west of and hydraulically crossgradient from the site. Based on the distance, direction, and/or regulatory status, these facilities would not be considered an environmental concern to the site.

7.15 State Index of Properties with Hazardous Waste – CORTESE List: Distance Searched – 1 mile

The CORTESE database is provided by Cal-EPA and is a state index that identifies potential and confirmed hazardous waste sites throughout California.

Neither the site nor facilities located within 1-mile from the site were listed on this database.

7.16 State Underground Storage Tank (UST) and Aboveground Storage Tank (AST) Registration List: Distance Searched – Site and Adjoining Properties

UST and AST databases are provided by the SWRCB. Inclusion on these lists is for permitting purposes and is not indicative of a release.

Neither the site nor adjoining properties were listed on either database.

7.17 State Brownfield List and State Institutional Control/Engineering Control Registries: Distance Searched – 0.5 mile

The DTSC maintains the Site Mitigation and Brownfields Reuse Program (SMBRP) that lists properties that are undergoing cleanup with DTSC oversight (see State Deed Restriction Listing in EDR report). The database includes properties with one or more deed restrictions, and therefore, includes institutional and engineering control registries.

Neither the site nor properties located within a 0.5-mile radius from the site were listed on this database.

7.18 State Voluntary Cleanup Programs (VCPs): Distance Searched – 0.5 mile

The State VCP database lists low threat level properties with either confirmed or unconfirmed releases. Project proponents have requested that the DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Neither the site nor properties located within a 0.5-mile radius from the site were listed on this database.

7.19 Indian Reservations: Distance Searched – 1 mile

This list depicts Indian administered lands of the United States that have an area equal to or greater than 640 acres. No Indian Reservations or Indian controlled land was listed within a 1-mile radius from the Property. Due to the lack of Indian Reservations with 1-mile of the Property, other tribal database listings required by ASTM and AAI were deemed not applicable. These listings would include tribal-equivalent NPL, CERCLIS, Landfill and/or Solid

Waste Disposal, LUST, UST and AST Registrations, Institutional Control/Engineering Control Registries, VCPs, and Brownfields.

7.20 Other Non-ASTM and AAI Database: Distance Searched – Site

Other databases are readily available, but are not required by ASTM or AAI. The current and historical addresses were listed on the following databases. Based on our review, it appears that the Agency purchased the northeastern portion of the larger property in approximately 2006. During demolition and clearing of the buildings, wastes such as oil mixtures and asbestos were discovered and/or generated.

7.20.1 National Pollutant Discharge Elimination System (NPDES)

As authorized by the Clean Water Act, the NPDES permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States.

According to the information provided by EDR, the site was listed twice. The first listing was in 1993 under the name "Lane Stanton Vance Lumber Company" for industrial storm water discharge. This permit was issued to evaluate stormwater runoff from the site. In 2007, the Agency was issued an NPDES permit (under the name "City of Industry/ Urban Development") during construction/demolition activities.

7.20.2 California Waste Discharge System (CA WDS)

The CA WDS database is maintained by the SWRCB and lists facilities that discharge liquids under the Waste Discharge Requirements.

The site was listed as "L&K Land Company" using the historical address (14166 Nelson Avenue) and the current address (151 Long Lane). The site was listed as an active industrial facility with continuous or seasonal discharge that is under waste discharge requirements. No other information was provided. It appears that L&K Land Company may have been the developer retained to construct the new commercial building located immediately northeast of the site.

7.20.3 HAZNET

HAZNET is a database containing information extracted from the copies of hazardous waste manifests received each year by the Department of Toxic Substances Control (DTSC).

The Agency was listed on the HAZNET database. Waste category information included three different events for waste and mixed oil, other organic solids, and asbestos containing waste. No other information was provided. These materials were likely discovered and/or generated during demolition activities associated with the adjacent property.

8 VAPOR ENCROACHMENT CONDITION (VEC)

Ardent completed a VEC study for the site using Tier 1 criteria as recommended by ASTM E 2600-10. The Tier 1 screening identifies surrounding facilities that pose a possible vapor intrusion source to the site based on the results of the Phase I ESA investigations and certain criteria outlined by ASTM. These criteria include a certain distance from the target site (referred to by ASTM as within the "area of concern"); the types of chemicals used (referred to by ASTM as the "chemicals of concern"); and a plume test to determine if the plume associated with a source of contamination is close enough to the site to impact indoor air quality. Based on our review of regulatory records, files, databases, and/or client furnished data and reports, one source meets the ASTM criteria; the Puente Valley Operable Unit of the San Gabriel Valley Groundwater Basin. As noted herein, the Puente Valley Operable Unit is a well defined groundwater plume of chlorinated solvents. Based on plume maps provided by the EPA, the VOC plume associated with this Operable Unit is located within the site boundary (Figure 3). Based on our review of groundwater contamination plume maps and current regulatory standards, there is a possibility that residual contaminants in groundwater beneath the site may pose a threat to human health of future occupants of the property through vapor intrusion into on-site buildings. Based on this information, Ardent recommends completing a soil gas survey to assess whether engineering vapor controls are necessary for future buildings.

9 REGULATORY RECORDS REVIEW

The Los Angeles County Sanitation District (LACD), Los Angeles County Department of Public Health (LACDPH), Los Angeles County Fire Department (LACFD), RWQCB, SCAQMD, LACDPW, and the DTSC are the lead regulatory agencies for permitting and regulating USTs, ASTs, LUST cases, and facilities that use, store, or generate hazardous waste or hazardous materials. Ardent requested information regarding possible files for the site using both current and historical site addresses. Pertinent documents are provided in Appendix E.

9.1 Los Angeles County Fire Department (LACFD) and Los Angeles County Department of Public Services (LACPH)

Records regarding the site were requested from the LACPH. According to the LACPH, records exist for the existing site address. Records reviewed included a Department of Health Services Contingency Plan for "Lazaro Trucking" dated January 5, 2009. The plan indicated waste oil generated during truck maintenance would be stored in 55-gallon drums. Two violations dated March and April 2009 included unlabeled waste oil and diesel drums. No other pertinent information was provided in the file. According to the LACPH, no files exist for 14166 Nelson Avenue or 251 Long Lane.

9.2 Regional Water Quality Control Board, Los Angeles Region (RWQCB)

Records regarding the site were requested from the RWQCB. According to the RWQCB, no records exist for the site. According to the SWQCB Geotracker website, the larger property at 14166 Nelson Avenue was listed as a closed case. No other information was provided.

9.3 South Coast Air Quality Management District (SCAQMD)

SCAQMD permit records for the site were reviewed online using the Facility Information Detail (FIND) search tool on the SCAQMD's website. According to the SCAQMD, no files exist for the site.

9.4 Los Angeles County Sanitation District (LACSD)

Records regarding the site were requested from the LACSD. According to the LACSD, no records exist for the site.

9.5 Los Angeles County Department of Public Works, Environmental Programs (LACDPW)

Records regarding the site were requested from the LACDPW using both historical and current addresses. According to the LACDPW, records regarding the current site address were not available. As previously discussed, the site was historically part of a larger property that included the parcel immediately northeast of the site. During this time, the former occupants (a lumber yard) were issued the address 14166 Nelson Avenue. Records regarding 14166 Nelson Avenue were available for review.

Reports regarding a former 2,000-gallon gasoline UST were reviewed. Based on scaled maps provided in the reports, the former UST was located off-site on the northeastern property formerly part of the site (approximately 150 feet northeast of the site). The UST was removed from the facility on July 10, 1989. At the time of removal, samples were collected beneath the former UST and dispenser unit. Laboratory results indicated elevated concentrations of total petroleum hydrocarbons (TPH) and benzene, toluene, ethylbenzene, and xylenes (BTEX) in the soil. On August 2, 1989, August 16, 1989, and October 24, 1989, approximately 70 cubic yards of contaminated soil beneath the former UST and dispenser unit was excavated and removed from the property. Confirmation samples taken along the walls of the excavation indicated no detectable concentrations of TPH. On November 9, 1992, at the request of the LACDPW, eight confirmation borings were drilled in the vicinity of the excavation. Laboratory results indicated no detectable concentrations of BTEX in the soil. Based on this information, the LACDPW issued a NFA letter dated December 14, 1992. Based on our review of the available reports, Ardent concurs with the LACDPW that no further work is necessary. Based on these results and the distance of this former feature from the site, there is a low likelihood that residual contaminants would environmentally impact

the site. Copies of the environmental reports regarding the off-site release are provided in Appendix E.

9.6 Department of Toxic Substances Control (DTSC)

According to the DTSC's Envirostor website, the site is not listed.

10 FINDINGS, OPINIONS, AND CONCLUSIONS

Based upon the results of this Phase I ESA, the following findings, opinions, and conclusions are provided.

10.1 Findings and Opinions

The following presents a summary of findings and opinions associated with the Phase I ESA for the subject site, including known or suspect RECs, historical RECs, and de minimus environmental conditions (i.e., conditions that generally do not present a material risk of harm to public health or the environment).

- From at least 1928 through the late 1960s, the site vicinity was used for agricultural purposes or vacant land. From at least 1972 to approximately 2005, the site was part of a larger property that was located immediately northeast of the site. During this time, the larger property was used as a lumber yard; the site was used for milling. In approximately 2006, the northeastern portion of the larger property was segregated from the site and redeveloped as a commercial building. The site was used from at least 2007 as a semi-truck maintenance facility and as a parking lot to temporarily store trailers for semi-trucks. At the time of this assessment, the site was being used as a parking lot for semi-truck trailers (no maintenance was being completed). One small canopy structure was located on-site.

- Based on our review of regulatory agency files, little to no chemical uses were reported at the site during the time the property was occupied as a lumber yard. During the short period of time the site was occupied by a semi-truck maintenance business, small quantities of waste oil and diesel fuel were reportedly stored on the site in 55-gallon drums. The location of these drums was undocumented. No violations for dumping or mishandling chemicals were reported in regulatory files. Based on the small quantities and type of chemicals used, there is a low likelihood, in our opinion, that a significant release has occurred, and therefore, these former features would not be considered an environmental concern to the site.

- Depth to groundwater at the site is expected to be 45 to 55 feet bgs and flow in a northwesterly direction. The site is located within the San Gabriel Valley Groundwater Basin. Portions of the San Gabriel Valley Groundwater Basin have been listed on the NPL, or Superfund Site. The site is located within the Puente Valley Operable Unit of the San Gabriel Valley Groundwater Basin. Portions of the Puente Valley Operable Unit are impacted with VOCs, namely the chlorinated solvents TCE and PCE, which were historically used by the commercial and industrial facilities located in this area. Based on our review of groundwater plume maps provided by the EPA, groundwater beneath the site has been impacted with chlorinated solvents. Based on information obtained during this assessment, there is a low likelihood that chlorinated solvents have been used at the site. In addition, the site has not been listed on the EPA database as a RP.

- As part of this assessment, Ardent completed a Tier 1 screening study of vapor encroachment conditions related to the site. As noted above, groundwater beneath the site is possibly impacted with chlorinated solvents from the surrounding land uses. Due to the possible groundwater contamination beneath the site and based on the ASTM standards, the site would be considered a potential health risk to future occupants due to vapor intrusion.

- Two short railroad spurs are located on the western portion of the site. It has been our experience that ballast materials beneath railroad spurs sometimes contain petroleum hydrocarbons and Polynuclear Aromatics (PNAs). Based on this information, the railroad spurs would be considered an environmental concern to the site.

- Based on the date of construction (early 1970s) of the on-site structure, ACMs and LBP are likely present. During our site reconnaissance, peeling paint was noted on the on-site structure.

- No off-site environmental concerns were noted in the site vicinity.

10.2 Conclusions

Ardent has performed this Phase I ESA in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527-05, the ASTM Practice E 2600-10, and the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquires (AAI), Final Rule (40 CFR, Part 312), for the property located at 151 Long Lane in the City of Industry, California. Any limitations or exceptions encountered during completion of this report are stated in Section 1.4. No evidence or indication of RECs, or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property has been revealed, except

for the possible risk of vapor intrusion into future on-site buildings and the possible contaminants associated with the railroad spurs. Although not considered an REC in accordance with ASTM Standards, ACMs and LBP may be present in the on-site canopy.

10.3 Recommendations

Based on the findings of the Phase I ESA, Ardent recommends the following:

- A soil gas survey should be completed throughout the site to assess whether off-gassing from the regional groundwater VOC issue may threaten human health of future occupants due to possible vapor intrusion. The results should be compared to Cal-EPA's California Human Health Screening Levels (CHHSLs). If elevated concentrations are discovered, a Human Health Risk Assessment (HHRA) should be completed to further evaluate whether a possible human health risk is present. If necessary, any future buildings could be constructed with engineering controls to limit vapor intrusion.

- Soil samples should be collected beneath the railroad spurs to assess whether elevated concentrations of petroleum hydrocarbons and PNAs are present.

- Prior to demolition of the on-site canopy structure, a comprehensive Hazardous Building Material Survey should be conducted to assess the extent and quantity of hazardous building materials. If present, these materials should be removed from the building prior to demolition.

11 QUALIFICATIONS STATEMENT AND SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

Mr. Paul Roberts states that the Phase I ESA was performed under his direct supervision, and that he has reviewed and approved the report, and the methods and procedures employed in the development of the report conform to the minimum industry standards. Mr. Roberts certifies that Ardent project personnel and subcontractors are properly licensed and/or certified to do the work described herein.

Pursuant to Paragraph 12.13 of the ASTM Standard E1527-05:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Paul A. Roberts, P.G., R.E.A. I/II
Principal Geologist

APPENDIX B

USER QUESTIONNAIRE

PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA)
USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user of the Phase I ESA* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

Project Information	
Facility Name and Address:	151 Long Lane, City of Industry
Reason for the Phase I ESA:	Purchasing Property
Type of Property:	
Site Owner and Contact Information:	Richard Lapin 562-463-9954
Site Contact Name and Contact Information:	Kent Valley Majestic Realty 562-948-4343
Tax Assessors Parcel Number (APN):	8202-033-015

	Yes	No
1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, state, or local law?		✓
2. Are you aware of any activity use limitations, such as engineering controls (engineered caps, liners, treatment methods, etc.), land use restrictions, or institutional controls (administrative measures restricting groundwater use, construction, or property use, etc.) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?		✓
3. Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property so that you would have specialized knowledge of the chemicals or processes used by this type of business?		✓
4a. Does the purchase price being paid for the subject property reasonably reflects the fair market value of the subject property?	✓	
4b. If you conclude that there is a difference in fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?		✓
5. Are you aware of any commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as a user:		✓
5 (a) Do you know of the past uses of the property?		✓
5 (b) Do you know of any specific chemicals that are present or were once present on the subject property?		✓
5 (c) Do you know of spills or other chemical releases that have taken place at the subject property?		✓

5 (d) Do you know of any environmental cleanups that have taken place at the subject property?		✓
6. As the user of this ESA, based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?		✓

If you answered "yes" to any of the questions (except 4a) above, please provide more detail below, or attach additional information to this document:

Name and title of person completing questionnaire: (Please Print)

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.

2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.

3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.

2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.

3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.

4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Commitment

Thank You for your confidence and support. We at First American Title Insurance Company maintain the fundamental principle:

Customer First!

First American Title Insurance Company

INFORMATION

The Title Insurance Commitment is a legal contract between you and the company. It is issued to show the basis on which we will issue a Title Insurance Policy to you. The Policy will insure you against certain risks to the land title, subject to the limitations shown in the policy.

The Company will give you a sample of the Policy form, if you ask.

The Commitment is based on the land title as of the Commitment Date. Any changes in the land title or the transaction may affect the Commitment and the Policy.

The Commitment is subject to its Requirements, Exceptions and Conditions.

This information is not part of the title insurance commitment.

please contact the issuing office.

COMMITMENT FOR TITLE INSURANCE

Issued by

First American Title Insurance Company

Agreement to Issue Policy

We agree to issue a policy to you according to the terms of this Commitment.

When we show the policy amount and your name as the proposed insured in Schedule A, this Commitment becomes effective as of the Commitment Date shown in Schedule A.

If the Requirements shown in this Commitment have not been met within six months after the Commitment Date, our obligation under this Commitment will end. Also, our obligation under this Commitment will end when the Policy is issued and then our obligation to you will be under the Policy.

Our obligation under this Commitment is limited by the following:

The Provisions in Schedule A.

The Requirements in Schedule B-1.

The Exceptions in Schedule B-2.

The Conditions.

This Commitment is not valid without Schedule A and Sections 1 and 2 of Schedule B.

SCHEDULE A

1. Commitment Date: August 10, 2010 at 7:30 A.M.

2. Policy or Policies to be issued: Amount

   (A) ALTA Standard Owner Policy - 2006 $1,465,218.00
   Proposed Insured:

   Industry Urban-Development Agency, a public body, corporate and politic

   (B) ALTA Extended Loan Policy - 2006 $To Be Determined
   Proposed Insured:

   To Be Determined

3. (A) The estate or interest in the land described in this Commitment is:

   Fee Simple

   (B) Title to said estate or interest at the date hereof is vested in:

   Richard G. Lapin, a married man

4. The land referred to in this Commitment is situated in the City of Industry, County of Los Angeles , State of California, and is described as follows:

   THAT PORTION OF LOT 438 OF TRACT NO. 606, IN THE CITY OF INDUSTRY, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 15 PAGES 142 AND 143 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, INCLUDED WITHIN THE FOLLOWING DESCRIBED LINES:

   BEGINNING AT A POINT OF INTERSECTION OF THE SOUTHEASTERLY LINE OF SAID LOT, WITH A LINE THAT IS PARALLEL WITH AND DISTANT SOUTHWESTERLY 285.73 FEET, MEASURED AT RIGHT ANGLES FROM THE NORTHEASTERLY LINE OF SAID LOT;
   THENCE NORTH 48° 07' WEST, ALONG SAID PARALLEL LINE, 457.36 FEET TO A POINT IN THE SOUTHEASTERLY LINE OF THE NORTHWESTERLY 470 FEET OF SAID LOT;
   THENCE SOUTH 41° 53' WEST ALONG SAID SOUTHEASTERLY LINE, 190.48 FEET TO A POINT IN A LINE THAT IS PARALLEL WITH AND DISTANT SOUTHWESTERLY 476.21 FEET MEASURED AT RIGHT ANGLES FROM SAID NORTHEASTERLY LINE OF SAID LOT;
   THENCE SOUTH 48° 07' EAST, ALONG SAID LAST MENTIONED PARALLEL LINE 457.36 FEET TO A POINT IN SAID SOUTHEASTERLY LINE OF SAID LOT;
   THENCE 41° 53' EAST, ALONG SAID SOUTHEASTERLY LINE, 190.48 FEET TO THE POINT OF BEGINNING.

   EXCEPT THEREFROM THAT PORTION OF SAID PROPERTY LYING BELOW A DEPTH OF 500 FEET MEASURED VERTICALLY FROM THE CONTOUR OF THE SURFACE THEREOF, AS RESERVED BY L & K LAND COMPANY, A COPARTNERSHIP CONSISTING OF ROBERT K. KING AND RICHARD G. LAPIN, IN DEED RECORDED OCTOBER 31, 1974 AS INSTRUMENT NO. 453, OFFICIAL RECORDS.

ALSO EXCEPT THEREFROM THE PRECIOUS METALS AND ORES THEREOF AS RESERVED FROM THE PARTITION BETWEEN JOHN ROWLAND SR. AND WILLIAM WORKMAN IN THE PARTITION DEED RECORDED IN BOOK 10 PAGE 39 OF DEEDS.

NOW BEING PARCEL 1 AND A PORTION OF LONG LANE (60 FEET WIDE) AS SHOWN ON PARCEL MAP NO. 33 FILED IN BOOK 42 PAGE 97 OF PARCEL MAPS, IN SAID OFFICE OF THE COUNTY RECORDER.

APN: 8202-033-015

SCHEDULE B

SECTION ONE

REQUIREMENTS

The following requirements must be met:

(A) Pay the agreed amounts for the interest in the land and/or the mortgage to be insured.

(B) Pay us the premiums, fees and charges for the policy.

(C) Documents satisfactory to us creating the interest in the land and/or the mortgage to be insured must be signed, delivered and recorded.

(D) You must tell us in writing the name of anyone not referred to in this Commitment who will get an interest in the land or who will make a loan on the land. We may then make additional requirements or exceptions.

(E) Releases(s) or Reconveyance(s) of Item(s): None

(F) Other: None

(G) You must give us the following information:
1. Any off record leases, surveys, etc.
2. Statement(s) of Identity, all parties.
3. Other: None

The following additional requirements, as indicated by "X", must be met:

[X] (H) Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form(as provided by company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[] (I) An ALTA/ACSM survey of recent date, which complies with the current minimum standard detail requirements for ALTA/ACSM land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[] (J) The following LLC documentation is required:
(i) a copy of the Articles of Organization
(ii) a copy of the Operating Agreement, if applicable
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Company Consent to the current transaction

[] (K) The following partnership documentation is required :
(i) a copy of the partnership agreement, including all applicable amendments thereto
(ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iii) express Partnership Consent to the current transaction

[] (L) The following corporation documentation is required:
(i) a copy of the Articles of Incorporation
(ii) a copy of the Bylaws, including all applicable Amendments thereto
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Corporate Resolution consenting to the current transaction

[] (M) Based upon the Company's review of that certain partnership/operating agreement dated for the proposed insured herein, the following requirements must be met:

Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.

[] (N) A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

[X] (O) Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.

[] (P) Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:

[] (Q) The Company's "Mechanic's Lien Risk Addendum" form must be completed by a Company employee, based upon information furnished by the appropriate parties involved.

[] (R) The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

[] (S) Financial statements from the appropriate parties must be submitted to the Company for review.

[] (T) A copy of the construction contract must be submitted to the Company for review.

[] (U) An inspection of the land must be performed by the Company for verification of the phase of construction.

SCHEDULE B

SECTION TWO

EXCEPTIONS

Any policy we issue will have the following exceptions unless they are taken care of to our satisfaction. The printed exceptions and exclusions from the coverage of the policy or policies are set forth in Exhibit A attached. Copies of the policy forms should be read. They are available from the office which issued this Commitment.

1. General and special taxes and assessments for the fiscal year 2010-2011, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. Covenants, conditions, restrictions and easements in the document recorded as Book 9781, Page 394 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, handicap, familial status, national origin, sexual orientation, marital status, ancestry, source of income or disability, to the extent such covenants, conditions or restrictions violate Title 42, Section 3604(c), of the United States Codes or Section 12955 of the California Government Code. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

4. An easement for railroad and transportation, public street and utility, together with right to offer easement for dedication to applicable government body and incidental purposes, recorded May 20, 1969 as Instrument No. 2255 of Official Records.

CONDITIONS

1. **DEFINITIONS**
(a)"Mortgage" means mortgage, deed of trust or other security instrument.
(b)"Public Records" means title records that give constructive notice of matters affecting the title according to the state law where the land is located.

2. **LATER DEFECTS**
The Exceptions in Schedule B - Section Two may be amended to show any defects, liens or encumbrances that appear for the first time in the public records or are created or attached between the Commitment Date and the date on which all of the Requirements (a) and (c) of Schedule B - Section One are met. We shall have no liability to you because of this amendment.

3. **EXISTING DEFECTS**
If any defects, liens or encumbrances existing at Commitment Date are not shown in Schedule B, we may amend Schedule B to show them. If we do amend Schedule B to show these defects, liens or encumbrances, we shall be liable to you according to Paragraph 4 below unless you knew of this information and did not tell us about it in writing.

4. **LIMITATION OF OUR LIABILITY**
Our only obligation is to issue to you the Policy referred to in this Commitment, when you have met its Requirements. If we have any liability to you for any loss you incur because of an error in this Commitment, our liability will be limited to your actual loss caused by your relying on this Commitment when you acted in good faith to:

comply with the Requirements shown in Schedule B - Section One
or
eliminate with our written consent any Exceptions shown in Schedule B - Section Two.

We shall not be liable for more than the Policy Amount shown in Schedule A of this Commitment and our liability is subject to the terms of the Policy form to be issued to you.

5. **CLAIMS MUST BE BASED ON THIS COMMITMENT**
Any claim, whether or not based on negligence, which you may have against us concerning the title to the land must be based on this commitment and is subject to its terms.

Privacy Policy

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its *Fair Information Values*, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's *Fair Information Values*. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

3. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 2 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the public records.

4. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970
WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant, (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder, (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy (except to the extent insurance is afforded herein as to any statutory lien for labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy).
4. Unenforceability of the lien of the insured mortgage because of failure of the insured at Date of Policy or of any subsequent owner of the indebtedness to comply with applicable "doing business" laws of the state in which the land is situated.

5. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970
WITH REGIONAL EXCEPTIONS

When the American Land Title Association Lenders Policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy, the exclusions set forth in paragraph 4 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

6. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992
WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy;
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or the extent insurance is afforded herein as to assessments for street improvements under construction or completed at date of policy); or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
(ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
(iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
(a) to timely record the instrument of transfer; or
(b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

7. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 6 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

8. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or

governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
(a) created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
(ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
(a) to timely record the instrument of transfer; or
(b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:
Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

10. AMERICAN LAND TITLE ASSOCIATION RESIDENTIAL TITLE INSURANCE POLICY - 1987 EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   * land use
   * land division
   * improvements on the land
   * environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   * a notice of exercising the right appears in the public records on the Policy Date
   * the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking.
3. Title Risks:
   * that are created, allowed, or agreed to by you
   * that are known to you, but not to us, on the Policy Date - unless they appeared in the public records
   * that result in no loss to you
   * that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:

* to any land outside the area specifically described and referred to in Item 3 of Schedule A, or
* in streets, alleys, or waterways that touch your land
This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

11. EAGLE PROTECTION OWNER'S POLICY

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998

Covered Risks 14 (Subdivision Law Violation). 15 (Building Permit). 16 (Zoning) and 18 (Encroachment of boundary walls or fences) are subject to Deductible Amounts and Maximum Dollar Limits of Liability

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the land
   e. land division
   f. environmental protection

   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.
   This exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This exclusion does not limit the coverage described in Covered Risk 11 or 18.

12. THIRD GENERATION EAGLE LOAN POLICY AMERICAN LAND TITLE ASSOCIATION EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (1/01/08)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions, or location of any improvement erected on the Land; (iii) the subdivision of land; or(iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b)Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing business laws of the state where the Land is situated.

5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.

13. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 2006

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;

   (ii) the character, dimensions, or location of any improvement erected on the Land;

   (iii) the subdivision of land; or

   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   (a) created, suffered, assumed, or agreed to by the Insured Claimant;

   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

   (c) resulting in no loss or damage to the Insured Claimant;

   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or

   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors? rights laws, that the transaction creating the lien of the Insured Mortgage, is

   (a) a fraudulent conveyance or fraudulent transfer, or

   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

14. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 2006

WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 13 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

15. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 2006
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risks 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

16. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 2006
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 15 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

151 LONG LANE
CITY OF INDUSTRY, CA 91746

COORDINATES

Latitude (North):	34.041400 - 34° 2' 29.0"
Longitude (West):	117.979900 - 117° 58' 47.6"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	409548.6
UTM Y (Meters):	3766984.8
Elevation:	303 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/31/2010 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (AREA 2)	*SUNSET & SAN BERNARDINON*	*1/2 - 1 (0.600 mi.)*	*0*	*10*
SAN GABRIEL VALLEY (AREA 4)	*STIMSON AVE & OLD VALLE*	*0 - 1/8 (0.000 mi.)*	*0*	*22*

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 01/29/2010 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (AREA 4)	*STIMSON AVE & OLD VALLE*	*0 - 1/8 (0.000 mi.)*	*0*	*22*

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/17/2010 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 12/20/2009 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (AREA 4)	*STIMSON AVE & OLD VALLE*	*0 - 1/8 (0.000 mi.)*	*0*	*22*

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/16/2010 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there is 1 EDR Historical Auto Stations site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there is 1 EDR Historical Cleaners site within approximately 0.25 miles of the target property.

Scoring: 2

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 2) is a ground water plume that parallels the San Gabriel River to the west in the San Gabriel ground water basin in the Baldwin Park area of Los Angeles County,

SAN GABRIEL VALLEY (AREA 2) (Continued) **1000114961**

California. The plume is about 7.5 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride, according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies containless than 5 parts per billion ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the threeother San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Site Description: Four areas of groundwater contamination are listed on the National Priorities List: San Gabriel Valley Area 1, San Gabriel Valley Area 2, San Gabriel Valley 3, and San Gabriel Valley 4. The four areas represent a significant portion of the 170 square mile San Gabriel Valley in Los Angeles County, California. More than one million residents live in the San Gabriel Valley alongside a variety of commercial and industrial operations. The San Gabriel Aquifer, which underlies most of the San Gabriel Valley Basin, stores an estimated three trillion gallons of water and is the primary source of water for most of the Basin?s residents. Major surface water features in the San Gabriel Valley include the San Gabriel River, tributaries to the San Gabriel River system, and spreading basins located in or adjacent to the river channels. The approximate location of the San Gabriel Valley Area 2 Site is west of highway 39, south of the San Gabriel Mountains, east of the San Gabriel River, and north of Walnut Creek. Nearly all of the Baldwin Park area is fully developed for residential, commercial, and industrial use. The largest parcels of open land are active and inactive gravel pits and the Santa Fe flood Control Basin. Water purveyors in the site area include: the City of Azusa, California Domestic Water Company, City of Glendora, La Puente Valley County Water District, San Gabriel Valley Water Company, Suburban Water Systems, and Valley County Water District. Volatile Organic Compounds (VOCs), major contaminants of concern at the San Gabriel Valley Sites, were used in large quantities at industrial facilities as early as the 1940?s. From the 1940?s through the 1980?s, carbon tetrachloride, tetrachloroethane, thrichlorethene, and other chlorinated solvents were used by hundreds of businesses for degreasing, as raw materials for automotive products, by a solvent recycler, for chemical extractions , and for other purposes. VOCs have been released by a combination of intentional disposal, careless handling during loading and unloading, leaking tanks and pipes, and other means. VOCs were not detected in ground water until 1979 during environmental monitoring activities conducted by Aerojet Electrosystems near its facility in Azusa. In May 1984, EPA listed four areas of contamination were listed as San Gabriel Valley Area 1 through 4. EPA began its enforcement efforts in the site area in 1985 with searches for and evaluations of historical Federal, State, and local records on chemical usage, handling, and disposal. In 1985, the California Regional Water Quality Board began its Well Investigation Program (WIP) to identify the sources of ground water contamination detected in water supply wells. In 1989, EPA entered into a cooperative agreement to expand the WIP program to determine the nature and extent of contamination in the San Gabriel Valley. The RI/FS for the Baldwin Park OU was conducted concurrently with source identification efforts, as a fund-lead project. In March 1994, the Record of Decision (ROD) document was signed.

Environmental Interest/Information System
CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 4) is a ground water plume that runs along the axis of the San Jose Creek in the San Gabriel ground water basin in La Puenta, Los Angeles County, California. The plume is about1 mile long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA SuggestedNo Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE, alevel considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984):
A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the three other San Gabriel Valley sites, was added tothe NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

LA PUENTE, CA 91744

Site Description: The Puente Valley Operable Unit (PVOU) is located within the southeastern portion of the San Gabriel Valley, approximately 25 miles from the Pacific Coast, in eastern Los Angeles County. Located within the San Gabriel Valley is the San Gabriel Basin. The majority of the groundwater pumped from the main San Gabriel Basin is used for drinking water, supplied to the public by purveyors that are regulated as public water supply systems. Land use at the site includes industrial, commercial, and residential. The San Gabriel Valley has been the subject of environmental investigation since 1979 when groundwater contaminated with volatile organic compounds (VOCs) was first identified. In May 1984, four broad areas of contamination within the basin were listed as San Gabriel Areas 1 through 4 on the Environmental Protection Agency's (EPA's) National Priorities List (NPL). EPA subsequently divided the basin into eight operable units (OUs) to provide a means of describing hydrogeology and contaminant distribution, and planning remedial activities in the basin. In May 1993, EPA sent Special Notice letters to 58 potentially responsible parties (PRPs), requesting that these parties present a good faith offer to perform the remedial investigation/feasibility study (RI/FS) for the PVOU. Forty-two of these PRPs formed the Puente Valley Steering Committee (PVSC), and in September 1993 entered into an administrative order on consent (AOC) with EPA to conduct the RI/FS. Also in September 1993, EPA issued a unilateral administrative order (UAO) to two PRPs, Goe Engineering and Diversey Corporation, that failed to present a good faith offer. Diversey Corporation completed the activities that the UAO required in 1996, and the PVSC and EPA completed the RI/FS in May 1997. PRPs in the EL Monte and South El Monte OUs have entered into AOCs to perform the RI/FS for their

SAN GABRIEL VALLEY (AREA 4) (Continued) **1000114960**

respective OUs. EPA also issued UAOs to two parties in the El Monte OU. In the Baldwin Park OU, EPA issued a ROD in March 1993. After the Interim ROD was signed, and Special Notice letters were sent out, the PRPs were unable to make a unified offer for all of the work (i.e., shallow zone and intermediate zone cleanup, and Mid-Valley monitoring). In an effort to keep the cleanup process moving forward as expeditiously as possible, EPA carved out implementation of the remedy such that the intermediate and shallow zone work would be conducted by two different PRP groups or parties. An Explanation of Significant Differences (ESD) addressing the emerging contaminants perchlorate and 1,4-dioxane at OU 1 was completed on June 14, 2005.

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Universal Waste Summary:

Waste type:	Batteries
Accumulated waste on-site:	Yes
Generated waste on-site:	Not reported

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Waste code:	D009
Waste name:	MERCURY
Violation Status:	No violations found

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010
Date Data Arrived at EDR: 04/02/2010
Date Made Active in Reports: 04/12/2010
Number of Days to Update: 10

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010

Next Scheduled EDR Contact: 10/25/2010
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010
Date Data Arrived at EDR: 04/02/2010
Date Made Active in Reports: 04/12/2010
Number of Days to Update: 10

Next Scheduled EDR Contact: 10/25/2010
Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010
Date Data Arrived at EDR: 02/09/2010
Date Made Active in Reports: 04/12/2010

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/07/2010
Date Data Arrived at EDR: 06/18/2010

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	303 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34117-A8 BALDWIN PARK, CA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

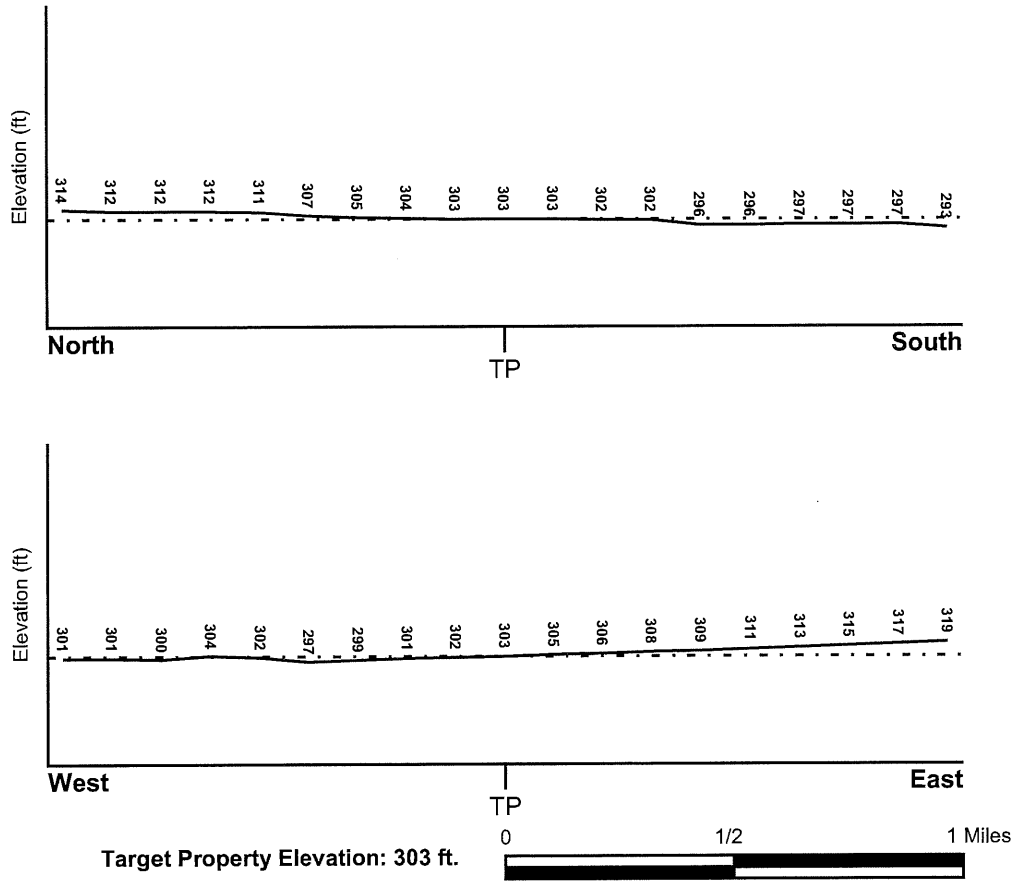
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SE
Site Name:	Brough Industries Inc.
Site EPA ID Number:	CAD983633710
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Aquifers under the site are most likely hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Water System Information:

Prime Station Code:	G19/039-NTBLR04	User ID:	MET
FRDS Number:	1910039056	County:	Los Angeles
District Number:	15	Station Type:	RESVR/WELL/AMBNT/MUN/INTAKE
Water Type:	M	Well Status:	Combined Treated
Source Lat/Long:	340300.0 1175900.0	Precision:	1,000 Feet (10 Seconds)
Source Name:	RESERVOIR B4 - NO3, WELLS B4B,B4C, BLEND		
System Number:	1910039		
System Name:	SAN GABRIEL VALLEY WATER CO.-EL MONTE		
Organization That Operates System:			
	P O BOX 6010		
	EL MONTE, CA 91734		
Pop Served:	151064	Connections:	43161
Area Served:	EL MONTE/SAN GABRIEL BASIN		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	01/03/2000	Findings:	7.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/10/2000	Findings:	7.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/17/2000	Findings:	7.8 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/24/2000	Findings:	7.51 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/31/2000	Findings:	7.2 MG/L

Sample Collected:	08/15/2001	Findings:	.95 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	08/15/2001	Findings:	.57 UG/L
Chemical:	TOTAL TRIHALOMETHANES		
Sample Collected:	09/05/2001	Findings:	10 UG/L
Chemical:	CARBON TETRACHLORIDE		
Sample Collected:	09/05/2001	Findings:	1.5 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	09/05/2001	Findings:	7.8 UG/L
Chemical:	TRICHLOROETHYLENE		

Sample Collected:	09/10/2001	Findings:	2.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	09/10/2001	Findings:	2.4 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE

CA WELLS **22726**

Water System Information:

Prime Station Code:	G19/039-NTBLR12	User ID:	MET
FRDS Number:	1910039058	County:	Los Angeles
District Number:	15	Station Type:	RESVR/WELL/AMBNT/MUN/INTAKE
Water Type:	M	Well Status:	Combined Treated
Source Lat/Long:	340300.0 1175900.0	Precision:	1,000 Feet (10 Seconds)
Source Name:	RES B12-N03, WELLS B7C,B73,B9B,B11A,B11B		
System Number:	1910039		
System Name:	SAN GABRIEL VALLEY WATER CO.-EL MONTE		
Organization That Operates System:			
	P O BOX 6010		
	EL MONTE, CA 91734		
Pop Served:	151064	Connections:	43161
Area Served:	EL MONTE/SAN GABRIEL BASIN		
Sample Collected:	01/03/2000	Findings:	13.4 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/10/2000	Findings:	14 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/17/2000	Findings:	14.1 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/24/2000	Findings:	11.4 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/31/2000	Findings:	13.1 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/07/2000	Findings:	12.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/14/2000	Findings:	12.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/22/2000	Findings:	17.5 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/28/2000	Findings:	15.5 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/06/2000	Findings:	16 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/13/2000	Findings:	13 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/20/2000	Findings:	12 MG/L
Chemical:	NITRATE (AS NO3)

Water System Information:

Prime Station Code:	01S/10W-31F03 S	User ID:	MET
FRDS Number:	1910039017	County:	Los Angeles
District Number:	15	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340238.0 1175805.0	Precision:	1,000 Feet (10 Seconds)
Source Name:	WELL B11A		
System Number:	1910039		
System Name:	SAN GABRIEL VALLEY WATER CO.-EL MONTE		
Organization That Operates System:	P O BOX 6010 EL MONTE, CA 91734		
Pop Served:	151064	Connections:	43161
Area Served:	EL MONTE/SAN GABRIEL BASIN		
Sample Collected:	08/15/2001	Findings:	9.8 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/15/2001	Findings:	26 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/15/2001	Findings:	1.5 UG/L
Chemical:	CIS-1,2-DICHLOROETHYLENE		
Sample Collected:	09/05/2001	Findings:	3.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	09/05/2001	Findings:	.97 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	09/05/2001	Findings:	2.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	09/07/2001	Findings:	1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	09/10/2001	Findings:	1.2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	09/10/2001	Findings:	19 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10/03/2001	Findings:	4.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	10/03/2001	Findings:	1.1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	10/03/2001	Findings:	2.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	10/09/2001	Findings:	37 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/07/2001	Findings:	12 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	11/07/2001	Findings:	2.4 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	11/07/2001	Findings:	5.3 UG/L
Chemical:	TRICHLOROETHYLENE		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	11/13/2001	Findings:	23 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/16/2001	Findings:	5.8 UG/L
Chemical:	VANADIUM		
Sample Collected:	11/16/2001	Findings:	12 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	11/16/2001	Findings:	12 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	11/16/2001	Findings:	8.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	11/16/2001	Findings:	23 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/16/2001	Findings:	4.4 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	12/04/2001	Findings:	11 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	12/04/2001	Findings:	2.5 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	12/04/2001	Findings:	5.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	12/10/2001	Findings:	29 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12/11/2001	Findings:	1.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	12/12/2001	Findings:	1.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	12/20/2001	Findings:	4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	12/21/2001	Findings:	5.6 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	01/02/2002	Findings:	8.4 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	01/02/2002	Findings:	2.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	01/02/2002	Findings:	3.7 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	01/14/2002	Findings:	23 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/06/2002	Findings:	7.9 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	02/06/2002	Findings:	3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	02/06/2002	Findings:	4 UG/L
Chemical:	TRICHLOROETHYLENE		

Sample Collected:	02/11/2002	Findings:	22 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/21/2002	Findings:	6.2 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	02/21/2002	Findings:	2.2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	02/21/2002	Findings:	3.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	02/21/2002	Findings:	19 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/05/2002	Findings:	5.2 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	03/05/2002	Findings:	1.7 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	03/05/2002	Findings:	2.4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03/11/2002	Findings:	19 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/03/2002	Findings:	4.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	04/03/2002	Findings:	1.4 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	04/03/2002	Findings:	2.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	04/08/2002	Findings:	7 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/02/2002	Findings:	8.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/02/2002	Findings:	1.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/02/2002	Findings:	3.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/13/2002	Findings:	20 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/15/2002	Findings:	5.6 UG/L
Chemical:	VANADIUM		
Sample Collected:	05/15/2002	Findings:	7.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/15/2002	Findings:	2.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/15/2002	Findings:	3.4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/15/2002	Findings:	35 MG/L
Chemical:	NITRATE (AS NO3)		

Sample Collected:	05/15/2002	Findings:	6.4 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	06/04/2002	Findings:	5.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06/04/2002	Findings:	1.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	06/04/2002	Findings:	3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/10/2002	Findings:	27 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/02/2002	Findings:	7 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/02/2002	Findings:	1.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/02/2002	Findings:	3.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/08/2002	Findings:	32 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/07/2002	Findings:	4.7 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	08/07/2002	Findings:	1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	08/07/2002	Findings:	2.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/12/2002	Findings:	29 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/04/2002	Findings:	5.2 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	09/04/2002	Findings:	1.1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	09/04/2002	Findings:	2.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	09/09/2002	Findings:	24 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/12/2002	Findings:	.46 MG/L
Chemical:	FLUORIDE (F) (NATURAL-SOURCE)		
Sample Collected:	09/12/2002	Findings:	120 UG/L
Chemical:	BARIUM		
Sample Collected:	09/12/2002	Findings:	8.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	09/12/2002	Findings:	2.1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	09/12/2002	Findings:	3.6 UG/L
Chemical:	TRICHLOROETHYLENE		

Sample Collected:	09/12/2002	Findings:	35 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	09/12/2002	Findings:	6.2 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	10/03/2002	Findings:	5.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	10/03/2002	Findings:	1.2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	10/03/2002	Findings:	2.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	10/15/2002	Findings:	35 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/07/2002	Findings:	4.4 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	11/07/2002	Findings:	1.1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	11/07/2002	Findings:	2.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	11/12/2002	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11/14/2002	Findings:	9.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	11/14/2002	Findings:	9.2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	11/14/2002	Findings:	6.6 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	11/14/2002	Findings:	22 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12/11/2002	Findings:	6.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	12/11/2002	Findings:	2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	12/11/2002	Findings:	3.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	12/13/2002	Findings:	2.2 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	12/16/2002	Findings:	3.3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	01/13/2003	Findings:	23 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/10/2003	Findings:	18 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03/06/2003	Findings:	2.9 UG/L
Chemical:	TETRACHLOROETHYLENE		

Sample Collected:	03/06/2003	Findings:	1.1 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	03/06/2003	Findings:	1.4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03/10/2003	Findings:	24 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04/14/2003	Findings:	22 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/06/2003	Findings:	7.2 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/06/2003	Findings:	1.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/06/2003	Findings:	3.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/12/2003	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05/13/2003	Findings:	6.4 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/13/2003	Findings:	1.8 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	05/13/2003	Findings:	2.8 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05/13/2003	Findings:	21 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06/02/2003	Findings:	9.4 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06/02/2003	Findings:	4.6 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06/09/2003	Findings:	37 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/01/2003	Findings:	12 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07/01/2003	Findings:	3 UG/L
Chemical:	1,1-DICHLOROETHYLENE		
Sample Collected:	07/01/2003	Findings:	5.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/07/2003	Findings:	24 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07/14/2003	Findings:	25 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/04/2003	Findings:	6.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	08/04/2003	Findings:	1.4 UG/L
Chemical:	1,1-DICHLOROETHYLENE		

Sample Collected:	08/04/2003	Findings:	2.6 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	08/04/2003	Findings:	460 MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	08/04/2003	Findings:	25.5 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08/04/2003	Findings:	6 UG/L
Chemical:	PERCHLORATE		
Sample Collected:	08/06/2003	Findings:	9.2 UG/L

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

Industry, CA 91744

Dear Mr. Lapin:

HAZARDOUS MATERIALS UNDERGROUND STORAGE
CLOSURE CERTIFICATION
CLOSURE PERMIT NO. 5716B
LOCATION: 14166 NELSON AVENUE, INDUSTRY

This office has reviewed the closure report submitted on November 24, 1992, dated November 23, 1992. Based on the information submitted, this letter confirms the completion of site investigation and remedial action at the above site. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is our position that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at this site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings or site usage.

If you have any questions regarding this matter, please contact Tom Lawrence at (818) 458-3531.

Very truly yours,

T. A. TIDEMANSON
Director of Public Works

350 East Commercial Center Street
Pomona, CA 91767

SUBJECT: PHASE II ACTIVITIES, L&K LAND CO., 14166 NELSON AVENUE, CITY OF INDUSTRY, CALIFORNIA

Dear Mr. Covey:

This letter constitutes the report on the Phase II activities conducted at L&K Land Co., 14166 Nelson Avenue, City of Industry, California (see Figures 1 and 2). The Phase II activities were conducted in response to the elevated concentrations of total petroleum hydrocarbons (TPH) and benzene, toluene, xylenes, and ethylbenzene (BTXE) that were discovered beneath the former location of a removed 2,000 gallon underground gasoline storage tank (UST) and associated dispenser unit (DU). Reference our report dated July 28, 1989 titled "Report on Removal of Underground Storage Tank Located at L&K Land Co., 14166 Nelson Avenue, City of Industry, California" for specifics.

The scope of EAI services for this investigation only included supervision of soil removal activities, soil sampling, data interpretation, recommendations and preparation of this report.

1.0 FIELD INVESTIGATION

On August 2, 1989, in accordance with the recommendations contained in our report dated July 28, 1989, H.B. Covey, Inc. (HBC) personnel excavated hydrocarbon contaminated soil beneath the former location of the UST and DU to depths of approximately 16 feet below grade. The excavated contaminated soil was stockpiled in an area immediately west of the excavation.

Prior to obtaining soil samples, a clean shovel was utilized to remove "sluff" material and approximately 1.5 feet of undisturbed soil from the base of the excavation. A clean hand trowel was utilized to obtain soil sample SSB @ 17.5 feet from the base of the excavation. Additionally, approximately 0.5 feet of soil was removed from the two sampling points located on each excavation sidewall. A clean aluminum hand trowel was utilized to obtain eight soil samples (two from each sidewall) from approximately 0.5 feet into the excavation sidewalls. These samples were: 1) SSWW-1 @ 11.5 feet and 14 feet from the west sidewall; 2) SSEW-1 @ 11.5 feet and 14 feet from the east sidewall; 3) SSNW-1 @ 11.5 feet and 14 feet from the north sidewall; and 4) SSSW-1 @ 11.5 feet and 14 feet from the south sidewall (see Figure 3). The soil samples were obtained at different depths in an attempt to determine the vertical extent of contamination within the excavation.

Five additional soil samples also were obtained. Sample SSB @ 21.5 feet was obtained approximately four feet below sample SSB @ 17.5 feet (see Figure 3). The soil sample was obtained by removing the four foot soil column with a hand auger. The four remaining samples, SSWW-2, SSEW-2, SSNW-2, and SSSW-2, were obtained at approximately 11.5 feet in depth and approximately 5 feet into the west, east, north, and south excavation sidewalls, respectively. A hand auger was used to bore horizontally into the sidewall at each sampling point and to obtain soil samples.

Soil samples obtained with a clean hand trowel or hand auger were sealed in clean 8 oz. glass jars with Teflon septa lined lids. The jars were completely filled so that no headspace existed between the sample and the lid. The samples were labeled with the sampling point identification number, date and time, placed immediately into an ice chest chilled with frozen blue ice, and remained chilled until delivered to the laboratory for analytical testing. The samples were logged on chain of custody forms (see Attachment A).

A Bacharach TLV Sniffer calibrated against a hexane standard was utilized on random soil samples within the excavation to determine if volatile hydrocarbon (vapors) were emanating directly from the soil. Measurements obtained within the excavation at a depth of approximately 11.5 feet below grade ranged from 600 to 2,000 parts per million (ppm), and at approximatley 14 feet below grade the measurements ranged from 80 to 180 ppm.

2.0 SAMPLING EQUIPMENT CLEANING PROTOCOL

Soil sampling equipment was decontaminated prior to sampling by the following procedure:

- All excess soil was scraped off the hand trowel/hand auger;
- The hand trowel/hand auger were washed in a solution of Alconcox detergent and tap water; and;
- The hand trowel/hand auger were rinsed with tap water and then distilled water.

3.0 ANALYTICAL TESTING

All soil samples obtained on August 2, 1989 were delivered for analytical testing to Weck Laboratories, a California Department of Health Services (DOHS) certified hazardous waste testing laboratory (Certificate #177) located in the City of Industry, California. The soil samples were analytically tested for total petroleum hydrocarbons (TPH) using modified EPA Method 8015. The results of the analytical testing are presented in Table 1. The laboratory report is contained in Attachment B.

TABLE 1

CONCENTRATIONS OF TPH IN SOIL SAMPLES OBTAINED ON AUGUST 2, 1989

SAMPLE I.D. #	SAMPLE LOCATION	TPH (ppm)
SSB @ 17.5'	Below excavation Base	ND*
SSB @ 21.5'		ND
SSWW-1 @ 11.5'**	West Sidewall	ND
SSWW-2 @ 11.5'***		ND
SSWW-1 @ 14'**		12
SSEW-1 @ 11.5'**	East Sidewall	ND
SSEW-2 @ 11.5'***		ND
SSEW-1 @ 14'**		ND
SSNW-1 @ 11.5'**	North Sidewall	ND
SSNW-2 @ 11.5'***		ND
SSNW-1 @ 14'**		ND
SSSW-1 @ 11.5'**	South Sidewall	ND
SSSW-2 @ 11.5'***		ND
SSSW-1 @ 14'**		ND

* ND = Not Detected
** Sample obtained 0.5 feet into excavation sidewall
*** Sample obtained 5 feet into excavation sidewall

The results of the analytical testing indicate that only sample SSWW-1 @ 14 feet contained detectable TPH concentrations (12 parts per million [ppm]). The detected TPH concentration was considered minor. The analytical testing results indicated that the lateral and vertical extent of contamination has not exceeded depths greater than 11.5 feet below surface grade.

The elevated vapor readings obtained during soil sampling combined with the low TPH concentrations (non-detectable to 12 ppm) detected in the soil samples analytically tested strongly suggested that a source for the hydrocarbon vapors measured in the excavation probably was present at depths shallower than

11.5 feet. EAI, therefore, recommended that additional soil sampling be conducted.

4.0 ADDITIONAL SAMPLING ACTIVITIES

On August 16, 1989, soil samples NW, WW, SW, and EW were obtained repectively from the north, west, south, and east excavation sidewalls. The samples were obtained at a depth of 0.5 feet into each excavation sidewall at approximately eight feet below grade. The samples were obtained and handled with the identical protocol as described in Section 1.0 and delivered to the laboratory the same day as sampling. The chain of custody form is contained in Attachment A.

The samples obtained on August 16, 1989 were delivered to Calscience Environmental Laboratories (CEL), a DOHS certified hazardous waste testing laboratory (Certificate #257) located in Stanton, California. The samples were analytically tested for TPH using modified EPA Method 8015. The results of the analytical testing are presented in Table 2. The laboratory report is contained in Attachment B.

TABLE 2

CONCENTRATIONS OF TPH IN SOIL SAMPLES OBTAINED ON AUGUST 16, 1989

SAMPLE I.D. #	TPH (ppm)
NW 6" in @ 8.0'	20,900
WW 6" in @ 8.0'	ND*
SW 6" in @ 8.0'	ND
EW 6" in @ 8.0'	ND

* ND = Not Detected; see Attachment B

The analytical testing results of soil samples obtained on August 16, 1989 show that only one sample NW contained elevated TPH concentrations (20,900 ppm). No detectable concentrations of TPH were present in any of the other samples.

5.0 ADDITIONAL EXCAVATION AND SAMPLING ACTIVITIES

Shortly after August 16, 1989, HBC's South Coast Air Quality Management District (SCAQMD) Rule 1166 excavation permit expired. This blanket permit allowed HBC to excavate hydrocarbon contaminated soil. Therefore, additional excavation activities were postponed until the end of October 1989 when the SCAQMD excavation permit was renewed.

On October 24, 1989, HBC personnel, under the supervision of EAI personnel, excavated additional soil from the north end of the excavation to 11.5 feet below grade. During this excavation process, the elevated TPH concentration detected in sample NW 6" in at 8 feet was removed. The additional excavated soil was stockpiled west of the tank excavation.

After the excavation activities were completed, EAI personnel obtained verification soil samples SS-1, SS-2, and SS-3) at eight feet below grade (see Figure 5) on the sidewalls of the newly excavated area. A backhoe was used to recover soil at these sampling points. The soil samples were obtained by driving 2.5-inch by 3-inch long brass rings directly into soil contained within the backhoe bucket. After sample recovery, the ends of the rings were covered with aluminum foil and plastic caps taped over the ends. Prior to use, the rings were washed in a solution of Alconox detergent and tap water, rinsed with tap water and then rinsed with distilled water. The samples were labeled and handled with the same protocol as described in Section 1.0 and delivered to the laboratory for analytical testing the following day (Attachment A).

All samples were delivered to CEL and were analyzed for TPH using modified EPA Method 8015. Additionally, the laboratory was instructed to test the sample containing the highest TPH concentration for BTXE using EPA Method 8020. The laboratory results are presented in Table 3. The laboratory report is contained in Attachment B.

TABLE 3

CONCENTRATIONS OF TPH IN SOIL SAMPLES OBTAINED ON OCTOBER 24, 1989

SAMPLE I.D. #	TPH (ppm)
SS-1 @ 8.0'	ND*
SS-2 @ 8.0'	ND
SS-3 @ 8.0'	ND

*ND = Not Detected

The results of the analytical testing of the three samples show that no detectable concentrations of TPH were detected on the excavation sidewalls. Previous testing (sample SSNW-2 obtained on August 2, 1989) revealed that the soils at 11.5 feet below grade in the base of the area excavated on October 24, 1989 contained no detectable concentrations of TPH (see Section 2.0 and Figure 5).

6.0 DISPOSAL OF CONTAMINATED SOIL

On November 8, 1989, the stockpiled hydrocarbon contaminated soil was properly manifested, transported, and disposed at Casmalia Resources, Inc. in Casmalia, California by Pacific Environmental Management Corp. (see Attachment C). Approximately 70 cubic yards of hydrocarbon contaminated soil was disposed.

7.0 DISCUSSION AND CONCLUSIONS

The analytical testing data from soil samples obtained on August 2 and 16, 1989 show that all samples, except for sample NW 6" in contained minor (12 ppm) to no detectable concentrations of TPH. Sample NW 6" in contained an elevated TPH concentration of 20,900 ppm. The soils containing the elevated TPH concentrations detected in sample NW 6" in were removed on

October 24, 1989. Subsequent verification sampling and testing show that the soils containing elevated TPH concentrations in the vicinity of sample NW 6" in have been removed, and that the problematic TPH contaminated soils in the immediate area beneath the former locations of the 2,000 gallon UST and removed dispensr unit have been removed.

The excavated hydrocarbon contaminated soil was manifested, transported and properly disposed at an approved landfill. It is EAI's opinion that no further on-site actions are necessary at this time.

9.0 LIMITATION

Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional advice contained in this report.

Please call if you have any questions.

Sincerely,

ENVIRONMENTAL AUDIT, INC.

LABORATORY ANALYSIS REQUEST

DELIVERED TO: Calscience PROJECT NO: 1053

PROJECT NAME: L+K Land Co.

PROJECT ADDRESS: 14166 Nelson Ave, Industry CA
number street city state

DATE OF DELIVERY: 10/25/89 DATE OF SAMPLING: 10/24/89

NUMBER/DESIGNATION OF SAMPLES DELIVERED:

SS-1 @ 8.0'				
SS-2 @ 8.0'				
SS-3 @ 8.0'				

TYPE OF SAMPLE(S): Soil X Water ___ Sludge ___ Air ___

Other ___ Specify ___

ANALYSIS REQUESTED: Analyze all samples for TPH using EPA method 8015 (M). If TPH concentrations are detected, analyze the highest sample for BTXE using EPA method 8020.

SPECIAL INSTRUCTIONS: Please project number on lab report and invoice

ENVIRONMENTAL AUDIT, INC. CONTACT: Paul Stoppelman (714) 632-8521

Mr. Bret Covey
H.B. Covey, Inc.
350 East Commercial Street
Pomona, CA 91767-5506

SUBJECT: REPORT ON REMOVAL OF UNDERGROUND STORAGE TANK LOCATED AT L&K LAND CO., 14166 NELSON AVENUE CITY OF INDUSTRY, CALIFORNIA

Dear Mr. Covey:

This letter constitutes the report on the sampling and analytical testing of soil samples obtained from beneath the former location of a 2,000 gallon underground storage tank and the associated dispenser unit (DU) located at L&K Land Co., 14166 Nelson Avenue, City of Industry, California (see Figures 1 and 2). The underground storage tank reportedly contained unleaded gasoline.

The scope of Environmental Audit, Inc. (EAI) services only included soil sampling, interpretation of analytical testing data, recommendations and preparation of this report.

1.0 FIELD WORK

Removal of the tank was originally scheduled with the Los Angeles County Fire Department (LACFD) for July 7, 1989. However, due to scheduling problems, removal of the tank was postponed until July 10, 1989. On July 7, 1989, an EAI geologist obtained soil sample SS-1 from approximately three feet below the former location of the DU. The DU was located approximately two feet north of the limits of the northern portion of the excavation, which was completed in preparation of tank removal (see Figure 2). A hand auger was used to place a borehole approximately three feet below grade in the side wall of the excavation and driven horizontally until under the center of the former location of the DU. Strong hydrocarbon odors were

encountered. The sample was transferred from the hand auger into a clean 8 oz. glass jar with a Teflon septa lined lid. The jar was completely filled so that no head space existed between the sample and the lid. The sample was labeled with the sampling point identification, depth interval, date and time, placed immediately into an ice chest chilled using frozen blue ice, and remained chilled until delivered to an EAI refrigerator for temporary storage. The sample remained in an EAI refrigerator until delivered on July 10, 1989 to the laboratory for analytical testing. The sample was logged on a chain of custody record form (see Attachment A).

On July 10, 1989, the tank was removed by H.B. Covey, Inc. (HBC) pursuant to tank removal permit #5716B, issued by the Los Angeles County Department of Public Works, Waste Management Division (LACDPW) (see Attachment B). Inspector Gomez of the LACFD was on-site and authorized the tank removal. After removal, the underground tank was visually inspected. No visual evidence of holes or cracks were noted. An identification tag was located on the tank; however, the markings on the tag were indiscernible. The tank was delivered for disposal to American Metal Recycling in Ontario, California (see Attachment C).

Following removal of the tank, soil samples SS-2A and SS-2B were obtained at approximately two feet below the base of the tank cavity, or at approximately 11.5 feet below grade (see Figure 2). Prior to obtaining the samples, a clean shovel was utilized to remove the "sluff" material and approximately one foot of undisturbed soil. Additionally, soil sample SS-3 was obtained from approximately six feet beneath the former location of the DU. The samples were obtained, labeled, handled and transported as described above. All samples, including sample SS-1 obtained on July 7, 1989, were relinquished to HBC personnel under proper chain of custody procedures. HBC personnel then delivered the samples to the laboratory for analytical testing (see Attachment A).

All sampling equipment was decontaminated prior to each sampling by the following procedure:

- All excess soil was scraped off the sampler parts;
- The sampler was washed in a solution of Alconox detergent and tap water; and
- The sampler was rinsed with tap water and then with distilled water.

No visual evidence of soil discoloration was present in the excavation. However, the stockpiled soil exhibited a slight hydrocarbon odor, and soil removed with the hand auger at each sampling location exhibited strong hydrocarbon odors.

A Bacharach TLV Sniffer, calibrated against a hexane standard, was utilized on samples of stockpiled soil to determine if volatile hydrocarbons (vapors) were emanating from the soil. Soil samples were obtained from a depth of approximately one foot within the stockpiled soil. The samples were placed into air-tight "Ziploc" plastic bags and allowed to sit in the sun. The head space within the plastic bags was then analyzed using the TLV Sniffer. TLV readings of the stockpiled soil ranged between 150 to 240 ppm.

No ground water was encountered during excavation activities. Depth to ground water at the site is believed to be approximately 73 feet below grade. This estimate is based on the water depth measurement obtained from observation well #3015 in May 1989, which is located approximately 3,100 feet northwest of the site, near the intersection Puente Avenue and Valley Boulevard, Pomona (Ms. Geneva Arismendy, Los Angeles County Department of Public Works, personal communication, July 1989).

2.0 ANALYTICAL TESTING

All samples were delivered for analytical testing to Weck Laboratories, a California Department of Health Services (DOHS) certified hazardous waste testing laboratory (Certificate #177), located in the City of Industry, California. Based on the requirements of tank removal permit #5716B, the soil samples were tested for total petroleum hydrocarbons (TPH) using modified EPA Method 8015, and benzene, toluene, xylenes and ethylbenzene (BTXE) using EPA Method 8020. The results of the testing are shown in Table 1. The laboratory report is contained in Attachment D.

TABLE 1

CONCENTRATIONS OF TPH AND BTXE PRESENT IN THE SOIL SAMPLES

Parts per Million (ppm)

Sample I.D. No.	TPH*	Benzene	Toluene	Xylenes	Ethyl-Benzene
SS-1 @ 3.0'	25,800	191	1,581	2,523	467
SS-2A @ 11.5'	11,442	28.6	498	1,065	180
SS-2B @ 11.5'	1,650	0.031	0.22	3.44	0.102
SS-3 @ 6.0'	33,460	321	2,787	4,007	720

* TPH concentrations expressed as gasoline.

3.0 CONCLUSIONS

The analytical testing results show that all samples contained elevated concentrations of TPH and BTXE. Soil samples SS-1 and SS-3 obtained from beneath the DU contained the highest TPH concentrations, i.e., 25,800 and 33,460 ppm, respectively. The lateral and vertical extent of the soil contamination has not been defined.

Visual examination of the tank indicated that it had integrity. This suggests that an unauthorized discharge(s) occurred as a result of a line failure or several years of tank overfills.

4.0 RECOMMENDATIONS

EAI recommends that a phased approach be used to complete the additional activities necessary to define the extent of the soil contamination. The first phase should include: 1) removal of the concrete slab on which the DU was located; 2) excavation of, at a minimum, an additional five and preferably seven foot column of soil from the base and sidewalls of the excavation and the area around the former location of the DU; and 3) obtaining

and analytically testing representative soil samples from the base and sidewalls of the excavation upon completion of excavation activities. The excavation activities should be completed under the supervision of an individual experienced in remediating contaminated soils. If the results of the analytical testing show no problematic concentrations of hydrocarbons in the soil, then no additional actions, other than remediating the contaminated soils excavated, will be warranted.

On the other hand, if the results of the analytical testing show problematic concentrations of hydrocarbons are still present, then it is recommended that representative hand auger borings be drilled and sampled at the base of the excavation to attempt to determine the vertical extent of the contamination. If the vertical extent of the contamination can not be defined using hand auger borings, it will be necessary to drill and sample borings using a truck mounted rig.

Based on the volatile organic compound (VOC) emissions detected in the majority of the soils excavated, it will be necessary to obtain a South Coast Air Quality Management District (SCAQMD) Rule 1166 permit to complete the additional excavation.

5.0 LIMITATION

Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental consultants practicing in this or similar localities. This report has been prepared for H.B. Covey, Inc. No other warranty, express or implied, is made as to the professional advice contained in this report.

Please call if you have any questions.

Sincerely,

ENVIRONMENTAL AUDIT, INC.

RE: VERIFICATION SAMPLING AND TESTING
L&K Land Company
14166 Nelson Avenue, City of Industry
File No. I-14944

Gentlemen:

This report presents the results of the verification sampling and testing completed at the site in November 1992, pursuant to the County of Los Angeles Department of Public Works, Waste Management Division, UST Local Oversight Program (County) letter dated September 1, 1992.

1.0 BACKGROUND

In July 1989, a 2,000-gallon capacity underground storage tank (UST) and associated fuel dispenser unit were removed from the site (see Figures 1 and 2). Elevated concentrations of total petroleum hydrocarbons (TPH) and benzene, toluene, xylenes and ethylbenzene (BTXE) were detected in all samples collected after removal of the UST. Excavation activities were conducted to remove the hydrocarbon contaminated soils. Upon completion of excavation activities, soil samples were obtained and analytically tested which showed that the affected soils had been removed from the site. For specifics on these activities, see the Environmental Audit, Inc. (EAI) reports for the site dated July 28, 1989 and November 20, 1989.

Based on review of reports submitted by EAI, it was the County's opinion that the available data did not adequately show that the contaminated soil had been removed from the

site. The County requested that additional verification sampling and testing be completed. At a meeting held on July 30, 1992 between representatives of the County, EAI and the land owner, a verification sampling and testing plan was proposed to the County. In a letter dated September 1, 1992, the County approved the verification sampling and testing plan.

2.0 SCOPE OF WORK

The scope of this verification and sampling plan consisted of the drilling and sampling of eight borings ranging in depth from approximately 12 to 20 feet below grade surface (bgs), with analytical testing of the soil sample obtained from the termination depth of each boring for BTXE.

3.0 FIELD WORK

On November 9, 1992, eight borings (CB-1 through CB-8) were drilled and sampled around the perimeter of the area excavated in association with soil removal activities (see Figure 2). The borings were drilled by West Hazmat Drilling Corp., under the supervision of an EAI geologist, using 8-inch diameter continuous flight hollow stem augers. Mr. Tom Lawrence of the County was on-site during drilling and sampling activities.

Soil samples were collected from the borings using six 2.5-inch diameter by 3-inch long brass tubes mounted with a split-spoon drive sampler employed in advance of the augers. After sample recovery, the ends of the lowermost tube were covered with aluminum foil and plastic caps taped over the ends. Prior to use, all tubes were washed in a solution of Alconox detergent and tap water, rinsed with tap water and then distilled water. The samples were labeled with the sample point identification, project number, depth interval, date and time, individually sealed in "Ziploc" plastic bags, and immediately placed into an ice chest chilled using frozen blue ice. The samples were kept chilled until delivered to the laboratory for analytical testing. All samples were logged on chain of custody record forms (see Attachment A).

4.0 ANALYTICAL TESTING

The samples were delivered for analytical testing to Calscience Environmental Laboratories, a state certified hazardous waste testing laboratory (Certificate #254) located in Stanton, California. The sample obtained from the termination depth of each boring was tested for BTXE using EPA Method 8020. No BTXE were detected in any of the samples (see Attachment B).

5.0 REQUEST

Based on the information previously submitted regarding site activities and the results from this investigation which confirm our previous belief that the affected soils have been excavated, removed from the site and properly disposed, we are requesting that the County grant site closure at this time.

Please call if you have any questions or need additional information.

Sincerely,

ENVIRONMENTAL AUDIT, INC.
