Attention: Mr. Don Ledet

Gentlemen:

**Transmittal of Information  
Requested by Somitex Prints of California  
for Site Access for Soil-Gas Survey**

We appreciate your concern for proceeding expeditiously with respect to granting site access for Utility Trailer Manufacturing Company's soil-gas survey that was requested by the Regional Water Quality Control Board (RWQCB). In our telephone conversation of June 10, 1991, you requested copies of the RWQCB's directive for the soil-gas survey and a copy of the final workplan submitted for this survey. Accordingly, we are enclosing copies of this material.

The soil-gas survey report must be submitted to the RWQCB by July 15, 1991. It is important that we get your response to our request by June 12, 1991, so that the work can be completed and the report submitted in compliance with the RWQCB's schedule.

Very truly yours,

HARDING LAWSON ASSOCIATES
