CITY OF INDUSTRY

CITY COUNCIL
REGULAR MEETING
AGENDA

JANUARY 23, 2025
9:00 AM

Location: *City Council Chambers,*
15651 Mayor Dave Way, City of Industry
California

Mayor Cory C. Moss
Mayor Pro Tem Michael Greubel
Council Member Steve Marcucci
Council Member Mark D. Radecki
Council Member Newell Ruggles

Addressing the City Council:

< ***Agenda Items:*** *Members of the public may address the City Council on any matter listed on the Agenda. In order to conduct a timely meeting, there will be a one-minute time limit per person for any matter listed on the Agenda. Anyone wishing to speak to the City Council is asked to complete a Speaker's Card which can be found at the back of the room and at the podium. The completed card should be submitted to the City Clerk prior to the Agenda item being called and prior to the individual being heard by the City Council.*

< ***Public Comments (Non-Agenda Items):*** *Anyone wishing to address the City Council on an item not on the Agenda may do so during the "Public Comments" period. In order to conduct a timely meeting, there will be a one-minute time limit per person for the Public Comments portion of the Agenda. State law prohibits the City Council from taking action on a specific item unless it appears on the posted Agenda. Anyone wishing to speak to the City Council is asked to complete a Speaker's Card which can be found at the back of the room and at the podium. The completed card should be submitted to the City Clerk prior to the Agenda item being called by the City Clerk and prior to the individual being heard by the City Council.*

At the time of publication, no Councilmembers intend to take part in the meeting remotely under the provisions of AB 2449. Should that change between the time of publication and the start of the meeting, a live webcasting of the meeting will be accessible via the link, meeting ID, and meeting passcode listed below. Whenever possible, an announcement will be made at the start of the meeting via the live webcast to confirm whether or not a Councilmember will join remotely. If they will not be joining remotely, then the live webcast will terminate after the announcement.

Americans with Disabilities Act:

< *In compliance with the ADA, if you need special assistance to participate in any City meeting (including assisted listening devices), please contact the City Clerk's Office (626) 333-2211. Notification of at least 48 hours prior to the meeting will assist staff in assuring that reasonable arrangements can be made to provide accessibility to the meeting.*

Agendas and other writings:

< *In compliance with SB 343, staff reports and other public records permissible for disclosure related to open session agenda items are available at City Hall, 15625 Mayor Dave Way, City of Industry, California, at the office of the City Clerk during regular business hours, Monday through Thursday 8:00 a.m. to 5:00 p.m.,*

Fridays 8:00 a.m. to 4:00 p.m. Any person with a question concerning any agenda item may call the City Clerk's Office at (626) 333-2211.

1. Call to Order

2. Flag Salute

3. AB 2449 Vote on Emergency Circumstances (if necessary)

4. Roll Call

5. Presentations

6. **CONSENT CALENDAR**

6.1 Consideration of the Register of Demands for January 23, 2025

RECOMMENDED ACTION: Approve the Register of Demands and authorize the appropriate City Officials to pay the bills.

6.2 Consideration of Resolution No. CC 2025-05 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF INDUSTRY, CALIFORNIA, CALLING FOR THE HOLDING OF AN ALL-MAIL BALLOT ELECTION TO BE HELD ON JUNE 3, 2025, FOR THE ELECTION OF CERTAIN CITY COUNCIL MEMBERS, IN ACCORDANCE WITH THE PROVISIONS OF STATE LAW, THE CITY'S CHARTER AND THE CITY'S MUNICIPAL CODE

RECOMMENDED ACTION: Adopt Resolution No. CC 2025-05.

6.3 Consideration of Resolution No. CC 2025-06 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF INDUSTRY, CALIFORNIA, REQUESTING THE BOARD OF SUPERVISORS OF THE COUNTY OF LOS ANGELES TO RENDER SPECIFIED SERVICES TO THE CITY RELATING TO THE CONDUCT OF A GENERAL MUNICIPAL ELECTION TO BE HELD ON TUESDAY, JUNE 3, 2025

RECOMMENDED ACTION: Adopt Resolution No. CC 2025-06.

6.4 Consideration of Amendment No. 1 to the Professional Services Agreement with Elevate Public Affairs, LLC, for public relations consulting services, increasing compensation by $220,000.00, updating the scope of services and rate schedule

RECOMMENDED ACTION: Approve Amendment No. 1.

6.5 Consideration of the Citywide Americans with Disabilities Act (ADA) Self-Evaluation and Transition Plan

RECOMMENDED ACTION: Approve a Citywide ADA Transition Plan.

6.6 Consideration of Amendment No. 4 to the Professional Services Agreement with Ninyo & Moore Geotechnical and Environmental Services Consultants, for On-Call Geotechnical Engineering Services, extending the term through December 30, 2027, revising the scope of services, revising the Rate Schedule, and increasing compensation by $200,000.00

RECOMMENDED ACTION: Approve the Amendment.

7. ACTION ITEM

7.1 Consideration of a Resolution approving Development Plan Application No. 24-04 with conditions of approval, for the demolition of an existing 313,611 square foot industrial building and the construction of a new 294,000 square foot industrial building and associated improvements, located at 16425 Gale Avenue, City of Industry, California, and adopting a Notice of Exemption regarding same, and making findings in support thereof

RECOMMENDED ACTION: Adopt Resolution No. CC 2025-04 approving Development Plan No. 24-04, with the Standard Requirements and Conditions of Approval contained in the Resolution and adopt a Notice of Exemption regarding same.

8. PUBLIC HEARING

8.1 Consideration of Resolutions approving Development Plan Application No. 23-02, and Conditional Use Permit 23-09 to allow Costco to enlarge its existing gasoline pump canopy from 3,818 square feet to 9,418 square feet, increase the number of multi-fuel dispensers from 8 to 15, and make associated site improvements at 17550 Castleton Street, City of Industry, California, and adopt a Notice of Exemption regarding same, and make findings in support thereof

RECOMMENDED ACTION: 1) Adopt Resolution No. CC 2025-01 approving a Notice of Exemption for the Project; 2) Adopt Resolution No. CC 2025-02, approving Development Plan No. 23-02, with the Standard Requirements and Conditions of Approval; and 3) Adopt Resolution No. CC 2025-03, approving Conditional Use Permit No.23-09

9. **CLOSED SESSION**

9.1 CONFERENCE WITH LEGAL COUNSEL – ANTICIPATED LITIGATION
Significant exposure to litigation; Pursuant to Government Code Section 54956.9(d)(2) One potential case

9.2 CONFERENCE WITH REAL PROPERTY NEGOTIATORS
Pursuant to Government Code Section 54956.8:

Property:	220 N Hacienda Blvd; 8208-025-952
Agency Negotiators:	Joshua Nelson, City Manager James M. Casso, City Attorney
Negotiating Parties:	Barrage Industrial, LLC
Under Negotiation:	Price and terms of payment

10. **CITY MANAGER REPORTS**

11. **AB 1234 REPORTS**

12. **CITY COUNCIL COMMUNICATIONS**

13. **PUBLIC COMMENTS**

14. Adjournment. The next regular City Council Meeting is Thursday, February 13, 2025, at 9:00 a.m.

ITEM NO. 6.2

CITY OF INDUSTRY

MEMORANDUM

TO: Honorable Mayor Moss and Members of the City Council
FROM: Joshua Nelson, City Manager
STAFF: Julie Gutierre Robles
DATE: January 23, 2025
SUBJECT:

Consideration of Resolution No. CC 2025-05 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF INDUSTRY, CALIFORNIA, CALLING FOR THE HOLDING OF AN ALL MAIL BALLOT ELECTION TO BE HELD ON JUNE 3, 2025, FOR THE ELECTION OF CERTAIN CITY COUNCIL MEMBERS, IN ACCORDANCE WITH THE PROVISIONS OF STATE LAW, THE CITY'S CHARTER AND THE CITY'S MUNICIPAL CODE

Attachments

Resolution No. CC2025-05

RESOLUTION NO. CC 2025-05

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF INDUSTRY, CALIFORNIA, CALLING FOR THE HOLDING OF AN ALL MAIL BALLOT ELECTION TO BE HELD ON JUNE 3, 2025, FOR THE ELECTION OF CERTAIN CITY COUNCILMEMBERS, IN ACCORDANCE WITH THE PROVISIONS OF STATE LAW, THE CITY'S CHARTER AND THE CITY'S MUNICIPAL CODE

WHEREAS, pursuant to the provisions set forth in Section 1.12.010 of the City's Municipal Code ("Code"), the City's general municipal election is to be held on the first Tuesday after the first Monday in June of each odd numbered year; and

WHEREAS, in accordance with the provisions of the Article III, Section 300 of the City's Charter, the term of office for each Councilmember is four years, and three four-year terms are filled at one general municipal election, and two four-year terms are filled at the subsequent election; and

WHEREAS, a General Municipal Election ("Election") for the election of two City Councilmembers shall be held on June 3, 2025.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF INDUSTRY HEREBY FINDS, DETERMINES AND RESOLVES AS FOLLOWS:

SECTION 1. Pursuant to the requirements of the laws of the State of California, the City's Charter and the City's Code, there is called and ordered to be held in the City of Industry, California, on Tuesday, June 3, 2025, an Election for the purpose of electing two (2) City Councilmembers, each for a full term of four (4) years.

SECTION 2. The ballots to be used at the Election shall be in form and content as required by law.

SECTION 3. The City's Elections Official is authorized, instructed and directed, to procure and furnish any and all official ballots, notices, printed matter and all supplies, equipment and paraphernalia that may be necessary in order to properly and lawfully conduct the Election.

SECTION 4. The Election will be conducted pursuant to Chapter 2 (Conduct of Mail Ballot Elections) of Division 4 (Mail Ballot Elections), commencing with Section 4100 of the California Elections Code, only where not inconsistent with the City's Charter and City ordinances.

SECTION 5. In accordance with Section 4103(a) of the Elections Code, ballots cast in this Election must be returned to the office of the City's Elections Official no later than 8:00 p.m. on Election day. Further, pursuant to the provisions set forth in Sections 4103(b), ballots cast in the Election must be received in the office of the City's Elections Official via the United States Postal

Service or a bona fide private mail delivery company, no later than three days after the date of the Election, so long as the ballot is postmarked on or before the date of the Election, or is time stamped or date stamped by a bona fide private mail delivery company on or before that date; or if the ballot has no postmark, a postmark with no date, or an illegible postmark, the vote by mail ballot identification envelope is date stamped by the City's Elections Official upon receipt of the vote by mail ballot from the United States Postal Service or a bona fide private mail delivery company, and is signed and dated pursuant to Elections Code Section 3011, on or before the date of the Election.

SECTION 6. In all particulars not recited in this Resolution, the Election shall be held and conducted as provided by law for holding municipal elections.

SECTION 7. Notice of the time and place of holding the Election is given and the City's Elections Official is authorized, instructed and directed to give further or additional notice of the Election, in time, form and manner as required by law.

SECTION 8. The City Council hereby authorizes the City's Elections Official to administer the Election and directs that all reasonable and actual election expenses be paid by the City upon presentation of a properly submitted bill.

SECTION 9. The provisions of this resolution are severable and if any provision, clause, sentence, word or part thereof is held illegal, invalid, unconstitutional, or inapplicable to any person or circumstances, such illegality, invalidity, unconstitutionality, or inapplicability shall not affect or impair any of the remaining provisions, clauses, sentences, sections, words or parts thereof of the Resolution or their applicability to other persons or circumstances.

SECTION 10. The City Clerk shall certify to the passage and adoption of this Resolution and enter it into the book of original Resolutions.

(SIGNATURES AND RECORD OF VOTE ON FOLLOWING PAGE)

PASSED, APPROVED AND ADOPTED by the City Council of the City of Industry at a regular meeting held on January 23, 2025, by the following vote:

Resolution No. CC2025-06

RESOLUTION NO. CC 2025-06

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF INDUSTRY, CALIFORNIA, REQUESTING THE BOARD OF SUPERVISORS OF THE COUNTY OF LOS ANGELES TO RENDER SPECIFIED SERVICES TO THE CITY RELATING TO THE CONDUCT OF A GENERAL MUNICIPAL ELECTION TO BE HELD ON TUESDAY, JUNE 3, 2025

WHEREAS, a General Municipal Election is to be held in the City of Industry, California ("City"), on June 3, 2025; and

WHEREAS, in the course of conduct of the election it is necessary for the City to request certain services from the County of Los Angeles ("County"); and

WHEREAS, all necessary expenses in performing these services shall be paid by the City.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF INDUSTRY HEREBY FINDS, DETERMINES AND RESOLVES AS FOLLOWS:

SECTION 1. Pursuant to the provisions of California Elections Code Section 10002, the City Council requests the Board of Supervisors of the County to permit the County Election Department to prepare and furnish the following for use in conducting the City's election:

1. The computer record of the names and addresses of all eligible registered voters in the City in order that the City's consultant may:

    a. Produce labels for vote-by-mail voters;
    b. Produce labels for sample ballot pamphlets;
    c. Print rosters of voters and street indexes

2. Voter signature verification services as needed;

3. Make available to the City, election supplies, equipment and assistance necessary to conduct the election in accordance with state law.

SECTION 2. The City shall reimburse the County for services performed when the work is completed and upon presentation to the City of a properly approved bill.

SECTION 3. The City Clerk is directed to forward without delay, a copy of this Resolution, to the County Board of Supervisors and to the County Election Department.

SECTION 4. The provisions of this resolution are severable and if any provision, clause, sentence, word or part thereof is held illegal, invalid, unconstitutional, or inapplicable to

any person or circumstances, such illegality, invalidity, unconstitutionality, or inapplicability shall not affect or impair any of the remaining provisions, clauses, sentences, sections, words or parts thereof of the Resolution or their applicability to other persons or circumstances.

SECTION 5. The City Clerk shall certify to the passage and adoption of this Resolution and enter it into the book of original Resolutions.

PASSED, APPROVED AND ADOPTED by the City Council of the City of Industry at a regular meeting held on January 23, 2025, by the following vote:

CITY COUNCIL

ITEM NO. 6.4

CITY OF INDUSTRY

MEMORANDUM

TO:	Honorable Mayor Moss and Members of the City Council
FROM:	Joshua Nelson, City Manager
STAFF:	Sam Pedroza, Assistant City Manager
DATE:	January 23, 2025
SUBJECT:	Consideration of Amendment No. 1 to the Professional Services Agreement with Elevate Public Affairs, LLC, for public relations consulting services, increasing compensation by $220,000.00, updating the scope of services and rate schedule

BACKGROUND

On October 13, 2022, the City Council approved a Professional Services Agreement ("Agreement") with Elevate Public Affairs, LLC ("Elevate") for a not-to-exceed amount of $1,000,000.00 through October 31, 2027. Elevate provides public relations consulting services to the City. These services include assisting City staff with developing press releases, fact sheets, and other informational materials; updating the City's website and social media with upcoming events; preparing print, digital, and other media to attract businesses to the City; and providing day-of support for special events.

DISCUSSION

Due to the increased demand for event planning services provided by Elevate, the reimbursable expenses under the current Agreement have been fully utilized. Amendment No. 1 will allocate an additional $180,000.00 for reimbursable expenses for the remainder of the agreement. This amount will cover costs associated with photography, videography, graphic design, postage, print and digital flyers, and related support services for City events. The amendment will also expand the scope of services to include event management, ensuring alignment with the services Elevate provides to the City. Additionally, it will account for the extra staff support required for special events scheduled in calendar year 2025 and update the rate schedule to incorporate event planning services as reimbursable expenses.

FISCAL IMPACT

The cost for public relations consulting services is included in the adopted budget for FY 24/25 under Community Promotion and Economic Development -- Professional Services (Account No. 100-621-5120.01). No appropriation is needed at this time.

RECOMMENDATION

Staff recommends that the City Council approve Amendment No. 1 to the Agreement.

Attachments

Amendment No. 1 to the Professional Services Agreement with Elevate

AMENDMENT NO. 1
TO PROFESSIONAL SERVICES AGREEMENT WITH
ELEVATE PUBLIC AFFAIRS, LLC.

This Amendment No. 1 to the Professional Services Agreement ("Agreement"), is made and entered into this 1st day of December, 2024 ("Effective Date"), by and between the City of Industry, a municipal corporation ("City") and Elevate Public Affairs, LLC, a California limited liability company ("Consultant"). The City and Consultant are hereinafter collectively referred to as the "Parties".

RECITALS

WHEREAS, on or about October 13, 2022, the Agreement was entered into and executed between the City and Consultant for public relations consulting services; and

WHEREAS, given an increased demand for event services, funds under the Agreement were expended prior to the expiration of the term, and it is therefore necessary to amend the Agreement to increase compensation for reimbursable expenses; and

WHEREAS, the Parties desire to amend the Agreement to update the Scope of Services and the Rate Schedule, and increase compensation by $220,000.00; and

WHEREAS, for the reasons set forth herein, the City and Consultant desire to enter into this Amendment No. 1, as set forth below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual covenants, promises and agreements set forth herein, it is agreed the aforesaid Agreement, and incorporated herein by reference, shall remain in full force and effect except as otherwise hereinafter provided:

Section 4. PAYMENT

Section 4(a) is hereby revised in its entirety:

The City agrees to pay Consultant monthly, in accordance with the payment rates and terms and the schedule of payment as set forth in Exhibit B ("Rate Schedule"), attached hereto and incorporated herein by this reference as though set forth in full, based upon actual time spent on the above tasks. This amount shall not exceed One Million Two Hundred Twenty Thousand Dollars ($1,220,000.00) for the total Term of the Agreement unless additional payment is approved as provided in this Agreement.

EXHIBIT A. SCOPE OF SERVICES

The Scope of Services is hereby rescinded in its entirety and replaced with the Scope of Services set forth in Attachment 2, attached hereto and incorporated herein by

reference.

EXHIBIT B. RATE SCHEDULE

The Rate Schedule is hereby rescinded in its entirety and replaced with the Rate Schedule set forth in Attachment 1, attached hereto and incorporated herein by reference.

The person or persons executing this Agreement on behalf of Consultant represents and warrants that he/she has the authority to execute this Agreement on behalf of the Consultant and has the authority to bind Consultant to the performance of its obligations hereunder.

IN WITNESS WHEREOF, the Parties hereto have caused this Amendment No. 1 to be executed as of the Effective Date.

EXHIBIT A

SCOPE OF SERVICES

Consultant shall provide the following services including, but not limited to:

Strategic Communications

- Media clips and listening reports
- Develop fact sheets of City initiatives and other projects funded and/or managed by the City
- Develop informational material to communicate to City residents, businesses, and the public
- Draft materials to share with appropriate publications to attract businesses to the City
- Identify speaking opportunities
- Assist in application submissions for awards or recognition
- Prepare materials and article submission opportunities with key business journals, membership and trade publications, domestic and international to highlight City initiatives

Media

- Assist the City with its media relations
- Facilitate media inquiries
- Prepare and disseminate press releases and media advisories
- Draft talking points for press interviews
- Schedule and manage media interviews about City events and initiatives
- Develop friendly relationships with reporters on behalf of the City

Event Management

- Coordinate event production for State of the City, USA BMX, City of Industry BBQ Picnic, YAL Terror Trail/Halloween Event, City of Industry Holiday Tree Lighting, Taste of the City, and the Rodeo
- Stakeholder coordination

Social Media

- Social Media Management including original content creation
- Manage all digital platforms and social media for improved access to City news and updates

Special Event Additional Support

- Event Management
- Marketing Management
- Video Management
- Ticket Management
- Website Management
- On-site Support
- Coordination with Organizations

- Coordination with Vendors/Businesses
- Stakeholder Coordination
- Material Development: Social/Media Advisory/Press Release/Talking Points
- Material Developments: Talking Points/Presentation/etc.
- Application Coordination - LA County Public Health Dept./ABC Business applications
- Monthly meetings/weekly meetings/real-time support of media management/ticket sales/etc.

Attachment 1

EXHIBIT B

RATE SCHEDULE

Activity	Rate
Services set forth in Exhibit A	$15,000.00/monthly
Special Event Additional Support	
USA BMX:	$2,500.00
City of Industry BBQ Picnic:	$2,500.00
YAL Terror Trail/Halloween Event:	$2,500.00
City of Industry Holiday Tree Lighting:	$2,500.00
State of the City:	$10,000.00
Taste of the City:	$10,000.00
Industry Hills Charity Pro Rodeo:	$10,000.00
Not to exceed amount of $40,000.00 for Calendar Year 2025 for special event additional support.	
Reimbursement Expenses	$280,000.00 (not to exceed the term of the Agreement)

Reimbursable Expenses – City shall reimburse Consultant its actual costs for all photocopy, videography, photography, graphic design, postage, print and digital flyers or similar media, or related support services for event planning, upon prior written approval from City and upon submittal of evidence of said costs along with monthly invoices, as set forth in the Agreement.

CITY COUNCIL

ITEM NO. 6.5

FINAL

City of Industry Americans with Disabilities Act (ADA) Self-Evaluation and Transition Plan

VOLUME 1, 2, AND 3

PREPARED BY THE OWEN GROUP

FINAL REPORT NOVEMBER 2024

November 2024

Mr. Matthew Hudson, Engineering Manager
City of Industry
15625 Mayor Dave Way
City of Industry, California 97144

Dear Mr. Hudson,

Bureau Veritas has performed a review of the Final ADA Self-Evaluation Transition Plan prepared by the Owen Group for the City of Industry. Based on the review, Bureau Veritas recommends that the following be applied regarding the obstruction barriers included in Appendix N-9 of the transition plan.

Based on Design Information Bulletin Number 82-06 published on November 16, 2017, by the Department of Transportation Division of Design Office of Standards and Procedures Pedestrian Accessibility Guidelines for Highway Projects per Section 4.1.7 Safe Harbor, Bureau Veritas concludes, that if the pedestrian route meets the requirements for eligibility for the safe harbor, that the safe harbor shown below regarding the clear width of the pedestrian route may be applied. It is the responsibility of the City of Industry to provide documentation proving that the requirements are met.

When implementing safe harbor to clear width, the following ADAAG and UFAS requirements apply:

1. 36 inches minimum clear width.
2. If less than 60 inches clear width, then passing spaces at least 60 inches by 60 inches shall be located at reasonable intervals not to exceed 200 feet.
3. The clear width shall be permitted to be reduced to 32 inches minimum for a length of 24 inches maximum provided the reduced segments are separated by segments that are 48 inches long minimum and 36 inches wide minimum.

If on a sidewalk, the minimum clear width does not include the curb width.

If you have questions regarding any elements of our response, please feel free to contact me.

Thank you,

Susan D. Lloyd

Susan D Lloyd, ADAC, APAC-BE
Senior Project Manager

List of Commonly Used Terms

Accessible	A site, building, facility, public right of way, or portion thereof that provides useable access to people with disabilities in compliance with the design requirements of the 2010 ADA Standards.
Accessible Pedestrian Signal (APS)	A device that communicates information about the WALK phase in audible and vibrotactile formats. (Public Right Of Way Accessibility Guidelines R105.5)
ADA Coordinator	An individual responsible for overseeing and coordinating the administrative requirements of a public entity's Title II Americans with Disabilities Act (ADA) compliance efforts and the ADA Self-Evaluation and Transition Plan and responding to complaints filed by the public.
ADA Transition Plan	An adopted listed of the physical barriers in a public entity's facility that limits the accessibility of its programs, activities or services to individuals with disabilities; a detailed outline of the methods that the public entity will use to remove the barriers identified and make the facilities accessible; the schedule for taking the necessary steps to achieve compliance. If the period for achieving compliance is longer than one year, the plan should identify the interim steps that the public entity will take during each year of the transition period. The plan includes the name of the official responsible for the plan's implementation.
Alteration	A change to a building or facility, including the public right of way that affects or could affect the usability of the building or facility or portion thereof. Alterations include, but are not limited to, remodeling, renovation, rehabilitation, reconstruction, historic restoration, resurfacing of circulation paths or vehicular ways, changes or rearrangement of the structural parts or elements, and changes or rearrangement in the plan configuration of walls and full-height partitions. Normal maintenance, re-roofing, painting or wallpapering, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.
Americans with Disabilities Act (ADA)	The Americans with Disabilities Act of 1990 is a federal law which provides civil rights protections to individuals with disabilities and guarantees them equal opportunity in public accommodations, employment, transportation, state and local government services, and telecommunications.
Americans with Disabilities Act Accessibility Guidelines (ADAAG)	The ADAAG contains scoping and technical requirements for accessibility to buildings and public facilities by individuals with disabilities under the ADA.
Assurances	A statement of guarantee given in consideration of and for receiving federal aid.

Auxiliary Aids and Services	Auxiliary aids and services include: (1) Qualified interpreters: on-site or through video remote interpreting (VRI) services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing; (2) Qualified readers: taped texts; audio recordings; Brailed materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision; (3) Acquisition or modification of equipment or devices; and (4) Other similar services and actions. (28 CFR §35.104)
Blended Curb or Transition	A curb ramp shallower than 1:20 (5%), where the sidewalk is blended into or is flush with the street.
Building	Any structure used or intended for supporting or sheltering any use or occupancy.
Circulation Path	An exterior or interior way of passage provided for pedestrian travel including, walks, hallways, courtyards, elevators, platform lifts, ramps, stairways, and landings.
Complainant	The person filing a complaint.
Complaint	A complaint is a claimed violation of the ADA.
Compliance	The satisfactory condition existing when a recipient has effectively complied with the current ADA standards.
Compliant	Meets all accessibility requirements in effect at the time of construction or alteration.
Cross Slope	The slope that is perpendicular to the direction of accessible pedestrian travel.
Crosswalk	The part of a roadway at an intersection that is included within the extensions of the lateral lines of the sidewalks on opposite sides of the roadway, measured from the curb line or, in the absence of curbs, from the edges of the roadway or, in the absence of a sidewalk on one side of the

	roadway, the part of the roadway included within the extension of the lateral lines of the sidewalk at right angles to the centerline.
Curb Line	A line at the face of the curb that marks the transition from the roadway to a sidewalk or planting strip between the sidewalk and the gutter or roadway.
Curb Ramp	A short ramp cutting through a curb or built up to it.
Detectable Warning	A standardized surface feature built in or applied to walking surfaces or other elements to warn of hazards on a circulation path.
Directional Curb Ramp	A curb ramp that is aligned parallel with the crosswalk, so there is a straight path of travel from the top of the curb ramp, to the center of the crosswalk, to the top of the curb ramp on the opposite side.
Disability	Disability is (a) a physical or mental impairment that limits one or more of the major life activities of an individual, (b) a record of such an impairment, or (c) being regarded as having such impairment.
Discrimination on the Basis of Disability	Discrimination on the basis of disability means to: • Limit, segregate, or classify a citizen in a way that may adversely affect opportunities or status because of the person's disability; • Limit, segregate, or classify a participant in a program or activity offered to the public in a way that may adversely affect opportunities or status because of the participant's disability; • Participate in a contract that could subject a qualified citizen with a disability to discrimination; • Use any standards, criteria, or methods of administration that have the effect of discriminating on the basis of disability; • Deny equal benefits because of a disability; • Fail to make reasonable accommodations to known physical or mental limitations of an otherwise qualified individual, unless it can be shown that the accommodation would impose an undue burden on the City's operations; • Use selection criteria that exclude otherwise qualified people with disabilities from participating in the programs or activities offered to the public; and • Failure to use tests, including eligibility tests, in a manner that ensures that the test results accurately reflect the qualified applicant's skills or aptitude to participate in a program or activity.
Element	An architectural or mechanical component of a building, facility, space, site or public right of way.
Entrance	Any access point to a building or portion of a building or facility used for the purpose of entering. An entrance includes the approach walk, the vertical access leading to the entrance platform, the entrance platform itself,

	vestibule if provided, the entry door or gate, and the hardware of the entry door or gate.
Equivalent Facilitation	The use of designs, products, or technologies as alternatives to those prescribed, resulting in substantially equivalent or greater accessibility and usability. In determining equivalent facilitation, consideration shall be given to means that provide for the maximum independence of persons with disabilities, while presenting the least risk of harm, injury or other hazard to such persons or others.
Facility	All or any portion of buildings, structures, site improvements, elements, and pedestrian routes or vehicular ways located on a site.
Federal Financial Assistance:	Any grant, loan, contract (other than a procurement contract or a contract of insurance or guaranty), or any other arrangement by which the Department provides or otherwise makes available assistance in the form of: (a) Funds; (b) Services of Federal personnel; or (c) Real or personal property or any interest in, or use of such property, including: (1) Transfers or leases of such property for less than fair market value or for reduced consideration; and (2) Proceeds from a subsequent transfer or lease of such property if the Federal share of its fair market value is not returned to the Federal Government. (49 CFR §27.5)
Flush Transition	The adjacent surfaces at transitions at curb ramps to walks, gutters, and streets shall be at the same level.
Frontage	The street frontage that includes all adjacent pedestrian facilities, including crosswalks, created by, prolongated from, or connected to any required or provided sidewalk improvements.

Governing Standards	<u>The most current edition in force of any and all of the following:</u> The Americans with Disabilities Act of 1990 (ADA) The 2010 ADA Standards for Accessible Design (ADAS) The implementing regulations at 28 CFR Parts 35 and 36 California Building Code [Part 2 of Title 24] (CBC) 2019 California Vehicle Code (CVC) California Manual on Uniform Traffic Control Devices, current edition (MUTCD or CAMUTCD) City Municipal Code <u>Best Practice Guidelines:</u> Shared-Use Paths and Class I Bicycle Paths: The Proposed Supplements to the Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way - Shared Use Paths (PROWAG) AASHTO Guide for the Development of Bicycle Facilities; Chapter 5: Design of Shared Use Paths (AASHTO, 2012) Temporary Traffic Control and Devices: Work Area Traffic Control Handbook [WATCH] (WATCH Committee of Public Works Standards, Inc.) <u>Curb Ramps:</u> Designing Sidewalks and Trails for Access - Part II of II: Best Practices Design Guide (FHWA, rev. 2/10/2014)
Grade Break	The meeting line of two adjacent surfaces of different slope (grade).
Graphic Information System	A geographic information system (GIS) lets users visualize, question, analyze, interpret, and understand data to reveal relationships, patterns, and trends.
Qualified Individual with a Disability	An individual with a disability who, with or without reasonable modification to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity.
Island	Curbed or painted area outside the vehicular path that is provided to separate and direct traffic movement, which also may serve as a refuge for pedestrians.
Maneuvering Space	The space where, because of the configuration of the physical environment or the location of accessible elements, a pedestrian is required to turn, or maneuver, or change direction in order to proceed along an accessible route.
Marked Crosswalk	Any portion of a roadway at an intersection or elsewhere that is distinctly indicated for pedestrian crossing by lines or other markings on the surface.
Parallel Curb Ramp	A system of two sloped ramps that run parallel to the curb line from a common lower landing that is approximately level with the street.

Pedestrian	(a) A “pedestrian” is a person who is afoot or who is using any of the following: (1) A means of conveyance propelled by human power other than a bicycle; (2) An electric personal assistive mobility device. (b) “Pedestrian” includes a person who is operating a self-propelled wheelchair, motorized tricycle, or motorized quadricycle and, by reason of physical disability, is otherwise unable to move about as a pedestrian.
Pedestrian Access Route	A continuous and unobstructed walkway within a pedestrian circulation path that provides accessibility. (PROWAG R105.5)
Perpendicular Curb Ramp	A curb ramp with a main slope running perpendicular to the curb line and with one or more flared side slopes.
Physical or Mental Impairments	Physical or mental impairments may include, but are not limited to: vision, speech, and hearing impairments; emotional disturbance and mental illness; seizure disorders; mental retardation; orthopedic disabilities; learning disabilities; diabetes; heart disease; nervous conditions; cancer; asthma; hepatitis B; HIV infection (HIV condition); and drug addiction if the addict has successfully completed or is participating in a rehabilitation program and no longer uses illegal drugs.
Public Right of Way	Land or property owned by a public entity and usually acquired for or devoted to transportation or pedestrian purposes.
Public Use	Interior or exterior, rooms, space, or elements that are made available to the public. Public use may be provided at a building or facility that is privately or publicly owned.
Ramp	A walking surface that has a running slope steeper than 5% grade.
Reasonable Program Modifications	If the individuals' disabilities prevent them from performing the essential functions of the program or activity, it is necessary to determine whether reasonable program modifications would enable these individuals to perform the essential functions of the program or activity. Reasonable program modification is any change in program or activity or in the way things are customarily done, that enables an individual with a disability to enjoy equal program opportunities. Accommodation means modifications or adjustments: • To a registration or application process to enable an individual with a disability to be considered for the program or activity; • To the program or activity environment in which the duties of a position are performed so that a person with a disability can perform the essential functions of the program or activity; and • That enable individuals with disabilities to enjoy equally the benefits of the program or activity as other similarly situated individuals without disabilities enjoy. Modification includes making existing facilities and equipment used by individuals readily accessible and usable by individuals with disabilities. Modification applies to:

	• All decisions and to the application or registration process; • All services provided in connection with the program or activity; and • Known disabilities only. Modification is not required if: • It changes the essential nature of a program or activity of the person with a disability; • It creates a hazardous situation; • Adjustments or modifications requested are primarily for the personal benefit of the individual with a disability; or • It poses an undue burden on the City.
Regarded as Having a Record of Impairment	An individual is disabled if they have a history of having an impairment that substantially limits the performance of a major life activity; or have been diagnosed, correctly or incorrectly, as having such impairment.
Regarded as Having a Disability	An individual is disabled if they are treated or perceived as having an impairment that substantially limits major life activities, although no such impairment exists.
Running Slope	The slope that is parallel to the direction of travel expressed as a ratio of rise to run in the public right of way. This is usually called grade and is expressed as a percentage.
Section 504	Section 504 of the US Rehabilitation Act of 1973, which prohibits discrimination in any program or activity receiving federal financial assistance.
Section 508	Section 508 of the US Rehabilitation Act of 1973, extends the prohibition of discrimination in any program or activity receiving federal financial assistance in regards to electronic and information technology.
Sidewalk	That portion of a public right of way between the curb line or lateral line of a roadway and the adjacent property line that is improved for use by pedestrians.
Street Furniture	Elements in the public right-of-way intended for use by pedestrians.
Subrecipient	An entity or person that indirectly (usually through a grant or contract) receives federal financial assistance to implement a program or activity, which obligates them to comply with the Section 504 and its implementing regulations. Subrecipients include, but are not limited to, metropolitan planning organizations, local public agencies, and colleges/universities.
Substantial Limitations of Major Life Activities	An individual is disabled if they have a physical or mental impairment that (a) renders them unable to perform a major life activity, or (b) substantially limits the condition, manner, or duration under which they can perform a particular major life activity in comparison to other people.

	Major life activities are functions such as caring for oneself, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working. In determining whether physical or mental impairment substantially limits the condition, manner, or duration under which an individual can perform a particular major life activity in comparison to other people, the following factors shall be considered: • The nature and severity of the impairment; • The duration or expected duration of the impairment; and • The permanent or long-term impact (or expected impact) of or resulting from the impairment.
Technically Infeasible	An alteration that has little likelihood of being accomplished because existing structural conditions would require removing or altering a load bearing member that is an essential part of the structural frame or because other existing physical or site constraints prohibit modification or addition of elements, spaces or features that are in full strict compliance with the minimum requirements of the 2010 ADA Standards.
Undue Burden	Undue burden means significant difficulty or expense. In determining whether an action would result in an undue burden, factors to be considered include: (1) The nature and cost of the action needed under this part; (2) The overall financial resources of the site or sites involved in the action; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements that are necessary for safe operation, including crime prevention measures; or the impact otherwise of the action upon the operation of the site; (3) The geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity; (4) If applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number, type, and location of its facilities; and (5) If applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.
Vibrotactile	A vibrating surface, located on the accessible pedestrian signal button that communicates information through touch. (PROWAG R105.5)

Executive Summary

Executive Summary

Introduction

The American with Disabilities Act (ADA) of 1990 is a federal civil rights law that mandates equal opportunity for individuals with disabilities. The ADA is comprised of five titles prohibiting discrimination against persons with disabilities in employment (Title I), State and local government services (Title II), public accommodations (Title III), telecommunications (Title IV), and miscellaneous (Title V).

The City of Industry (City) has undertaken a comprehensive evaluation of its policies, programs, and facilities to determine the extent to which individuals with disabilities may be restricted to access to City services and activities.

This document established the City's commitment to the development and maintenance of accessible features. This report will also guide the planning and implementation of necessary program and facility modifications in order to comply with the Americans with Disabilities Act.

Purpose

This ADA Self-Evaluation and Transition Plan has been prepared to fulfill the requirements set forth in Title II of the ADA (28 CFR §35.105 and 28 CFR §35.150(d)).

The City of Industry is obligated to observe all requirements of Title I in its employment practices, Title II in its policies, programs and services, and any parts of Titles IV and V that apply to the City and its programs, services, or facilities.

Title II has the broadest impact on the City of Industry. Included in Title II are administrative requirements for all government entities employing more than 50 people, as listed below:

1. Completion of a Self-Evaluation
2. Development of an ADA Grievance (Complaint) procedure
3. Designation of an ADA Coordinator to oversee Title II compliance
4. Development of a Transition Plan to schedule the removal of barriers

While the City of Industry employs less than 50 people, the City has chosen to follow best practices and pursue the completion of this ADA Self-Evaluation and Transition Plan.

Methodology

The process to prepare this ADA Self-Evaluation and Transition Plan included discussions with Department heads and employees; the administration of departmental program accessibility questionnaires; a review of the City's published rules, regulations and policies; surveys available to the public that identify barriers in public facilities, streets, and city programs, services, and activities; and a public involvement process in the preparation and review of this report. The public was informed about the preparation of this report and their opportunity to comment through a public announcement.

A City-wide assessment of all City-owned facilities was performed to identify physical barriers, the results are presented in Volume 2. A City-wide assessment of the sidewalks, curb ramps, and traffic signals with the right of way throughout the City was also performed and is presented in Volume 3 of this report. Data on construction project costs from an industry standard database was used to calculate the costs of the barrier removal recommendations in Volumes 2 and 3.

Public Participation

Public entities shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the Self-Evaluation process by submitting comments. A public input questionnaire was available at the public counters and was posted on the City website on July 19, 2019 to afford members of the public an opportunity to provide input. The Public Input Questionnaire is provided in **Appendix D.**

The City has provided an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the Transition Plan by submitting comments. A copy of the transition plan shall be made available for public inspection.

The dissemination of information and requests for comments took place through the following methods:

- City Website and Social Media
- Direct Correspondence with the local disability related organizations

Content and Organization of this Report

The ADA Self-Evaluation and Transition Plan is divided into three (3) Volumes as listed below:

- Volume 1: Self-Evaluation of Programs, Policies, and Procedures
- Volume 2: Self-Evaluation and Transition Plan for City Facilities
- Volume 3: Self-Evaluation and Transition Plan for Public Right of Way

Findings and Recommendations

Programs, Policies, and Procedures (Volume 1)

City Programs, policies, and procedures were reviewed for the purpose of this evaluation through City department questionnaires and meetings with City staff. It is recommended to maintain accessibility to programs and services through these recommendations, ongoing improvement efforts and modified business practices.

Public Review: This plan shall be available for public review (28 CFR §35.150(d)(1)). The City shall maintain this plan (in all the appropriate alternate formats) for public access review and inspection.

Terminology: Any future City publications shall be reviewed for the term "handicapped" and "disabled person." The words "individuals with disabilities" or "persons with disabilities" shall replace those terms.

Maintenance of Records: For three years after completion of the Self-Evaluation, the City must keep a record of any problems identified (28 CFR §35.105). Ongoing customer satisfaction surveys and other methods for public input will assist with ongoing outreach to enhance the efforts of the City to serve individuals with disabilities; therefore, the City shall continue the availability of the public input questionnaire.

Training: On-going compliance with the ADA can only be achieved if City staff and officials receive proper training. The City shall develop and implement an annual training program for all employees. Staff training programs shall include the following subjects:

> Disability etiquette: Staff members who interact with the public shall be aware of the many tips on interacting with individuals with disabilities.
>
> Acceptable methods for reasonable accommodations: Staff members shall be aware of simple and easy methods to accommodate individuals with disabilities.
>
> Resources available: Staff members should know about the availability of auxiliary aids, services, assistive listening devices, etc. All staff members should know where to look and who to call.
>
> ADA Coordinator: Consider joining the various organizations that hold training specifically for ADA coordinators, such as the ADA Coordinator Certification Program and the National Association of ADA Coordinators.
>
> Accessible PDF: Regardless of whether documents are created in Adobe PDF, Microsoft Word, or another format, there are right and wrong ways to create documents in order to ensure people with disabilities can access them. It is advisable to provide training to City staff on PDF accessibility.

Training resources: Various training resources are readily available through the United States Access Board and the Pacific ADA Network, as well as through other state and national organizations. A complete list of resources is provided in Section 1.4 ADA Toolkit and List of Resources.

Policies and Procedures Implementation Plan: Refer to **Appendix A** for the Policies and Procedures Implementation Plan.

City Facilities (Volume 2)

Field Assessment: A Certified Access Specialist (CASp) conducted an assessment of facilities in the City of Industry in the spring of 2019. A database of non-compliant findings that create a physical barrier to the public, is provided in **Appendix M.** The following City facilities were assessed as part of this report: City Hall, Community Services Center, Council Chambers, Cultural Homestead Museum, El Encanto Hospital, Expo Center, Fire Station 118, and Metro Station.

Costs: Opinions of costs of repair or replacements presented in this report are approximations only and should not be interpreted as bids or offers to perform work. Actual costs can be affected by the extent of work to be done as one project, the quality of contractor, the quality of materials chosen, and the specific work conditions.

Implementation of Improvements: The City shall implement a plan for removal of accessibility barriers to City facilities per the programs offered at the locations. In the case of a barrier being presented, the City should consider moving the program to an alternative location until the facility is made compliant. Facility exterior barrier improvements such as access to a facility from parking and street walkways, accessible parking, accessible interior and exterior path of travel, accessible restrooms, and accessible meeting space shall be addressed in the initial years of transition plan.

Maintenance of accessible features: The City shall develop and implement a maintenance program for their accessible features and elements (28 CFR §35.133).

Public Right of Way (Volume 3)

Field Assessment: Streets, curb ramps, pedestrian push buttons, and transit stops were assessed in the spring of 2019 and an inventory of findings of non-compliant items and barriers to accessibility are provided in **Appendix N.** The purpose of this inventory is to provide a baseline of existing conditions in the right of way for use as the basis for the City's ADA Transition Plan.

Costs: Opinions of costs of repair or replacements presented in this report are approximations only and should not be interpreted as bids or offers to perform work. Actual costs can be affected by the extent of work to be done as one project, the quality of contractor, the quality of materials chosen, and the specific work conditions.

Implementation of Improvements: The City shall budget and implement the recommendations in the Transition Plan presented in Volume 3.

Prioritization of Projects: The Department of Justice's implementing regulations of the ADA's recommended prioritization based on location is used to determine which projects should be undertaken first. In addition to prioritization based on location as stated above, a ranking of "High, Medium, or Low" degrees of non-compliance, safety, and usability is given each barrier in the right of way. Based on the results of the barrier prioritization, an ADA Right of Way Implementation Schedule is established to improvements to curb ramps, driveways, sidewalks, and push buttons over the next 20-year period.

Funding: The plan recommends specific goals for the construction of accessibility improvements. While specifying locations and general scope of work, the plan is intended to serve as a conceptual plan whereby the extent and goals of future projects will be evaluated prior to preparing detailed cost estimates.

Volume 1

1.0 ADA Self-Evaluation of Programs, Services, Policies, and Procedures

The American with Disabilities Act (ADA) of 1990 is a federal civil rights law that mandates equal opportunity for individuals with disabilities. This ADA Self-Evaluation and Transition Plan has been prepared to fulfill the requirements set forth in Title II of the ADA (28 CFR §35.105 and 28 CFR §35.150(d)). The City of Industry (City) has undertaken a comprehensive evaluation of its policies, programs, and facilities to determine the extent to which individuals with disabilities may be restricted to access to City services and activities.

This volume describes the evaluation process of the City's policies, programs, and services, and presents the findings and recommendations.

1.1 Methodology

A Departmental program and policy questionnaire was administered to City departments and divisions. Each department questionnaire included a description of programs and services, a contact person, location of the program, and practices that facilitate the participation of persons with disabilities.

From the information provided in the completed questionnaire and follow-up interviews, staff provided information on the nature of the programs, forms and methods used to advertise the programs, services and activities, a profile of current participants, the types of equipment and materials used, testing and entrance requirements, the level of staff training, and any special modifications provided.

The City is made up of several departments, as described below:

1.1.1 Administrative Services

The Administrative Services Department coordinates municipal government operations under the direction of the City Manager, who receives policy direction from the City Council. The Department is tasked with ensuring that City services are performed to the highest professional and ethical standards in line with the City Council policies and in accordance with the City Charter and the Municipal Code. The Administrative Services Department consists of the following areas:

- City Attorney;
- City Boards and Commissions;
- City Clerk;
- City Council;
- City Manager;

- Community Support;
- Economic Development;
- Human Resources;
- Legislative Services and Intergovernmental Coordination; and
- Public Information.

1.1.2 Development Services

The Development Services Department is tasked with: coordinating multiple City divisions so that they work in concert to streamline public and private projects; ensuring public safety; collaborating with multiple outside agencies to ensure effective action and regulation; and working strategically to implement the City's General Plan and Capital Improvement Plan.

The Development Services Department is responsible for:

- Asset and Property Management;
- Streetlights
- Code Enforcement;
- Development Review and Approvals;
- Engineering;
- Environmental Programs;
- Field Operations and Maintenance;
- Habitat and Open Space Areas;
- Planning;
- Public Safety, and
- Utility Coordination.

1.1.3 Industry Public Utilities

City of Industry Public Utilities Commission (IPUC) operates a municipal electric system serving portions of business and residential properties within the city. IPUC meetings are held in the City of Industry Council Chambers. The IPUC is expanding electrical service network throughout the community. The IPUC owns and operates a 66kV/12kV Substation facility located at 208 Waddingham Way in the City of Industry.

The City of Industry is serviced by six (6) water purveyors. The water companies include the City of Industry Waterworks Systems, Suburban Water Systems, Rowland Water District, San Gabriel Valley Water District, Walnut Valley Water District, and La Puente Valley County Water District.

1.1.4 Finance

The Finance Department oversees the fiscal affairs and financial operations of the City of Industry. The core mission of the Finance Department is to safeguard the City’s public assets and fiscal resources and

maintain sound fiscal practices and financial records in accordance with Generally Accepted Accounting Principles ("GAAP") and all Federal and State laws.

The Department is responsible for:

- Accounts Payable, Accounts Receivable, and Payroll;
- Purchasing;
- Budget Preparation & Adoption;
- Debt Management;
- Information Technology Services;
- Risk Management; and
- Financial Reporting.

The following City Departments/Sub-departments responded to the questionnaire:

- City Clerk
- Code Enforcement
- Developmental Services
- Engineering / CIP Management
- Permitting
- Public Affairs
- Human Resources
- Planning and Building

The following is a list of programs and/or methods in which the City has contact with the public, as identified in the staff questionnaire:

City Clerk: Prepares agenda packets, process public records requests, and maintains agreements

Code Enforcement: Enforcement of state and local regulations, coordinate efforts with local Sheriff's Department

Development Services: Limited daily contact. Answer questions regarding procurement of goods and services, and economic and property development.

Engineering/CIP Management: Potential contacts during field visits, during staff report presentations at City Council meetings.

Permitting: Public comes to drop off or pick up permits at City Hall front counter

Public Affairs: Public relations, coordination meetings and events, producing informational and educational materials for public distribution

Human Resources: Hiring

Planning and Building: Planning and Building assist customers at the front counter on a daily basis with over the counter plan check, submittals, and permits

1.2 Program Accessibility

This report analyzes two kinds of accessibility: program accessibility and physical accessibility. For there to be an absence of discrimination, both types of accessibility must be provided.

Program Accessibility:

The policies, practices, and procedures that permit people with disabilities to participate and have access to important information. Individuals with disabilities shall be provided with an equally effective opportunity to participate in or benefit from the City's programs and services. Program accessibility must be achieved by either structural or non-structural methods. Non-structural methods include acquisition or redesign of equipment, assignment of aids, provisions of services at alternate sites, etc.

Physical Accessibility:

Requires that a facility be barrier-free. Barriers include any obstacles that prevent or restrict the entrance to or use of a facility or public rights-of-way.

The City may achieve physical accessibility by a number of methods:

- Structural methods such as altering an existing facility;
- Providing services at alternate accessible sites; and

- Designing or repairing elements in the public right of way.

When choosing a method of providing program access, the City shall give priority to the solution that results in the most integrated setting appropriate to encourage interaction among all users, including individuals with various types of disabilities. In compliance with the requirements of the ADA, the City must provide equality of opportunity. For example, the use of separate auxiliary counters to conduct transactions could be viewed as segregation; therefore, it is recommended that the main counters used for transactions and services are accessible.

1.3 Findings and Recommendations

1.3.1 Public Notice and Written Notifications

28 CFR §35.106, 28 CFR §35.163

Requirement:

The City needs to inform the public of their rights and protections provided by ADA and ensure that interested persons, including persons with impaired vision or hearing, can obtain information as to the existence and location of accessible services, activities, and facilities. The law requires the following:

- Provide information to applicants, participants, beneficiaries, employees, and other interested persons of the rights and protections afforded by Title II of the ADA
- All written materials must include notice of non-discrimination
- Provide Title II information in alternative formats to ensure that the information is accessible to people with disabilities

The law does not specifically state how the City must provide accessibility to the City's programs, services and activities. One method is to publish information in a variety of locations and formats to enhance the access to programs, services, and activities of the City.

Findings:

1. The City of Industry does not have a formal published Americans with Disabilities Act (ADA) Notice.

Recommendations:

1. **ADA notice, as provided below, shall be formally published by the City of Industry. See following page.**
2. **The notice shall be uploaded to the City Website, and posted at public counters and bulletin boards, included in social media, posted at facilities, published in local newspapers, and/or included in program announcements.**

SAMPLE AMERICANS WITH DISABILITIES ACT NOTICE

In accordance with the requirements of Title II of the Americans with Disabilities Act of 1990 (ADA), the City of Industry will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

ADA Coordinator: The ADA coordinator is responsible for coordinating the efforts of the City of Industry and investigating any concerns or complaints regarding access to City programs, services, or activities.

The ADA Coordinator for the City of Industry is:

Kathy Tai
Development Services Manager and ADA Coordinator
15625 Mayor Dave Way, City of Industry, CA 91744-0366
(626) 333-2211 Ext. 232
ktai@cityofindustry.org

Employment: The City of Industry will not discriminate based on disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under Title I of the ADA.

Effective Communication: The City of Industry will provide appropriate aids and services leading to effective communication for qualified persons with disabilities so they can participate equally in City programs, services, and activities. This includes qualified sign language interpreters, documents in Braille, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service, or activity of the City of Industry, should contact the ADA Coordinator.

Modifications of Policies and Procedures: The City of Industry will make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services, and activities. The ADA does not require the City of Industry to take any action that would fundamentally alter the nature of its programs or services or impose an undue financial or administrative burden.

Fees and Surcharges: The City of Industry will not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs.

Complaints: Complaints that a program, service or activity of the City of Industry is not accessible to persons with disabilities should be directed to the ADA Coordinator.

1.3.2 ADA Coordinator

28 CFR §35.107(a)

Requirement:

The ADA requires that the City designate at least one employee to coordinate ADA compliance. The regulations require the City to make available to interested persons the name, office address and telephone number of the ADA Coordinator.

Findings:

1. The City has a designated ADA Coordinator:

   Kathy Tai
   Development Services Manager and ADA Coordinator
   15625 Mayor Dave Way, City of Industry, CA 91744-0366
   (626) 333-2211 Ext. 232
   ktai@cityofindustry.org

Recommendation:

1. **Publish the ADA Coordinator's name on the City website.**

2. **Consider creating an ADA liaison team, consisting of representatives from the various City Departments that work with the public. This team would be trained more frequently on subjects related to disability and would assist the ADA Coordinator in various coordination efforts in implementing the ADA Transition Plan.**

3. **Provide periodic training opportunities to the ADA Coordinator regarding their roles and responsibilities under federal law.**

4. **Include ADA Coordinator contact information on public notifications.**

1.3.3 Grievance Procedures

28 CFR §35.107(b) and 28 CFR §35.170 thru 178

Requirements:

The City is required to adopt and publish grievance procedures, which provide for the prompt and fair resolution of complaints alleging any action that would be prohibited by the ADA. A Grievance Procedure shall include a description of how and where a complaint can be filed, a statement that alternative means of filing can be made available to people who require such an alternative, description of the time frame and processes to be followed, information on how to appeal an adverse decision, and a statement of how long complaint files will be retained.

Once the City establishes the grievance procedure, it shall be distributed to all agency heads, posted in public spaces, and on the City website.

Findings:

1. The City does not have formal published ADA Grievance Procedure.
2. City staff are generally not aware of how and with whom to file a disability discrimination complaint.

Recommendations:

1. **Adopt a City-wide Grievance Procedure. The policy shall include process for determining whether a policy or practice modification would fundamentally alter the nature of the program or service being offered. Sample provided on the following page.**
2. **Post the ADA notice on the city website and at all public counters. This notice includes information about how and with whom to file a disability discrimination complaint.**
3. **Provide staff training opportunities on how and with whom to file a disability discrimination complaint.**
4. **Establish a procedure for the annual evaluation of policies and practices for implementing set forth grievance procedures. This annual evaluation shall include the following:**
    a. **Notify the head of the operating administration of the completion of the annual evaluation.**
    b. **Identify shortcomings in compliance and notify the methods used to remedy them.**
    c. **Begin to modify, with official approval of recipient's management, any policies or practices that do not meet the requirements.**
    d. **Take appropriate remedial steps to eliminate the effects of any discrimination that resulted from previous policies and practices.**

SAMPLE GRIEVANCE PROCEDURE

This Grievance Procedure is established to meet the requirement of the ADA. It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the City of Industry.

The complaint should be made **in writing** and contain the following information:

Complainant's Information:

- **Name**
- **Address**
- **Phone number**
- **Email address**

Incident Violation:

- **Location**
- **Date and Time of Occurrence**
- **Description of the problem**
- **Name of City Employee Involved (if any)**
- **Name and Contact Information of witnesses (if any)**

The complaint should be submitted as soon as possible, preferably within 60 calendar days of the alleged violation, to: (add city contact information).

Within **15 calendar days** after receipt of the complaint, the ADA Coordinator will meet with the complainant to discuss the complaint and the possible resolutions.

Within **15 calendar days** of the meeting, the ADA Coordinator will respond in writing and where appropriate, in format that is accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of the City and offer options for substantive resolution of the complaint.

If the response by the ADA Coordinator does not satisfactorily resolve the issue, the complainant may appeal the decision within **15 calendar days** after receipt of the response to the City Administrator or their designee.

Within **15 calendar days** after receipt of the appeal, the City Administrator or their designee will meet with the complainant to discuss the complaint and possible resolutions.

Within **15 calendar days** after the meeting, the City Administrator or their designee will respond in writing and where appropriate, in a format that is accessible to the complainant with a final resolution to the complaint.

1.3.4 Fees and Surcharges

28 CFR §35.130(f)

Requirement:

The City cannot charge a fee or add a surcharge to cover the cost of making their facilities, programs, services, or activities accessible to persons with disabilities.

Finding:

1. From the review of the policies, there are no circumstances in which a person with a disability would be asked to pay a fee or meet any other requirement not imposed on other program participants for the City, but there is no written policy prohibiting the charging of fees to provide reasonable accommodations in the future.

Recommendation:

1. **Develop a written policy that prohibits the charging of fees or surcharges to provide reasonable accommodations to facilities, programs, services, or activities to persons with disabilities.**

1.3.5 Use of Consultants

28 CFR §35.130(b)(5)

Requirement:

The City cannot use contract procurement criteria that discriminates against persons with disabilities. Furthermore, consultants/contractors are required to comply with ADA laws and abide by the same nondiscrimination rules that apply to the City.

Findings:

1. The City uses outside contracted employees to provide services to the public.
2. The City uses construction contractors, and professional design consultants to provide services to the public.
3. Nothing found in the procurement criteria indicates that the City discriminates against persons with disabilities.

Recommendations:

1. **The City shall notify contractors (professional design consultants, construction contractors, contract employees, etc.) of their obligations to abide by the same accessibility requirements as the City.**
2. **Continue to have contracts reviewed by the City Attorney to ensure that outside consultants/contractors are notified of their responsibilities for providing services in a nondiscriminatory manner as required by the ADA.**
3. **Develop a written policy that outlines how contracted employees and consultants shall operate per City accessibility policies and standards, including provisions for enforcement by the City.**
4. **Online service providers shall be required to abide by web accessibility guidelines.**

1.3.6 Access to Programs, Services, and Activities

28 CFR §35.130(b)(3)

Requirement:

The City may not adopt official policies that are discriminatory or engage in practices that are discriminatory. This prohibition applies to policies that are explicitly exclusionary and to those which appear to be neutral but have a discriminatory effect.

Finding:

1. In general, from the review of policies, the City has no policies or practices that could have the direct or indirect effect of excluding or limiting the participation of individuals with disabilities.

Recommendations:

1. **Develop a written policy that describes the City's commitment that they will not adopt any policies that are discriminatory or engage in practices that are discriminatory, including overall requirements for providing accessible programs, services and activities as required under Title II of the ADA. See sample overall city policy on accessibility in Appendix P of this document.**

2. **Provide periodic compliance reviews of new and existing city programs, services, and activities.**

1.3.7 Reasonable Modifications to Policies, Practices, or Procedures

28 CFR §35.130(b)(7)

Requirement:

Procedures and policies shall allow for reasonable modifications to policies, practices or procedures, when such modifications are necessary to offer goods or services, etc., to individuals with disabilities unless doing so would fundamentally alter the goods or services, etc. (28 CFR §35.150(a)(3) and 28 CFR §35.164).

Finding:

1. The City does not have any formal policy, forms, or training on reasonable modifications to City policies, practices, or procedures.

2. The City does not have a process for determining whether a policy or practice modification would fundamentally alter the nature of the program or service being offered.

Recommendations:

1. **Adopt and publish a reasonable modification policy and form. Sample provided on the following page.**

2. **Establish a formal process for determining whether a policy or practice modification would fundamentally alter the nature of the program or service being offered.**

SAMPLE REASONABLE MODIFICATION POLICY

Introduction

In accordance with Title II of the Americans with Disabilities Act (ADA) it is the policy of the City of Industry to provide qualified persons with disabilities with a reasonable modification to its policies, practices, and procedures so that they can access programs, services, and activities. Furthermore, it is the policy of the City to provide these modifications quickly, easily, without additional disability justification and with minimum burden to the person with the disability.

Denial of a modification should occur only in situations for which the policy modification would fundamentally alter the program, service, or activity, or would constitute an undue financial and/or administrative burden.

What Is a Reasonable Modification?

A reasonable modification is a change or exception to a policy, practice, or procedure that allows people with disabilities to have equal access to programs, services, and activities. Reasonable modifications must always be related to the individual's specific limitation caused by the disability.

When requesting a reasonable modification to a City program or service, an individual with a disability is not required to provide a medical documentation or diagnosis to justify their request, but they must be able to explain how their disability is related to the requested modification.

Examples of a Reasonable Modification:

- City Hall modifies its "no pet" policy in order to allow individuals with service animals to enter the premises with their animal.
- Allowing a person using an electric wheelchair or other mobility device to access areas where electric vehicles are banned.
- Assisting someone with a cognitive disability in understanding and filling out a form to receive public assistance benefits.

The City of Industry will accommodate requests provided that:

- Fundamental nature of the service, program or activity is not altered, or
- It does not cause a direct threat to the health or safety of others, or
- It does not result in an undue financial and administrative burden, or
- The requestor would not be able to fully use the service provided by the City without the modification.

SAMPLE REASONABLE MODIFICATION REQUEST FORM

Please complete this form to request a reasonable accommodation from City of Industry. Submit the completed form to the ADA Coordinator:

Kathy Tai
15625 Mayor Dave Way

1.3.8 Public Meetings

28 CFR §35.130(d)

Requirement:

Services, programs, and activities must be conducted in the most integrated setting appropriate to the needs of qualified individuals with disabilities where possible, as the same setting offered to others.

Findings:

1. Not all public meeting notices contain information relative to how auxiliary aids and services can be obtained (only City Council Agendas currently utilize such a notice).

2. Not all public meetings publicize information regarding accommodations and the process for requesting auxiliary aids, assistive listening systems, interpreters, alternative formals, specialized equipment, or assisted services (only City Council Agendas currently publicize this information).

3. City Council Meeting agendas include the following notice relative to how auxiliary aids and services can be obtained:

   In compliance with the Americans with Disabilities Act of 1990, if you require disability - related modification or accommodation to attend or participate in this meeting, including auxiliary aids or services, please call the City Clerk' s office at (626) 333 -2211 at least 48 hours prior to the meeting.

4. Except for City Council Meeting agendas, other public meeting notices do not contain information relative to how auxiliary aids and services can be obtained.

5. There is no policy in place to ensure all videos posted are captioned.

6. Public Meetings are held in City Council Chambers and Community Center.

Recommendations:

1. **Include Notification of ADA Compliance on all City public meeting notices.**

2. **All public meetings shall be held in locations that comply with ADA requirements in terms of being architecturally accessible to individuals with disabilities.**

3. **Publicize the availability of auxiliary aids, assistive listening systems, interpreters, alternative formals, specialized equipment or assisted services at all public meetings.**

4. **Ensure that PowerPoint presentations and videos are captioned.**

1.3.9 Equally Effective Communication

28 CFR §35.160(a)

Requirements:

The City must ensure that members of the public, applicants, and participants with disabilities have communication access that is equally effective as that provided to persons without disabilities.

The City must provide appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity. The City shall provide information in alternative formats such as using easy-to understand language, Braille, large-print format, audiotape, or computer disk upon request in order to assure equally effective communication.

Findings:

1. The City does not have a list of available interpreters, readers, etc. to be used to accommodate requests.

2. The City does not provide assistive listening devices at meetings, conferences, and hearings upon request.

3. The City Clerk's Department is the central location for the furnishing and administration of auxiliary aids and services.

Recommendations:

1. **Maintain a list of on-call American Sign Language interpreters, who may be brought to meetings to assist individuals with hearing disabilities. This list shall be available to all City departments so that when a request is made, interpreters can be provided in a timely manner.**

    a. **At the time of this report, the following contacts provide American Sign Language Interpreting services in the greater Los Angeles area:**

    Links Sign Language & Interpreting Services - 866-722-9205
    AML Global American Language Services - 310-829-0741
    Alliance Business Services - 877-512-1195

2. **Purchase assistive listening devices to be used at meetings, conferences, and hearings upon request.**

3. **Provide program, facility, permits, and reservation information in a variety of formats upon request (for example, in large-print format for persons with visual disabilities or in simple language for persons with cognitive disabilities).**

4. **Where the City communicates by telephone with applicants and beneficiaries, ensure that TDD's or equally effective telecommunication systems are used to communicate with individuals with impaired hearing or speech. (28 CFR §35.161).**

1.3.10 Distribution of Publications

28 CFR§35.163(b)

Requirement:

Materials need to be displayed in departments and areas that are accessible for individuals with disabilities.

Finding:

1. In general, the City provides materials available for public review in locations that are accessible to persons with disabilities.

Recommendations:

1. **Develop a written policy describing the requirement that material on display and available for public review must be accessible for individuals with disabilities.**

2. **Ensure that publications can be made available in audio for the visually impaired.**

3. **Ensure that PDFs are created in accessible format and tested for color-blindness color types.**

1.3.11 Website Accessibility and Section 508

28 CFR §35.149 and 28 CFR §35.163(a)

Requirement:

The ADA Title II and the Rehabilitation Act of 1973 generally require that state and local governments provide qualified individuals with disabilities equal access to their programs, services, or activities. A city website is an example of a program, service, or activity, and is therefore required to be accessible. One way to help meet those requirements is to follow Section 508 Standards, which Federal agencies must follow on their own web pages. The standards provide guidance to web developers on designing accessible websites and reference the Web Content Accessibility Guidelines.

Findings:

1. The internet is an important tool used by the City of Industry to do business. The City of Industry routinely makes information about their programs, activities, and services available to the public by posting it on their website.

2. A preliminary review of the City's website was performed using the W3C Web Accessibility initiative; "Easy Checks – A First Review of Web Accessibility" was conducted and the results are included in **Appendix B** of this document. The purpose of this check is to perform an initial assessment of web page accessibility. The assessment is not comprehensive; a web page could seem to pass these checks, yet still have accessibility barriers.

3. The webpage was not verified as being accessible for the hearing impaired.

Recommendations:

1. **Establish web accessibility guidelines to ensure that the city's web pages- Internet and Intranet - are accessible to people with disabilities. Develop a policy that website updates shall be designed to follow WCAG 2.1 or the most current guidelines.**

2. **Designate and advertise an email address to allow people with disabilities to inform the webmaster of accessibility problems encountered on the website.**

3. **Perform a thorough web accessibility evaluation with a website accessibility consultant. The checks presented here are not definitive and only cover a few issues. A robust evaluation is recommended to evaluate all issues comprehensively.**

4. **Check all images (in all pages) for alt text and add the missing alt text.**

5. **Provide contrast ratio to correct deficiencies.**

6. **Continue to provide closed captioning (or transcripts) to any videos posted by the City.**

7. **Add control for the movement of information on sliders.**

1.3.12 Emergency Evacuation

28 CFR §35.130(b)(3)

Requirement:

While Title II of the ADA and its implementing regulations clearly prohibit discrimination against people with disabilities and mandate that accommodations be provided, there are no explicit references to the obligations of governmental entities to integrate disability issues and concerns into emergency planning. Nonetheless, there is recognition and development of the rights of people with disabilities in emergency planning through the courts. Various guidance and resources are available from the federal government to ensure that people with disabilities are fully incorporated into emergency planning.

Therefore, the City shall ensure that people with disabilities who may need special assistance during an emergency out of a City building are adequately planned for.

Findings:

1. There are no specific written procedures for evacuating people with disabilities.
2. Not all staff departments have received training regarding the evacuation of people with disabilities during an emergency evacuation from a City building.
3. Except for the Police Department, not all staff members who provide emergency services to the public have had training in emergency evacuation, including communicating in emergency situations with people who have hearing or speech impairments or communication with people with Autism.
4. There are no specific procedures or provision for evacuating people with disabilities.
5. There are no sign language interpreters nor closed captioning provided at televised emergencies or informational updates.

Recommendations:

1. **Develop written policies and guidelines for the evacuation of persons with disabilities in various types of emergency situations.**
2. **Emergency Evacuation Plans shall:**
    a. **Address what to do when an alarm is triggered**
    b. **Establish meetings places for assistance**

c. **Provide direction on what to do if assistance is not available**

3. **Provide training opportunities for City staff regarding emergency evacuation procedures with periodic drills.**

4. **Provide sign language interpreters and closed captioning at televised emergencies or informational updates.**

1.3.13 Special Events on City Property and City Sponsored Public Events

28 CFR §35.130(b)(3)

Findings:

1. The City provides an opportunity for private organizations to utilize City facilities for special events, as well as sponsoring special events for the public.

   List of Special Events:

   - Workshops, lectures, presentations, tours, and festive events such as the Holiday Tree Lighting Ceremony are offered by the Homestead Museum
   - Taste of Town Festival
   - The Expo Center is a venue for various special events, such as the Industry Racing Speedway at the Grand, Car Show, Dog Show, and Annual Charity Rodeo

2. The City does not have an accessibility checklist for public events.

Recommendations:

1. **The City shall require private organizations to comply with applicable ADA requirements in situations where private organizations sponsor events in City facilities or on City property.**

2. **The City shall provide a checklist and information during the application process to inform organizers of their responsibility for accessibility under the ADA.**

3. **The City shall make the special events accessibility checklist and information available on the City website.**

4. **Refer to the specific physical barriers found at City Facilities in Appendix M of this report.**

5. **Consider the use of temporary accessible stage ramps as needed for special events.**

1.3.14 Printed Information

28 CFR §35.160

Requirement:

The law requires that the City ensures that individuals with disabilities have communication access that is equally effective as that provided to persons without disabilities. In order for the City to meet the ADA communication standards, the City must be able to provide information in alternative formats.

Findings:

1. Staff indicated that they have some understanding of the requirements and types of accessible alternate formats and but did not have a procedure to produce accessible alternate formats.

2. City does not portray individuals with disabilities in documents and publications.

3. Publications, service announcements, and advertisements are not always advertised as being available in alternative formats.

Recommendations:

1. **Develop a City-wide policy that describes the City's commitment and procedures to provide program information in alternative formats on an individual basis as requested.**

    a. **Alternative formats include but are not limited to large print, Braille, audiotape, computer disk, pictorial, and signage.**

2. **When publications are accompanied by illustrations, images of individuals with and without disabilities shall be included. This gives individuals with disabilities a sense of welcome and inclusion in City programs.**

3. **Include a notice on all materials printed by the City that are made available to the public that the publications can be made available upon request in alternative formats, such as, Braille, large print, audiotape, or computer disk. Include the contact information for processing the request.**

4. **Provide staff training opportunities on the production of accessible PDFs and publications in various alternative formats to ensure that requests are handled in a uniform and consistent manner:**

    a. **Potential reasonable accommodations include staff assisting in filling out forms when alternative formats are unavailable or infeasible, provide alternative format for lengthy document, provide large print text, etc.**

b. City staff that are interacting with the public shall be trained on providing alternative methods of completing forms for people with disabilities.

1.3.15 Telephones, Communication Devices, and Auxiliary Aids

28 CFR §35.161

Requirements:

Where a public entity communicates by telephone with applicants and beneficiaries, text telephones (TTYs) or equally effective telecommunications systems shall be used to communicate with individuals who are deaf or hard of hearing or have speech impairments. When a public entity uses an automated attendant system, including, but not limited to, voice mail and messaging, or an interactive voice response system, for receiving and directing incoming telephone calls, that system must provide effective real-time communication with individuals using auxiliary aids and devices, including TTYs and relay systems.

Findings:

1. The City does not have TDDs/TTYs nor are the staff members trained in the use of TDD/TTY equipment or other means of communicating over the telephone with a person with hearing and speech disabilities, such as the 711 California Relay System. At the time of this Self-Evaluation, City staff indicated the recent installation of new telephones systems in the City.

Recommendation:

1. **Obtain access to TTY system and conduct staff training on operating TTY/TDDs and in other means of communicating over the telephone with a person having a hearing or speech disability. Note that 911 is not included in this evaluation because it is under the jurisdiction of Los Angeles County.**

1.3.16 Polling Places

28 CFR §35.161

Requirements:

In communities large and small, people cast their ballots in a variety of facilities that temporarily serve as polling places, such as libraries, schools, and fire stations, or churches, stores, and other private buildings.

The ADA's provisions apply to all aspects of voting, including polling places (or vote centers). Voting at one's polling place allows voters the chance to interact with neighbors and candidates who talk with voters outside the polling place, and to ask questions of or receive assistance from trained poll workers inside the polling place.

The ADA requires that public entities ensure that people with disabilities can access and use all of their voting facilities. Because a mix of public and private facilities are used as polling places, public entities may ensure Election Day accessibility of a polling place by using low-cost temporary measures, such as portable ramps or door stops, if the facility is not fully accessible.

Findings:

1. There is one location at which polling is held at the City of Industry:

   Industry Hills Expo Center
   Avalon Room
   16200 Temple Ave
   Industry, CA 91744

Recommendations:

1. **Refer to Appendix I - ADA Checklist for Polling Places for more information about accessibility at polling locations.**
2. **Refer to Appendix M - City Facilities Field Assessment Report for detailed accessibility barriers at the Industry Hills Expo Center.**

1.3.17 Employment

28 CFR 35.140

Requirement:

No qualified individual with a disability shall, on the basis of disability, be subjected to discrimination in employment under any service, program, or activity conducted by a public entity.

Public entities must ensure that their employee practices and policies do not discriminate on the basis of disability against qualified individuals with disability in every aspect of employment, including: recruitment, hiring, promotion, demotion, layoff and return from layoff, compensation, job assignments and classifications, paid or unpaid leave, fringe benefits, training, and employer-sponsored activities.

Public entities must make "reasonable accommodation" to the known physical or mental limitations of otherwise qualified applicants or employees with disabilities, unless the public entity can show that the accommodation would impose an "undue hardship" on the operation of its program.

Findings:

1. There are no formal policies, practices, or procedures that are followed to ensure nondiscrimination in employment.
2. There is no formal reasonable accommodation policy.

Recommendations:

1. **Develop a written policy to ensure nondiscrimination in recruitment, hiring, promotion, demotion, layoff and return from layoff, compensation, job assignments and classifications, paid or unpaid leave, fringe benefits, training, and employer-sponsored activities. Sample provided on the following pages.**
2. **Ensure that job applications identify physical needs that meet job requirements.**
3. **Ensure that job applications are available to be provided in a variety of formats (JAWS, Computer with large print options).**
4. **Adopt and publish the Reasonable Accommodation Request policy and form. Sample provided on the following pages.**

SAMPLE REASONABLE ACCOMODATION POLICY

PURPOSE:

To comply with the Americans with Disabilities Act (ADA) and applicable local, state, and federal laws and regulations prohibiting employment discrimination against individuals with disabilities.

POLICY:

1. It is the policy of the City to prohibit disability discrimination in all employment practices, including job application procedures, hiring, advancement, discharge, compensation, job training, conditions, and privileges of employment.
2. It is the City's policy to provide Reasonable Accommodation for the known disability applicant or employee unless it would impose an undue hardship to the City or result in a direct threat to the applicant, employee, or others.
3. The City is committed to ensuring that applicants with disabilities have equal access to employment opportunities and are provided necessary reasonable accommodations upon request.

FILING A REASONABLE ACCOMMODATION REQUEST:

- Any qualified individual with a disability may request a reasonable accommodation, verbally or in writing. Request for Reasonable Accommodation should be made to an employee's immediate supervisor or department manager.
- Upon request for a Reasonable Accommodation, the applicable department shall provide the employee a Reasonable Accommodation Request Form to complete.
- It is the responsibility of the employee to complete and submit the form to his or her immediate supervisor or department management.
- The City shall protect and maintain the privacy and confidentiality of medical information provided by, or on behalf of employees and applicants with disabilities unless otherwise required by law.
- Upon receipt of the completed Reasonable Accommodation Request Form, the employee's immediate supervisor or department management shall review the request to determine the appropriateness of the request and select and implement the Reasonable Accommodation.
- The determination as to whether a Reasonable Accommodation can be provided is made on case-by-case basis. The department and employee will analyze the essential functions of the position in question, determine how the disability limits the performance of the essential functions of the position, identity accommodations options, determine the effectiveness and feasibility of the proposed accommodations, and select a suitable accommodation with consideration of the employee's preference.
- Although primary consideration should be given to the preferences of the employee in determining appropriate accommodation, the City has the ultimate discretion to choose between effective accommodations and may choose the less expensive accommodations or the accommodation that is easier to provide.

SAMPLE REASONABLE ACCOMODATION REQUEST FORM

Employee Name: _____ Employee Classification: _____
Phone: _____ Department: _____
Supervisor Name: _____ Supervisor Classification: _____

1. Do you have a disability that limits a major life activity, which requires a reasonable accommodation to enable you to perform the essential functions of your position or to enjoy the equal benefits/privileges of employment? Please explain.

2. What, if any, job functions are you having difficulty performing, or what benefit/privilege of employment are you having difficulty accessing because of your disability?

3. Describe how your condition limits your ability to safety and effectivity perform the essential or primary job functions indicated above.

4. What accommodations are you requesting? Please be as specific as possible. If requirement is requested, please specify brand, model number and vendor.

5. How will this accommodation assist you in performing the essential functions of the position or in accessing a benefit/privilege of employment?

6. Have you had any accommodation in the past for the same limitation?

7. Please provide any additional information that might be useful.

1.3.18 Service Animals

28 CFR § 35.136

Requirement:

Under the ADA and the California Building Code, State and local governments must allow service animals and service animals in training to accompany people with disabilities in all areas where the public is normally allowed to go.

Service animals are dogs (and in certain circumstances, miniature horses) that are individually trained or in training to perform tasks for people with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheeled mobility device, alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. Animals whose sole function is to provide comfort or emotional support do not qualify as service animals under the ADA.

A public entity may ask an individual with a disability to remove a service animal from the premises if the animal is out of control and the animal's handler does not take effective action to control it; or the animal is not housebroken.

A service animal shall be under the control of its handler. A service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (e.g., voice control, signals, or other effective means).

A public entity is not responsible for the care or supervision of a service animal.

A public entity shall not ask about the nature or extent of a person's disability, but may make two inquiries to determine whether an animal qualifies as a service animal.

Individuals with disabilities shall be permitted to be accompanied by their service animals in all areas of a public entity's facilities where members of the public, participants in services, programs or activities, or invitees, as relevant, are allowed to go.

A public entity shall not ask or require an individual with a disability to pay a surcharge, even if people accompanied by pets are required to pay fees, or to comply with other requirements generally not applicable to people without pets. If a public entity normally charges individuals for the damage they cause, an individual with a disability may be charged for damage caused by his or her service animal.

Individuals who have service animals are not exempt from local animal control or public health requirements, including, but not limited to, licensing, vaccinations, and registration.

Finding:

1. The City does not currently have a formally published service animal policy, although staff indicated they do not have restrictions on service animals as pertaining to their programs.

Recommendation:

1. **Develop a written policy pursuant to 28 CFR § 35.136 regarding service animals and ensure City staff are trained on the new policy. Refer to sample policy on following page.**

SERVICE ANIMAL SAMPLE POLICY AND PROCEDURE

Service Animals

A service animal is any dog that is individually trained, or in training, to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Tasks performed can include, among other things, pulling a wheelchair, retrieving dropped items, alerting a person to a sound, reminding a person to take medication, or pressing an elevator button. Service animals are limited to dogs. However, the City will make reasonable modifications to allow individuals with disabilities to use miniature horses if they have been individually trained to do work or perform tasks for individuals with disabilities.

Policy

- In compliance with the ADA and the California Building Code, service animals, or service animals in training, are welcome in all facilities where the public is generally allowed.
- At events and spaces with a "no pets" policy, a person with a disability will not be denied entry with a service animal.

Requirements of Service Animals and their Owners

- All animals need to be immunized, licensed, and registered per state law.
- The owner must be in full control of the animal at all times, which is achieved through a leash, harness, or voice control if the owner is unable to maintain the animal on a leash due to their disability. Uncontrolled barking, jumping on other people, or running away from the handler are examples of unacceptable behavior for a service animal. The handler must take effective action to control any unacceptable behavior.
- Service animals may be excluded (but not the person with a disability) when the animal's behavior poses a direct threat to the health or safety of others, the animal is not under control or is not housebroken. The City is not responsible for the care of an excluded animal.
- Emotional support animals, including dogs that provide comfort just by being with a person, are not considered service animals. Since they have not been trained to perform a specific job or task related to a person's disability, they do not qualify as service animals under the ADA.
- Individuals who have service animals are not exempt from local animal control or public health requirements.
- The care and supervision of the animal is solely the responsibility of the owner/partner.
- Service animals are not required to wear a vest, ID tag, or specific harness because this is not required under the ADA.

Responsibility of City Staff

- City staff may ask only two specific questions: (1) is the dog a service animal required because of a disability? And (2) what work or task has the dog been trained to perform?
- City staff may not ask for the animal to demonstrate a task.
- City staff may not ask questions about the nature or extent of the disability.
- City staff may not ask for documentation or proof that the animal has been certified, trained, or licensed as a service animal.

1.3.19 Transportation/Paratransit

28 CFR § 35.130(b)(3)

Requirements:

Where a public entity provides transportation or paratransit services, then they must be accessible to and useable by individuals with disabilities. If these services are contracted out by the city, contractors must abide by the city policy regarding the provision of accessible programs, services, and activities.

Finding:

1. The City of Industry provides bus service or other paratransit services.

Recommendations:

1. **Ensure that transportation vehicles are accessible to individuals with disabilities.**
2. **Ensure that loading and unloading areas are accessible to people with disabilities.**
3. **Ensure that any websites related to transportation are accessible.**

1.4 ADA Toolkit and List of Resources

In order to facilitate access to all City Programs and Departments, the City shall maintain these program accessibility guidelines, standards and resources as part of their ADA toolkit and training resources. This information shall be made available to all employees, volunteers, and contractors. The City shall maintain and update these guidelines as necessary to address its needs. Revisions shall include information and technological devices that help employees and contractors communicate with individuals with a variety of disabilities. The City shall periodically review the components of this section, as new technologies are developed in order to ensure that the best types of modifications are included.

Federal guidelines and standards and the California Building Code (CBC) are periodically updated (CBC is normally updated every three years). These periodic revisions are based on research findings and guidance from advisory committees. Therefore, the City shall have an ongoing program of regularly reviewing code changes and updating policies and procedures related to accessibility. The program shall include a regular practice of reviewing research materials posted to the U.S. Access Board's website and updating local guidelines and practices as new standards are adopted or existing standards are revised.

In addition to these resources, **Appendix E** through **Appendix L** are provided for supplemental resources.

Federal Accessibility Standards and Regulations	
U.S. Department of Justice http://www.ada.gov	
ADA Regulations for Title II https://www.ada.gov/2010_regs.htm	Title II of the ADA protects qualified individuals with disabilities from discrimination on the basis of disability in the services, programs, or activities of all state and local governments.
Title II Technical Assistance Manual (1993) and Yearly Supplements http://www.ada.gov/taman2.html http://www.ada.gov/taman2up.html	This manual explains what state and local governments must do to ensure that their services, programs, and activities are provided to the public in a nondiscriminatory manner.
Americans with Disabilities Act of 1990 http://www.ada.gov/pubs/adastatute08.pdf	This link is the current text of the ADA statute including changes made by the ADA Amendments Act of 2008 (P.L. 110-325)

1.5 Policies and Procedures Action Log

A Policies and Procedures Implementation Plan (Action Log) can be found in **Appendix A.**

Volume 2

2.0 ADA Self-Evaluation and Transition Plan for Facilities

An ADA Self-Evaluation as required by CFR 28 §35.105 provides a comprehensive inventory of facilities owned and operated by the public agency. This ADA Self-Evaluation of Facilities in the City of Industry includes the findings of non-compliant items that create a physical barrier to the public.

2.1 Introduction

In assessing the facilities for physical barriers, a Certified Access Specialist (CASp) visited each facility in order to evaluate compliance with State and Federal accessibility laws and codes. The field investigation was conducted with the state-of-the art tools for efficient and accurate data collection in order to analyze, describe, and document code conformance. Inaccessible elements that posed barriers to accessibility (commonly referred to as physical barriers) were recorded and are presented herein this part of the report.

The following City facilities have been assessed by a Certified Access Specialist (CASp) for the purpose of this report:

Building Name	**Abbreviation Used in Report**
City Hall	CH
Community Services Center	CSC
Council Chambers	CC
Cultural Homestead Museum	CHM
El Encanto Hospital	EEH
Expo Center	EXPO
Fire Station 118	FS
Metrolink Station	MS

2.2 Program Accessibility

As described in the ADA requirements for program accessibility, a public entity shall operate each service, program or activity so that, **when viewed in its entirety**, it is accessible and usable by individuals with disabilities.

The ADA does not require the public entity to make all of its existing facilities accessible, nor does it require a public entity to take any action that would fundamentally alter the nature of a service, program or activity. Additionally, it does not require implementation of the ADA that would result in undue financial and administrative burdens. In such cases where documentation is provided in keeping with strict procedures outlined in the ADA, there are various methods that may be appropriate for providing program accessibility in lieu of making actual physical changes to facilities.

The first step in determining what structural changes to existing facilities are necessary is to develop an understanding of the specific public programs and activities occurring at existing facilities within the City.

2.3 Legislative Requirements

2.3.1 State of California Accessibility Requirements

The California Code of Regulations, Title 24, and Part 2 mandates that all publicly funded buildings, structures and related facilities shall be accessible to and usable by persons with disabilities. These regulations, which are often referred to as Title 24, pertain to the City of Industry public buildings, parks and facilities that were constructed using state, City, or municipal funds or that are owned, leased, rented, contracted, or sublet by the municipality.

The ADA states that it does not override requirements of other state and local requirements. For the purpose of this report, Title 24 regulations and standards were also incorporated in the evaluation of architectural barriers as part of this Transition Plan. Where there is a conflict between Title 24 and ADA standards, the provision providing the greatest level of protection for individuals with disabilities shall govern.

2.3.2 Code and Standards References

The following codes / standards are referenced within this document: At the time of construction, research will need to be applied as to the current California Building Code being enforced and adjust items based on the current requirements.

- 1991 ADA Accessibility Guidelines (ADAAG)
- 2010 ADA Standards (ADAS)
- 2016 and 2019 Title 24 California Building Code (CBC)
- Public Right-of-Way Guidelines (PROWAG)
- California Manual on Uniform Traffic Control Devices (CAMUTCD)

2.3.3 Accessibility Standards and Compliance Dates

The ADA identifies the following federal construction requirements based on the dates provided below:

If physical construction or alterations commenced after July 26, 1992, but prior to September 15, 2010, then new construction and alterations subject to this section must comply with either the Uniform Federal Accessibility Standards (UFAS) or the 1991 Standards except that the elevator exemption contained at section 4.1.3(5) and section 4.1.6(1)(k) of the 1991 Standards shall not apply.

If physical construction or alterations commence on or after September 15, 2010, and before March 15, 2012, then new construction and alterations subject to this section may comply with one of the following: the 2010 Standards, UFAS, or the 1991 Standards except that the elevator exemption contained at section 4.1.3(5) and section 4.1.6(1)(k) of the 1991 Standards shall not apply.

If physical construction or alterations commence on or after March 15, 2012, then new construction and alterations subject to this section shall comply with the 2010 ADA Standards.

The assignment of priorities are intended to facilitate public review and to address specific concerns of the local disabled community. It must be emphasized that it is the intent for all individuals with disabilities to be reasonably accommodated by each public entity.

2.4 Methodology

Field assessments were conducted in the spring of 2019. During this period, field crew teams included the oversight of a Project Manager. The assessment team includes David Stuber, Certified Access Specialist (CASp). Program Manager / Lead CASp, Sandra Miles, monitors and provides ongoing direction and updates for each of project including, but not limited to, preparing inspection coordination, assignments and oversight of personnel, answering questions, and spot checking completed tasks.

Equipment used during assessments:

- Digital Scale (calibrated at the beginning of each day)
- Measuring Tape
- Contour Gauge
- Apple iPad Air 2

When assessing for physical barriers, field assessors typically look for and document the following barriers to accessibility:

Parking	Ramps	Building Entrance
• Number of accessible and van accessible stalls • Proper Signage • Cross slopes • Curb ramps • Accessible route from nearest transit stop to building site • Accessible route from accessible stalls to building entrance • Pavement Striping • Tow Away signs	• Handrails and Handrail extensions • Edge Protection • Cross Slope • Landings	• Door Width, hardware, closing speed, landing, door threshold • Change in elevation at the door

Restrooms	Drinking Fountains	Signage and Misc.
• Accessible stall dimensions • Grab bars • Height of Dispensers • Protruding objects • Accessible routes/corridors • Shelves/coat hooks/mirrors/accessories • Door Swing • Door Maneuvering clearing • Seat Heights • Location of Flush controls • Lavatories and Sinks • Geometric Door Signage	• High and Low fountains provided • Clear Floor space • Protruding objects • Reach ranges	• Tactile/Braille Signage requirements • Sign Mounting Heights • Signs indicating location of accessible elements • Meeting Rooms - Are Assistive Listening Devices provided • Service Counter Heights • Stairs

2.4.1 Facility Priority Designations

Priority 1: Approach and Entrance (exterior accessible route and accessible parking. Includes directional signage, exterior ramps, exterior stairs, exterior side of entrances thresholds, door handles, 48” door separation in vestibules, exterior protruding objects)

Priority 2: Access to Programs, Services (begins at entrance of building and includes circulation routes, protruding objects, elevators, interior stairs, interior ramps, reach ranges, signage for room designation, doors, aisles, carpet, seating, desks, benches, dressing rooms, lockers, reception counters, counter heights)

Priority 3: Toilet Rooms

Priority 4: Additional Accessible elements (drinking fountains, phones, fire alarm systems)

Priority 5: California only requirements to comply with building code

Priority 6: Employee areas that may need to be reprioritized if public is allowed to use these areas

2.4.2 Facility Severity Designations:

Severity A: Item that creates a Safety Issue (tripping hazards, protruding objects, fire strobes, egress signage, door closing speed and door pressures, and two-way communication at elevators)

Severity B: Item that creates a major inconvenience to a significant number of people (cross slopes, slopes, etc.)

Severity C: Item that creates a minor inconvenience, however it is not compliant and creates a barrier (restrooms, audio visual elements, door hardware, vision lights, drinking fountains, directional signage, accessible parking, etc.)

Severity D: Required only in California Building Code but is compliant with ADA Federal Regulations

Severity E: Nothing required unless public is allowed to access this area

2.4.3 Facility Precedence Designations

Severity A: Item that creates a Safety Issue (tripping hazards, protruding objects, fire strobes, egress signage, door closing speed and door pressures, and two-way communication at elevators)

Severity B: Item that creates a major inconvenience to a significant number of people (cross slopes, slopes, etc.)

Severity C: Item that creates a minor inconvenience, however it is not compliant and creates a barrier (restrooms, audio visual elements, door hardware, vision lights, drinking fountains, directional signage, accessible parking, etc.)

Severity D: Required only in California Building Code but is compliant with ADA Federal Regulations

Severity E: Nothing required unless public is allowed to access this area

2.5 Alterations and Path of Travel

Per CBC 11B-202.4, when alterations or additions are made to existing buildings or facilities, an accessible path of travel to the specific area of alteration shall be provided. The primary accessible path of travel shall include a primary entrance to the building, toilet and bath facilities serving the area, drinking fountains, public telephones serving the area, and signs.

An alteration is defined as a change to a building that could affect usability, including remodeling, renovation, rehabilitation, historic restoration, resurfacing of circulation path or vehicular ways, plan configuration of walls, changes or rearrangement of structural parts, and changes or rearrangements of full-height partitions. Alterations do not include normal maintenance, reroofing, painting, or changes to mechanical or electrical systems.

When the adjusted construction cost is less than or equal to the current valuation threshold, the cost of compliance with 11B-202.4 shall be limited to 20 percent the adjusted cost of alterations. When the full compliance with Section 11B-202.4 would exceed 20 percent, compliance shall be provided to the greatest extent possible without exceeding 20 percent. This section does not apply where areas are being altered solely to meet Title II program accessibility.

2.6 Costs

Estimated costs are based on information obtained from several industry accepted data-base sources, such as R.S. Means, BNI Building News, and National Estimator. These sources are used as a basis, along with the estimator's professional judgment, to adjust for the specific project type, location, complexity and size, and other unique or special circumstances.

All costs represented in this report reflect current-year U.S. dollars. The costs generated are built on identified deficiencies with replacement of materials or components in-kind unless industry standard requires change of material or component type.

Costs for contingency, escalation, design, construction management, engineering, permitting, inspection, and similar professional services for developing the plans to remove barriers are included in the expenditure plan and estimated at 30 percent. Other indirect costs such as temporary space rental or costs associated with fundraising or financing are not included.

Opinions of costs of repair or replacements are approximations only and should not be interpreted as bids or offers to perform work. Actual costs can be affected by the extent of work to be done as one project, the quality of contractor, the quality of materials chosen, and the specific work conditions.

2.7 Findings and Recommendations

The specific findings and recommendations for facilities are attached in the **Appendix M.**

Volume 3

3.0 ADA Self-Evaluation and Transition Plan of Public Right of Way

3.1 Overview

This volume presents the City of Industry's ADA Self-Evaluation and Transition Plan of streets, curb ramps and related facilities in the public right of way and includes an inventory of findings of non-compliant items and barriers to accessibility. The purpose of this inventory is to provide a baseline of existing conditions in the right of way for use as the basis for the City's ADA Transition Plan.

The ADA Transition Plan contains detailed physical barrier surveys of City streets, curb ramps, and related facilities in the public right of way under the City's jurisdiction, and schedules which barriers to remove to provide access for individuals with disabilities to City programs. These surveys are contained in a comprehensive computer database, and document barriers present at the time of the survey. Improvements made to facilities after the date of survey are not included as part of this ADA Transition Plan. It is important to understand that as is true with the Self-Evaluation Plan, the Transition Plan is intended to be a living document.

The Department of Justice's Title II Technical Assistance Manual points out that a public entity's programs related to streets, sidewalks and curb ramps may be prioritized with respect to relative importance and frequency of usage. A determination of what public rights-of-way are programmatically required to be accessible may vary from jurisdiction to jurisdiction.

3.2 Background

3.2.1 Federal Accessibility Requirements

A Self-Evaluation and Transition Plan of scheduled changes is required by the following federal accessibility requirements:

Section 504 of the Rehabilitation Act of 1973 (Section 504) covers "any program or activity receiving federal financial assistance." Programs and services are to be available, without discrimination, to people with disabilities.

The Americans with Disabilities Act (ADA) of 1990 is a federal civil rights law that ends discrimination against people with disabilities. Composed of five Titles, Title II covers a public entity's employment, programs, activities, services, communications, and facilities codified in 28 CFR Part 35. Title II extends the prohibition of discrimination on the basis of disability established by Section 504 to all activities of State and local governments, including those that do not receive Federal financial assistance.

3.2.2 Components of a Transition Plan

The ADA Transition Plan is significant in that it establishes the City's ongoing commitment to providing accessibility to its citizens. The specific requirements for preparation of an acceptable Transition Plan are described in 28 CFR §35.150(d)(3). This plan includes:

- A schedule for providing curb ramps or other sloped areas where pedestrian walks cross curbs, giving priority to walkways serving entities covered by the ADA, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas **(Section 3.6.3).**
- Identification of physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities **(Section 2.0).**
- A detailed description of methods that will be used to make facilities accessible **(Section 2.0).**
- A schedule of necessary steps to achieve compliance. If longer than one year, identification of steps that will be taken during each year of the transition period **(Appendix A).**
- An indication of the official responsible for implementation of the plan per 28 CFR § 35.150 (d)(4) **(Section 3.3.1).**
- If a public entity has already complied with the transition plan requirement, it needs to be updated to include those areas not included in the previous transition plan (Not applicable for this project).
- A record of opportunity given to the disability community and other interested parties to participate in the development of the plan **(Section 3.3.6).**

3.2.3 Code and Standards References

At the time of construction, research will need to be applied as to the current version of the California Building Code being enforced and adjust items based upon the current requirements. The following codes / standards are referenced within this document:

- 1991 ADA Accessibility Guidelines (ADAAG)
- 2010 ADA Standards (ADAS)
- 2016 Title 24 California Building Code (CBC 2016)
- 2019 Title 24 California Building Code (CBC 2019)
- Public Right of Way Accessibility Guidelines (PROWAG)
- California Manual on Uniform Traffic Control Devices (CAMUTCD)

3.2.4 Maintenance vs. Alteration in the Public Right of Way

The United States Department of Justice (DOJ) has issued a memorandum on clarification of maintenance vs. alteration projects in the public right of way. Projects deemed to be alterations must include curb ramps within the scope of the project. This clarification provides a single Federal policy that identifies specific asphalt and concrete-pavement repair treatments that are considered to be maintenance and do not require curb ramps at the time of improvement. It is recommended that this

clarification with regard to when curb ramp installation is required as part of a project be distributed to appropriate City staff.

ADA Maintenance (does not require curb ramps)	ADA Alterations (requires curb ramps)
• Chip Seals • Crack Filling and Sealing • Diamond Grinding • Dowel Bar Retrofit • Fog Seals • Joint Crack Seals • Joint Repairs • Pavement Patching • Scrub Sealing • Slurry Seals • Spot High Friction Treatments • Surface Sealing	• Addition of New Layer of Asphalt • Cap Seals • Hot in Place Recycling • Mill and Overlay • New Construction • Open-grade Surface Course • Rehabilitation and Reconstruction • Asphalt and Concrete Rehabilitation • Microsurfacing/Thin Lift Overlay

The DOJ/DOT Joint Technical Assistance is provided in **Appendix E.**

3.3 Transition Plan Requirements

3.3.1 Official Responsible Party

The ADA requires that an official be identified as responsible for the implementation of the public entity's plan.

The Official Responsible for the implementation shall be able to seek/acquire funding for ADA barrier removal work over the City of Industry Transition Planning period. The City has designated **Kathy Tai, the City's ADA Coordinator,** as the person responsible for the implementation of its ADA Transition Plan.

Typically, the responsibility of making any particular City program, service or activity accessible to all persons, regardless of ability, rests with the official who controls the operating funds for that particular program, service or activity. To this end, the task of seeking/getting approval for funds from the governing body to make the said program accessible lies with the official responsible for the program. Indication of the official responsible for implementation of the plan fulfills the final requirement of a Transition Plan.

3.3.2 ADA Coordinator

The ADA requires that the City designate at least one employee to coordinate ADA compliance. The following are some of the qualifications that help an ADA Coordinator to be effective:

- Familiarity with the state or local government's structure, activities, and employees
- Knowledge of the ADA and other laws addressing the rights of people with disabilities, such as Section 504 of the Rehabilitation Act, 29 U.S.C. § 794
- Experience with people with a broad range of disabilities
- Knowledge of various alternative formats and alternative technologies that enable people with disabilities to communicate, participate, and perform tasks
- Ability to work cooperatively with the local government and people with disabilities
- Familiarity with any local disability advocacy groups or other disability groups skills
- Training in negotiation and mediation organizational and analytical skills

It is the responsibility of the ADA Coordinator to develop, monitor, and implement this Transition Plan. The final product is a working document to be modified as barriers are removed, or alterations are made. The City's final document, ADA Transition Plan will be retained for record keeping purposes following completion and be maintained on file and made available for public inspection.

3.3.3 Monitoring of Progress

One of the key responsibilities of the ADA Coordinator is to monitor the progress of this Transition Plan. In order to be effective, the Transition Plan needs to be utilized in yearly planning of projects and funding decisions, and also needs to be periodically reviewed for compliance and validity. This monitoring will be done with oversight of ADA Coordinator, who may delegate public right of way projects to the public works director or other appropriate City staff.

3.3.4 Regular Update of Plan

Alongside the monitoring of progress, the Transition Plan shall be viewed as a "living document" and updated regularly to reflect changes in real world conditions and to address any possible new areas of noncompliance. It is required to update the plan:

<u>At every grievance/complaint received</u>

- Within 180 days of receiving the grievance, the ADA Coordinator shall evaluate its current policies and practices, identify shortcomings in compliance, and describe the method used to remedy the situation. Appropriate remedial steps shall be taken to eliminate the effects of any discrimination.

<u>Annual Review and Update of Plan</u>

- The ADA Coordinator shall establish a system for the annual reviewing and updating the self-evaluation.
- It is to be updated until all accessibility barriers are removed and as programs, services, and activities are modified, and as facilities come under ownership or control of the City.
- The plan shall keep pace with changes due to budget, program modification, delays in contract awards, construction timelines, impacts of weather, any new access issues, etc.

- Changes to a sidewalk such as the installation of a newspaper vending machine, or the relocation of a light pole, can create new access problems that were not evident when the plan was drafted. These changes shall be reviewed for ADA compliance.
- Annual updates to the plan will result in monitoring compliance and the effectiveness of priorities set in the Plan itself.

3.3.5 Addressing Future ADA

The public is invited to use the established Public Right of Way ADA Request Form located in **Appendix C** should any request for future ADA work in the public right of way is needed.

3.3.6 Public Participation

Per CFR 28, Part 35, Subpart D, a public entity is required to make available to applicants, participants, residents and other interested parties information regarding the ADA Transition Plan and its applicability to the services, programs or activities of the public entity, and to apprise the public of the protections against discrimination afforded to them by the ADA. A public entity also is required to provide an opportunity for interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the ADA Transition Plan by submitting comments and making specific recommendations. The ADA also requires that a copy of the draft ADA Transition Plan shall be made available for public inspection during a formal public review period.

This process included persons with disabilities and those representing disability service organizations. This section describes the public participation and outreach efforts made by the study team. The main objective of the outreach effort was to ensure that the ADA Transition Plan is one that truly represents the goals and aspirations of the local disability community.

The City has provided an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan by submitting comments. A copy of the transition plan shall be made available for public inspection.

The dissemination of information and requests for comments took place through the following methods:

Public Outreach and Participation	
Method of Outreach*	Date
Public Outreach Questionnaire	
Posting of Transition Plan on City Website	

*Examples: Awareness days, newsletters, City's web page. Possible sources of input include activists, advocacy groups, and general citizens, organizations that support the rights of the disabled, elected officials, other agencies, a Governor's Committee on People with Disabilities or other such body.

3.3.7 Public Participation Results

Survey Responses			
Locale	Total Respondents	Restraint #1	Restraint #2
No Responses as of March 2020			

3.3.8 Public Review / Comment Period

A public entity that employs 50 or more people is required to seek public input on its ADA Transition Plan. Beyond the legal requirements, public input is vital to assure that those affected by the City's programs, services and facilities understand the scope and nature of the City's responsibilities for providing equal access to the public.

With support from the study team, the City will announce in local publications and will hold a City Council workshop on the draft ADA Transition Plan to begin the 45-day public review comment period.

A City Council Hearing on the final draft ADA Transition Plan is required to approve the plan.

The Draft ADA Transition Plan will be available in alternate formats, and written comments will be received in any alternative formats chosen by respondents. All public comments received will be incorporated in their entirety into a section of the final ADA Transition Plan.

All public comments will be reviewed, analyzed and incorporated into the text of the final ADA Transition Plan as deemed to be appropriate. The ADA Transition Plan will be provided in various alternative formats upon written request.

Requests for copies of the ADA Transition Plan and public comments should be directed to

Kathy Tai
Development Services Manager and ADA Coordinator
15625 Mayor Dave Way, City of Industry, CA 91744-0366
(626) 333-2211 Ext. 232
ktai@cityofindustry.org

3.4 ADA Self Evaluation for Right of Way

3.4.1 Public Right of Way Assessment Methodology

Field assessments were conducted in the spring of 2019. During this period, field crew teams included oversight by the Project Manager. Completed data was downloaded into the master database program at regular intervals.

The project team includes David Stuber, Certified Access Specialists (CASp). Program Manager / Lead CASp, Sandra Miles, monitors and provides ongoing directions and updates for each of project including, but not limited to, preparing inspection coordination, assignments, and oversight of personnel, answering questions and spot checking completed tasks.

Equipment used during assessments:

- Digital Scale (calibrated at the beginning of each day)
- Measuring Tape
- Contour Gauge
- Apple iPad Air 2

3.4.2 Public Right of Way Data Collection

Although not exhaustive, the following list gives an overview of what constitutes a compliant curb ramp and sidewalk. For a complete list of requirements, refer to 2010 ADA Standards, 2016 and 2019 California Building Code, the Manual on Uniform Traffic Control Devices (MUTCD), and at the time of this report, best practices include the Public Right of Way Accessibility Guidelines (PROWAG).

Elements of Accessible Curb Ramps

In order for a curb ramp to be compliant, it must have the following features:

- Surface shall be firm, stable and slip resistant
- Clear width of Curb ramp run shall be 48 inches wide minimum
- Curb Ramp Running slope may not exceed 8.3%
- Curb Ramp Cross slope may not exceed 2%
- A Landing/Turning space of 4 feet deep x 4 feet width of curb ramp to allow for maneuvering space at top of a perpendicular curb ramp or at bottom of a parallel curb ramp
- The slope of the landing may not exceed 2% in either direction
- Must have flush transitions at grade breaks
- When provided, flare slope may not exceed 10%
- A surface of truncated domes/detectable warnings must be provided and shall extend the full width of the curb ramp with a minimum of 3 feet length in direction of travel
- Curb ramp counter slope of adjoining gutter must not exceed 5%

- Diagonal or corner type curb ramps that serve two crosswalks shall provide 48 inches clear space within marked crossing
- Diagonal or corner type curb ramps that serve two crosswalks shall provide 48 inches clear space outside active travel lanes
- Diagonal or corner type curb ramps that serve two crosswalks and have flared sides shall have segment of curb 24 inches long minimum on each side of curb ramp and within marked crossing

Elements of Accessible Sidewalks

Accessibility codes do not require that sidewalks be installed. However, if sidewalks are installed, they must meet accessibility code requirements and be maintained in accessible condition. In order to be compliant, sidewalks must have the following features:

- Surface shall be firm, stable and slip resistant
- Clear width of 48 inches minimum
- When, because of right of way restrictions, natural barriers or other existing conditions, the enforcing agency determines that compliance with 48 inches clear sidewalk width would create an unreasonable hardship, the clear width may be reduced to 36 inches
- Passing spaces provided at intervals of 200 feet maximum
- A level landing is required every 400 feet where sidewalk slopes exceed 1:48
- Passing spaces shall be 60 inches by 60 inches minimum, or an intersection of two walking surfaces forming a T-intersection
- Running slope shall not exceed 5% or the running slope of street grade
- Cross slope may not exceed 2%
- Changes in level of ¼ inch are permitted
- Changes in level of 1/4 inch-1/2 inch must be beveled with a slope of 1:2
- Objects with leading edges more than 27 inches and not more than 80 inches above the finish floor or ground shall protrude 4 inches maximum into the circulation path
- Free standing objects mounted on posts or pylons shall overhang circulation paths 4 inches maximum when located 27 inches-80 inches above the finish floor

Elements of Accessible Driveways

- Cross slopes shall be 2% maximum
- Driveway running slope may not exceed 8.3%

Elements of Accessible Transit Stops

- Bus boarding and alighting area shall provide a clear length of 96 inches minimum, measured perpendicular to the curb or vehicular roadway edge, and clear width of 60 inches minimum, measured parallel to the vehicular roadway

- Bus stop boarding and alighting areas shall be connected to streets, sidewalks, or pedestrian paths by an accessible route
- Newly constructed bus stop boarding, and alighting areas shall provide a detectable transition between the boarding/alighting area and the roadway; the detectable transition shall consist of a curb with the face sloped at 35 degrees maximum from vertical or detectable warnings
- Parallel to the roadway, the slope of the bus stop boarding, and alighting area shall be the same as the roadway, to the maximum extent practicable
- Perpendicular to the roadway, the slope of the bus stop boarding, and alighting area shall not be steeper than 1:48
- Bus shelters shall provide a minimum clear floor space (30 inches by 48 inches)
- Bus shelters shall be connected by an accessible route

Elements of Accessible Pedestrian Push Buttons

- Pushbutton shall be unobstructed and adjacent to a level, all-weather surface to provide access from a wheelchair
- Where there is an all-weather surface, provide a wheelchair accessible route from the pushbutton to the ramp
- Pushbutton placed in allowable reach range of 15 inches minimum to 48 inches maximum for unobstructed reach
- A side reach obstruction is allowed if it does not exceed 10 inches maximum in either height or width
- Pushbuttons are placed between the crosswalk line farthest from the street centerline and the edge of the curb ramp
- Pushbuttons are placed no more than 5 feet from the crosswalk line
- Pedestrian pushbuttons located between 1.5-6 feet from the edge of curb, shoulder, or pavement. Exception: Where there are physical constraints, pushbutton may be placed no more than 10 feet away
- Operable parts of pushbutton shall be operable with one hand and not require tight grasping, pinching, or twisting of the wrist
- The face of the pushbuttons is oriented parallel to the crosswalk it serves
- Pushbutton diameters are at least 2 inches.
- Where two pushbuttons are located on the same corner, the pushbuttons are separated by at least 10 feet
- If two Audible Pedestrian Signal (APS) pushbuttons are not separated by 10 feet or on the same pole, the following features are provided: 1) A Pushbutton locator toner, 2) A tactile arrow, 3) A speech walk message for the WALKING PERSON (symbolizing WALK indication) and 4) A speech pushbutton information message
- Pushbutton shall be adjacent to a level all-weather surface with an accessible route to the curb ramp
- If crossing is prohibited, it should be closed off to all pedestrians

- Adequate crossing time (3.5 feet per second) from top of curb ramp to opposite curb
- A clear space 2.5 feet by 4 feet minimum is provided adjacent to each pushbutton
- Clear space slopes do not exceed 2% in all directions
- Clear space are connected to adjacent pedestrian access routes

3.5 Right of Way Findings

The summary of findings provided in this section present a high-level overview/analysis of the City's curb ramps, sidewalks, driveways, and pedestrian push buttons. Detailed reports of noncompliance have been compiled in the Public Right of Way Accessibility Compliance Assessment Report (ACAR) that can be found in **Appendix N.**

3.5.1 Summary of Sidewalk Findings

A total of 130 miles of sidewalk corridors were evaluated for running and cross slopes, obstructions, vertical displacements, and driveway crossings.

Sidewalk Segments Cross Slopes			
Finding		**Count**	**%**
0% - 2%	Compliant	702	43%
2.1%-5%	Non-Compliant	911	56%
Greater than 5%	Non-Compliant	17	1%
TOTAL		**1630**	**100%**

Sidewalk Obstructions		
Type	**Count**	**%**
Cement Utility Grate	174	7%
Control Box	132	5%
Fire Hydrant	275	11%
Mailbox	14	1%
Metal Utility Grate	115	5%
Moveable Object	21	1%
Parking Meter	1	0%
Road Sign	154	6%
Traffic Signal	89	3%
Utility Pole	235	9%
Buckled Cement Slab	4	0%
Construction Work	9	0%

Foliage	583	23%
Street Lamp	638	25%
Tension Cable	52	2%
Tree Roots	59	2%
TOTAL	**2555**	**100%**

Sidewalk Vertical Displacement		
Height	**Count**	**%**
Non-compliant beveled 0.25” to 0.5”	6	1%
0.25” to 0.5” Non-Compliant	14	2%
0.5” to 1” Non-Compliant	234	36%
Greater than 1” Non-Compliant	398	61%
TOTAL	**652**	**100%**

Sidewalk Other Findings		
Finding	**Count**	**%**
Clear path of travel is chipped, cracked or broken	146	69%
Loose debris and/or rubble	15	7%
Horizontal openings greater than 0.5”	17	8%
At-grade rail crossing excessive flangeway gaps	35	16%
TOTAL	**213**	**100%**

Driveways		
Finding	**Count**	**%**
Compliant Driveway	44	4%
Driveway not part of pedestrian access route	51	4%
Non-compliant Driveway	1047	92%
TOTAL	**1142**	**100%**

3.5.2 Summary of Curb Ramp Findings

A total of 392 curb ramps were evaluated for running slope, cross slope, flares, land area, detectable warning, and the gutter transition.

Main Slopes on Curb Ramps (8.33% maximum allowed)			
Ramp Slope		**Count**	**%**
Less than or equal to 8.33%	Compliant	211	54%
Greater than 8.33%	Non-Compliant	77	20%
Greater than 10%	Non-Compliant	104	27%
TOTAL		**392**	**100%**

Cross Slopes on Curb Ramps (2% maximum allowed)			
Cross Slope		**Count**	**%**
Less than or equal to 2%	Compliant	200	51%
2.1% - 3%	Non-Compliant	85	22%
Greater than 3%	Non-Compliant	107	27%
TOTAL		**392**	**100%**

Widths of Curb Ramps		
Width	**Count**	**%**
Less than or equal to 36-inches	0	0%
Less than 48-inches	1	0.26%
Greater or equal to 48-inches	391	99.74%
TOTAL	**392**	**100%**

Flush Transition on Curb Ramps (no lip allowed)			
Transition		**Count**	**%**
Transition is flush	Compliant	269	69%
Transition has a lip	Non-Compliant	123	31%

TOTAL	**392**	**100%**

Curb Ramps with Truncated Domes			
Truncated Domes		**Count**	**%**
Truncated Dome provided	Compliant	378	96%
Truncated Dome missing	Non-Compliant	14	4%
TOTAL		**392**	**100%**

3.5.3 Summary of Signalized Intersection Findings

Signalized Intersection Findings		
Push Button Type	**Compliant**	**Noncompliant**
Pedestrian Signals provide information in non-visual formats and provide audible and vibrotactile walk indications	9	239
If two pushbuttons are placed less than 10 feet apart or on the same pole, each pedestrian pushbutton is provided with a pushbutton locator tone and provided with a tactile arrow	9	239
If two pushbuttons are placed less than 10 feet apart or on the same pole, each pedestrian pushbutton is provided with a speech pushbutton information message	9	239
Pushbutton placed between the crosswalk line farthest from the street centerline and the edge of the curb ramp	43	205
Pushbutton placed less than 5 feet from the crosswalk line	198	50
Pushbuttons located between 1.5-6 feet from the edge of curb, shoulder, or pavement	216	32
Pushbutton location unobstructed and adjacent to a level, all-weather surface	72	176
Where there is an all-weather surface, there is a wheelchair accessible route from the pushbutton to the curb ramp	224	24

If there is an obstruction to the pushbutton, it is less than 10 inches maximum in either height or width	229	19
If there is a physical constraint, pushbutton is placed no more than 10 feet away edge of curb, shoulder, or pavement	243	5
Face of pushbutton is oriented parallel to the crosswalk it serves	226	22
Operable part of pushbutton is operable with one hand and does not require tight grasping, pinching, or twisting of the wrist	239	9
Pushbutton placed in allowable reach range of 15" to 48" above the finish surface	235	13
Pushbutton diameter at least 2 inches	201	47

3.5.4 Accessibility Compliance Assessment Report (ACAR)

Detailed reports of noncompliance have been compiled in the Public Right-of-Way Accessibility Compliance Assessment Report (ACAR) that can be found in **Appendix N**. The ACAR reports provide the barrier and barrier removal options and will guide the City's planning for barrier removal based on priorities. Not all barriers must be removed to provide barrier access.

3.6 Right of Way Implementation Schedule

3.6.1 Prioritization Criteria for ADA Right of Way Work

Capital improvement projects forming the ADA Right of Way Implementation have been prioritized to determine which projects shall be undertaken first. The Department of Justice's implementing regulations of the ADA and the Federal Highway Administration prioritize public right of way projects based on locations to be modified in the following order:

1. Public Input Requests
2. Proximity to State and local government offices and facilities
3. Proximity to transit facilities (bus stops, train stations)
4. Proximity to places of public accommodations and employers
5. All other areas, including residential

In addition to prioritization based on location as stated above, a ranking of "High, Medium, or Low" degrees of noncompliance, safety, and usability is given each barrier in the right of way.

Based on the results of the barrier prioritization, an ADA Right of Way Implementation Schedule is established to provide improvements to the public right of way over the next 30 year period.

Public input requests for constructing curb ramps, installing accessible pedestrian signals, or for providing other accessibility improvements in the right of way would have first priority.

3.6.2 Cost Estimation

Estimate costs are based on information obtained from several industry accepted data-base sources, such as R.S. Means, BNI Building News, and National Estimator. These sources are used as a basis, along with the estimator's professional judgment, to adjust for the specific project type, location, complexity and size, and other unique or special circumstances.

All costs represented in this report reflect current-year U.S. dollars. The costs generated are built on identified deficiencies with replacement of materials or components in-kind unless industry standard requires change of material or component type.

Costs for contingency, escalation, design, construction management, engineering, permitting, inspection, and similar professional services for developing the plans to remove barriers are included in the expenditure plan and estimated at 30%. Other indirect costs, such as temporary space rental or costs associated with fundraising or financing, are not included.

Opinions of costs of repair or replacements are approximations only, and should not be interpreted as bids or offers to perform work. Actual costs can be affected by the extent of work to be done as one project, the quality of contractor, the quality of materials chosen, and the specific work conditions.

3.6.3 Curb Ramp Schedule

Note: Costs included in these tables do not include community member requests. Additionally, any completed, ongoing, or scheduled Capital Improvement Projects (CIP) are not taken into account in this draft.

The Curb ramp schedule is located in **Appendix N-2** Transition Plan.

3.7 Public Right of Way Funding

As part of a typical compliant Transition Plan, the barrier removal must be funded and implemented as well. There are different ways to approach these accessibility improvements:

- Incorporating into existing capital improvement projects
- Creating special projects that specifically address access requirements

Funding sources for capital improvement projects are described in this section. These programs include on-going City capital improvement and maintenance programs, as well as specific projects and funding sources. An ADA Capital Implementation Plan uses, to the maximum extent possible, existing and prospective funding programs and sources.

The plan recommends specific goals for the construction of accessibility improvements. While specifying locations and general scope of work, the plan is intended to serve as a conceptual plan, whereby the extent and goals of future projects will be evaluated prior to preparing detailed cost estimates.

3.7.1 Capital Improvement Program

The Capital Improvement Program (CIP) is the City's operating document and financial investment plan for all existing City infrastructure project improvements and new capital outlay projects. The City operates its CIP Program on a yearly plan, ensuring projects are properly planned and completed in accordance with the City's major infrastructure needs, Council priorities, and in line with current year budget objectives.

The City's CIP Program is primarily funded by the City's General Fund, bond proceeds, and grant funds. The extent of funding levels may be fixed or may vary yearly.

On-going capital improvement programs operated by and coordinated with the City include the following:

- Grade Separations
- Street Widening Reconstruction, Resurfacing, and Slurry Seal
- Storm Drain and Stormwater Improvements
- Traffic Signal and Traffic Related Improvements
- Bridge Widening, Seismic Retrofit, and Preventative Maintenance
- Homestead Museum
- Industry Hills Golf and Convention Facilities
- El Encanto C.I.P.
- Expo Center at Industry Hills
- Open Spaces/Tonner Canyon/Tres Hermanos
- Tres Hermanos Ranch Property
- Property Redevelopment and Demo
- IPU-Water Utility

- IPU-Electric Improvements
- Civic Center Facilities
- Miscellaneous
- Civic Center Improvements – CIP
- Facilities Improvements

The City of Industry CIP is envisioned as one that will use, to the maximum extent possible, existing and prospective funding programs and sources to provide ADA improvements. The ADA improvements will be funded either as stand-alone projects or as components of transportation improvement projects.

3.7.2 Specific Funding Programs and Projects

There are various other opportunities for funding sources. These programs and sources which can be used for ADA improvements include the following:

Federal Funding:

Community Development Block Grant Funding (CDBG) – This can be used for ADA improvements in qualified low-income census tract areas.

Safe Routes to School Program (SR2S):

SRTS programs can be implemented by a department of transportation, metropolitan planning organization, local government, school district, or even a school. It is an approach that promotes walking and bicycling to school through infrastructure improvements, enforcement, tools, safety education, and incentives to encourage walking and bicycling to school.

Transnet:

These funds are generated by various sources including gas taxes. They are used by some cities for ADA improvements in the public right of way such as improving accessibility in sidewalks, streets, crosswalks and by installing Audible Pedestrian Signals (APS).

Local Funding:

Various funding sources can be used for accessibility improvements, such as the general fund, CIP funds, Developmental Impact Fees (DIF), Maintenance Assessment Districts (MAD), Park Improvement funds.

Development Impact Fees (DIF):

The Development Impact Fees Program uses fees charged to developers of large housing and commercial projects. It ensures that the City's transportation network can sustain traffic generated from new development. A DIF is assessed based on which area a project is in and is based on the amount of traffic generated by the project's use and size.

Financing Districts:

Expenditures and funding allocations can be planned for the various City of Industry Financing Districts.

Grant funding:

There are various grant funding opportunities that can be used for ADA improvements.

APPENDIX A: POLICIES AND PROCEDURES IMPLEMENTATION PLAN

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
Public Notice and Written Notifications			
1.3.1	No formal published Americans with Disabilities Act (ADA) Notice	Publish ADA Notice on City Website, public counters, bulletin boards, social media, etc.	ADA Coordinator
ADA Coordinator			
1.3.2	City has a designated ADA Coordinator	Public ADA Coordinator's name on City website	Website Administrator
		Consider creating an ADA liaison team	ADA Coordinator
		Provide periodic training opportunities to the ADA coordinator regarding their roles and responsibilities	ADA Coordinator
		Include ADA Coordinator contact information on public notifications.	ADA Coordinator
Grievance Procedure			
1.3.3	No formal published grievance procedures	Adopt a City-wide Grievance Procedure. Sample provided.	City Policy-makers
	City staff are generally not aware of how and with whom to file a disability discrimination complaint.	Post ADA notice at all public counters.	ADA Coordinator
		Provide staff training opportunities on how and with whom to file a disability discrimination complaint.	ADA Coordinator
Fees and Surcharges			

Submittal: November 4, 2021

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
1.3.4	There are no circumstances in which a person with a disability would be asked to pay a fee or meet any other requirement not imposed on other program participants for the City, but there is also no written policy prohibiting the charging of fees to provide reasonable accommodations.	Develop a written City-wide policy that prohibits the charging of fees or surcharges to provide reasonable accommodations to facilities, programs, services or activities to persons with disabilities.	City Policy-makers
Use of Consultants			
1.3.5	The City uses outside contracted employees to provide services to the public.	Develop a written policy that outlines contracted employees and consultants shall operate per City accessibility policies and standards.	City Policy-makers
Access to Programs, Services, and Activities			
1.3.6	City has no policies or practices that could have the direct or indirect effect of excluding or limiting the participation of individuals with disabilities.	Develop a written policy that describes the City's commitment that they will not adopt any policies that are discriminatory or engage in practices that are discriminatory.	City Policy-makers
Modifications to Policies, Practices, or Procedures			

Submittal: November 1, 2021

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
1.3.7	No formal policy, forms, or training on reasonable modifications to City policies, practices, or procedures. No process for determining whether a policy or practice modification would fundamentally alter the nature of the program or service being offered.	Adopt and publish a reasonable accommodation policy and form. Sample form provided.	City Policy-makers
Public Meetings			
1.3.8	Not all public meeting notices contain information relative to how auxiliary aids and services can be obtained (only City Agendas).	Include Notification of ADA Compliance all City public meeting notices.	ADA Coordinator
	No available information regarding accommodations and the process for requesting auxiliary aids, assistive listening systems, interpreters, alternative formals, specialized equipment or assisted services.	All public meetings shall be held in locations that comply with ADA requirements in terms of being architecturally accessible to individuals with disabilities.	ADA Coordinator

Submittal: November 1, 2021

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
		All public meetings shall be held in locations that comply with ADA requirements in terms of being architecturally accessible to individuals with disabilities.	
		Publicize the availability of auxiliary aids, assistive listening systems, interpreters, alternative formats, specialized equipment or assisted services at public meetings.	ADA Coordinator
Equally Effective Communication			
1.3.9	The City does not have a list of available interpreters, readers, etc. to be used to accommodate requests.	Maintain a list of on-call American Sign Language interpreters who may be brought to meetings to assist individuals with hearing disabilities. This list shall be available to all City departments so that when a request is made, interpreters can be provided in a timely manner.	ADA Coordinator
	The City does not provide assistive listening devices at meetings, conferences and hearings upon request.	Purchase assistive listening devices to be used at meetings, conferences, and hearings upon request.	Finance / Purchasing
		Provide program, facility, permits, and reservation information in a variety of formats upon request (for example, in large-print format for persons with visual disabilities or in simple language for persons with cognitive disabilities).	ADA Coordinator
		Where the City communicates by telephone with applicants and beneficiaries, ensure that TDD's or equally effective telecommunication systems are used to communicate with individuals with impaired hearing or speech. (28 CFR §35.161).	ADA Coordinator
Distribution of Publication			

Submittal: November 1, 2024

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
1.3.10	In general, the City provides materials available for public review in locations that are accessible to persons with disabilities.	Develop a written policy describing the requirement that material on display and available for public review must be accessible for individuals with disabilities.	City Policy-makers
Website Accessibility and Section 508			
1.3.11	A preliminary review of the City's website was performed using the W3C Web Accessibility initiative, "Easy Checks – A First Review of Web Accessibility" was conducted.	Establish web accessibility guidelines to ensure that your web pages- Internet and Intranet - are accessible to people with disabilities. Develop a policy that website updates shall be designed to follow WCAG 2.1 guidelines.	Website Administrator
		Designate and advertise an email address to allow people with disabilities to inform the webmaster of accessibility problems encountered on the website.	Website Administrator
		Perform a thorough web accessibility evaluation. The checks presented here are not definitive and only cover a few issues. A robust evaluation is recommended to evaluate all issues comprehensively	Website Administrator
		Check all images (in all pages) for alt text and add the missing alt text Provide contrast ratio to correct deficiencies Continue to provide closed captioning (or transcripts) to any videos posted by the City Add control for the movement of information on sliders	Website Administrator
Emergency Evacuation Procedures			

Submittal: November 1, 2021

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
1.3.12	Not all staff departments have received training regarding the evacuation of people with disabilities during an emergency evacuation out of a City building.	Develop guidelines for the evacuation of persons with disabilities in various types of emergency situations.	ADA Coordinator
	There are no specific procedures for provision for evacuating people with disabilities.	Provide training opportunities for City staff regarding emergency evacuation procedures with periodic drills.	ADA Coordinator
Special Events			
1.3.13	The City does not an accessibility checklist for pubic events.	The City shall provide a checklist and information during the application process to inform organizers of their responsibility for accessibility under the ADA.	ADA Coordinator
Printed Information			
1.3.14	Staff indicated that they have some	Develop a City-wide policy that describes describe the City's commitment to provide program information in alternative formats on an individual basis as requested.	City Policy-makers
	City does not portray individuals wit	When publications are accompanied by illustrations, images of individuals with and without disabilities shall be included.	ADA Coordinator
	Publications, service announcements, and advertisements are not always made known that they can be made available in alternative formats.	Include a notice on all materials printed by the City that are made available to the public that the publications can be made available upon request in alternative formats.	ADA Coordinator
		Provide staff training opportunities on the production of publications in various alternative formats.	ADA Coordinator
Printed Information			

Submittal: November 1, 2021

Section Number	Summary Description of Finding	Recommendation	Department/Person Responsible for Implementation:
1.3.15	The City does not have TDDs/TTYs nor are the staff members are trained in the use of TDD/TTY equipment or other means of communicating over the telephone with a person with hearing and speech disabilities, such as the 711 California Relay System. At the time of this Self-Evaluation, City staff indicated the recent installation of new telephones systems in the City.	Obtain access to TTY system and conduct staff training on operating TTY/TDDs and in other means of communicating over the telephone with a person having a hearing or speech disability. Note that 911 is not included in this evaluation because it is under LA County jurisdiction.	Finance / Purchasing

Submittal: November 1, 2024

APPENDIX B: CITY WEBSITE "EASY CHECKS" REVIEW

CITY WEBSITE EASY CHECKS REVIEW

BACKGROUND:

The internet is an important tool used by the City of Industry to do business. The City of Industry routinely makes information about their programs, activities, and services available to the public by posting it on their website. As a result, many people can easily access this information. The website also allows the public to participate in at any time of day and without the assistance of government personnel.

The ADA Title II and the Section 508 Rehabilitation Act of 1973 require that state and local governments provide qualified individuals with disabilities equal access to their programs, services, or activities. One way to help meet these requirements is to ensure that government web sites have accessible features for people with disabilities. As part of this ADA Self-Evaluation and Transition Plan, a preliminary review of the City's website was performed using the W3C Web Accessibility initiative, "Easy Checks – A First Review of Web Accessibility."

METHODOLOGY:

Web Content Accessibility Guidelines (WCAG) is developed through the W3C process in cooperation with individuals and organizations around the world, with a goal of providing a single shared standard for web content accessibility that meets the needs of individuals, organizations, and governments internationally.

WCAG 2.1 is a stable, referenceable technical standards with specific guidelines to check. There are 12-13 guidelines that are organized under 4 principles: perceivable, operable, understandable, and robust. For each guideline, there are testable SUCCESS CRITERIA, which are at three levels: A, AA, and AAA. WCAG 2.1 extends Web Content Accessibility Guidelines 2.0 [WCAG20], which was published as a W3C Recommendation December 2008.

WCAG has developed a preliminary checklist called the "Easy Checks – A First Review of Web Accessibility." The purpose of this check helps assess the accessibility of the web page. The detailed results of the website review are presented in this section.

RECOMMENDATIONS:

1. **The City should perform a thorough web accessibility evaluation. The checks presented here are not definitive and only cover a few issues. A robust evaluation is recommended to evaluate all issues comprehensively. Note that review for hearing impaired not provided and is not part of the standard checklists. City to have a thorough review with website specialist.**
2. **Check all images (in all pages) for alt text and add the missing alt text**
3. **Provide contrast ratio to correct deficiencies**

4. **Continue to provide closed captioning (or transcripts) to any videos posted by the City**
5. **Add control for the movement of information on sliders**

EASY CHECKS RESULTS

CRITERIA 1: PAGE TITLE CHECKS (PG 6-9 OF W3C WEB ACCESSIBILITY INITIATIVE GUIDELINES):

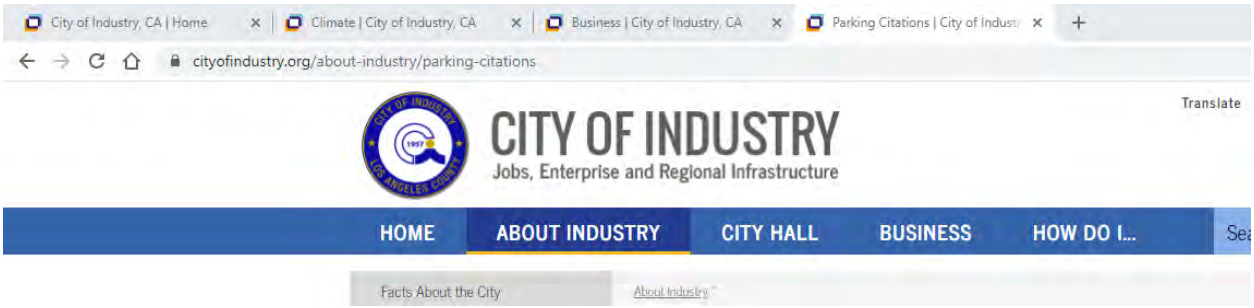
Page Titles are shown in the window title bar, in browser tabs when there are multiple web pages open, and in search engine results. Best practice is for Titles "front-loaded" with the important and unique identifying information first. For example:

Poor Titles

- Industry About Us
- Industry Contact Us
- Industry Public Works

Better Page Titles:

- About Industry
- Contact Industry
- Public Works Industry



Finding: Page titles are front-loaded. The unique page title is placed before "Industry."

The page titles also adequately and briefly describe the content of the pages and adequately distinguishes pages from one another.

This is good practice and there are no recommendations for modifications in this criterion.

CRITERIA 2: IMAGE TEXT ALTERNATIVES "ALT TEXT" (PG 9-14 OF W3C WEB ACCESSIBILITY INITIATIVE GUIDELINES)

Text Alternatives ("alt text") convey the purpose of an image, including pictures, illustrations, charts, etc. Text alternatives are used by people who cannot see the image. (For example, people who are blind and use screen readers can hear the alt text read out loud). From checks from different web pages, various pages have images that are missing alt text.

Finding: Not all images contain alt text.

Recommendation: It is recommended that the City of Industry Webmaster check all images (in all pages) for alt text and add the missing alt text.

CRITERIA 3: HEADINGS (PG 18-24 OF W3C WEB ACCESSIBILITY INITIATIVE GUIDELINES):

All pages checked have headings that are marked up as headings and the heading hierarchy is meaningful.

This is good practice and there are no recommendations for modifications for this criterion.

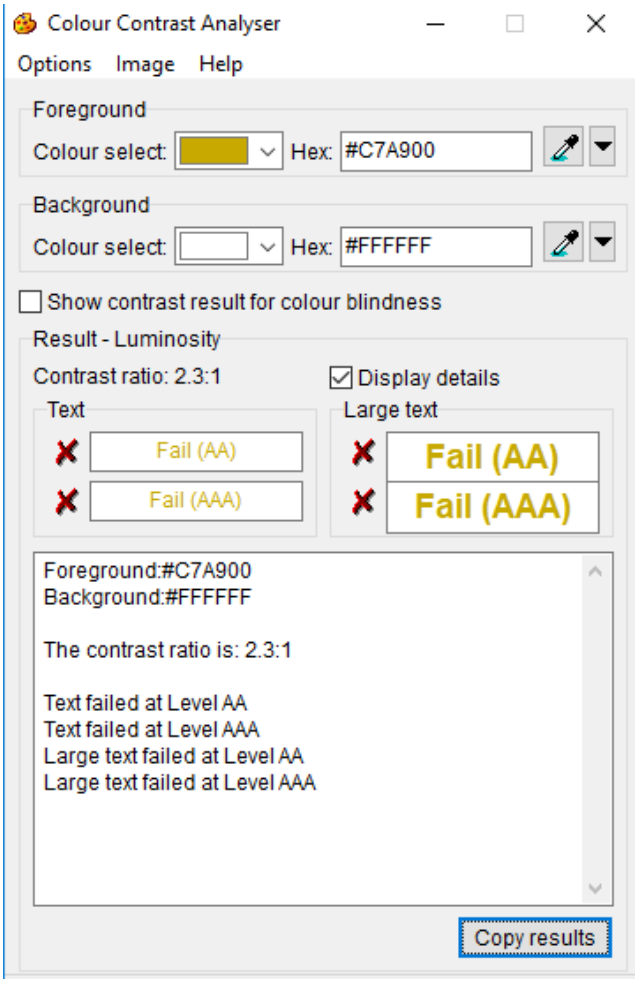
CRITERIA 4: CONTRAST RATIO (PG 24-29 OF W3C WEB ACCESSIBILITY INITIATIVE GUIDELINES):

Web browsers should allow people to change the color of the text and background, and webpages need to work when people change colors. From random checks of certain pages,

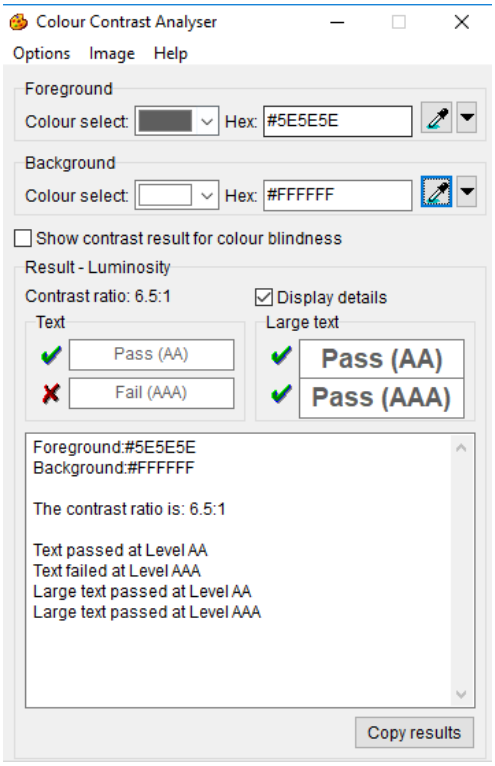
The color contrast was checked using the Internet Explorer WAT (Web Accessibility Toolbar) Colour Contrast Results (Luminosity Contrast Ratio).

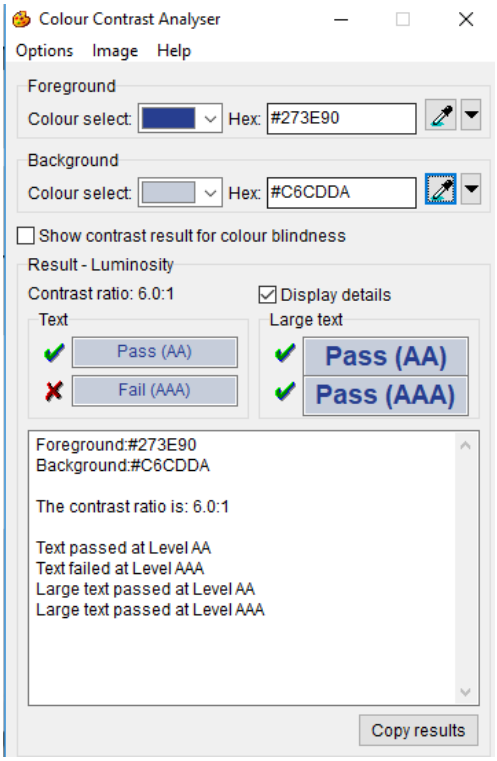
Recommendation: provide contrast ratio to correct deficiencies as noted on the next pages:

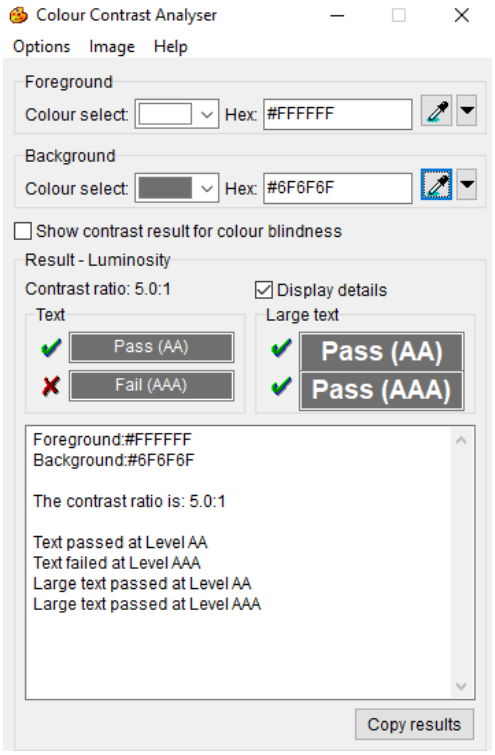
One color combination failed at all criteria:



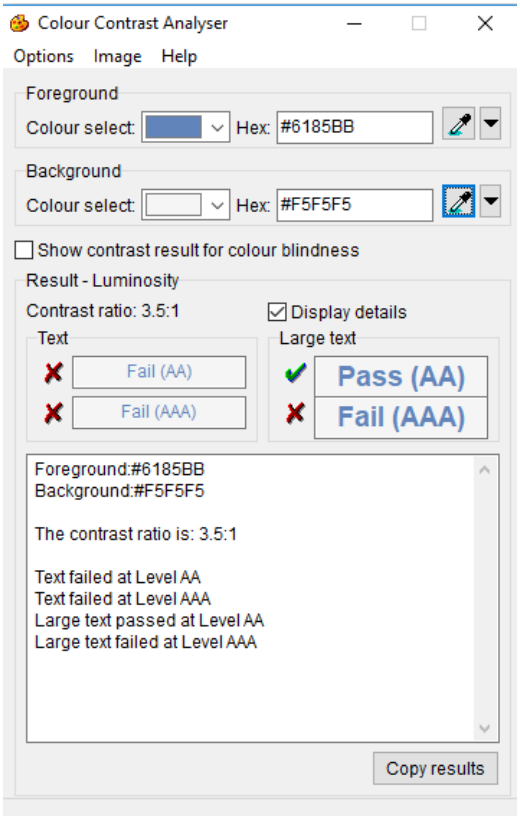
Three color combinations failed at the AAA criteria



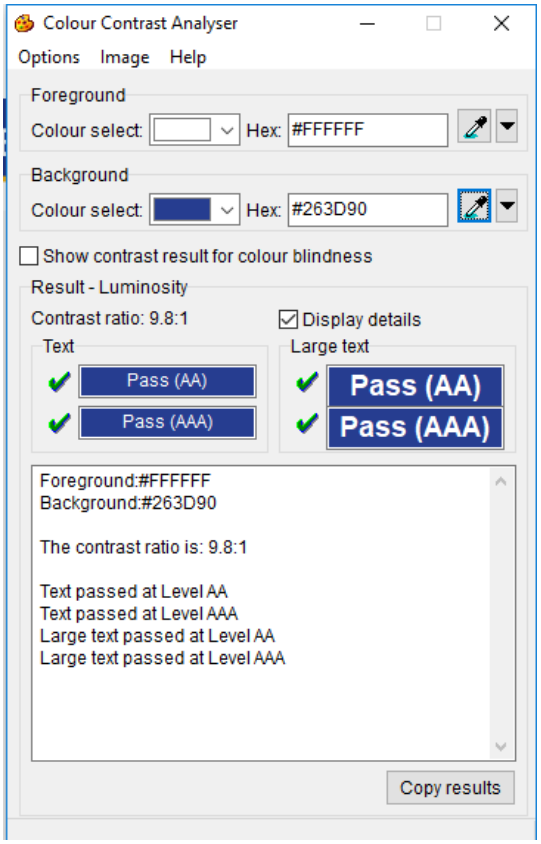


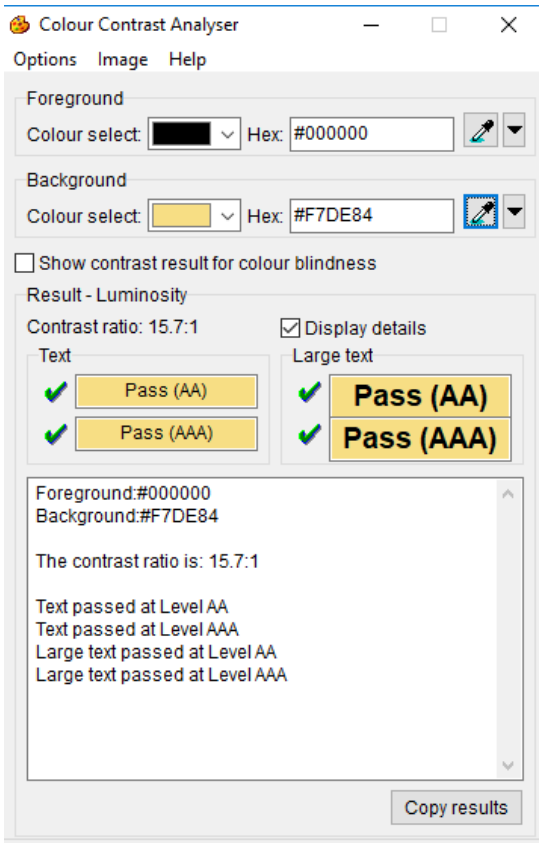


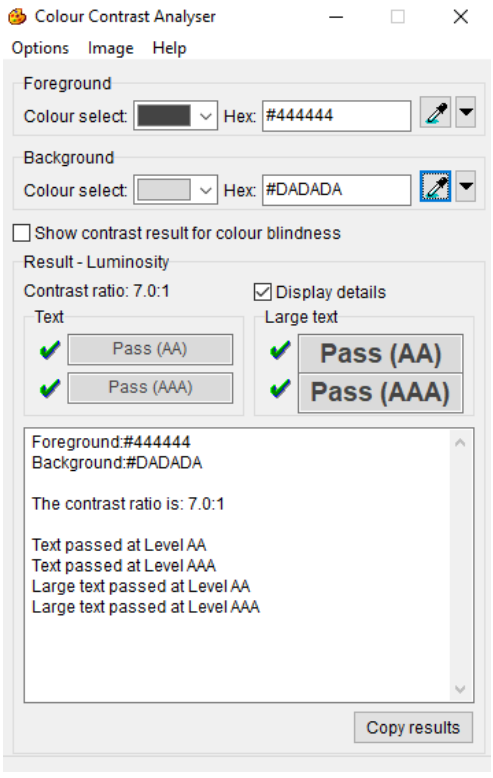
One color combination failed at all criteria except for large text AA



Three color combination passed all criteria.







CRITERIA 5: RESIZE TEXT (PG 25-29 OF W3C WEB ACCESSIBILITY INITIATIVE GUIDELINES):

For Internet Explorer the text size increases and is good. For Chrome the text zoom also generally checks as described in the guidelines. There were no cases of text overlap.

The website passed this test and there are no recommendations for this criterion.

CRITERIA 6: KEYBOARD ACCESS AND VISUAL FOCUS (PG 34-38 OF W3C WEB ACCESSIBILITY INITIATIVE GUIDELINES):

- Tab to all and Tab away: This functionality worked and was able to tab to elements and able to tab away from elements.
- Media play controls passed the test.
- The Tab order follows the logical reading order.
- The keyboard only functionality was very good.
- Drop-down lists in forms worked.
- Most image links appear to work.

The website passed this test and there are no recommendations for this criterion.

CRITERIA 7: FORMS, LABELS, AND ERRORS (PG 32-39 OF W3C WEB

Keyboard access:

Keyboard access in the form was very good.

Label Checks:

It is best practice that every form control has a label associated with it using 'label', 'for', and 'id.' Most of the labels in the form checked were marked up with label 'for' and 'id.'

Required fields and other instructions:

Fields that are required are clearly indicated with an asterisk and was not dependent on color alone.

Error Handling:

Error message was clear and specific, easily findable, and fields without errors remained populated with the date.

The website passed this test and there are no recommendations for this criterion.

CRITERIA 8: MULTIMEDIA

Information in podcasts or other audio is not available to people who are deaf, unless it is provided in an alternative format such as captions and text transcripts. Visual information in videos is not available to people who are blind, unless it is provided in an alternative format such as auto or text. When there are videos published on the website or a City's YouTube channel, they must be captioned.

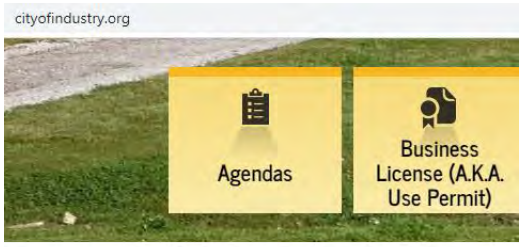
Recommendation: Continue to provide closed captioning (or transcripts) to any videos posted by the City.

CRITERIA 9: MOVING, FLASHING, OR BLINKING CONTENT:

Moving, flashing, or blinking content include carousels, ads, videos, auto-updating stock tickers, scrolling news feeds, etc. User need to be able to control moving content, especially some people with attention deficit disorder or visual processing disorders.

At the time of this report, review of the website has indicated that was scrolling information (sliders) that start automatically and could not be stopped.

Recommendation: Add control for the movement of information on sliders.



Submittal: November 2024

APPENDIX C: PUBLIC RIGHT OF WAY ADA REQUEST FORM

Appendix C – Public Right of Way ADA Request Form

PUBLIC RIGHT OF WAY ADA REQUEST FORM

This form is an initial step in processing your request for an accommodation under Title II of the Americans with Disabilities Act (ADA). An accommodation is a reasonable modification or adjustment that enables a qualified person with a disability to enjoy the same access to employment, facilities, services, activities and programs that are enjoyed by persons without disabilities. Such request allows the City to become aware of an individual requesting an accommodation. Accommodating such requests by the City is done based on the nature of budgetary constraints and the requests being asked for. Accepting such request by the City shall not imply that the City will be able to install or modify the path of travel at any time in the future.

This request form is intended to create a means of communicating directly with the ADA Coordinator in order for the City to evaluate and prioritize ADA Path of Travel needs in our community.

Please be as specific as possible with the information provided below. Completed forms may be sent to:

Kathy Tai, ADA Coordinator
15625 Mayor Dave Way
City of Industry, CA 91744-0366
(626) 333-2211 Ext. 232
ktai@cityofindustry.org

Date: _____

Name: _____

Address: _____

Telephone Number: _____Email Address: _____

Request for installation or repair of sidewalk: Yes _____ No _____

Request for installation or repair of curb ramp: Yes _____ No _____

Location of Path of Travel Barrier: _____

Description of Path of Travel Barrier: _____

APPENDIX D: PUBLIC INPUT QUESTIONNAIRE

Survey for City of Industry, CA
Americans with Disabilities Act
(ADA) Public Input Questionnaire

The City is seeking input from the public to help enhance accessibility to City facilities, programs, services and events.

The City of Industry is in the process of preparing their ADA Self Evaluation and Transition Plan which is required by Americans with Disabilities Act (ADA) Title II (28 CFR §35.105(a)). Your input will assist the City in improving its ability to serve the needs of people with disabilities and their families.

Please send completed forms to:

Email:
ktai@cityofindustry.org

Mail:
Kathy Tai
Development Services Manager and ADA Coordinator
15625 Mayor Dave Way
City of Industry, CA 91744-0366

Date (Optional): _____ Address (Optional): _____
Name (Optional): _____
Phone (Optional): _____
Email (Optional): _____

Questions:

1. What is your relationship to the City of Industry?
   - ☐ Work here
   - ☐ Do business here
   - ☐ Live here
   - ☐ Volunteer here
   - ☐ Other _____

2. List any program, services or activities in which you participate at the City.

3. Do you know who to contact if you need assistance, have a concern or complaint, or need an accommodation to access a facility, program, service or event?

4. Have you ever requested an accommodation for a disability from the City?

5. If an accommodation was requested, was your request for accommodation made by the City?

6. Have you ever requested auxiliary aids, an interpreter, or specialized equipment?

7. Have you experienced any non-accessible areas or programs? *(Examples: no accessible parking spaces, difficulty reaching an accessible entrance, steep ramps, uneven sidewalks, stairs only to the facility, narrow doorways, protruding objects in the hallways, lack of assistive devices, missing or inappropriate signage, lack of interpreters, etc.)*

8. Is information provided regarding accommodations, auxiliary aids (such as assistive listening systems, interpreters, alternate formats, specialized equipment, or assisted services, etc.)?

9. Is the City website accessible to you? If no, please describe.

10. Is the City phone system accessible to you? If no, please describe.

11. Have you attended any special events at the City? If yes, did you encounter any non-accessible areas?

12. Is accessible seating provided for individuals with disabilities at meetings, classes, programs, etc.?

13. What do you feel is the highest priority for accessibility in the City of Industry?

14. What program, activity or facility improvements do think would promote accessibility to the City's programs, services, and facilities?

APPENDIX E: DOJ/DOT JOINT TECHNICAL ASSISTANCE ON THE TITLE II OF THE ADA REQUIREMENTS TO PROVIDE CURB RAMPS WHEN STREETS, ROADS, OR HIGHWAYS ARE ALTERED THROUGH RESURFACING AND SUPPLEMENT

U.S. Department of Justice
Civil Rights Division
Disability Rights Section

U.S. Department of Transportation
Federal Highway Administration

Department of Justice/Department of Transportation Joint Technical Assistance[1] on the Title II of the Americans with Disabilities Act Requirements to Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing

Title II of the Americans with Disabilities Act (ADA) requires that state and local governments ensure that persons with disabilities have access to the pedestrian routes in the public right of way. An important part of this requirement is the obligation whenever streets, roadways, or highways are *altered* to provide curb ramps where street level pedestrian walkways cross curbs.[2] This requirement is intended to ensure the accessibility and usability of the pedestrian walkway for persons with disabilities.

An alteration is a change that affects or could affect the usability of all or part of a building or facility.[3] Alterations of streets, roads, or highways include activities such as reconstruction, rehabilitation, *resurfacing*, widening, and projects of similar scale and effect.[4] Maintenance activities on streets, roads, or highways, such as filling potholes, are not alterations.

Without curb ramps, sidewalk travel in urban areas can be dangerous, difficult, or even impossible for people who use wheelchairs, scooters, and other mobility devices. Curb ramps allow people with mobility disabilities to gain access to the sidewalks and to pass through center islands in streets. Otherwise, these individuals are forced to travel in streets and roadways and are put in danger or are prevented from reaching their destination; some people with disabilities may simply choose not to take this risk and will not venture out of their homes or communities.

Because resurfacing of streets constitutes an alteration under the ADA, it triggers the obligation to provide curb ramps where pedestrian walkways intersect the resurfaced streets. See Kinney v. Yerusalim, 9 F 3d 1067 (3rd Cir. 1993). This obligation has been discussed in a variety of technical assistance materials published by the Department of Justice beginning in 1994.[5] Over the past few years, state and local governments have sought further guidance on the scope of the alterations requirement with respect to the provision of curb ramps when streets, roads or highways are being resurfaced. These questions have arisen largely due to the development of a variety of road surface treatments other than traditional road resurfacing, which generally involved the addition of a new layer of asphalt. Public entities have asked the Department of Transportation and the Department of Justice to clarify whether particular road surface treatments fall within the ADA definition of alterations, or whether they should be considered maintenance that would not trigger the obligation to provide curb ramps. This Joint Technical Assistance addresses some of those questions.

Where must curb ramps be provided?

Generally, curb ramps are needed wherever a sidewalk or other pedestrian walkway crosses a curb. Curb ramps must be located to ensure a person with a mobility disability can travel from a sidewalk on one side of the street, over or through any curbs or traffic islands, to the sidewalk on the other side of the street. However, the ADA does not require installation of ramps or curb ramps in the absence of a pedestrian walkway with a prepared surface for pedestrian use. Nor are curb ramps required in the absence of a curb, elevation, or other barrier between the street and the walkway.

Submittal: November 1, 2024

When is resurfacing considered to be an alteration?

Resurfacing is an alteration that triggers the requirement to add curb ramps if it involves work on a street or roadway spanning from one intersection to another, and includes overlays of additional material to the road surface, with or without milling. Examples include, but are not limited to the following treatments or their equivalents: addition of a new layer of asphalt, reconstruction, concrete pavement rehabilitation and reconstruction, open-graded surface course, micro-surfacing and thin lift overlays, cape seals, and in-place asphalt recycling.

What kinds of treatments constitute maintenance rather than an alteration?

Treatments that serve solely to seal and protect the road surface, improve friction, and control splash and spray are considered to be maintenance because they do not significantly affect the public's access to or usability of the road. Some examples of the types of treatments that would normally be considered maintenance are: painting or striping lanes, crack filling and sealing, surface sealing, chip seals, slurry seals, fog seals, scrub sealing, joint crack seals, joint repairs, dowel bar retrofit, spot high-friction treatments, diamond grinding, and pavement patching. In some cases, the combination of several maintenance treatments occurring at or near the same time may qualify as an alteration and would trigger the obligation to provide curb ramps.

What if a locality is not resurfacing an entire block, but is resurfacing a crosswalk by itself?

Crosswalks constitute distinct elements of the right-of-way intended to facilitate pedestrian traffic. Regardless of whether there is curb-to-curb resurfacing of the street or roadway in general, resurfacing of a crosswalk also requires the provision of curb ramps at that crosswalk.

---

1 The Department of Justice is the federal agency with responsibility for issuing regulations implementing the requirements of title II of the ADA and for coordinating federal agency compliance activities with respect to those requirements. Title II applies to the programs and activities of state and local governmental entities. The Department of Justice and the Department of Transportation share responsibility for enforcing the requirements of title II of the ADA with respect to the public right of way, including streets, roads, and highways.

2 See 28 CFR 35.151(*i*)(1) (Newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway) and 35.151(i)(2) (Newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways).

3 28 CFR 35.151(b)(1).

4 2010 ADA Accessibility Standards, section 106.5.

5 See 1994 Title II Technical Assistance Manual Supplement, Title II TA Guidance: The ADA and City Governments: Common Problems; and ADA Best Practices Tool Kit for State and Local Governments: Chapter 6, Curb Ramps and Pedestrian Crossings under Title II of the ADA, available at ada.gov.

The Americans with Disabilities Act authorizes the Department of Justice (the Department) to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This document provides informal guidance to assist you in understanding the ADA and the Department's regulations.

This guidance document is not intended to be a final agency action, has no legally binding effect, and may be rescinded or modified in the Department's complete discretion, in accordance with applicable laws. The Department's guidance documents, including this guidance, do not establish legally enforceable responsibilities beyond what is required by the terms of the applicable statutes, regulations, or binding judicial precedent.

APPENDIX F: PUBLIC EVENT POLICY AND CHECKLIST

PUBLIC EVENT POLICY AND CHECKLIST

ACCESSIBLE PUBLIC EVENT – CONTACT INFORMATION FORM

EVENT NAME / DESCRIPTION:

_____

_____

EVENT LOCATION / ADDRESS:

_____

_____

EVENT ON SITE CONTACT PERSON:

_____

_____

PHONE NUMBER: _____ EMAIL ADDRESS: _____

DATE & TIME OF THE EVENT: _____ /_____

DEPARTMENT CONTACT: _____

PHONE NUMBER: _____ EMAIL ADDRESS: _____

It is the policy of the City that all City-sponsored public meetings and events be architecturally and programmatically accessible to people with disabilities. This checklist has been developed in order to assist you, the organizer, in ensuring that your meeting and/or event is accessible.

Please discuss the results of the following questions with the City's ADA Coordinator to ensure that the meeting or event will be in compliance with ADA requirements.

Submittal: November 2014

Individual terms used in the checklist are defined in the “Definitions” section of this document.

DRAFT

Submittal: November 2015

Appendix F- Public Event Policy and Checklist

Section One: Architectural Accessibility Checklist			
Event Set-up:	**YES**	**NO**	**N/A**
If a stage or raised dais is provided, is it accessible by means of a ramp, wheelchair lift, or portable wheelchair lift.			
Fencing or other crowd control barriers are placed so as to provide an accessible route.			
If a stage, raised platform, or dais is provided, and it would be very difficult to make provisions for wheelchair access, describe alternative options for accessibility.			
Getting to the Event:			
An accessible route exists from the street and from the disabled parking spaces to the event and all event activities.			
All public events should have proper signage to direct the public to the location.			
Accessible parking: Does the meeting, event site, or facility provide sufficient disabled parking spaces? **Table *11B*-208.2 Parking Spaces** **Total Number of Parking Spaces Provided in Parking Facility** / **Minimum Number of Required Accessible Parking Spaces** 1 to 25 — 1 26 to 50 — 2 51 to 75 — 3 76 to 100 — 4 101 to 150 — 5 151 to 200 — 6 201 to 300 — 7 301 to 400 — 8 401 to 500 — 9 501 to 1000 — 2 percent of total 1001 and over — 20, plus 1 for each 100, or fraction thereof, over 1000			
Amenities:			
Accessible restrooms are available and in the same vicinity of the regular restrooms.			
An accessible route is provided to the accessible restrooms.			
Accessible drinking fountains are available (if drinking fountains provided).			
Accessible telephones are available (if telephones are provided).			
Art displays or exhibits are positioned to provide an accessible route and to not be a hazard to people who are blind or have visual disabilities.			

If a public event has food or beverages as part of the event, are they located so that a wheelchair user or person of short stature can reach the area of transaction 48 inches maximum above the floor or ground?			
Seating:	**YES**	**NO**	**N/A**
If seating is provided, are enough assessable seating provided per table. **Table *11B*-221.2.1.1 Number of Wheelchair Spaces in Assembly Areas** **Number of Seats** / **Minimum Number of Required Wheelchair Spaces** 4 to 25 — 1 26 to 50 — 2 51 to 150 — 4 151 to 300 — 5 301 to 500 — 6 501 to 5000 — 6, plus 1 for each *100*, or fraction thereof, between 501 through 5000 5001 and over — *46*, plus 1 for each 200, or fraction thereof, over 5000			
Are provisions made for wheelchair and companion seating?			
Are assistive listening system in provided in assembly areas?			
Signs are provided indicating the accessible seating areas.			
Signs are provided indicating assistive listening device/system.			
If the meeting, event site, or facility is not accessible to wheelchair users, is there an accessible alternate site or facility that is accessible?			
Section Two: Programmatic Accessibility and Effective Communication	**YES**	**NO**	**N/A**
Do all notices and/or announcements for the meeting or event include ADA accessibility compliance information? This includes agendas, brochures, pamphlets, and web site notifications.			
Do all notices and/or announcements for the meeting or event include information on whom to contact to request ADA accommodations? For example, the City's ADA Coordinator, the City's Department staff member, or event planner (name & phone).			
If a sound system is provided, are provisions made for people with hearing impairments who need sound amplification devices as an auxiliary aid?			
If film or video materials are produced by the City, are they closed captioned for the deaf and hearing impaired?			

If printed materials are provided, are they available in alternative formats? For example, large print copies and/or electronically.			

ACCESSIBLE PUBLIC EVENT POLICY: DEFINITIONS

Accessibility information – Meeting or Event Notice shall include information on how to request accommodations, including alternative formats or auxiliary aids and services, notice of wheelchair accessibility, and information on whom to contact to make accommodation requests. Please see "Sample Accessible Meeting Notice," and "Sample Accessible Event Notice" below.

Accessible dais – A fixed or mobile public speaking location that includes a table or podium that is no higher than 34" on which a microphone can be placed**.**

Accessible drinking fountains – Drinking fountain with the bubbler no higher than 36" with knee clearance underneath that is 27" high x 18" minimum deep.

Accessible exhibit materials – Alternatives that provide equivalent exhibit information for people with sensory disabilities in a manner appropriate to the program material.
Examples include, but are not limited to:

- Titles of work and narrative using large 14-point san serif fonts on a high contrast background
- Taped audio descriptions of photographs/artwork
- Tactile replicas of art objects
- Captioning of video or film presentations
- Trained staff available to provide descriptions or tours

Accessible surface – Firm, stable and slip-resistant surfaces, such as concrete, asphalt, wood, carpet, etc. Grass, wood chips and sand are not accessible surfaces.

Accessible parking – Parking which is set aside for exclusive use by people with disabilities, located near the accessible entrance to the facility. **Note:** Temporary accessible spaces can be created using signs and cones, provided that dimensional requirements are met (contact the City of Industry Public Works Department for temporary signage).

Accessible portable toilets and sinks – Toilets and sinks that meet state and federal requirements for accessibility. Acceptable toilet manufacturers include but are not limited to Satellite and L&L Manufacturing. If one unit is to be provided, it must be accessible. When multiple units are provided, a minimum of one-unit with 10% of the total units provided shall be accessible. Accessible toilets and sinks shall be disbursed among the various locations and located on a level area, along an accessible route with an accessible surface. At each location there should be at least one accessible toilet and sink available. **Note:** This information is provided for situations in which the general public will be using portable toilets. A portable, accessible toilet is NEVER equivalent access if the general public is using

indoor toilets.

Accessible restrooms – Restrooms that are located on an accessible route and contain accessible features, including grab bars in bathroom stalls, wide bathroom stalls, etc.

Accessible route – A continuous unobstructed path connecting all accessible elements and spaces of a building or facility. Interior accessible routes may include corridors, floors, ramps, elevators, lifts, and clear floor space at fixtures. Exterior accessible routes may include parking access aisles, curb ramps, crosswalks at vehicular ways, walks, ramps, and lifts.

Accessible tables – A table providing knee space that is a minimum of 27" high, 30" wide and 19" deep knee space with the tabletop no higher than 34".

Accessible Telephones – Telephones that are located on an accessible route, mounted at 48" from the floor to the coin slot and have volume controls.

Assistive Listening Device – A device that takes a signal from a microphone or public address system and sends it to a personal amplification system.

Captioned – Video or film program with subtitles reflecting the content of the spoken or descriptive material.

Directional Signage – Include the International Symbol of Accessibility (ISA) with the directional signage.

Hazards to blind or visually impaired participants – Pedestrian and participant areas shall be clear of objects (including plant branches and public art) which overhang less than 80" from the floor surface, or wall, and post mounted or freestanding objects that protrude 4" or more between 27" and 80" above the floor or ground.

Portable wheelchair lift – A lift that is not built into the structure but can be available for a specific event.

Seating location - Accessible seating must be situated so those individuals who cannot stand can view the meeting or event over seated or standing participants. Seating for persons who are deaf must be provided in a location near the stage/presentation area with direct view to the stage/presentation location of sign language interpreters.

Wheelchair and companion seating – Seating for wheelchair users and adjacent seating for individuals accompanying wheelchair use

Appendix F- Public Event Policy and Checklist

DRAFT

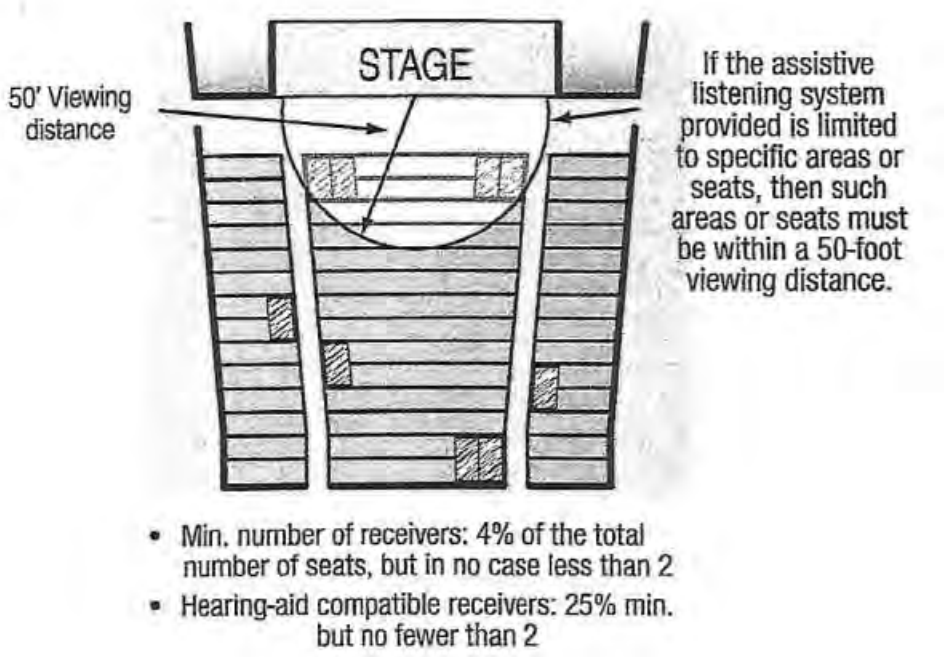
APPENDIX G: ASSISTIVE LISTENING SYSTEMS

ASSISTIVE LISTENING SYSTEMS

KEY CONCEPTS

- An assistive listening system must be provided in assembly areas, including conference and meeting rooms.
- Each assembly area required to provide assistive listening systems must provide signs informing patrons of the availability of the assistive listening system.
- The minimum number of receivers to be provided must be equal to 4% of the total of seats, but in no case less than 2.
- 25% minimum of receivers provided, by no fewer than 2, must be hearing-aid compatible.
- If the assistive listening system provided is limited to specific areas or seats, then such areas or seats must be within a 50-foot viewing distance of the stage or playing area and must have a complete view of the stage or playing area,
- Permanently installed assistive listening systems are required in areas if they accommodate at least 50 persons or if they have audio-amplification systems and they have fixed seating.
- If portable assistive listening systems are used for conference or meeting rooms, the system may serve more than one room.
- An adequate number of electrical outlets or other supplementary wiring necessary to support a portable assistive listening system must be provided.

NUMBER AND LOCATION OF ASSISTIVE LISTENING SYSTEMS



Submittal: November 2020

CURRENT TECHNOLOGY

At the time of this report, there are three basic wireless technologies available which provide different methods of transmission:

1. FM Broadcast Technology (FM)
2. Infrared Light Technology (IR)
3. Induction Loop Technology

No single technology is best for all applications. Each type has its own advantages, problems and limitations. All three types of assistive listening technologies can easily and successfully be used for personal and commercial applications alike, as long as their individual limitations are kept in mind.

TYPE 1: FM BROADCAST TECHNOLOGY

In principle, FM systems designed for hearing assistance application work just like commercial FM broadcast systems operating in the 88 to 108 MHz range. However, in the United States, the FM systems operate at FCC-designated frequency bands in the rage from 72 to 76 MHz and from 216 to 217 MHz. Since each FM system may use its own broadcast frequency, several systems can operate simultaneously at one location without interfering with one another. Unlike the loop system, the FM system requires a special receiver for each person, whether they have a hearing aid or not. There are several listening options available for FM receivers. The most common for public facilities are headphones and neck loops for T-coil users. Typical applications include outdoor open-air assembly areas.

Advantages	Disadvantages
• Easy to move around • Easy to install • 17 wide-band and /or 40 Narrow-band and to choose from • Transmission range up to 1,000 ft	• Receivers required for everyone • Both headphone and neck loop options must be available at public facilities • For multi-applications, receivers must operate on different channels • Cannot be used when confidentiality is an issue as FM signal can be tapped from the outside

TYPE 2: INFRARED LIGHT TECHNOLOGY (IR)

Appendix G – Assistive Listening System

Infrared light can be used for signal transmission in same fashion as with FM transmission. An infrared system consists of two or three basic components: a modulator and an emitter which often are combined, and a receiver. The audio signal is conveyed onto a sub-carrier in the modulator which in turn is converted into infrared light by the emitter. The receiver detects the IR signal and converts it back into the original audio signal. However, unlike FM transmission and induction loop technology, infrared light can not pass through walls. Therefore, infrared light transmission is ideal for facilities operating several systems simultaneously in different rooms in that all receivers can be identical with no need for frequency coordination. As with FM technology, each person must use a receiver, whether or not s/he has a hearing aid. Receiver types include lightweight under-the-chin style, over-the-head receivers for 360 degree reception and body-pack style. The same listening options are available for the body-pack style receivers as for the FM receivers. Typical applications are for indoor assembly areas with no interruption to the direct line of sight.

Advantages	Disadvantages
• Multiple systems can run simultaneous without interfering with one another. • Insures confidentiality as IR signals cannot penetrate through walls. • No size limitation as emitter panels may be daisy-chained.	• Receivers required for everyone. • Both headphone and neck loop options must be available at public facilities. • Not practical for outdoor applications due to sunlight interference. • Installation can be costly for large venue systems

TYPE 3: INDUCTION LOOP TECHNOLOGY (TELELOOP - HEARING LOOP - ROOM LOOP)

This technology is based on electromagnetic transmission and has the unique advantage that the signal is received directly by the user's hearing aid when it is equipped with a T-coil (telemagnetic pickup coil). It is commonly referred to as a telephone switch. An induction loop system consists of an amplifier and a discrete wire (the loop) that runs along the perimeter of the room. When the loop amplifier receives a signal from an audio source such as a microphone or PA system, the sound is received wireless by the user's hearing aid without the need for an additional receiver as is required by all other technologies. Induction receivers are available for hearing impaired people without hearing aids or without the T-coil feature. Typical application includes indoor or outdoor areas – outdoor venues may utilize portable loop systems.

Advantages	Disadvantages
• Transmits directly to hearing aids equipped with T-coils - no receiver required • Unobtrusive with T-coil hearing aids-individuals are not required to request equipment or assistance • Only 50% induction receivers required compared to FM and IR systems	• Professional design and installation required • Size limitations or layout restrictions may apply • Listening area may be subject to electrical interference from power lines, high power equipment etc • The loop itself may be difficult or impossible to install at some facilities. • Cannot loop adjacent rooms due to spill-over effect

TOUR GUIDE SYSTEMS

Tour Guide Systems are portable systems for use by mobile tour groups, i.e. walking, biking, etc. Typical applications are indoors and outdoors in parks, museums, galleries and other public places. They are expandable by adding additional receivers and transmitters.

Advantages

They are mobile and expandable by adding additional receivers and transmitters.

Disadvantages

They have limited transmitting range so the group must stay close to the guide.

Appendix G – Assistive Listening System

SYSTEMS COMPLIANT WITH ADA & CBC

Assistive Listening Systems must comply with ADAS sections 216, 219, and 703. They must also comply with CBC sections 11B-216, 11B-219 and 11B-706. Specification sheets are needed to verify compliance.

VENDORS

The ideal system is not only compliant with the ADAS and the CBC, but depends upon the venue, environment, services and goals. The following vendors can be contacted to supply information, suggestions on appropriate systems, and specifications on compliant systems they offer.

VENDOR	WEBSITE	TELEPHONE
Centrum Sound	https://www.centrumsound.com/	888-736-6005

SAMPLE PRICING AND SPECIFICATIONS

The following information is provided for assistance only to the City in their purchasing of the equipment and costing is not guaranteed to be accurate as vendors change their costs periodically. Please verify all specifications and costs directly through the vendors. Neither the City nor the consultant endorses any specific vendors.

TYPE	SPECIFIC SYSTEM	PRICING	SPECIFICATIONS
Wireless FM Radio	Williams Sound FM 558. Includes signs and neck loops	$1945.00 on Centrum Sound website	https://www.centrumsound.com/pdf/WS/FM_Wave/fmT55_specs.pdf https://www.centrumsound.com/pdf/WS/ppa_r37_specs_en.pdf https://www.centrumsound.com/pdf/WS/ppa_r37-8_spec_en.pdf https://www.centrumsound.com/pdf/WS/ppa_r38_specs_en.pdf
Wireless Infrared	Williams Sound IR SY 6. Includes signs and neck loops	$1377.00 on Centrum Sound web site	https://www.centrumsound.com/pdf/WS/IR-T2_Specs.pdf https://www.centrumsound.com/pdf/WS/wir_rx18_specs_en.pdf
Wireless Induction Loop			Various components based upon design available at Oval Window Audio. Call for design, pricing and installation information available. Does not require neck loops. Cost is dependent upon design and installation costs. http://www.ovalwindowaudio.com/satellitespec.htm
Tour Guide System		$1658.00 on Centrum Sound web site	Williams Sound TGS Pro 737. For 10 listeners and is expandable. Neck loops and signs are not included and must be purchased a la carte. https://www.centrumsound.com/pdf/WS/tgs_pro_737_specs_en.pdf

DRAFT

APPENDIX H: ADA BEST PRACTICES TOOLKIT: GENERAL EFFECTIVE COMMUNICATION REQUIREMENT

Chapter 3

General Effective Communication Requirements Under Title II of the ADA

In this chapter, you will learn about the requirements of Title II of the ADA for effective communication. Questions answered include:

- What is effective communication?
- What are auxiliary aids and services?
- When is a state or local government required to provide auxiliary aids and services?
- Who chooses the auxiliary aid or service that will be provided?

A. Providing Equally Effective Communication

Under Title II of the ADA, all state and local governments are required to take steps to ensure that their communications with people with disabilities are as effective as communications with others.[1] This requirement is referred to as "effective communication"[2] and it is required except where a state or local government can show that providing effective communication would fundamentally alter the nature of the service or program in question or would result in an undue financial and administrative burden.

What does it mean for communication to be "effective"? Simply put, "effective communication" means that **whatever is written or spoken must be as clear and understandable to people with disabilities as it is for people who do not have disabilities**. This is important because some people have disabilities that affect how they communicate.

How is communication with individuals with disabilities different from communication with people without disabilities? For most individuals with disabilities, there is no difference. But people who have disabilities that affect hearing, seeing, speaking, reading, writing, or understanding may use different ways to communicate than people who do not.

> The effective communication requirement applies to ALL members of the public with disabilities, including job applicants, program participants, and even people who simply contact state or local government agencies seeking information about programs, services, or activities.

---

[1] Department of Justice Nondiscrimination on the Basis of State and Local Government Services Regulations, 28 C.F.R. Part 35, § 35.160 (2005). The Department's Title II regulation is available at www.ada.gov/reg2.htm.

[2] See Department of Justice Americans with Disabilities Act Title II Technical Assistance Manual II-7.1000 (1993). The Technical Assistance Manual is available at www.ada.gov/taman2.html.

1. Providing Equal Access With Auxiliary Aids and Services

There are many ways that you can provide equal access to communications for people with disabilities. These different ways are provided through "auxiliary aids and services." **"Auxiliary aids and services" are devices or services that enable effective communication for people with disabilities.**[3]

Title II of the ADA requires government entities to make appropriate auxiliary aids and services available to ensure effective communication.[4] You also must make information about the location of accessible services, activities, and facilities available in a format that is accessible to people who are deaf or hard of hearing and those who are blind or have low vision.[5]

Generally, the requirement to provide an auxiliary aid or service is triggered when a person with a disability requests it.

[3] 28 C.F.R. §§ 35. 104, 35.160.
[4] 28 C.F.R. Part 35.160(b)(1).
[5] 28 C.F.R. § 35.163 (a).

2. Different Types of Auxiliary Aids and Services

Here are some examples of different auxiliary aids and services that may be used to provide effective communication for people with disabilities. **But, remember, not all ways work for all people with disabilities or even for people with one type of disability. You must consult with the individual to determine what is effective for him or her.**

- qualified interpreters
- notetakers
- screen readers
- computer-aided real-time transcription (CART)
- written materials
- telephone handset amplifiers
- assistive listening systems
- hearing aid-compatible telephones
- computer terminals
- speech synthesizers
- communication boards
- text telephones (TTYs)
- open or closed captioning
- closed caption decoders
- video interpreting services
- videotext displays
- description of visually presented materials
- exchange of written notes
- TTY or video relay service
- email
- text messaging
- instant messaging
- qualified readers
- assistance filling out forms
- taped texts
- audio recordings
- Brailled materials
- large print materials
- materials in electronic format (compact disc with materials in plain text or word processor format)

B. Speaking, Listening, Reading, and Writing: When Auxiliary Aids and Services Must be Provided

Remember that communication may occur in different ways. Speaking, listening, reading, and writing are all common ways of communicating. When these communications involve a person with a disability, an auxiliary aid or service may be required for communication to be effective. The type of aid or service necessary depends on the length and complexity of the communication as well as the format.

1. Face-to-Face Communications

For brief or simple face-to-face exchanges, very basic aids are usually appropriate. For example, exchanging written notes may be effective when a deaf person asks for a copy of a form at the library.

For more complex or lengthy exchanges, more advanced aids and services are required. Consider how important the communication is, how many people are involved, the length of the communication anticipated, and the context.

Examples of instances where more advanced aids and services are necessary include meetings, hearings, interviews, medical appointments, training and counseling sessions, and court proceedings. In these types of situations where someone involved has a disability that affects communication, auxiliary aids and services such as qualified interpreters, computer-aided real-time transcription (CART), open and closed captioning, video relay, assistive listening devices, and computer terminals may be required. Written transcripts also may be appropriate in pre-scripted situations such as speeches.

Computer-Aided Real-Time Transcription (CART)

Many people who are deaf or hard of hearing are not trained in either sign language or lipreading. CART is a service in which an operator types what is said into a computer that displays the typed words on a screen.

2. Written Communications

Accessing written communications may be difficult for people who are blind or have low vision and individuals with other disabilities. Alternative formats such as Braille, large print text, emails or compact discs (CDs) with the information in accessible formats, or audio recordings are often effective ways of making information accessible to these individuals. In instances where information is provided in written form, ensure effective communication for people who cannot read the text. Consider the context, the importance of the information, and the length and complexity of the materials.

When you plan ahead to print and produce documents, it is easy to print or order some in alternative formats, such as large print, Braille, audio recordings, and documents stored electronically in accessible formats on CDs. Some examples of events when you are likely to produce documents in advance include training sessions, informational sessions, meetings, hearings, and press conferences. In many instances, you will receive a request for an alternative format from a person with a disability before the event.

If written information is involved and there is little time or need to have it produced in an alternative format, reading the information aloud may be effective. For example, if there are brief written instructions on how to get to an office in a public building, it is often effective to read the directions aloud to the person. Alternatively, an agency employee may be able to accompany the person and provide assistance in locating the office.

Don’t forget . . .

Even tax bills and bills for water and other government services are subject to the requirement for effective communication. Whenever a state or local government provides information in written form, it must, when requested, make that information available to individuals who are blind or have low vision in a form that is usable by them.

3. Primary Consideration: Who Chooses the Auxiliary Aid or Service?

When an auxiliary aid or service is requested by someone with a disability, you must provide an opportunity for that person to request the auxiliary aids and services of their choice, and you must give primary consideration to the individual's choice.[6] "Primary consideration" means that the public entity must honor the choice of the individual with a disability, with certain exceptions.[7] The individual with a disability is in the best position to determine what type of aid or service will be effective.

The requirement for consultation and primary consideration of the individual's choice applies to aurally communicated information (i.e., information intended to be heard) as well as information provided in visual formats.

The requesting person's choice does not have to be followed if:

- the public entity can demonstrate that another equally effective means of communication is available;
- use of the means chosen would result in a fundamental alteration in the service, program, or activity; or
- the means chosen would result in an undue financial and administrative burden.

Video Remote Interpreting (VRI) or Video Interpreting Services (VIS)

VRI or VIS are services where a sign language interpreter appears on a videophone over high-speed Internet lines. Under some circumstances, when used appropriately, video interpreting services can provide immediate, effective access to interpreting services seven days per week, twenty-four hours a day, in a variety of situations including emergencies and unplanned incidents.

On-site interpreter services may still be required in those situations where the use of video interpreting services is otherwise not feasible or does not result in effective communication. For example, using VRI / VIS may be appropriate when doing immediate intake at a hospital while awaiting the arrival of an in-person interpreter, but may not be appropriate in other circumstances, such as when the patient is injured enough to have limited mobility or needs to be moved from room to room.

VRI / VIS is different from Video Relay Services (VRS) which enables persons who use sign language to communicate with voice telephone users through a relay service using video equipment. VRS may only be used when consumers are connecting with one another through a telephone connection.

---

[6] 28 C.F.R. Part 35.160(b)(2).
[7] See Title II Technical Assistance Manual II-7.1100.

---

4. Providing Qualified Interpreters and Qualified Readers

When an interpreter is requested by a person who is deaf or hard of hearing, the interpreter provided must be qualified.

A "qualified interpreter" is someone who is able to sign to the individual who is deaf what is being spoken by the hearing person and who can voice to the hearing person what is being signed by the person who is deaf. Certification is not required if the individual has the necessary skills. To be qualified, an interpreter must be able to convey communications effectively, accurately, and impartially, and use any necessary specialized vocabulary.[8]

Similarly, those serving as readers for people who are blind or have low vision must also be "qualified."[9] For example, a qualified reader at an office where people apply for permits would need to be able to read information on the permit process accurately and in a manner that the person requiring assistance can understand. The qualified reader would also

need to be capable of assisting the individual in completing forms by accurately reading instructions and recording information on each form, in accordance with each form's instructions and the instructions provided by the individual who requires the assistance.

Did You Know That There are Different Types of Interpreters?

Sign Language Interpreters
Sign language is used by many people who are deaf or hard of hearing. It is a visually interactive language that uses a combination of hand motions, body gestures, and facial expressions. There are several different types of sign language, including American Sign Language (ASL) and Signed English.

Oral Interpreters
Not all people who are deaf or hard of hearing are trained in sign language. Some are trained in speech reading (lip reading) and can understand spoken words more clearly with assistance from an oral interpreter. Oral interpreters are specially trained to articulate speech silently and clearly, sometimes rephrasing words or phrases to give higher visibility on the lips. Natural body language and gestures are also used.

Cued Speech Interpreters
A cued speech interpreter functions in the same manner as an oral interpreter except that he or she also uses a hand code, or cue, to represent each speech sound.

9 28 C.F.R. § 35.104.

---

5. Television, Videos, Telephones, and Title II of the ADA

The effective communication requirement also covers public television programs, videos produced by a public entity, and telephone communications.[10] These communications must be accessible to people with disabilities.

a. Public Television and Videos

If your local government produces public television programs or videos, they must be accessible. A common way of making them accessible to people who are unable to hear the audio portion of these productions is closed captioning. For persons who are blind or have low vision, detailed audio description may be added to describe important visual images.

b. Telephone Communications

Public entities that use telephones must provide equally effective communication to individuals with disabilities. There are two common ways that people who are deaf or hard of hearing and those with speech impairments use telecommunication. One way is through the use of teletypewriters (TTYs) or computer equipment with TTY capability to place telephone calls. A TTY is a device on which you can type and receive text messages. For a TTY to be used, both parties to the conversation must have a TTY or a computer with TTY capability. If TTYs are provided for employees who handle incoming calls, be sure that these employees are trained and receive periodic refreshers on how to communicate using this equipment.

A second way is by utilizing telephone relay services or video relay services. Telephone relay services involve a relay operator who uses both a standard telephone and a TTY to type the voice messages to the TTY user and read the TTY messages to the standard telephone user. Video relay services involve a relay operator who uses both a standard telephone and a computer video terminal to communicate voice messages in sign language to the computer video terminal user and to voice the sign language messages to the standard telephone user.

Public employees must be instructed to accept and handle relayed calls in the normal course of business. Untrained individuals frequently mistake relay calls for telemarketing or collect calls and refuse to accept them. They also may mistakenly assume that deaf people must come into a government office to handle a matter in person even though other people are allowed to handle the same matter over the telephone.

---

[10] 28 C.F.R. §§ 35.104, 35.160, 35.161.

C. Planning Ahead to Provide Effective Communication

Even before someone requests an auxiliary aid or service from your public entity, plan ahead to accommodate the communication needs of persons with disabilities. Prepare for the time when someone will request a qualified interpreter, Braille documents, video relay, or another auxiliary aid or service.

- **Identify local resources for auxiliary aids and services.** Even if you do not think there is anyone with a disability in your community, you need to be prepared.

- **Find out how you can produce documents in Braille or acquire other aids or services.** Technology is changing, and much of the equipment needed to ensure effective communication is less expensive than it once was. Consider whether it makes sense to procure equipment or obtain services through vendors. If your needs will be best met by using vendors, identify vendors who can provide the aids or services and get information about how much advance notice the vendors will need to produce documents or provide services.

- **Contract with qualified interpreter services and other providers so that interpreters and other aids and services will be available on short notice.** This is especially critical for time-sensitive situations, such as when a qualified interpreter is necessary to communicate with someone who is arrested, injured, hospitalized, or involved in some other emergency.

- **Use the checklist included in this Chapter to assess your agency's ability to provide effective communication and to figure out the next steps for achieving ADA compliance.**

- **Train employees about effective communication and how to obtain and use auxiliary aids and services. All employees who interact with the public over the telephone or in person need to know their role in ensuring effective communication.**

APPENDIX I: ADA CHECKLIST FOR POLLING PLACES

U.S. Department of Justice
Civil Rights Division
Disability Rights Section

Americans with Disabilities Act

ADA CHECKLIST FOR POLLING PLACES

June 2016

Part 1 discusses polling place accessibility with a focus on the areas of a facility that may be used as a polling place on Election Day.

Part 2 includes a list of the tools election officials will need in order to use the Checklist, some helpful tips on taking measurements and photographs, and a useful list of the most common tools for temporary remedies and the circumstances in which they may be used.

Part 3 is the 2016 Checklist.

Reproduction of this document is encouraged. Additional copies of this publication may be obtained, viewed or downloaded from the technical assistance section of the ADA Website (www.ada.gov) or by calling the ADA Informa-tion Line at 800-514-0301 (voice), 800-514-0383 (TTY).

Submittal: November 2017

Polling Place Accessibility Checklist 16

POLLING PLACE ACCESSIBILITY IS REQUIRED BY THE AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) is a federal civil rights law that provides protections to people with disabilities to ensure that they are treated equally in all aspects of life. Title II of the ADA requires state and local governments ("public entities") to ensure that people with disabilities have a full and equal opportunity to vote. The ADA's provisions apply to all aspects of voting, including polling places (or vote centers). Voting at one's polling place allows voters the chance to interact with neighbors and candidates who talk with voters outside the polling place, and to ask questions of or receive assistance from trained poll workers inside the polling place. Simply put, voting in person at a local polling place is the quintessential American voting experience.

In communities large and small, people cast their ballots in a variety of facilities that temporarily serve as polling places, such as libraries, schools, and fire stations, or churches, stores, and other private buildings. Voters include people with a variety of disabilities, such as those who use wheelchairs, scooters, or other devices, those who have difficulty walking or using stairs, or those who are blind or have vision loss. They are people, young and old, who have come to their polling place to exercise their right to vote. Many public entities report that their polling places are accessible. However, the Government Accountability Office estimates that only 27% of polling places were accessible to people with disabilities in the 2008 elections.[1] This means that 73% of the polling places used in 2008 had architectural barriers that made it difficult or even impossible for people with disabilities to enter their polling place and vote side by side with their neighbors.

People with disabilities must have the opportunity to be full participants in an integrated civic event. The ADA requires that public entities ensure that people with disabilities can access and use all of their voting facilities. Because a mix of public and private facilities are used as polling places, public entities may ensure Election Day accessibility of a polling place by using low-cost temporary measures, such as portable ramps or door stops, rather than necessarily making permanent modifications to a facility. If temporary measures will not fix a barrier, and public entities are unable to make a permanent modification to fix the barrier, then the public entity must look for an alternative, accessible polling place. In some circumstances, when a public entity is unable to identify or create an accessible polling place for a particular voting precinct or ward, election administrators may instead use an alternative method of voting at the polling place.[2] Public entities are encouraged to make permanent modifications to their facilities used as polling places, such as schools, community centers, and town halls. The use of temporary measures to provide access to polling places on Election Day does not change a public entity's obligations under the ADA to ensure that its programs and services are accessible to people with disabilities, nor does it mean that a temporary remedy would be appropriate in a public facility on an everyday basis.

A voter with a disability casting his ballot

Submittal: November 2, 2010

REQUIREMENTS FOR ACCESSIBILITY

The ADA's regulations and the ADA Standards for Accessible Design set out what makes a facility accessible and should be used to determine the accessibility of any facility being considered for use as a polling place. This publication, the ADA Checklist for Polling Places (2016 Checklist), provides guidance to election officials for determining whether a polling place already has the basic accessibility features needed by most voters with disabilities or can be made accessible on Election Day using temporary solutions to remove barriers. The updated Checklist includes provisions from the 2010 ADA Standards for Accessible Design ("2010 Standards").[3] Any alterations made to a polling place must comply with the 2010 Standards.

Other Justice Department Publications

In addition to the 2016 Checklist, election officials should consult the Department's 7-page publication on the rights of voters with disabilities, ***The Americans with Disabilities Act and Other Federal Laws Protecting the Rights of Voters with Disabilities***.

Another Justice Department publication, ***Solutions for Five Common ADA Access Problems at Polling Places***, illustrates suggested temporary solutions for several common accessibility problems found at polling places.

This 2016 Checklist and other Justice Department publications, as well as the title II regulation and the 2010 Standards are available at www.ada.gov.

Part 1: Evaluating the Physical Accessibility of Polling Places

The 2016 Checklist, found in Part 3 of this document, is designed to assist officials in determining whether a facility being considered for use as a polling place is accessible to people with mobility or vision disabilities, and, if not, whether modifications can be made to ensure accessibility or relocation to another accessible facility will be necessary. The 2016 Checklist should be used to evaluate both new and existing polling places. Completing the 2016 Checklist will provide guidance on whether a facility is accessible for voters with disabilities, and how to identify and remedy any barriers that exist.

Accessible polling place

[1]U.S. Government Accountability Office Report: Voters with Disabilities; Additional Monitoring of Polling Places Could Further Improve Accessibility; September 2009.

[2]*See* U.S. Department of Justice Technical Assistance: "The Americans with Disabilities Act and Other Federal Laws Protecting the Rights of Voters with Disabilities," (September 2014), available at www.ada.gov.

[3]The requirements that new construction and alterations comply with the 2010 Standards went into effect on March 15, 2012. Facilities that were built or altered before that date, and that complied with the 1991 Standards, need not be modified to comply with the 2010 Standards as to those provisions included in the 1991 Standards. *See* 28 C.F.R. §35.151(b)(2)(i). This is referred to as a safe harbor. The 1991 Standards and the 2010 Standards, as applied to polling places, are very similar, however, with the exception of the requirements for accessible parking. For example, the 1991 Standards required only one van-accessible space for every eight accessible spaces, *see* 28 C.F.R. pt. 36, Appendix D, §4.1.2(5)(b), while the 2010 Standards require one van-accessible space for every six accessible spaces, *see* 2010 Standards §208.2.4.

Submittal: November 2, 2020

Getting Started

Individuals using the 2016 Checklist need not be experienced in evaluating facilities for accessibility. It is designed to be used to evaluate key areas that must be accessible. By following these directions, staff can identify accessible polling places and consider how to implement temporary and permanent accessibility remedies to those facilities found to be inaccessible. References are also provided to the 2010 Standards for more information about particular requirements. We encourage election officials to provide training to their staff on compliance with the ADA.

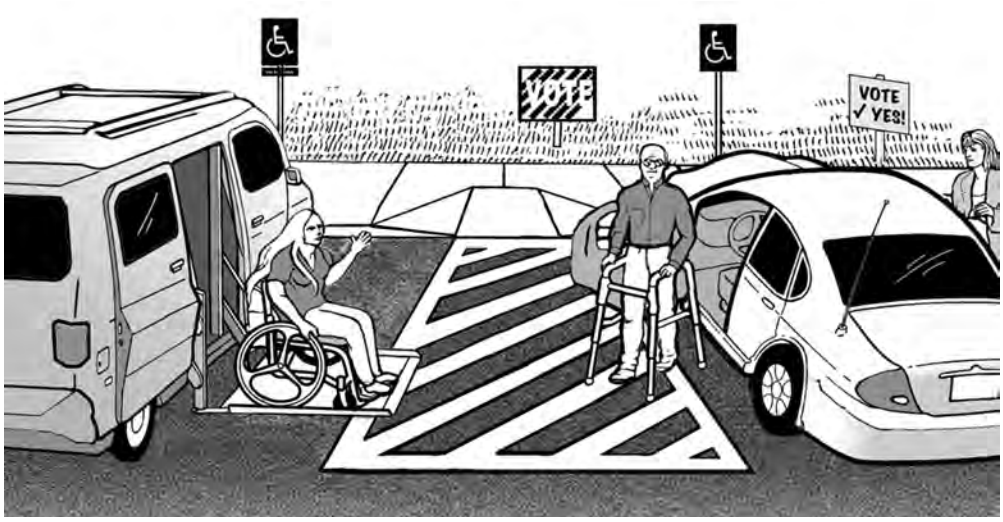
An evaluation of polling place accessibility focuses on those areas of a facility that may be used as a polling place on Election Day. Think about how people generally arrive at, enter, and move through the polling place. Do people drive and park? Are people dropped off at the entrance? Do they arrive on foot or do they take public transportation? This document addresses the following key areas or features that must be accessible: the parking area and passenger drop-off sites; routes (both exterior and interior); the entrance to the polling place; and the voting area itself.

Arriving at the Polling Place

Parking

If parking is provided for voters, accessible parking must be provided for people with disabilities. An accessible space is composed of three elements: the parking space, an access aisle adjacent to the space that is wide enough to allow voters with a mobility disability to get out of their car or van, and signage designating it as an accessible space. The 2010 Standards require one accessible parking space per 25 parking spaces provided (up to the first 100 spaces). One of six (or fraction of six) accessible parking spaces, but always at least one, must be van accessible. Generally, the access aisle must be at least 60 inches wide for cars and 96 inches wide for vans. Van accessible spaces can also have an access aisle at least 60 inches wide if the width of the van parking space is at least 132 inches. A sign, with the International Symbol of Accessibility, must mark each accessible parking space. Van accessible spaces must be designated as such on the sign at these spaces. Accessible parking spaces and the access aisles serving them must be on a surface that is stable, firm, and slip resistant (e.g., clear of gravel or mud) without wide cracks or broken pavement and located on the closest accessible route to the accessible entrance. The accessible parking spaces and access aisles must also be level to allow a safe transfer from the car to a person's wheelchair. (See Part 2 of this document for tips on measuring slopes and cross slopes.)

Parking requirements are in Section A of the 2016 Checklist found in Part 3 of this document.



A van acccessible parking space and a car parking space share an access aisle

Submittal: November 2, 2021

Solutions for Accessibility:
Problems Involving the Parking Area

Problem One: Parking is available, but no accessible parking is provided or there are not enough accessible parking or van accessible spaces.

Solution: Find a relatively level parking area near the accessible entrance and then designate the area for accessible parking spaces and adjacent access aisles. Use three parking spaces to make two accessible parking spaces with an access aisle. Traffic cones or other temporary elements may be used to mark these spaces and access aisles. Provide a temporary sign designating each accessible parking space and make sure the access aisle of each space is connected to the accessible route to the accessible entrance.

Problem Two: Accessible parking is provided, but it does not have a marked access aisle next to each designated accessible parking space.

Solution: Use traffic cones to mark and block off the access aisle and curb ramp area. The first accessible parking space provided should be a van accessible parking space with an access aisle that is at least 96 inches wide.

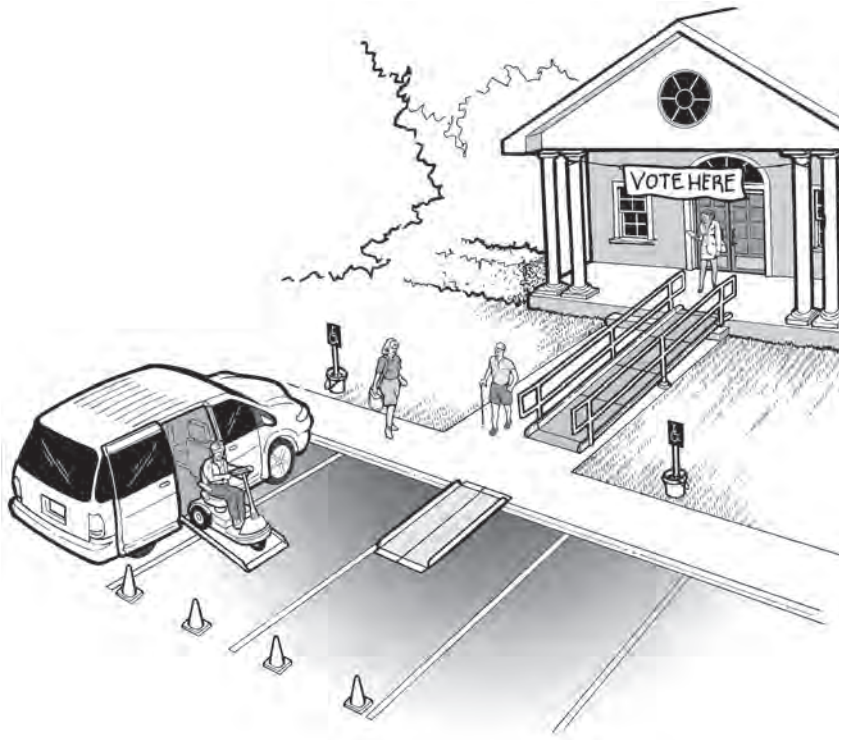
Problem Three: Accessible parking spaces or access aisles are on a sloped surface and do not provide a level area for a safe transition from the voter's car to a wheelchair.

Solution: Find a parking area that is close to the accessible entrance and is level. Provide accessible parking spaces and access aisles in that area by marking them off with traffic cones. Make sure the accessible parking spaces connect to an accessible route to the entrance. Provide a sign designating each accessible parking space. When the parking area generally is not level, you may need to look beyond the parking area, to driveways and streets, for example, to provide accessible parking in a level area temporarily on Election Day.

Problem Four: No sign with the International Symbol of Accessibility is installed at each accessible parking space.

Solution: Provide a temporary sign in front of each accessible parking space, including a "van accessible" sign for the van parking space.

Problem Five: A large number of accessible parking spaces are provided, including van accessible spaces, at a school near the main building entrance. The voting area and entrance to the voting area, however, are at the rear of the school and there are no designated accessible parking spaces in this area.



Three standard parking spaces are converted into a van accessible parking space with an access aisle. Cones mark and block off the access aisle and a temporary curb ramp with edge protection connects to an accessible route to the polling place.

Solution: Find a relatively level parking area near the accessible entrance to the voting area and then designate the area for accessible parking spaces and adjacent access aisles. Traffic cones or other temporary elements may be used to mark the spaces and access aisles. Provide a temporary sign for each accessible parking space and make sure the access aisle of each space is connected to the accessible route to the accessible entrance.

Passenger Drop-off Locations

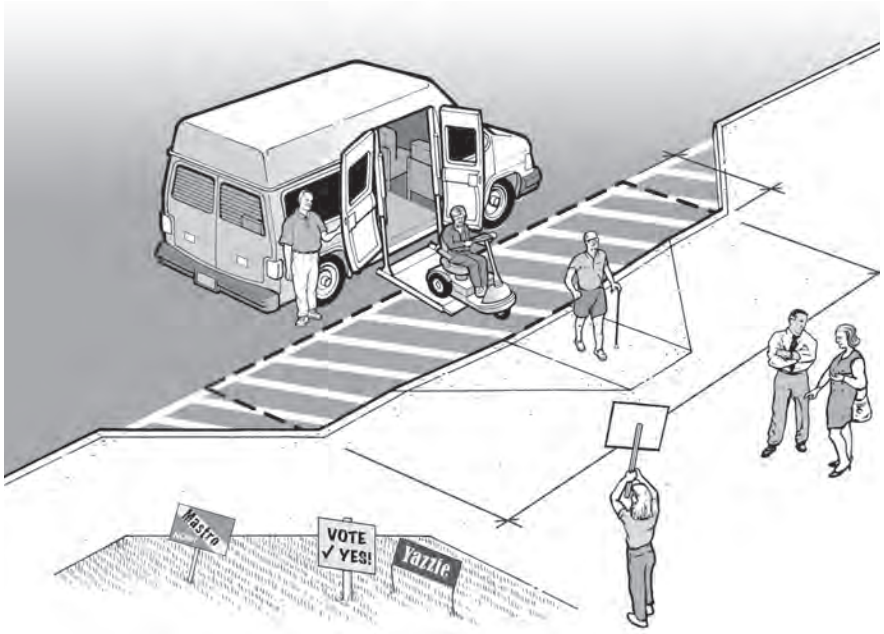
Some voters with disabilities will be driven to the polling place and dropped off in a passenger drop-off area near the entrance. If the polling place is served by passenger drop-off areas, then at least one drop-off area must be accessible. An accessible drop-off area, also known as an accessible passenger loading zone, must have a level access aisle next to the vehicle space. If a curb separates the access aisle from an accessible route, a curb ramp must be provided so that people with disabilities can get to the accessible route leading to the accessible entrance.

Passenger drop-off area requirements are in Section B of the 2016 Checklist found in Part 3 of this document.

Accessible Routes (Exterior and Interior)

Once a voter with a disability arrives at the polling site, there must be an accessible route from the accessible parking, passenger drop-off sites, sidewalks and walkways, and public transportation stops to get to the entrance of the voting facility. The accessible route must be at least 36 inches wide. It may narrow briefly to 32 inches wide, but only for a distance of up to 24 inches. (See Part 2 of this document for tips on taking measurements.) Whenever possible, the accessible route must be the same as or near the general circulation path (i.e., the path for general pedestrian use).

Inside the polling place, there must be an accessible route from the entrance through hallways, corridors, and interior rooms leading to the voting area. The route must be free of abrupt changes in level, steps, high thresholds, or steeply sloped walkways. The accessible route is essential for people who have difficulty walking or who use wheelchairs or other mobility devices to get into the polling place and to the voting area. Where an accessible route is different from the general circulation path, signs will be needed to direct voters with disabilities to the accessible route and to the voting area.



Accessible passenger drop-off and loading area

Route requirements are in Sections C and E of the 2016 Checklist found in Part 3 of this document.

Submittal: November 8, 2016

Accessible routes to and within the polling place

Solutions for Accessibility:
Problems Involving the Accessible Route

Problem One: The sidewalk connecting parking to the polling place entrance is too steep to be accessible.

Solution: Check to see if there is another sidewalk that provides an accessible route to the accessible entrance. Sometimes there is a less direct route that can serve as the accessible route. If no accessible route can be found from the current designated accessible parking, relocate the accessible parking using traffic cones and signs to an area where there is an accessible route to the entrance.

Problem Two: The accessible route crosses a curb and no curb ramp is provided.

Solution: Install a portable ramp.

Problem Three: One or two steps are part of the route leading to the accessible entrance.

Solution: Install a portable ramp.

Problem Four: The interior hallway leading to the voting area contains a set of stairs that cannot be ramped.

Solution: If the accessible route cannot be relocated, look for another area where voting may be provided. For example, if the stage in a school auditorium used for voting is up several steps, perhaps the hallway or lobby area may be accessible and used for voting instead of the stage. Or, if a church basement located down a flight of stairs is used as the voting area, perhaps one of the ground floor rooms could be used as the voting area. If it is impossible to relocate the voting area for all voters, find a location for an accessible voting station that offers the same privacy as the other voting area.

Submittal: November 6, 2014

Ramps

If any part of the accessible route - exterior or interior - has a slope greater than 1:20, it is considered a ramp and must meet the requirements for ramps. (See Part 2 of this document for tips on measuring running slopes and cross slopes.) If any part of the accessible route contains steps, it must be ramped. Even one short step at an entrance or in a hallway can prevent access by a person using a wheelchair, walker, or cane and can make entry difficult for many people who have other mobility disabilities. Interior and exterior ramps must not be too steep and must have a level landing at the bottom and top, and where the ramp changes direction. They must meet the ADA's requirements regarding slope, width, landings, handrails, and edge protection. Ramps with a rise greater than six inches must have handrails and if there are vertical drop offs on the sides, there must be edge protection.

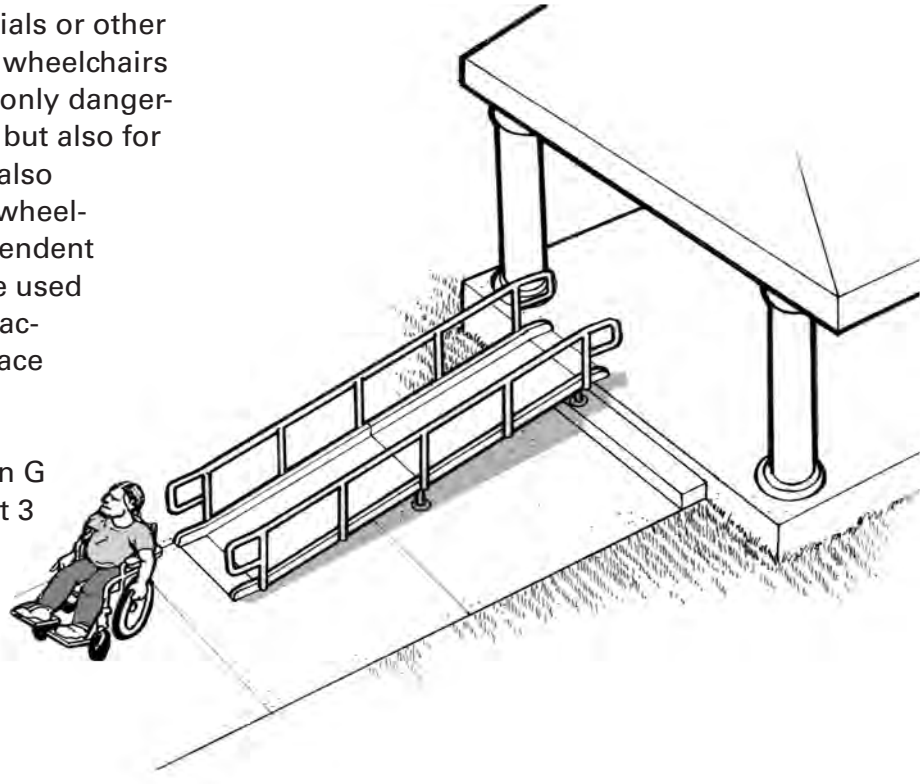
In the past, at some polling places where one or more steps were present, officials or other voters have carried people using wheelchairs up the steps. This practice is not only dangerous for the person being carried, but also for those lifting the wheelchair. It is also degrading to the person using a wheelchair and does not provide independent access. Carrying should never be used as an alternative to providing an accessible way to enter a polling place (or other facility).

Ramp requirements are in Section G of the 2016 Checklist found in Part 3 of this document.

Solutions for Accessibility: Problems Involving Ramps

Problem One: There is a six inch high step on the accessible route that has a ramp that is only three feet long, making the ramp too steep and, therefore, inaccessible.

Solution: Alter the route to avoid the steep ramp or place a temporary ramp that is at least six feet long over the short ramp.



A portable ramp with edge protection and handrails is placed over stairs to provide an accessible route on Election Day.

Submittal: November 8, 2016

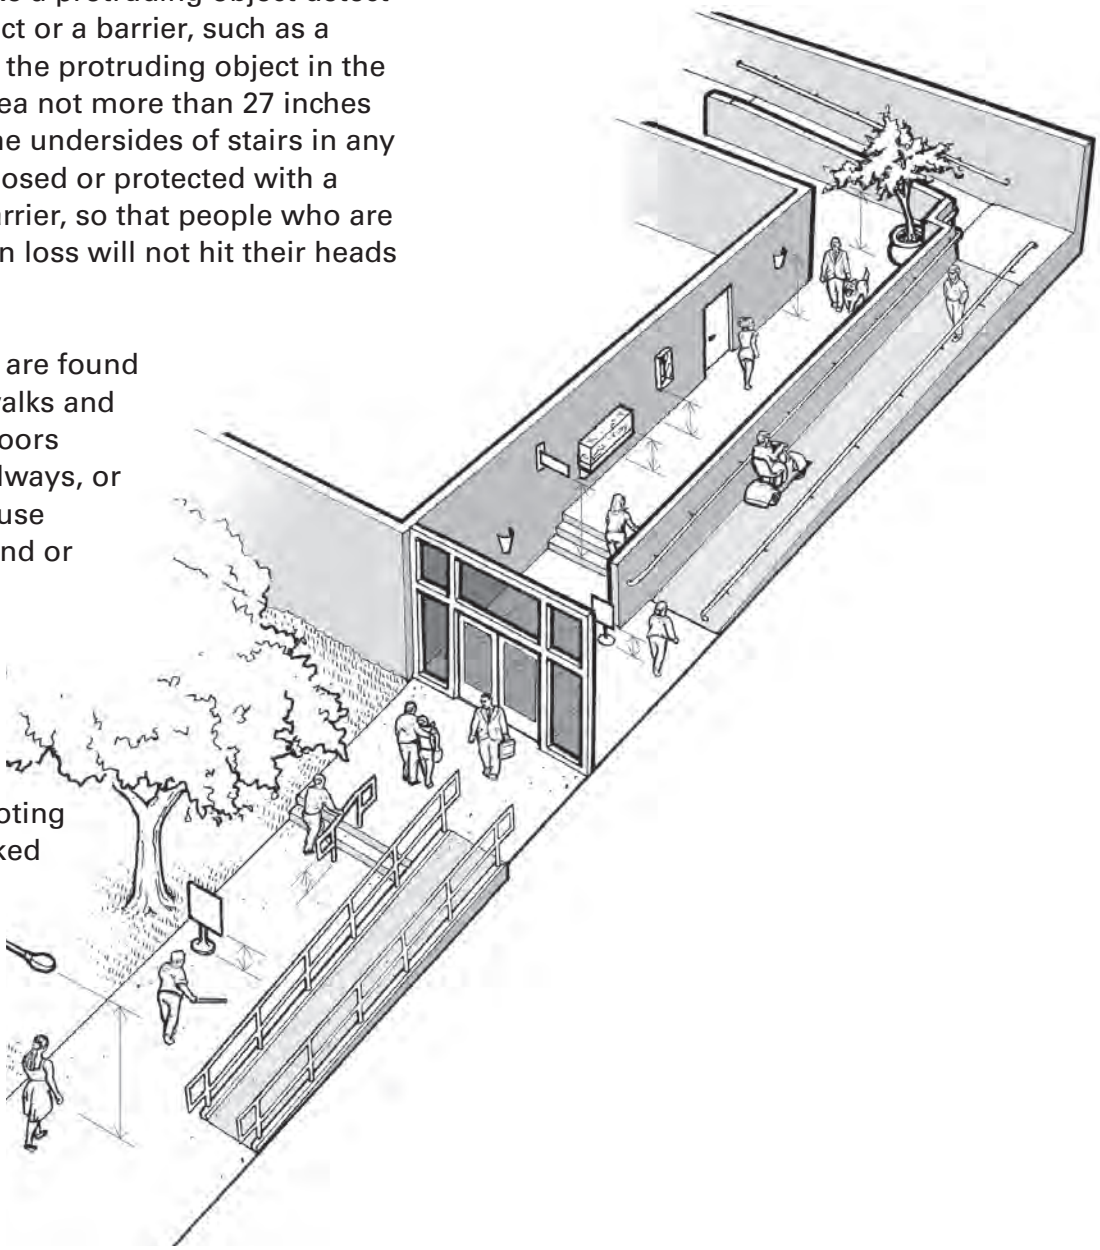
Protruding Objects

When people who are blind or who have vision loss use a cane to detect hazards, only objects located at 27 inches above the floor or ground or lower are detectable. If an object is higher than 27 inches and wall- mounted, it must not protrude more than four inches into the path of travel. Similarly, post mounted objects higher than 27 inches must not protrude more than 12 inches into the path of travel. There must be at least 80 inches clear height above the pedestrian route. To make a protruding object detectable: place an object or a barrier, such as a traffic cone, below the protruding object in the cane-detectable area not more than 27 inches above the floor. The undersides of stairs in any route must be enclosed or protected with a cane-detectable barrier, so that people who are blind or have vision loss will not hit their heads on the underside.

Protruding objects are found outdoors on sidewalks and walkways, and indoors in lobby areas, hallways, or voting areas. Because people who are blind or have vision loss may walk on any circulation path, not just the accessible routes, all routes serving or leading to the voting area must be checked for protruding objects.

Examples of outdoor protruding objects include post or wall-mounted signs and low-hanging tree limbs. Examples of indoor protruding objects include fire extinguishers and wall-mounted display cases, wall sconces, open staircases, exit signs, overhead signs, banners, and some arched doorways.

Protruding object requirements are in Sections C, E, and F of the 2016 Checklist found in Part 3 of this document.



Signs or other objects in the pedestrian route can be a hazard if the bottom is more than 27 inches but less than 80 inches above the route. Objects that overhang the pedestrian route must be at least 80 inches above the route.

Solutions for Accessibility:
Problems Involving Protruding Objects

Problem One: Objects, such as branches and ceiling-mounted televisions, over a route are lower than 80 inches above the ground or floor.

Solution: Prune the branches or remove the items that are hanging below 80 inches. Another approach is to install a detectable barrier under the item that is too low. The detectable barrier or object must be no higher than 27 inches above the route.

Problem Two: A wall-mounted display case protrudes seven inches from the wall and the bottom of the case is 40 inches above the floor.

Solution: Place a detectable object or skirting below the case. The bottom of the skirting or detectable object must be no higher than 27 inches above the floor.

Problem Three: The bottom of a set of stairs is open and voters who are blind or have vision loss can hit their head on the underside of the stairs.

Solution: Provide a detectable fence or other object so voters cannot walk under the stairs.

Building Entrance

A polling place must have at least one accessible entrance. At least one door at the accessible entrance must have a minimum clear width of 32 inches for a voter who uses a wheelchair or other mobility device to pass through the doorway. (See Part 2 of this document for tips on taking measurements.) Door hardware must be useable with one hand without tight grasping, pinching, or twisting of the wrist, so that it is operable by someone with limited mobility in their hands. Doors may not have high thresholds that impede voters who use wheelchairs or other mobility devices in crossing the threshold. Inaccessible entrances must have signs directing voters to the accessible entrance. The accessible entrance must remain unlocked at all times the polling place is open.

When the underside of a set of stairs is open, it is a hazard to people who are blind or have low vision. Enclosing the area below the stair or installing a cane-detectable barrier helps the person to stop before hitting her head.

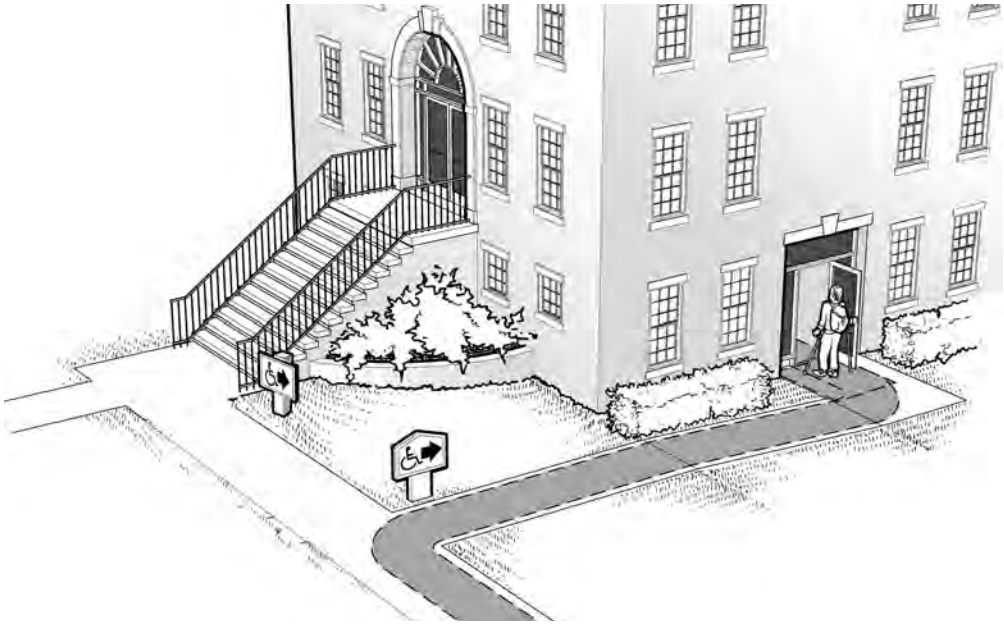
Building entrance requirements are in Section D of the 2016 Checklist found in Part 3 of this document.

Solutions for Accessibility:
Problems Involving the Building Entrance

Problem One: One or two steps at the entrance prevent access.

Solution: If another entrance is accessible and on an accessible route from parking, passenger drop-off sites, or public transportation stops, designate it as the accessible entrance. If the main entrance is not accessible, install a directional sign at the main entrance directing voters with disabilities to the accessible entrance. Keep the accessible entrance unlocked during all voting hours. If another accessible entrance is not available, install a temporary ramp at the main entrance.

Submittal: November 8, 2016



Accessible entrance to polling place with signs directing voters to the accessible entrance

Problem Two: The entrance door threshold is one inch high.

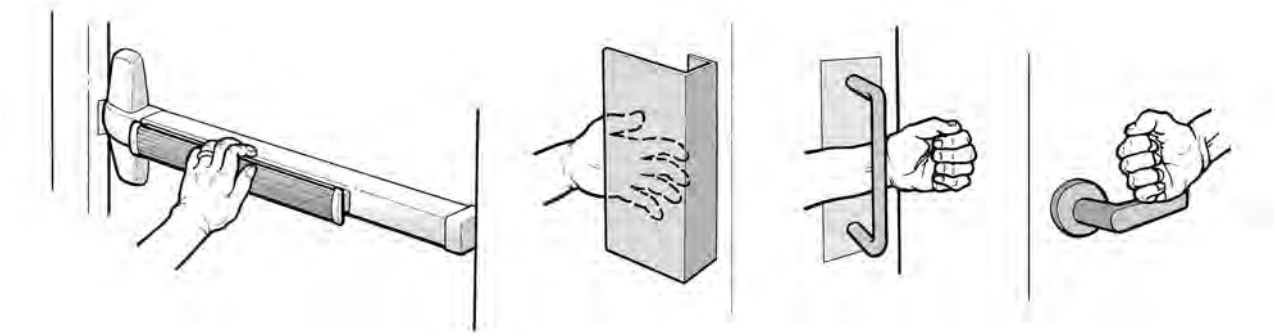
Solution: Short ramps or wedges may be used on both sides of the threshold to allow a voter in a wheelchair to pass over the threshold.

Problem Three: The entrance doors are narrow double leaf doors that are normally opened by an automatic door opener but it is not working on Election Day.

Solution: Keep both doors propped open, station volunteers near the doors to open them for voters while the polling place is open, or provide a temporary doorbell to notify officials that the door needs to be opened in a timely manner.

Problem Four: The entrance door has a door knob and/or latch that requires tight pinching and twisting and is not accessible.

Solution: There are four typical solutions: add an accessible pull or handle and leave the door unlatched; install fully accessible door hardware; leave the door propped open; or provide a temporary doorbell to notify officials that the door needs to be opened in a timely manner.



Examples of accessible door hardware

Lifts and Elevators

If the voting area is not on the same level as the entrance, there must be an independently operable elevator or lift to provide an accessible route to individuals with disabilities. The door into the elevator or lift and the space within must be wide enough to accommodate wheelchairs and other mobility devices. All controls should be operable without tight grasping, pinching, or twisting and should be no higher than 48 inches. Chair or seated lifts found on staircases do not comply with the 2010 Standards as they are not suited for many voters with disabilities, including people who use wheelchairs.

Lift and elevator requirements are in Section H and I of the 2016 Checklist found in Part 3 of this document.

Solutions for Accessibility:
Problems Involving Lifts and Elevators

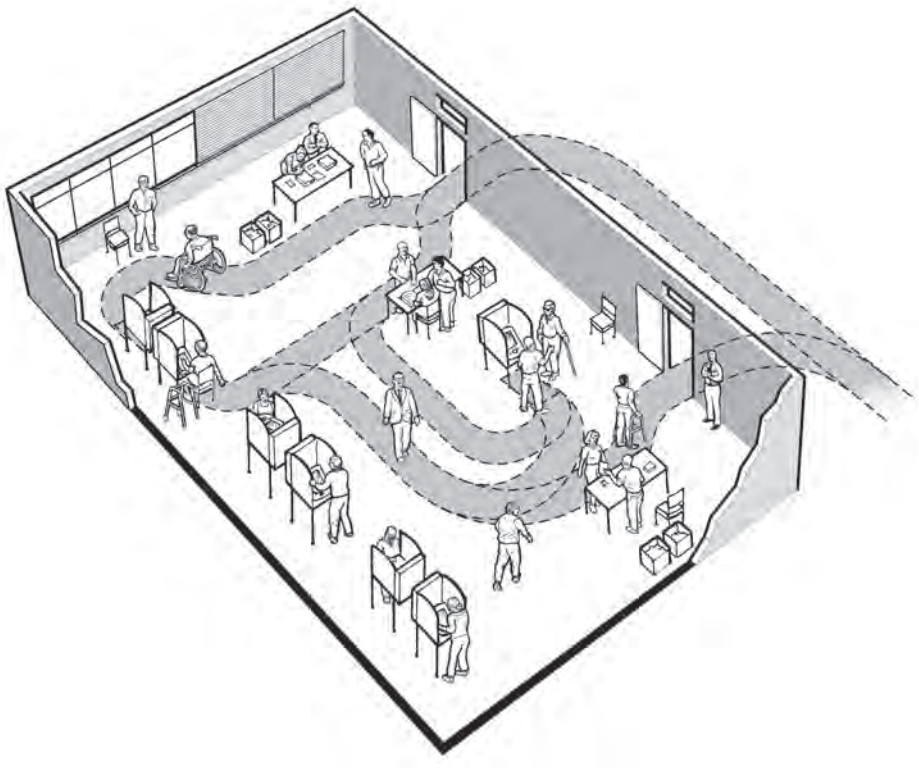
Problem One: The elevator or lift to the voting area requires a key to be inserted before the elevator or lift is operational.

Solution: Relocate the voting area to avoid use of the elevator or lift. Otherwise, leave the key in the elevator or lift for the entire time the polling place is open, or station a volunteer, who has been trained in its operation, to operate the elevator or lift while the polling place is open.

Voting Area

The accessible voting area must have an accessible entrance and adequate circulation and maneuvering space for voters who use wheelchairs or scooters, or who walk with mobility devices, to get in to the voting area, sign in at the check-in table, and go to the voting stations or machines. Within the voting area there must be enough clearance for an individual with a disability to access and use all the voting equipment. Voting machines should be positioned so that the highest operable part is no higher than 48 inches. If voters are expected to vote at counters or tables, there should be a writing surface that provides knee and toe clearance so that a voter who uses a wheelchair may sit at and use the counter or table.

Voting area requirements are in Section F of the 2016 Checklist found in Part 3 of this document.



An accessible route connects the building entrance with the voting area, including voter check-in and voting stations.

Submittal: November 2019

Solutions for Accessibility:
Problems Involving the Voting Area

Problem One: The voting area is in a small room and the accessible voting machine is only two feet from the check-in table.

Solution: Relocate the voting area to a larger space such as a hallway or lobby or change the layout of the voting area by moving the check-in table outside the room to provide appropriate space for voters with disabilities to use the accessible voting machine.

Part 2: Tools for Surveys

The tools necessary to conduct surveys using the 2016 Checklist are inexpensive and many, if not all, can be purchased at local hardware and home improvement stores.

Tools and Documentation

The following tools are needed for the 2016 Checklist:

- a metal tape measure at least 20 feet long
- a digital level or a bubble level that is at least 24 inches long
- a door pressure gauge
- a digital camera with a flash
- a copy of the 2016 Checklist for each location to be surveyed
- a clipboard and pens or pencils

Completing Measurements and Recording Information

One person can complete a survey of a polling place but it is often quicker and easier for two people to work together. One can be responsible for taking the measurements and the other for recording the information and taking any photographs.

Taking Measurements

Sloped Surfaces

Measuring the slope of a ramp, parking space, pedestrian route, or other ground or floor surface is important to identify whether the surface is accessible. Two slope measurements perpendicular to one another should be taken at each location. One is the running slope that runs parallel to the direction of travel and the other is the cross slope, which runs perpendicular to the running slope.

The amount of slope or grade is described as the proportion of a vertical rise to a horizontal length. It is usually described as:

- a ratio (e.g., 1:20, means one unit of vertical rise for each 20 units of horizontal length); or
- a percentage (e.g., 8.33% which equates to a ratio of 1:12 or 4.76 degrees).

The easiest way to measure slope is to use a digital level. The digital display gives a reading that may be shown as a ratio, percent, or degree. Calibrate the digital level before each use.

A digital level that can be used with measurements in degrees, percentages, or ratios

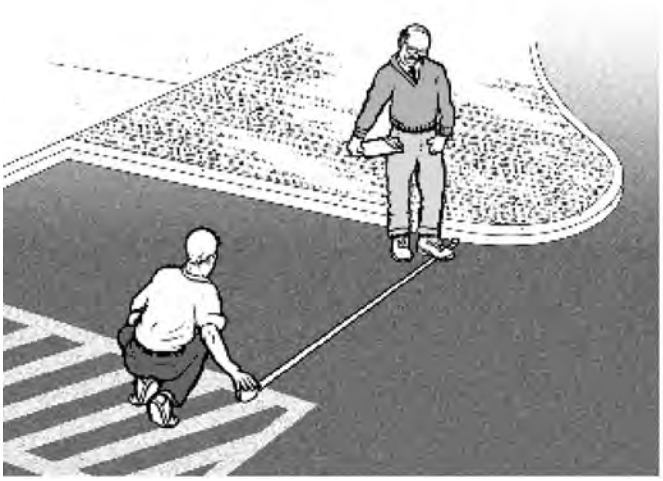
Submittal: November 2, 2020

Another way to measure slope is to use a 24 inch level with leveling bubbles and a tape measure. Place the level on the sloped surface in the direction you wish to measure. Rest one end of the level at the highest point of the sloped surface and lift the other end (see image) until the bubble is in the middle of the tube. This is the "level" position. While the level is in this position, measure the distance between the bottom end of the level and the sloped surface below. If the distance is two inches or less, then the slope is 1:12 or less. When the distance is more than two inches, record the distance on the checklist so the exact slope can be calculated later. For measuring cross slope, if the distance measured from the level position is ½ inch or less then the slope is 1:48 or less.

Measuring slope using a 24 inch bubble level and tape measure

Using the Tape Measure

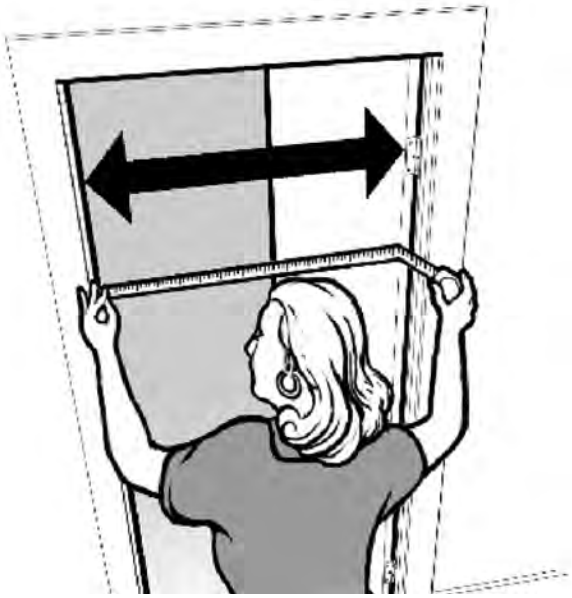
A tape measure is used to measure the length, width, height, and depth of various elements including parking spaces and access aisles, routes, thresholds, doorways, and protruding objects.



Using a tape measure to measure the width of a parking space

Measuring Door Openings

Special care is needed when measuring the clear opening of a doorway. To measure the clear opening of a standard hinged door, open the door to 90 degrees. Measure the clear door opening from the edge of the doorstop to the edge of the door (not to the door jamb). This measures the clear width of the door opening through which people pass, which is less than the width of the door itself. Door handles and push bars should not be included in the measurements of door opening widths.



Measuring the clear door opening

Submittal: November 2014

Taking Photographs

It is always useful to first take a photo that will clearly identify the site, then the elements surveyed. A comprehensive set of photographs makes it easier to understand existing conditions after the survey is completed. It is a good idea to take several photos of the exterior and interior of the polling place. We recommend taking photographs of measurements and non-compliant elements such as steps. It is likely that others may review information about the facility you are surveying.

Temporary Remedies

Many accessibility barriers at polling places can be removed with temporary remedies. Although not designed to be permanent solutions, the following tools can be used to provide remedies on Election Day to improve accessibility. These tools can often be found in local hardware and home improvement stores or online at minimal cost.

Temporary Remedies

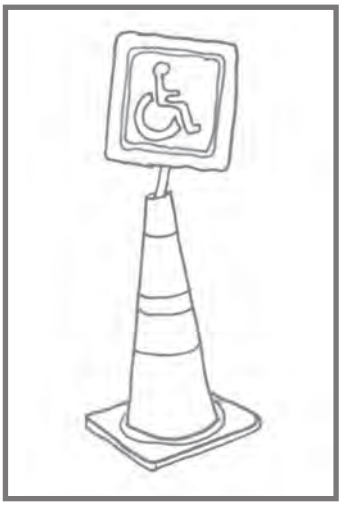
Traffic Cones

Traffic cones can be used to mark parking spaces, access aisles and passenger loading zones, to hold parking signs, and to warn of protruding objects.

Van Parking Sign

Van accessible parking signs should be used to designate van accessible parking locations.

Parking Signs



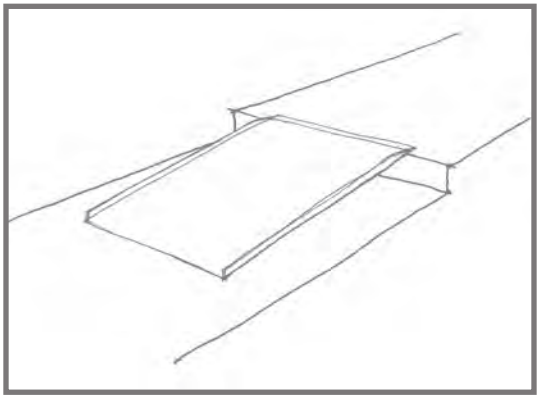
Accessible parking signs should be used to designate accessible parking locations.

Directional Signs

Directional signage should be used to show direction to the accessible route, accessible entrance, and voting area.

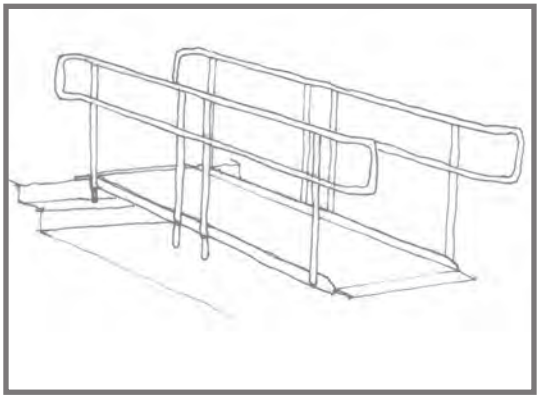
Submittal: November 6, 2012

Portable ramp - step six inches or less



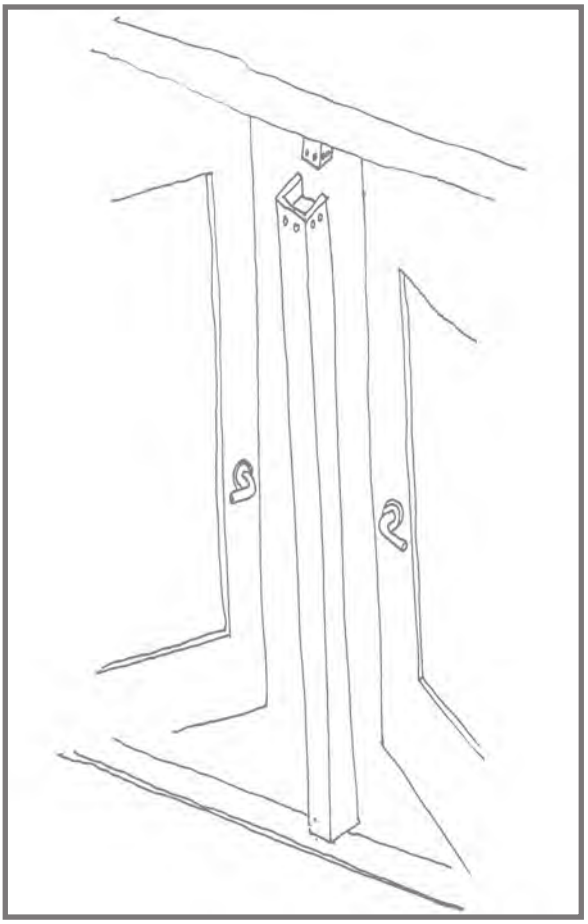
Portable ramps without handrails can only be used for heights six inches or less and can provide access at a curb or low step. Portable ramps also can be placed flat to cover holes or gaps in a sidewalk.

Portable ramp - greater than six inch step



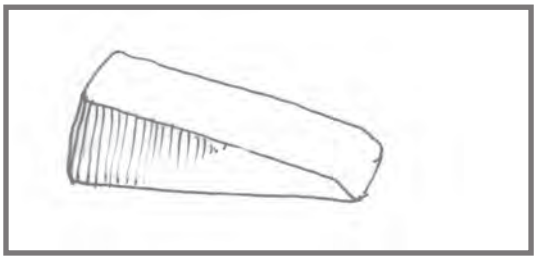
Portable ramps with handrails must be used for heights greater than six inches to provide access over steps. For ramps greater than six inches high, temporary edge protection such as a pipe or piece of wood can be attached with ties or twine to the edges of the ramp. Edge protection must run the entire length of the ramp.

Remove post (increase clear width at double leaf doors)



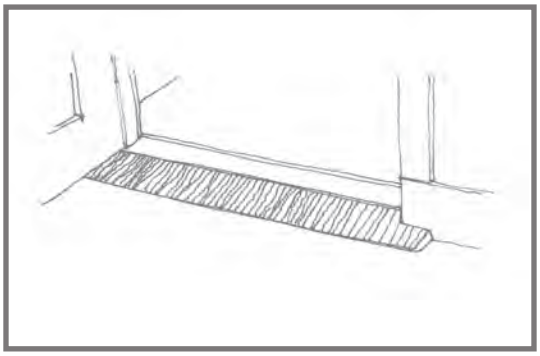
Remove center post between doors if the post is bolted to the door frame to provide a 32 inch clear opening or to allow double doors to be propped open.

Door stop



Door stops can be used to prop open a door if the door handle is inaccessible, or if there is an inadequate maneuvering clearance for a person using a wheelchair or other mobility device to open the door.

Wedges



Wedges can provide access at thresholds and slight changes in level.

Part 3 : Polling Place Accessibility Checklist

Ward:_____ Precinct:_____ Staff:_____ Date:_____ Time:_____

Address:_____ Location name:_____

This checklist is designed to provide guidance for determining whether a polling place has basic accessibility features needed by voters with disabilities.

For each question below there are citations to the 2010 ADA Standards for Accessible Design (2010 Standards). Please review the 2010 Standards for all requirements.

There are some differences between the 1991 ADA Standards for Accessible Design (1991 Standards) and the 2010 Standards. Elements and spaces in a building constructed or altered before March 15, 2012, that complied with the 1991 Standards may remain in compliance with the 2010 Standards. See 28 C.F.R. §35.150(b)(2) for more information.

In completing the checklist, provide a measurement for every question with a "no" answer. Where a question asks about more than one element, provide a note in the comments explaining any noncompliant elements.

Status of Polling Place

____ All Elements Compliant

____ Non-Compliant Elements Remediable with Temporary Measures

____ Non-Compliant Elements Not Remediable with Temporary Measures (Relocate Polling Place)

Submittal: November 2, 2015

A	Parking **Only complete this section if off-street parking is provided to voters. If off-street parking is not provided to voters, go to Section B.** **If more than 25 parking spaces are provided to voters, see the 2010 Standards for the number of accessible parking spaces required. (§208.2)**	Yes	No	N/A	Comments/ Remedies
A1	Is there at least one designated van accessible space with signage with the International Symbol of Accessibility and designated "van accessible"? (§§208.2, 208.2.4, 502.6)				
A2	Are the designated van accessible spaces at least 96" wide with a 96" wide access aisle, or 132" wide with a 60" wide access aisle? (§§502.2, 502.3) Width of space _____ Width of access aisle _____				
A3	For van accessible spaces (particularly in a garage or parking structure), is there vertical clearance of at least 98" for the vehicular route to the parking space, in the parking space and access aisle, and along the vehicular route to the exit? (§502.5)				
A4	Are designated accessible parking spaces and the access aisles serving them on a level surface, with slopes not exceeding 1:48 in all directions? (Note: Curb ramps may not be part of an access aisle since they include slopes greater than 1:48.) (§502.4)				
A5	Are the surfaces of the designated accessible parking spaces and access aisles stable, firm, and slip resistant? (§§502.4, 302.1)				
A6	Are the designated accessible parking spaces located on the shortest accessible route to the accessible entrance? (§208.3.1)				

Ward:_____ Precinct:_____ Staff:_____ Date:_____ Time:_____

Address:_____ Location name:_____

B	Passenger Drop-Off Area **Only complete this section if a passenger drop-off area is provided for voters. If a drop-off area is not provided to voters, go to Section C.**	Yes	No	N/A	Comments/ Remedies
B1	Is the vehicle pull-up space on a level surface, with slopes not exceeding 1:48 in all directions? (§503.4)				
B2	Is the access aisle next to the vehicle pull-up space on a level surface, with a slope not exceeding 1:48 in all directions? (§503.4)				
B3	Is there vertical clearance of at least 114" (9 feet 6 inches) from the site entrance to the vehicle pull-up area, in the access aisle, and along the vehicular route to the exit? (§503.5)				
B4	Is a curb ramp provided if a curb separates the access aisle from the accessible route to the accessible entrance? (§§206.2.1, 503.3)				
B5	Is the width of the curb ramp surface at least 36" (not counting the side flares)? (§405.5)				
B6	Does an accessible route connect the access aisle and curb ramp to the accessible entrance of the polling place? (§206.2)

H	Lifts	Yes	No	N/A	Comments/ Remedies
H1	Is the lift operational at the time of the survey? (28 C.F.R. §§35.130, 35.133)				
H2	Is the lift independently operable, or can it be made so during Election Day? (§410.1)				
H3	Is there 30" by 48" of clear floor space within the lift? (§§410.3, 305.3)				
H4	Are the controls for the lift no higher than 48"? (§§410.5, 309.3, 308)				
H5	Are the controls useable with one hand without tight grasping, pinching or twisting? (§§410.5, 309.4)				
H6	Is the clear width of the door opening/gate opening at the end of the lift at least 32"? If a side door/gate is provided, is the clear opening width at least 42"? (§410.6)				

Ward:_____ Precinct:_____ Staff:_____ Date:_____ Time:_____

Address:_____ Location name:_____

I	Elevators	Yes	No	N/A	Comments/ Remedies
I1	Is the elevator car door opening at least 36" wide? (§407.3.6, Table 407.4.1)				
I2	Is there space to maneuver within the elevator car, e.g., 51" deep and 68" wide; OR 80" deep and 54" wide; OR 60" deep and 60" wide? (§407.4.1)				
I3	Are hallway elevator call buttons 48" high or lower? (§§407.2.1.1, 308.2, 308.3)				
I4	Are elevator car controls 48" high or lower? (§§407.4.6.1, 308.2, 308.3)				
I5	Does the elevator have visible and audible signals in the hallway to indicate the arrival and direction of the elevator car? (§407.2.2.1)				
I6	Does the elevator have visible and audible signals within the elevator car to indicate the position of the car? (§407.4.8)				

The Americans with Disabilities Act authorizes the Department of Justice (the Department) to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This document provides informal guidance to assist you in understanding the ADA and the Department's regulations.

This guidance document is not intended to be a final agency action, has no legally binding effect, and may be rescinded or modified in the Department’s complete discretion, in accordance with applicable laws. The Department’s guidance documents, including this guidance, do not establish legally enforceable responsibilities beyond what is required by the terms of the applicable statutes, regulations, or binding judicial precedent.

APPENDIX J: ADA BEST PRACTICES TOOLKIT: EMERGENCY MANAGEMENT UNDER TITLE II OF THE ADA

NOTICE

Portions of this chapter may not fully reflect the current ADA regulations. The regulation implementing title II of the ADA was revised as recently as 2016. Revised ADA Standards for Accessible Design (2010 Standards) were issued on September 15, 2010 and went into effect on March 15, 2012.

ADA Best Practices T ool Kit for State and Local Governments

Chapter 7

Emergency Management Under T itle II of the ADA

In this Chapter, you will learn how to make emergency management programs, services, and activities accessible to everyone, including people with disabilities. Chapter 7 answers the following questions:

- What does emergency management cover?
- How does the ADA apply to emergency management?
- What are some of the common problems faced by people with disabilities in accessing emergency- and disaster-related services, programs, activities, and facilities?
- What are some of the steps that state and local governments can take to make emergency- and disaster-related services, programs, activities, and facilities accessible to people with disabilities?

A. ADA Basics for Emergency Management

One of the primary responsibilities of state and local governments is to protect residents and visitors from harm, including assistance in preparing for, responding to, and recovering from emergencies and disasters. State and local governments must comply with Title II of the ADA in the emergency- and disaster-related programs, services, and activities they provide.[1] This requirement applies to programs, services, and activities provided directly by state and local governments as well as those provided through third parties, such as the American Red Cross, private nonprofit organizations, and religious entities.[2] Under Title II of the ADA, emergency programs, services, activities, and facilities must be accessible to people with disabilities [3] and generally may not use eligibility criteria that screen out or tend to screen out people with disabilities.[4] The ADA also requires making reasonable modifications to policies, practices, and procedures when necessary to avoid discrimination against a person with a disability[5] and taking the steps necessary to ensure effective communication with people with disabilities.[6] The ADA generally does not require state or local emergency management programs to take actions that would fundamentally alter the nature of a program, service, or activity or impose undue financial and administrative burdens.[7]

B. What is Emergency Management?

Emergency management is wide-ranging. It includes all programs, services, and activities related to emergencies and disasters, including:

- Preparation – advance planning for emergencies and disasters;
- Testing of Preparedness – staging emergency simulations and other approaches to testing the effectiveness of emergency preparedness;
- Notification – alerting the public to emergencies and disasters and to available programs, services, and activities;
- Community Evacuation and Transportation;
- Emergency Shelter Programs;
- Temporary Lodging and Housing;
- Social Services and Emergency- and Disaster-Related Benefit Programs;
- Emergency Medical Care and Services;
- Relocation Programs, Activities, and Services;
- Transition and Transportation Back to the Community Following an Emergency or Disaster;
- Emergency and Disaster Recovery Programs, Services, and Activities; and
- Remediation of Damage Caused by Emergencies and Disasters– repairing and rebuilding damaged facilities, removing debris, and relocation and re-introduction of state and local government programs, services, and activities following an emergency or disaster.

C. Pr eparation – Advance Planning for Emergencies and Disasters

An emergency management plan is the all-important first step in ensuring an effective response to emergencies and disasters. Public officials, specialists from organizations such as the American Red Cross, and community members should work together to develop a comprehensive plan to prepare for emergencies. One good way to test your emergency management plan is to enlist people with disabilities to role-play during emergency simulations. Seeking and using input from people with a variety of disabilities, and organizations with expertise on disability issues, will help ensure that your emergency planning and preparedness meet the access needs of people with disabilities in your community with respect to all phases of emergency management.

D. Notification – Alerting the Public to an Emergency

Officials must act quickly to alert the public to an impending emergency situation. But many traditional emergency notification methods are not accessible to people with disabilities. People who are deaf will not hear radio, television, sirens, or other audible alerts. Those who are blind or who have low vision may not be aware of visual cues, such as flashing lights. State and local governments need to use warning methods that ensure all residents and visitors will have the information necessary to make sound decisions and take appropriate, responsible action.

Often, using a combination of notification methods will be more effective than relying on one method alone. For instance, combining visual and audible alerts will reach a greater audience than either method would alone. Auto-dialed text telephone (TTY) messages to pre-registered individuals who are deaf or hard of hearing, text messaging, emails, and other innovative uses of technology may be incorporated into such procedures. For announcements by government officials on local television stations, providing qualified sign language interpreters and open captioning will ensure that all people tuning in are able to access the information provided. The emergency management plan should identify the steps that will be taken and the resources that will be used to ensure that emergency notifications will be accessible to all.

E. Community Evacuation and T ransportation

In an emergency, people with disabilities may face a variety of challenges in evacuating to safety. A person with a mobility disability may need assistance leaving a building without a working elevator. Individuals who are blind or who have low vision may no longer be able to independently use traditional orientation and navigation methods. A deaf person may be trapped somewhere unable to communicate with anyone because the only available communication device relies on voice. State and local governments need to establish procedures to ensure that people with disabilities can evacuate the area of an emergency in a variety of conditions, with assistance when it is needed.

One step that can significantly increase the effectiveness of your planning process is to create a voluntary, confidential registry of persons with disabilities who may need individualized notification or evacuation assistance. Setting up a voluntary registry requires that procedures be implemented to ensure that the registry is voluntary, confidentiality is protected, and information is updated as needed.

Both public and private transportation may be disrupted due to overcrowding, because of blocked streets and sidewalks, or because the transit system is not functioning at all. The movement of people during an evacuation is critical, but many people, because of their disabilities, cannot drive or use traditional, inaccessible transportation. Thus, emergency plans must identify accessible forms of transportation (i.e., vehicles equipped with wheelchair lifts) available to help evacuate people with disabilities. For instance, some communities have used lift-equipped school buses, transit buses, or paratransit vehicles to evacuate people who use wheelchairs or scooters. Some people with disabilities will be able to reach mass evacuation pick-up locations independently, while others may be unable to leave their homes without assistance. Evacuation and emergency transportation plans should address the evacuation-related needs of people with disabilities.

F. Emergency Shelter Pr ograms

When emergencies arise, communities often provide residents and visitors with safe refuge in temporary shelters. Shelters are sometimes operated by government entities themselves. More often, they are operated by a third party. Regardless of who operates a shelter, the ADA generally requires shelter operations to be conducted in a way that offers people with disabilities the same benefits – e.g., safety, comfort, food, medical care, the support of family and friends – provided to people without disabilities. Because sheltering programs are critical to ensuring the safety of people with disabilities in emergencies and disasters, ADA requirements for sheltering are discussed in greater detail in two stand-alone technical assistance documents that state and local governments can provide to shelter operators to assist them in planning to meet the needs of people with disabilities in the shelter environment. While these technical assistance documents do not address all ADA compliance issues that may arise in emergency shelters, they address a number of the most common access problems.

The first of these technical assistance documents – "The ADA and Emergency Shelters: Access for All in Emergencies and Disasters" is in Addendum 2 to this Chapter at www.ada.gov/pcatoolkit/chap7shelterprog.htm. It discusses the ADA's nondiscrimination requirements for shelter programs. The second technical assistance document – "ADA Checklist for Emergency Shelters" is in Addendum 3 to this Chapter at www.ada.gov/pcatoolkit/chap7shelterchk.htm. The Checklist includes two assessment tools to help state and local governments and emergency shelter operators ensure that emergency shelters provide access to all: (1) a preliminary survey tool that will help in deciding if a facility has the accessibility characteristics that make it a good candidate for a potential emergency shelter, and (2) a more detailed checklist that will help identify the most common architectural barriers to access for people with disabilities found at emergency shelters.

G. Access to Social Services, T emporary Lodging or Housing, and Other Benefit Pr ograms

State and local governments often provide social services and other benefit programs to assist people harmed by emergencies and disasters. These programs need to be accessible to all, including people with disabilities. Following are some important points to remember:

- Application procedures should not limit access by people with disabilities. For example, programs that require people to apply by telephone may exclude people who are deaf or hard of hearing. Inaccessible web-based application procedures and printed application forms may exclude people who are blind or have low vision. Programs that require in-person applications may exclude people who, because of their disabilities, are unable to leave shelters or their homes. Procedures that allow people to apply in different ways – providing auxiliary aids and services and reasonable modifications to application procedures when people with disabilities need them – is the most effective way to ensure equal access.

- Information about social services and other benefit programs should be available in formats that people with communication disabilities can use. For example, during emergencies, announcements about the availability of social services and other benefits are often made orally, whether in radio and television broadcasts or in public announcements at emergency shelters. People who are deaf or hard of hearing may not receive information about these programs unless television broadcasts have open captions, materials describing the programs are posted on websites, or public announcements are translated by a sign language interpreter or posted on shelter bulletin boards.

- Crisis counseling services will not be accessible to people who are deaf or hard of hearing unless appropriate auxiliary aids and services are provided. In addition, these services need to be offered in physically accessible locations so people with mobility disabilities can use them.

- Temporary lodging or housing programs will not be accessible to people with mobility disabilities or people who are deaf or hard of hearing unless accessible hotel rooms or accessible temporary housing is available. People with disabilities may be unable to utilize temporary lodging or housing programs without assistance in locating a hotel room or housing that meets their disability-related needs, or without accessible transportation. To prepare for the potential need for temporary housing, identify in your emergency response plan available physically accessible short-term housing, as well as housing with appropriate communication devices, such as TTY's. Temporary accessible housing (such as nearby accessible hotel rooms) may be used if people with disabilities cannot immediately return home after a disaster.

Access to T emporary Housing

People with disabilities may have more difficulty locating temporary housing or lodging than others. For example, someone with a mobility disability may need to personally verify that an entrance to an apartment has no steps or that the accessible features of a bathroom or kitchen meet his needs. Some people who are blind or have low vision may not be able to locate addresses in an unfamiliar community or determine if an apartment is clean and safe without assistance. For these reasons people with disabilities may need extra time and help, including transportation assistance, in locating housing.

H. Repairing and Rebuilding

Emergencies and disasters often damage state and local government facilities. In the recovery stage of emergency management, state and local governments often make alterations to facilities to repair such damage, construct facilities to replace those that were destroyed or extensively damaged, or move government programs, services, and activities from damaged facilities to other locations. When constructing new or replacement facilities and repairing damaged facilities, state and local governments must comply with the accessibility requirements of Title II of the ADA. They may choose from two design standards for new construction and alterations – either the Uniform Federal Accessibility Standards (UFAS) or the ADA Standards for Accessible Design (ADA Standards). If the ADA Standards are chosen, public entities are not entitled to the elevator exemption contained in § 4.1.3(5) of the Standards. If the building was newly constructed or altered after the ADA went into effect, then the design standard used at that time must be followed for the rebuilding. Alterations to facilities must not decrease accessibility.

State or local government facilities constructed after January 26, 1992 and alterations to such facilities must comply with the new construction requirements of Title II of the ADA.[8] Alterations to facilities constructed before the ADA became effective, must comply with Title II's requirements for alterations to existing facilities.[9] Under the ADA Standards, alterations to primary function areas of existing facilities trigger a "path of travel" requirement – i.e., a requirement to make the path of travel from the entrance to the altered area accessible, including telephones, restrooms, and drinking fountains serving the altered area.[10] Primary function areas are those where major activities take place. But a public entity is not required to spend more than 20 percent of the cost of the original alteration on making the path of travel accessible, even if this cost limitation results in less than full accessibility. Under UFAS, if an existing facility undergoes a "substantial alteration," the public entity must provide (1) an accessible route from public transportation, parking, streets, and sidewalks to all accessible parts of the building; (2) an accessible entrance; and (3) accessible restrooms.[11] A "substantial alteration" for purposes of UFAS is where the total cost of all alterations in a 12-month period amounts to 50 percent or more of the value of the building.

When moving programs from a damaged facility to another location, state and local governments must ensure that the programs remain accessible to people with disabilities.[12] This requirement applies whether the program is relocated permanently or temporarily.

I. Steps to Ensur e Access for All in Emergencies and Disasters

Here are some steps you can take now to ensure that emergency management programs, services, and activities are accessible to everyone, including people with disabilities.

- Advance Planning: On an on-going basis, seek and use input from people with different types of disabilities (i.e., mobility, vision, hearing, cognitive, psychiatric, and other disabilities) regarding all phases of your emergency management plan, including:
    - preparation;
    - notification;
    - evacuation and transportation;
    - sheltering;
    - first aid and medical services;
    - temporary lodging and housing;
    - transition back to the community;
    - clean up; and
    - other emergency- and disaster-related programs, services, and activities.
- Voluntary Registry: Create voluntary, confidential registries of persons with disabilities who may need individualized evacuation assistance, transportation, and/or notification. Establish procedures to ensure the registry's voluntariness, guarantee confidentiality controls, and develop a process to update the registry when needed. Publicize the availability of the registry.
- Notification: If you use emergency warning systems such as sirens or other audible alerts, provide ways to provide people who are deaf or hard of hearing prompt notice of an impending disaster. Combine visual and audible alerts to reach a greater audience than either method would by itself. Consider using telephone calls, auto-dialed TTY (teletypewriter) messages, text messaging, emails, and even direct door-to-door contact with pre-registered individuals. Also, consider using open captioning on local TV stations, and dispatching qualified sign language interpreters to assist in broadcasting emergency information provided to the public.
- Ensur e Access for People with Disabilities Who Use Service Animals: Modify "no pets" policies to enable people with disabilities to evacuate, use emergency transportation, stay in shelters, and participate in all emergency- and disaster-related programs together with their service animals. Teach first responders and the employees, volunteers, and third parties who perform emergency- and disaster-related functions that people with disabilities should not be separated from their service animals even in places where pets are typically not allowed. Only two questions may be asked to determine if an animal is a service animal: (1) Is this animal a service animal required because of a disability? (2) What tasks or work has this animal been trained to perform? If the answers to these questions reveal that an animal has been trained to provide assistance to a person with a disability, that person should be able to access services, programs, activities, and facilities while accompanied by his service animal. Service animals do not require certification, identification cards or licenses, special equipment, or professional training.
- Evacuation and Return Home: Adopt policies to ensure that your community evacuation and recovery plans enable people with disabilities, including those who have mobility, vision, hearing, cognitive, and psychiatric disabilities to safely self-evacuate, to be evacuated by others, and to return home.
- Transportation: Some people with disabilities will need accessible transportation. Identify accessible modes of transportation, such as wheelchair lift-equipped school buses, transit buses, paratransit vehicles, and taxis that will be available to evacuate people with disabilities during an emergency. Ensure that transportation plans address people with disabilities' needs to transport mobility aids, such as wheelchairs or scooters, oxygen tanks or other medical equipment, and service animals.
- Shelters – Policies: Review your sheltering program to ensure that rules, policies, and procedures comply with ADA requirements. Use the Department of Justice's technical assistance publication, "The ADA and Emergency Shelters: Access for All in Emergencies and Disasters, " which is located in Addendum 2 to this Chapter and at www.ada.gov/pcatoolkit/chap7shelterprog.htm All shelter operators need to know the ADA requirements discussed in this Chapter, including the Addenda. If your sheltering program is operated through any third parties, provide them with a copy of these materials.
- Shelters – Physical Accessibility: Survey your community's current shelters for barriers to access for persons with disabilities. Use the Department of Justice's "ADA Checklist for Emergency Shelters," which is located in Addendum 3 to this Chapter, and at www.ada.gov/pcatoolkit/chap7shelterchk.htm
    - If you find barriers to access, r emove the barriers or work with the facility' s owner to r emove them.
    - If barriers r emain, find another nearby facility that is or can be made accessible. In identifying new or alternative shelter locations, use the pr eliminary survey tool which will help you determine if a facility is a good candidate for a potential emergency shelter .
    - Until all emergency shelters have accessible parking, exterior routes, entrances, interior routes to the shelter area, sleeping and recreational areas, dining facilities, and toilet/bathing rooms, identify and widely publicize to the public, including persons with disabilities and organizations with expertise on

disability issues, the locations of the most accessible emergency shelters and the accessible features they provide.

- Adopt procedures to ensure that shelter staff and volunteers maintain accessible routes and minimize protruding objects.

- Social Services and Other Benefit Programs: Review your social service and other emergency- and disaster-related programs, services, and activities to ensure that people with disabilities have an equal opportunity to apply for and benefit from them.
  - Ensure that eligibility criteria do not unnecessarily screen out or tend to screen out people with disabilities – e.g., requiring a driver's licence excludes people who, because of their disability, cannot drive; requiring a telephone number excludes many people who are deaf or have a speech disability.
  - Ensure that architectural barriers do not deny access to people with mobility disabilities.
  - Ensure that communication barriers do not deny access to people with disabilities. Establish policies and procedures to provide the auxiliary aids and services needed to communicate effectively with people with disabilities, giving primary consideration to the auxiliary aids and services requested by an individual with a disability.
  - Provide training so that employees and volunteers who staff these programs understand their ADA obligation to provide effective communication and make reasonable modifications to policies, practices, and procedures when necessary to avoid discrimination against people with disabilities.
- Incident Management: During emergencies and disasters, first responders, emergency transportation drivers, and shelter staff often have questions about how to handle issues that arise. When these issues involve people with disabilities, ADA obligations are often implicated. Consider appointing one or more persons knowledgeable on ADA requirements and disability issues (ADA Incident Managers) who will be on-call throughout emergencies and disasters to provide quick guidance on issues that may involve the ADA and/or a person with a disability.
- Recovery: During disasters, government facilities can be damaged or destroyed. When altering or rebuilding after a disaster, ensure that alterations to facilities and the design and construction of new or replacement facilities comply with all applicable federal accessibility requirements.

APPENDIX K: EMERGENCY PREPAREDNESS RESOURCES

Emergency Preparedness Resources for Employers, Governments, Shelters and Service Providers

Ask Your Questions about the Americans with Disabilities Act (ADA)

Southeast ADA Center
A Member of the ADA National Network
1-800-949-4232 (voice/TTY)
The Southeast ADA Center is one of 10 regional centers that provide accurate information on issues related to the Americans with Disabilities Act (ADA), disability, and technology access. Our purpose is to teach the public how to comply with the ADA. The Southeast ADA Center serves Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee. **All calls are confidential!**
www.adasoutheast.org

ADA National Network
The ADA National Network provides information, guidance and training on the Americans with Disabilities Act (ADA), tailored to meet the needs of business, government and individuals at local, regional and national levels. The ADA National Network has ten Regional Centers located throughout the United States that provide local assistance to ensure that the ADA is implemented wherever possible. The Centers are funded by the National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR).

Staying Safe at Work: Teaching Workers with Disabilities about Health & Safety on the Job - Instructor's Manual (Labor Occupational Health Program, UC Berkeley and National Institute for Occupational Safety and Health)
This training course was developed by the Labor Occupational Health Program at UC Berkeley with hands-on activities that encourage practice and don't require reading skills. Topics include how workers with developmental disabilities can identify and protect themselves from workplace hazards, what to do in an emergency, and how to speak up about a safety problem at work. Project staff created a version of the curriculum to support the Walgreens Disability Inclusion initiative to hire workers with disabilities in its new distribution centers. Walgreens trainees with disabilities take part in this course while they are learning to do their job in the company's training centers. Note: Lesson Three in this guide is "Staying Safe in an Emergency at Work."

APPENDIX L: DISABILITY ETIQUETTE

United Spinal Association

DISABILITY ETIQUETTE

Tips On Interacting With People With Disabilities

Submittal: November 1, 2017

United Spinal Association

Mission Statement

United Spinal Association's mission is to improve the quality of life of all people living with spinal cord injuries and disorders (SCI/D).

Who We Are

United Spinal Association is the largest non-profit in the United States dedicated to helping people living with SCI/D. We are a 501(c)(3) national disability rights and veterans service organization founded in 1946. United Spinal Association provides active-lifestyle information, peer support and advocacy that empowers people with SCI/D to achieve their highest potential in all facets of life. United Spinal played a significant role in writing the Americans with Disabilities Act, the landmark civil rights law of 1990 that protects people with disabilities from discrimination. It has also made important contributions to the Fair Housing Amendments Act and the Air Carrier Access Act, and was instrumental in getting New York City to create sidewalk curb ramps and accessible public transportation that is currently used as a model for many cities nationwide.

Who We Serve

United Spinal Association's diverse membership includes wheelchair-users, veterans with disabilities and people living with multiple sclerosis, amyotrophic lateral sclerosis (ALS), post-polio, spina bifida and other spinal cord disorders. Each year, United Spinal Association helps thousands of people of all ages overcome the daily challenges of living life with a disability. And we extend our unending support to those most important in their lives— their family members and caregivers.

Publications

To download any of United Spinal Association's informative publications free of charge, visit **www.unitedspinal.org/publications** or call 1-800-444-0120 to order printed copies.

Donations

United Spinal Association receives very little government funding. Its programs and services depend on individuals like you and your tax-deductable gifts. In fact, without your generous support, the organization could not exist. If you would like to make a donation to support United Spinal's mission, please visit **www.unitedspinal.org/giving** or call 1-800-404-2899.

Membership

National Spinal Cord Injury Association is the membership program of United Spinal Association, and welcomes all individuals with a strong interest in our community. Individual membership is free. Visit **www.spinalcord.org** or call 800-962-9629.

Training

United Spinal Association can customize a "Disability Etiquette" training session at a reasonable cost for your company, organization, or institution. Its experienced staff can plan a program based on your needs. For more information, please contact *info@unitedspinal.org*.

Disabilities Movement Project
Page | 159

Introduction

The National Organization on Disability (NOD) reports that more than 54 million Americans have a disability. This booklet is for anyone—with or without a disability—who wants to interact more effectively with people with disabilities. The Americans with Disabilities Act (ADA) of 1990 was conceived with the goal of integrating people with disabilities into all aspects of life, particularly the workplace and the marketplace. Sensitivity toward people with disabilities is not only in the spirit of the ADA, it makes good business sense. It can help you expand your practice, better serve your customers or develop your audience. When supervisors and co-workers use disability etiquette, employees with disabilities feel more comfortable and work more productively. Practicing disability etiquette is an easy way to make people with disabilities feel welcome.

You don't have to feel awkward when dealing with a person who has a disability. This booklet provides some basic tips for you to follow. And if you are ever unsure how to interact with a person who has a disability, just ask!

The Basics

ASK BEFORE YOU HELP

Just because someone has a disability, don't assume she needs help.* If the setting is accessible, people with disabilities can usually get around fine. Adults with disabilities want to be treated as independent people. Offer assistance only if the person appears to need it. A person with a disability will oftentimes communicate when she needs help. And if she does want help, ask how before you act.

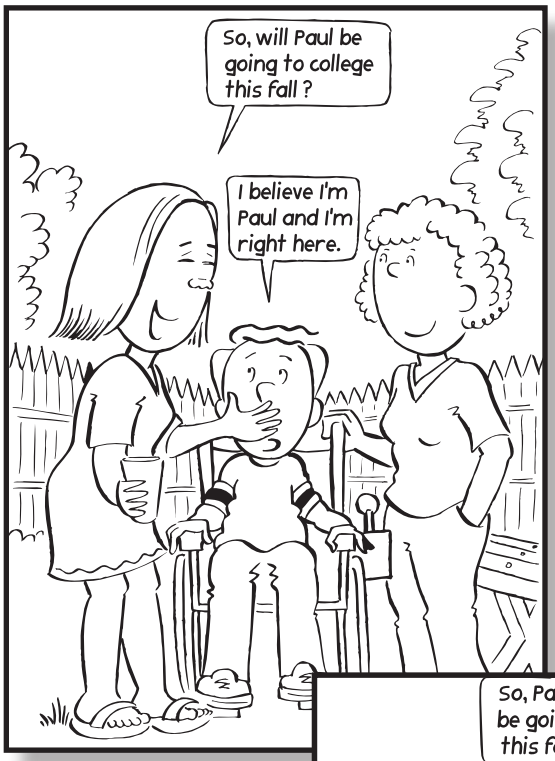
BE SENSITIVE ABOUT PHYSICAL CONTACT

Some people with disabilities depend on their arms for balance. Grabbing them, even if your intention is to assist, could knock them off balance.

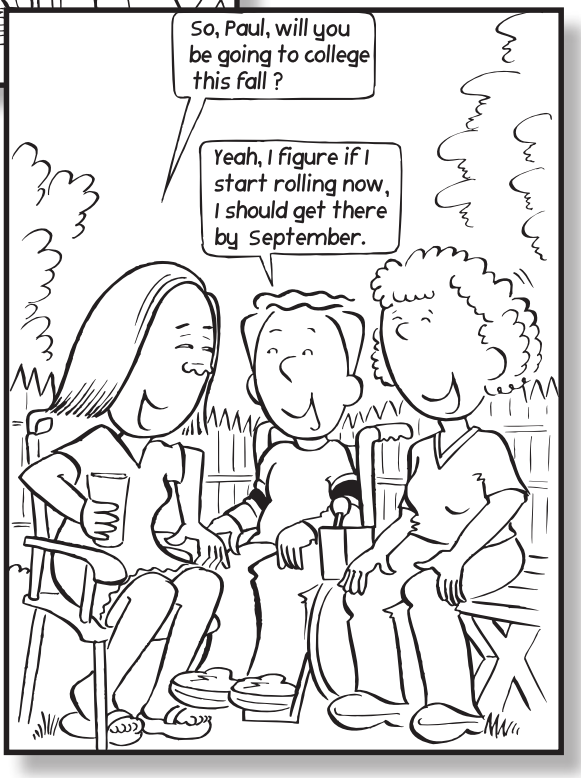
Avoid patting a person on the head or touching his wheelchair, scooter or cane. People with disabilities consider their equipment part of their personal space.

* Note: We want you to think of people who have disabilities as individuals—your friends, your co-workers, your neighbors—so rather than use the amorphous group term "they" for people with disabilities, we use the pronouns "he" or "she" throughout this booklet.

Submittal: November 6, 2020



Speak directly to a person with a disability....



....not to his companion or sign language Interpreter.

THINK BEFORE YOU SPEAK

Always speak directly to the person with a disability, not to his companion, aide or sign language interpreter. Making small talk with a person who has a disability is great; just talk to him as you would with anyone else. Respect his privacy. If you ask about his disability, he may feel like you are treating him as a disability, not as a human being. However, many people with disabilities are comfortable with questions about their disability after getting to know someone. A simple "I don't feel comfortable sharing that" by the person with a disability can set the tone if it is not something that he/she is willing to share.

DON'T MAKE ASSUMPTIONS

People with disabilities are the best judge of what they can or cannot do.

Don't make decisions for them about participating in any activity. Depending on the situation, it could be a violation of the ADA to exclude people because of a presumption about their limitations.

RESPOND GRACIOUSLY TO REQUESTS

When people who have disabilities ask for an accommodation at your business, it is not a complaint. It shows they feel comfortable enough in your establishment to ask for what they need. And if they get a positive response, they will probably come back again and tell their friends about the good service they received.

Terminology Tips

PUT THE PERSON FIRST. Say "person with a disability" rather than "disabled person." Say "people with disabilities" rather than "the disabled." For specific disabilities, saying "person with Tourette syndrome" or "person who has cerebral palsy" is usually a safe bet. Still, individuals do have their own preferences. If you are not sure what words to use, ask.

Avoid outdated terms like "handicapped", "crippled", or "retarded."Be aware that many people with disabilities dislike jargony, euphemistic terms like "physically challenged" and "differently abled." Say "person who uses a wheelchair" rather than "confined to a wheelchair" or "wheelchair bound." The wheelchair is what enables the person to get around and participate in society; it's liberating, not confining.

Submittal: November 6, 2012

With any disability, avoid negative, disempowering words, like "victim" or "sufferer." Say "person with AIDS" instead of "AIDS victim" or "person who suffers from AIDS."

It's okay to use idiomatic expressions when talking to people with disabilities. For example, saying, "It was good to see you," and "See you later," to a person who is blind is completely acceptable; they use these expressions themselves all the time.

Many people who are Deaf communicate with sign language and consider themselves to be members of a cultural and linguistic minority group. They refer to themselves as Deaf with a capital "D," and may be offended by the term "hearing impaired." Others may not object to the term, but in general it is safest to refer to people who have hearing loss but who communicate in spoken language as "hard of hearing" and to people with profound hearing losses as Deaf or deaf.

People Who Use Wheelchairs or Other Mobility Devices

PEOPLE WHO USE WHEELCHAIRS have different disabilities and varying abilities. Some can use their arms and hands. Some can get out of their wheelchairs and even walk for short distances.

People who use wheelchairs are individuals, not equipment. Don't lean over someone who uses a wheelchair to shake another person's hand or ask a wheelchair user to hold coats. Setting your drink on the desktop attached to someone's wheelchair is a definite no-no.

- Don't push or touch a person's wheelchair; it's part of her personal space. If you help someone down a curb without waiting for instructions, you may dump her out of the chair. You may detach the chair's parts if you lift it by the handles or the footrest.

- Keep the ramps and wheelchair-accessible doors to your building unlocked and unblocked. Under the ADA, displays should not be in front of entrances, wastebaskets should not be in the middle of aisles, and boxes should not be stored on ramps.

Disabilities Movement Page | 198

Keep accessible paths of travel clear.

Submittal: November 1, 2024

- Be aware of a person's reach limits. Place as many items as possible within their grasp. And make sure that there is a clear path of travel to shelves and display racks. When talking to a person using a wheelchair, grab your own chair and sit at her level. If that's not possible, stand at a slight distance, so that she isn't straining her neck to make eye contact with you.

- If the service counter at your place of business is too high for a person using a wheelchair to see over, step around it to provide service. Have a clipboard handy if filling in forms or providing signatures is expected. A business may also want to make sure employees are prepared to angle down or detach a key pad so a person using a wheelchair can sign their electronic signature after making a credit card purchase.

- If your building has different routes through it, be sure that signs direct people to the accessible routes around the facility. People who use canes or crutches also need to know the easiest way to get around a place, but stairs may be easier for them than a ramp. Ensure that security guards and receptionists can answer questions about the most accessible way around the building and grounds, including the location of elevators.

- People who use canes or crutches need their arms to balance themselves, so never grab them. People who have limited mobility may lean on a door for support as they open it. Pushing the door open from behind or unexpectedly opening the door may cause them to fall. Even pulling out or pushing in a chair may present a problem. Always ask before offering help.

- If you offer a seat to a person who has limited mobility, keep in mind that chairs with arms or with higher seats are easier for some people to use.

- Falls are a big problem for people who have limited mobility. Be sure to set out adequate warning signs after washing floors. Also put out mats on rainy or snowy days to keep the floors as dry as possible. (Make sure they don't bunch up and make the floor impassable.)

Submitted November 2014 Page | 196

Don't ask a person using a wheelchair to hold things for you.

Respect her personal space.

Submittal: November 1, 2016

- People who do not have a visible disability may have needs related to their mobility. For example, a person with a respiratory or heart condition may have trouble walking long distances or walking quickly. Be sure that your museum, hotel or department store has ample benches for people to sit and rest on.

- Some people have limited use of their hands, wrists or arms. Be prepared to offer assistance with reaching, grasping or lifting objects, opening doors and display cases, and operating vending machines and other equipment.

People Who Are Blind

PEOPLE WHO ARE BLIND know how to orient themselves and get around on the street. They are competent to travel unassisted, though they may use a cane or a guide dog. A person may have a visual disability that is not obvious. Be prepared to offer assistance—for example in reading—when asked.

- Identify yourself before you make physical contact with a person who is blind. Tell him your name and your role if it's appropriate, such as security guard, usher, case worker, receptionist or fellow student. And be sure to introduce him to others who are in the group, so that he's not excluded.

- If a new customer or employee is blind or has low vision, offer him a tour of your facility.

- If you have changed your facility (i.e., rearranged the furniture) notify your customers who are blind of the changes.

- People who are blind may need their arms for balance, so offer your arm—don't take his—if he needs to be guided. (It is however appropriate to guide a blind person's hand to a banister or the back of a chair to help direct him to a stairway or a seat.)

- If the person has a guide dog, walk on the side opposite the dog. As you are walking, describe the setting, noting any obstacles, such as stairs

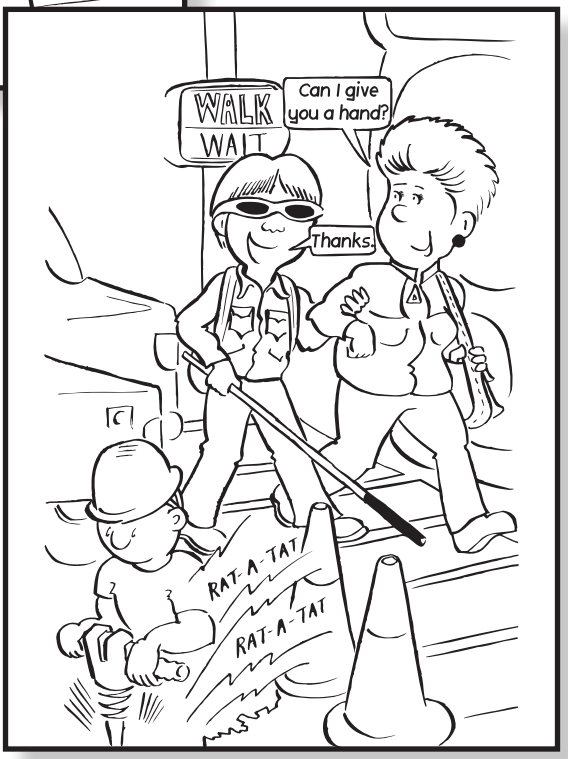
If a person who is blind needs to be guided....



....offer your arm— don't take his.

Submittal: November 1, 2021

('up' or 'down') or a big crack in the sidewalk. Other hazards include: revolving doors, half-opened filing cabinets or doors, and objects protruding from the wall at head level such as hanging plants or lamps. If you are going to give a warning, be specific. Hollering "Look out!" does not tell the person if he should stop, run, duck or jump.

- If you are giving directions, give specific, non-visual information. Rather than say, "Go to your right when you reach the office supplies," which assumes the person knows where the office supplies are, say, "Walk forward to the end of this aisle and make a full right."

- If you need to leave a person who is blind, inform him you are leaving and ask if he needs anything before you leave.

- Don't touch the person's cane or guide dog. The dog is working and needs to concentrate. The cane is part of the individual's personal space. If the person puts the cane down, don't move it. Let him know if it's in the way.

- Offer to read written information—such as the menu, merchandise labels or bank statements—to customers who are blind. Count out change so that they know which bills are which.

- If you serve food to a person who is blind, let him know where it is on the plate according to a clock orientation (12 o'clock is furthest from them, 6 o'clock is nearest). Remove garnishes and anything that is not edible from the plate. Some patrons may ask you to cut their food; this can be done in the restaurant's kitchen before the meal is served.

Document Government Exhibit
Page 199

Be specific when giving directions....

...to people who are blind or have low vision.

Submittal: November 1, 2021

People With Low Vision

A PERSON WHO HAS LOW VISION may need written material in large print. A clear font with appropriate spacing is just as important as the type size. Labels and signs should be clearly lettered in contrasting colors. It is easiest for most people with low vision to read bold white letters on black background. Avoid using all uppercase letters because it is more difficult for people with low vision to distinguish the end of a sentence.

- Good lighting is important, but it shouldn't be too bright. In fact, very shiny paper or walls can produce a glare that disturbs people's eyes.

- Keep walkways clear of obstructions. If people with low vision regularly use your facility as customers or employees, inform them about any physical changes, such as rearranged furniture, equipment or other items that have been moved.

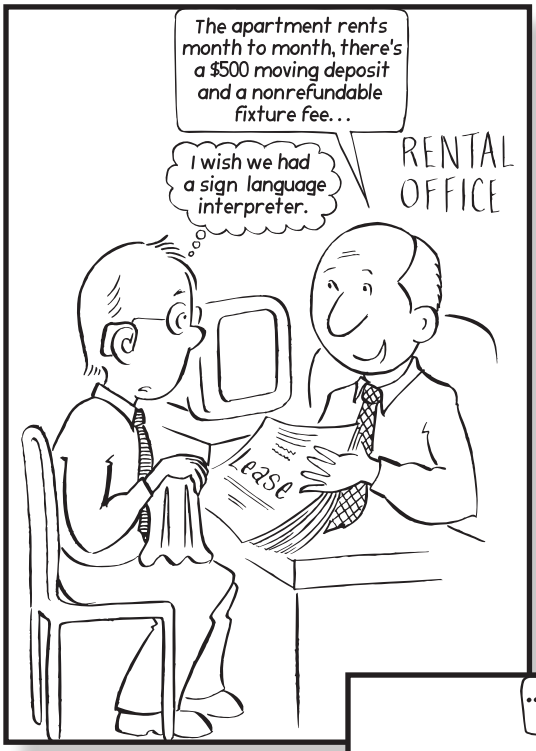
People Who Are Deaf or Have a Hearing Loss

AMERICAN SIGN LANGUAGE (ASL) is an entirely different language from English, with a syntax all its own. Speech reading (lip reading) is difficult for people who are Deaf if their first language is ASL because the majority of sounds in English are formed inside the mouth, and it's hard to speech read a second language.

People who have a hearing loss, however, communicate in English. They use some hearing, but may rely on amplification and/or seeing the speaker's lips to communicate effectively.

There is a range of communication preferences and styles among people with hearing loss that cannot be explained in this brief space. It is helpful to note that the majority of people who incurred a hearing loss as adults do not communicate with sign language, do use English, and may be candidates for writing and assistive listening devices to help improve communication. People with cochlear implants, like other people with hearing loss, will usually inform you what works best for them.

Document Government Exhibit
Page 1 of 1



When an exchange of information is complex, the most effective way to communicate with....

....a person who is Deaf is through a qualified sign language interpreter.

Submittal: November 1, 2021

- When the exchange of information is complex (e.g., during a job interview or doctor's visit or when reporting a crime) the most effective way to communicate with a native signer is through a qualified sign language interpreter. For a simple interaction (e.g., ordering in a restaurant or registering for a hotel room) writing back and forth is usually okay.

- Follow the person's cues to find out if she prefers sign language, gesturing, writing or speaking. If you have trouble understanding the speech of a person who is deaf or hard of hearing, let her know.

- When using a sign language interpreter, look directly at the person who is deaf, and maintain eye contact to be polite. Talk directly to the person ('What would you like?'), rather than to the interpreter ('Ask her what she'd like.').

- People who are deaf need to be included in the decision-making process for issues that affect them; don't decide for them.

- Before speaking to a person who is deaf or has a loss of hearing, make sure that you get her attention. Depending on the situation, you can extend your arm and wave your hand, tap her on the shoulder or flicker the lights.

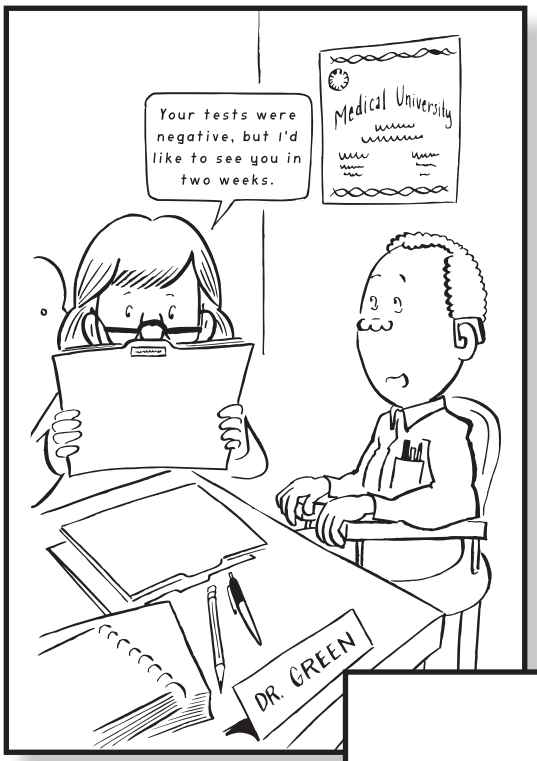
- Rephrase, rather than repeat, sentences that the person does not understand.

- When talking, face the person. A quiet, well-lit room is most conducive to effective communication. If you are in front of the light source (e.g., a window) with your back to it, the glare may obscure your face and make it difficult for the person who is hard of hearing to speech read.

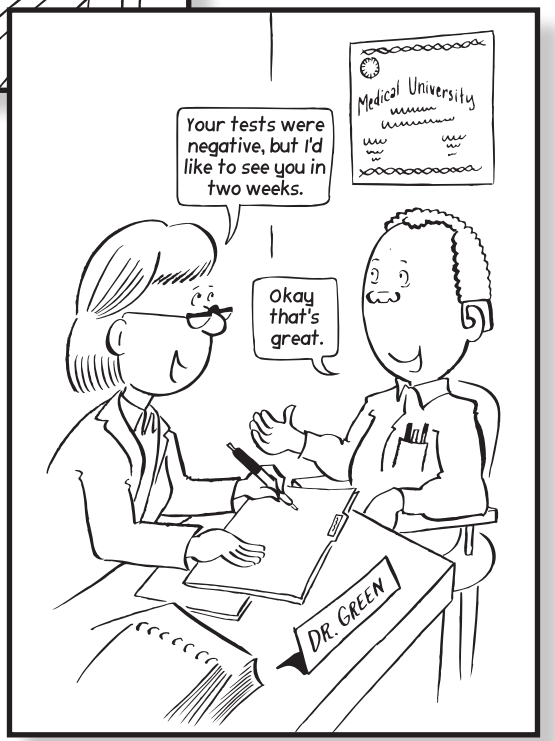
- Speak clearly. Most people who have a hearing loss count on watching people's lips as they speak to help them understand. Avoid chewing gum, smoking or obscuring your mouth with your hand while speaking.

- There is no need to shout. If the person uses a hearing aid, it will be calibrated to normal voice levels; your shout will just distort the words.

Document Government Exhibit
Page 1 208



Do not obscure your face when communicating with a person who has a hearing loss.



Submittal: November 2, 2024

- People who are deaf (and some who have a hearing loss or speech disabilities) make and receive telephone calls with the assistance of various technologies including a TTY (short for teletypewriter) or a Video Relay Service (VRS). VRS enables a person who is deaf or has a hearing loss to make and receive telephone calls through a communications assistant who is a qualified American Sign Language Interpreter. For many people who are deaf or have a hearing loss, VRS is closer to "functionally equivalent" telephone services than any other form of relay service. For American Sign Language users, VRS conversations flow more smoothly, naturally, and faster than communicating by typing.

- When a TTY user calls a business that does not have a TTY, she places the call through her state's relay service. Likewise, a business that does not have a TTY can reach a customer who is a TTY user through the relay service. If you receive a relay call, the operator will identify it as such. Please do not hang up; this is the way that people who are deaf are able to place an order at your pizza parlor, call your store to find out what hours you are open, or make a reservation at your restaurant.

People With Speech Disabilities

A PERSON WHO HAS HAD A STROKE, is deaf, uses a voice prosthesis or has a stammer or other type of speech disability may be difficult to understand.

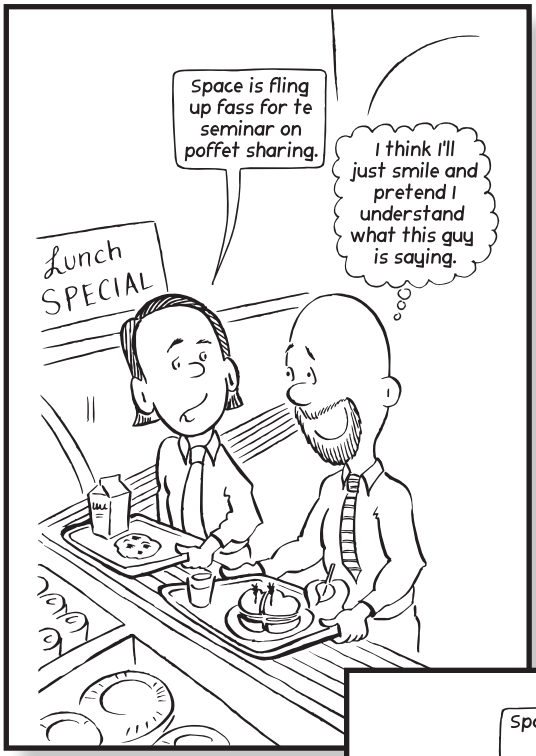
- Give the person your full attention. Don't interrupt or finish the person's sentences. If you have trouble understanding, don't nod. Just ask him to repeat. In most cases the person won't mind and will appreciate your effort to hear what he has to say.

- If you are not sure whether you have understood, you can repeat for verification.

- If, after trying, you still cannot understand the person, ask him to write it down or to suggest another way of facilitating communication.

- A quiet environment makes communication easier.

Document Government Exhibit
Page 1 206



If you have trouble understanding a person with....

...a speech disability ask him to repeat.

Submittal: November 2, 2006

◆ Don't tease or laugh at a person with a speech disability. The ability to communicate effectively and to be taken seriously is important to all of us.

Persons of Short Stature

THERE ARE 200 DIAGNOSED TYPES OF GROWTH-RELATED DISORDERS that can cause dwarfism and that result in the person being 4 feet 10 inches or less in height. For an adult, being treated as cute and childlike can be a tough obstacle.

◆ Be aware of having necessary items within the person's reach to the maximum extent possible.

◆ Be aware that persons of short stature count on being able to use equipment that is at their height. Be sensitive about not using lower telephones, bank counters and urinals if they are in limited supply.

◆ As with people who have other disabilities, never pet or kiss a person of short stature on the head.

◆ Communication can be easier when people are at the same level. Persons of short stature have different preferences. You might kneel to be at the person's level; stand back so you can make eye contact without the person straining her neck (this can be hard to do in a crowded room); or sit in a chair. Act natural and follow the person's cues.

People With Cerebral Palsy

AS A RESULT OF INJURY TO THE CENTRAL NERVOUS SYSTEM, people with cerebral palsy (CP) have difficulty controlling their muscles.

◆ Many people with CP have slurred speech and involuntary body movements. Your impulse may be to discount what they have to say, based on their appearance. Monitor your responses and interact with the person as you would with anyone else.

◆ A person who may appear to be drunk, sick or have a medical emergency might in fact have CP or another disability. Get the facts before acting on your first impression, whether the situation is business, social or law enforcement.

Solomon Government Page | 207

People With Tourette Syndrome

PEOPLE WITH TOURETTE SYNDROME may make vocalizations or gestures such as tics that they cannot control. A small percentage of people with Tourette syndrome involuntarily say ethnic slurs or obscene words. An employee or other person with Tourette syndrome will benefit from the understanding and acceptance of co-workers and others.

- If a person with Tourette makes vocalizations during a conversation, simply wait for her to finish, and then calmly continue.

- The more the person tries to contain these urges, the more the urges build up. It may be helpful for a person with Tourette to have the option to leave the meeting or conversation temporarily to release the build-up in a private place.

People Who Look Different

A DIFFERENT ISSUE confronts people who may not be limited in their life activities, but who are treated as if they have a disability because of their appearance. People with facial differences, such as cleft lip or palate, cranio-facial disfigurement, or a skin condition; people who are above or below the average height or weight; people who may display visible effects of medication, such as a tremor—in short, people who look different—have the frequent experience of finding people staring at them, looking away or looking through them as if they are invisible.

- Everyone needs to have a positive self-image to be a fully participating member of society. Be sure that you don't contribute to stigmatizing people who look different.

- If the situation is appropriate, strike up a conversation and include the person in whatever is going on.

Submittal: November 2, 2021

People With Hidden Disabilities

NOT ALL DISABILITIES ARE APPARENT. A person may make a request or act in a way that seems strange to you. That request or behavior may be disability-related.

For example, you may give seemingly simple verbal directions to someone, but the person asks you to write the information down. He may have a learning disability that makes written communication easier for him. Or a person may ask to sit, rather than stand, in line. This person may be fatigued from a condition such as cancer, or may be feeling the effects of medication.

Even though these disabilities are hidden, they are real. Please respect the person's needs and requests whenever possible.

People With Epilepsy or Seizure Disorders

EPILEPSY IS A NEUROLOGICAL CONDITION characterized by seizures that happen when the electrical system of the brain malfunctions. The seizures may be convulsive, or the person may appear to be in a trance. During complex partial seizures, the person may walk or make other movements while he is, in effect, unconscious.

- If a person has a seizure, you cannot do anything to stop it. If he has fallen, be sure his head is protected and wait for the seizure to end.
- When a seizure has ended, the person may feel disoriented and embarrassed. Try to ensure that he has privacy to collect himself.
- Be aware that beepers and strobe lights can trigger seizures in some people.

Solomon Grove Memorial Library
Page | 209

Try to avoid using sprays or other fumy products when customers are in your store.

Submittal: November 1, 2010

People With Multiple Chemical Sensitivity (MCS) and Respiratory Disabilities

PEOPLE WITH MCS AND RESPIRATORY DISABILITIES such as asthma or emphysema react to toxins in the air. Stale air, fumes from cleaning products, perfume, carpeting, air freshener or even the fumes from magic markers can trigger a severe reaction.

- Try to avoid spray-cleaning tables, windows or other surfaces while people are in your place of business. If you must use a spray product, spray or pour it closely into the cloth, not into the air. Use less-toxic products when possible. Request that staff that have contact with the public go easy on fragranced body-care products like cologne, hair spray, hand lotion, and after-shave.

- Maintaining good ventilation and indoor air quality will not only benefit your customers who have MCS and respiratory disabilities, it will also help you and all of your employees stay healthier and more alert.

- Second-hand smoke can be particularly harmful to people with MCS or respiratory disabilities. Follow and enforce no-smoking regulations, including in restrooms and stairwells. Discourage smokers from congregating at the entrance to your business. If appropriate, designate a separate smoking area where the door is kept closed and the air ventilates to the outside.

People With HIV & AIDS

PEOPLE WITH HUMAN IMMUNODEFICIENCY VIRUS (HIV) or Autoimmune Deficiency Syndrome (AIDS) have impaired immune systems, so their bodies have trouble fighting off infections.

- You can't catch HIV from casual contact such as shaking hands, so don't be afraid of touching or being touched by a person with AIDS.

- A person with HIV or AIDS, however, is at significant risk of picking up an airborne infection. Be conscious of not putting someone else at risk. If you have a respiratory infection or any other easily transmittable illness, be considerate of all your customers and employees and stay home, if possible.

- Many people with AIDS feel stigmatized. By simply greeting or shaking the person's hand, you are letting him know that he is accepted. It will mean a lot to him.

A WORD ABOUT CONFIDENTIALITY:
You may really care or you may just be curious about a person with a disability who is in crisis, suddenly ill, or misses work for unexplained reasons. In spite of your concern, please respect the privacy of a person with a disability. Allow him to discuss his situation if and when he feels comfortable doing so.

Submittal: November 1, 2012

People with Psychiatric Disabilities or Mental Illness

PEOPLE WITH PSYCHIATRIC DISABILITIES may at times have difficulty coping with the tasks and interactions of daily life. Their disorder may interfere with their ability to feel, think or relate to others. Most people with psychiatric disabilities are not violent. One of the main obstacles they face is the attitudes that people have about them. Because it is a hidden disability, chances are you will not even realize that the person has a mental health condition.

- Stress can affect the person's ability to function. Try to keep the pressure of the situation to a minimum.

- People who have psychiatric disabilities have varying personalities and different ways of coping with their disability. Some may have trouble picking up on social cues; others may be supersensitive. One person may be very high energy, while someone else may appear sluggish. Treat each person as an individual. Ask what will make him most comfortable and respect his needs to the maximum extent possible.

- In a crisis, stay calm and be supportive as you would with anyone. Ask how you can help, and find out if there is a support person who can be sent for. If appropriate, you might ask if the person has medication that he needs to take.

Document Government Page | 218

Always ask before you help.

Submittal: November 1, 2014

People With Developmental Disabilities

PEOPLE WITH DEVELOPMENTAL DISABILITIES LEARN SLOWLY. They have a hard time using what they have learned and applying it from one setting or situation to another.

- Speak to the person in clear sentences, using simple words and concrete—rather than abstract—concepts. Help her understand a complex idea by breaking it down into smaller parts.

- Don't use baby talk or talk down to people who have developmental disabilities. Gauge the pace, complexity, and vocabulary of your speech according to theirs.

- Remember that the person is an adult and, unless you are informed otherwise, can make her own decisions.

- People with developmental disabilities may be anxious to please. During an interview, the person may tell you what she thinks you want to hear. In certain situations, such as law enforcement or a doctor's examination, it can have grave consequences if your interview technique is not effective. Questions should be phrased in a neutral way to elicit accurate information. Verify responses by repeating each question in a different way.

- It can be difficult for people with developmental disabilities to make quick decisions. Be patient and allow the person to take their time.

- Clear signage with pictograms can help a person who has developmental disabilities to find her way around a facility.

- People with developmental disabilities often rely on routine and on the familiar to manage work and daily living. Be aware that a change in the environment or in a routine may require some attention and a period of adjustment.

Document Government Exhibit
Page 1 of 3

People with Learning Disabilities

LEARNING DISABILITIES ARE LIFELONG DISORDERS that interfere with a person's ability to receive, express or process information. Although they have certain limitations, most people with learning disabilities have average or above-average intelligence. You may not realize that the person has a learning disability because he functions so well. Or you may be confused about why such a high-functioning person has problems in one aspect of his work.

- People with dyslexia or other reading disabilities have trouble reading written information. Give them verbal explanations and allow extra time for reading.

- Don't be surprised if you tell someone very simple instructions and he requests that you write them down. Because spoken information gets "scrambled" as he listens, a person who has a learning disability such as auditory processing disorder may need information demonstrated or in writing.

- Ask the person how you can best relay information. Be direct in your communication. A person with a learning disability may have trouble grasping subtleties.

- It may be easier for the person to function in a quiet environment without distractions, such as a radio playing, people moving around or loudly patterned curtains.

People with Traumatic (or Acquired) Brain Injury

PEOPLE WITH TRAUMATIC BRAIN INJURY have had damage to the brain usually as the result of trauma, such as an accident or stroke.

- Some of the factors that affect people with learning disabilities also apply to people with traumatic brain injury. People with brain injury may have a loss of muscle control or mobility that is not obvious. For example, a person may not be able to sign her name, even though she can move her hand.

Submittal: November 2016

- A person with a brain injury may have poor impulse control. The person may make inappropriate comments and may not understand social cues or "get" indications that she has offended someone. In her frustration to understand, or to get her own ideas across, she may seem pushy. All of these behaviors arise as a result of the injury.

- A person with a brain injury may be unable to follow directions due to poor short-term memory or poor directional orientation. She may ask to be accompanied, or she may use a guide dog for orientation, although she does not appear to be mobility impaired.

- If you are not sure that the person understands you, ask if she would like you to write down what you were saying.

- The person may have trouble concentrating or organizing her thoughts, especially in an over-stimulating environment, like a crowded movie theater or transportation terminal. Be patient. You might suggest going somewhere with fewer distractions.

People Who Use Service Animals

SOME PEOPLE WHO are Deaf, blind or have low vision, or who have traumatic brain injury, seizure disorder, or a range of other disabilities may use a service animal to assist them with daily living.

- While you may inquire whether an animal is a service animal, the person may not have information identifying it as such. This means that in general, you will need to modify a "no animals" policy to allow the person to enter with her service animal. Barring a direct threat to health and safety, this requirement of the ADA is generally thought to take precedence over any health codes, such as those for restaurants, and personal preferences, such as those of taxi drivers, prohibiting pets.

- Service animals are generally highly trained and well behaved. You may ask the person to remove the animal if she does not have the animal under her control. Do not touch the service animal without permission. The animal may be adorable, but it is on the job.

Emergency Evacuation Procedures for People With Disabilities

PEOPLE WITH DISABILITIES MUST BE CONSIDERED IN ANY FACILITY'S EVACUATION PLAN.

- Compile a voluntary list of people with disabilities who are regulars at your facility, such as employees, students or residents. While you are compiling this list, let people know that even though they may not consider themselves of having a disability, they should be included if they may need help during an emergency. For example, this might apply to someone whose asthma may be triggered by stress or smoke. Keep the list updated to include people who are living with temporary disabilities, such as a pregnant woman or someone with a broken leg.

- Interview each individual on the list to plan the most effective way to assist them in case of an emergency. For example, a person with a cognitive disability may get confused and need assistance in following directions.

- Also develop a plan, including a voluntary sign-in, for an emergency that may affect people who are not attached to the facility, such as customers, theatergoers, patients or other members of the public.

- Practice the evacuation procedures and keep your plans up to date.

Document Government Page 219

Conflict Management

SOMETIMES CONFLICTS ARISE between people with disabilities and the places they visit for work, recreation, health care or education. These conflicts are usually the result of misunderstanding or a lack of information. Sometimes conflicts develop between people with disabilities who have conflicting needs. For example, a person who has a hearing loss cannot hear the proceedings with the window open, but a person with Multiple Chemical Sensitivity needs the window open for fresh air; someone who uses a service dog may run into a conflict with a person who has an anxiety disorder and an extreme fear of dogs.

All of these situations call for flexibility, patience, creativity, and open communication—a willingness to listen to the other guy's perspective and to learn.

Sometimes good faith efforts are not enough, and parties have difficulty working out their differences. In these cases, consider using the services of a skilled mediator.

A Final Word

PEOPLE WITH DISABILITIES are individuals with families, jobs, hobbies, likes and dislikes, and problems and joys. While the disability is an integral part of who they are, it alone does not define them. Don't make them into disability heroes or victims. Treat them as individuals.

ACCESSIBILITY SERVICES
BRINGING YOU UP TO CODE

ACCESSIBILITY CONSULTING & TRAINING

Accessibility Services has worked with public housing authorities, private housing developers, professional sports venues, retail operators, architectural firms, and many others to help them untangle the often conflicting requirements of aesthetics and accessibility, keeping them informed of building codes changes and revisions at all levels, and provide innovative solutions to accessibility at any type of facility.

APPENDIX M: FACILITIES

Total Facility Cost Estimate Summary Table:

	Estimated Costs	Estimated Cost with GC (30%)
Year 1	$347,444	$451,677
Year 2	$127,940	$166,322
Year 3	$1,191,793	$1,549,331
Year 4	$0	$0
Year 5	$0	$0
Total	**$1,667,177**	**$2,167,330**

Facility Priority Designations:

·Priority 1 – Approach and Entrance (exterior accessible route and accessible parking. Includes directional signage, exterior ramps, exterior stairs, exterior side of entrances thresholds, door handles, 48” door separation in vestibules, exterior protruding objects)
·Priority 2 – Access to Programs, Services (begins at entrance of building and includes circulation routes, protruding objects, elevators, interior stairs, interior ramps, reach ranges, signage for room designation, doors, aisles, carpet, seating, desks, benches, dressing rooms, lockers, reception counters, counter heights)
·Priority 3 – Toilet Rooms
·Priority 4 – Additional Accessible elements (drinking fountains, phones, fire alarm systems)
·Priority 5 – California only requirements to comply with building code
·Priority 6 – Employee areas that may need to be reprioritized if public is allowed to use these areas

Facility Severity Designations:

‘A’: Item that creates a Safety Issue (tripping hazards, protruding objects, fire strobes, egress signage, door closing speed and door pressures, two way communication at elevators)

‘B’: Item that creates a major inconvenience to a significant number of people (cross slopes,

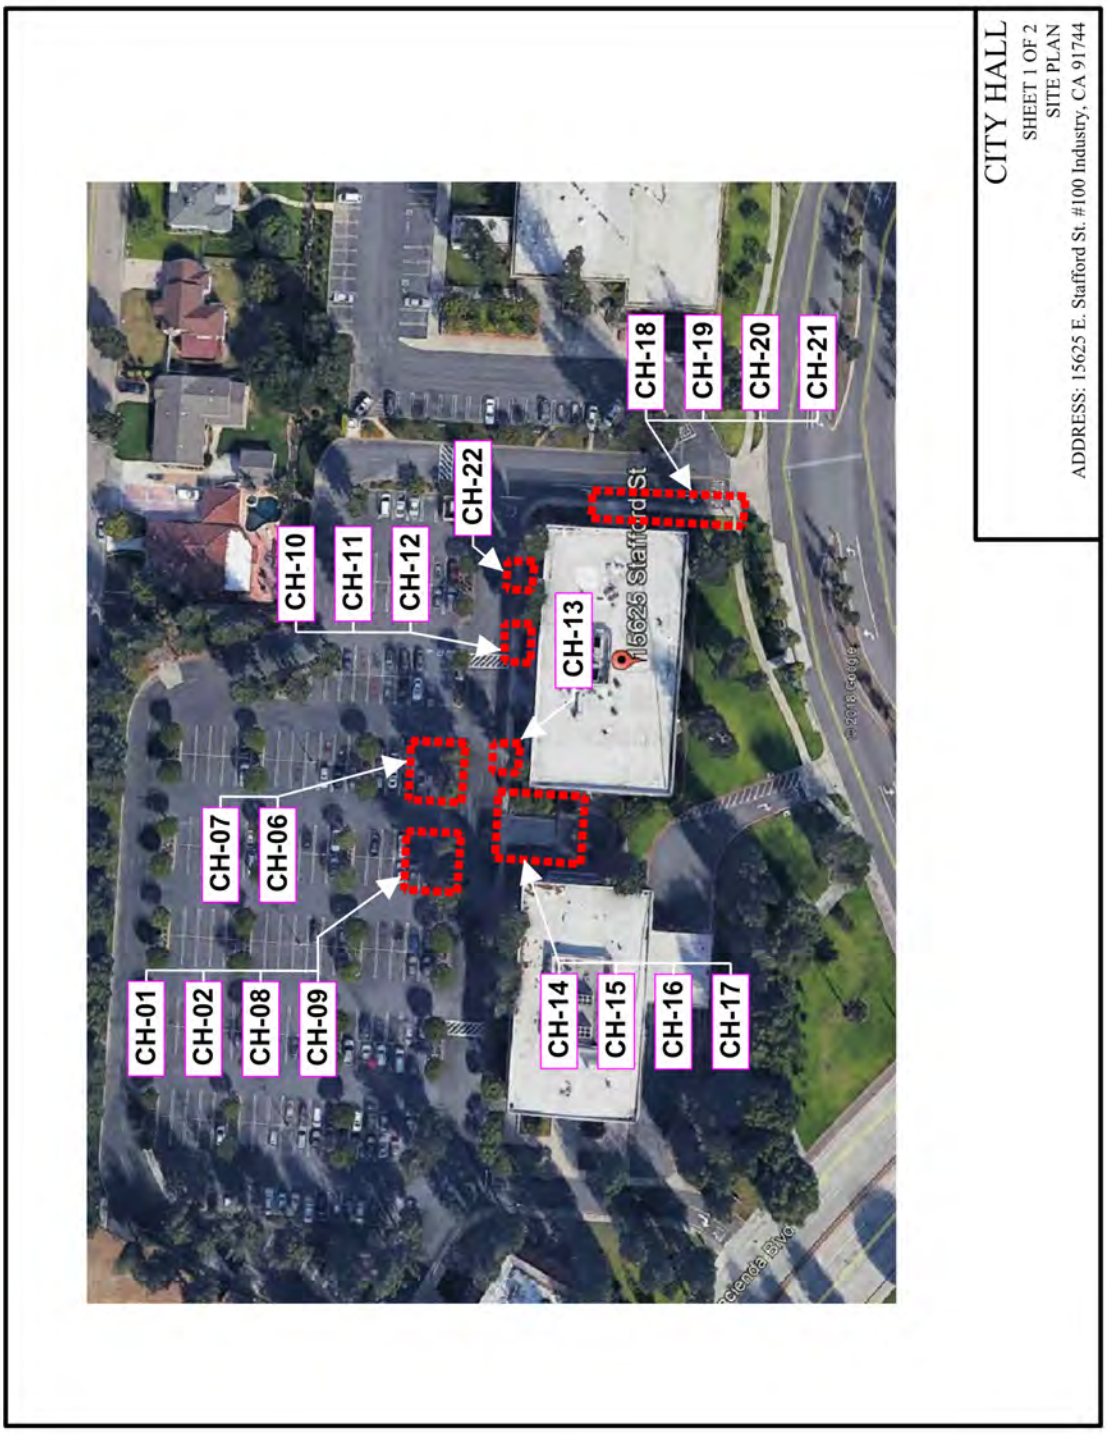
‘C’: Item that creates a minor inconvenience, however it is not compliant and creates a barrier (restrooms, audio visual elements, door hardware, vision lights, drinking fountains, directional signage, accessible parking,

‘D’: Required only in California Building Code, but is compliant with ADA Federal Regulations

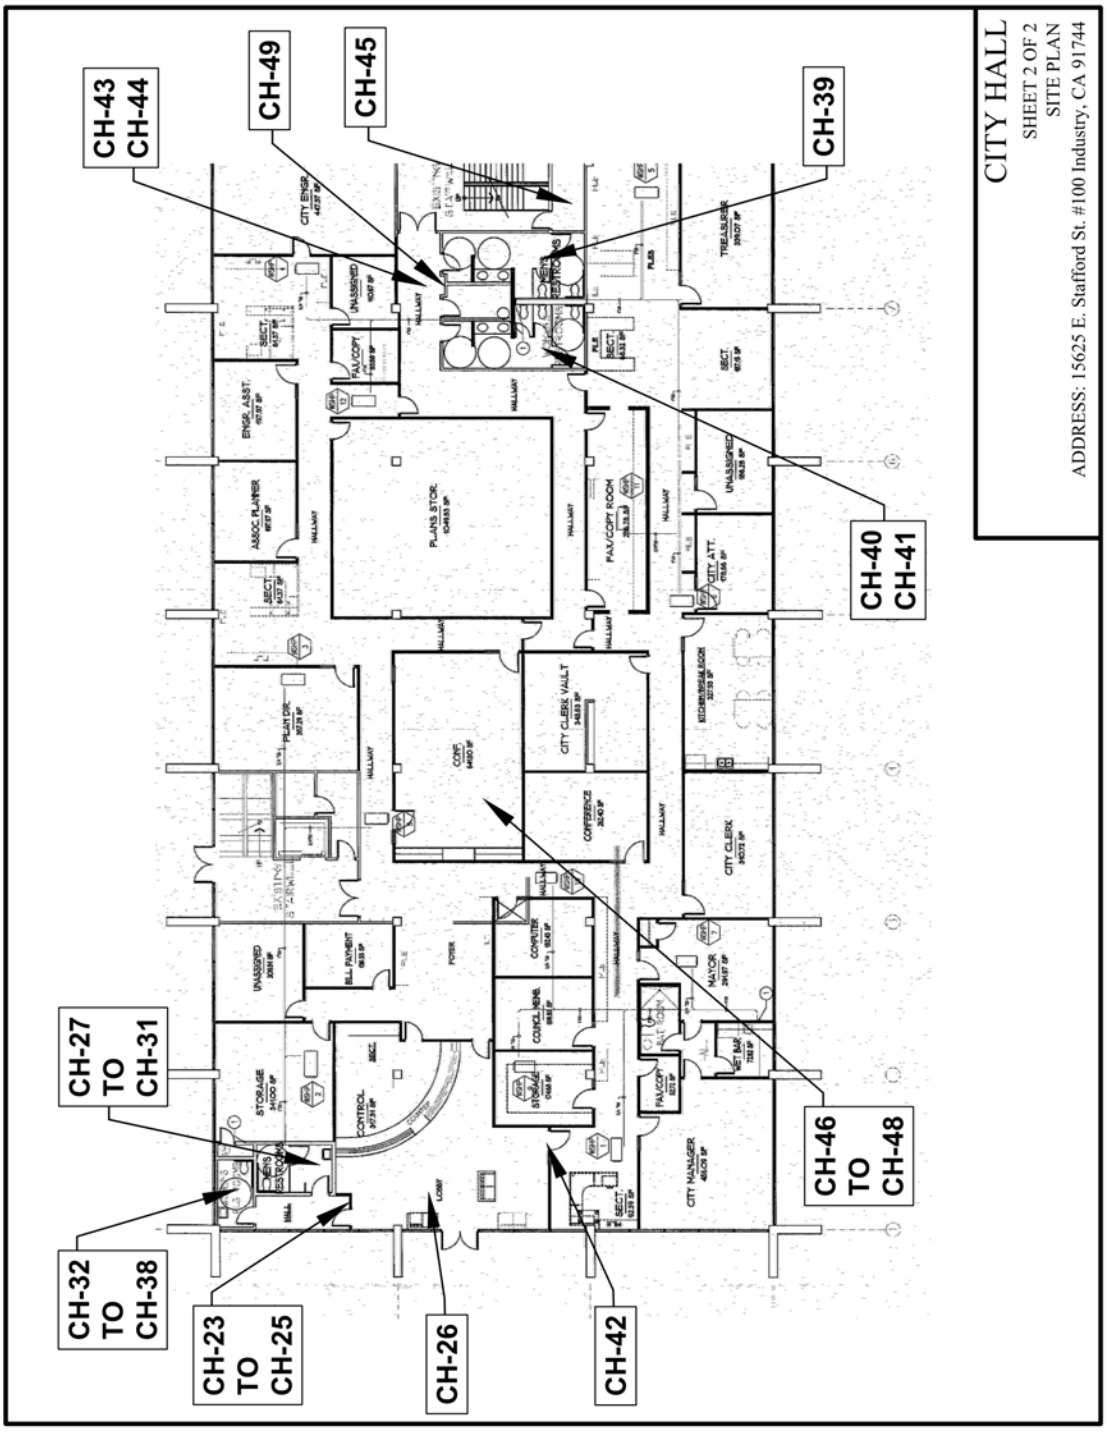
‘E’: Nothing required unless public is allowed access to this area

CITY HALL

Facility Site Plan:



Facility Floor Plan:



FACILITY: CITY HALL

Facility Description:

Facility was constructed in the year 1980 .

Facility Address: 15625 E. Stafford St.

This facility is used for the following programs:

City administration
Permitting
Planning
City Staff Building

Comment #: CH-01 **Priority:** N/A **Severity:** N/A **Estimated Direct Cost:** $0
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $0

Deficiency: Site Elements — Parking
Space Count — General

Parking count is compliant, this record is for information purposes only.

Measurement: 9 count

Recommended Remediation:

Parking count =222, 9 accessible stalls (4 van accessible) basd on table 11B-208.2, This is compliant

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: 4.6.1/4.1.2(5)
2010 ADAS: 208.2
2016 CBC: 2016 CBC 11B-208.2

Quantity: 6 each

Comment #: CH-02 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $1,500
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Tow Away Signage — Verbiage

The verbiage on the "tow-away" sign is not compliant with 2016 CBC 11B-502.8.2.

Measurement: 3 count

Recommended Remediation:

Remove and replace the current sign with a Caltrans R-100B sign, and provide reclaim vehicle information as a permanent part of the sign. An additional sign shall be posted either; 1) in a conspicuous place at each entrance to an off-street parking facility or 2) immediately adjacent to on-site accessible parking and visible from each parking space.

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Entire Lot

Code References:
1991 ADAAG: N/A
2010 ADAS: 208.2
2016 CBC: 2016 CBC 11B-502.8.2

Quantity: 3 each

Comment #: CH-03 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $5,250
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $6,825

Deficiency: Site Elements — Parking
Access Aisles — Hatched Line: Asphalt

The hatched lines on asphalt within the border line of the access aisle faded.

Measurement: 7 count

Recommended Remediation:

For asphalt, recommend providing white hatched striping inside of a blue borderline. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 7 each

Comment #: CH-04 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $4,500
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $5,850

Deficiency: Site Elements — Parking
Access Aisles — "No Parking"

The words "No Parking" in the access aisle have faded so that they are not contrasting with the ground surface.

Measurement: 6 count

Recommended Remediation:

Mark access aisles 'No Parking' or repaint existing markings to provide contrast compliant with local requirements. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 6 each

Comment #: CH-05 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $2,000
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $2,600

Deficiency: Site Elements — Parking
Signage — Height in Circulation

The sign is in the circulation path and the bottom of the sign is lower than 80 inches (2032 mm) above the finished floor.

Measurement: 74.75 inches

Recommended Remediation:

Provide a height extension for the post mounted sign(s). (See site plan for exact location) The two east sets of parking stalls. The furthest west set has compliant recommendation. (See plan for exact location.

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.6 **Quantity:** 4 each
2016 CBC: 2016 CBC 11B-502.6 Exception

Comment #: CH-06 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $750
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $975

Deficiency: Site Elements — Parking
Access Aisles — "No Parking"

The access aisle does not provide the words "No Parking" in minimum 12 inch (305 mm) high lettering visible from the adjacent vehicular way.

Measurement: 1 count

Recommended Remediation:

Mark access aisles 'No Parking' or repaint existing markings to provide contrast compliant with local requirements. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:

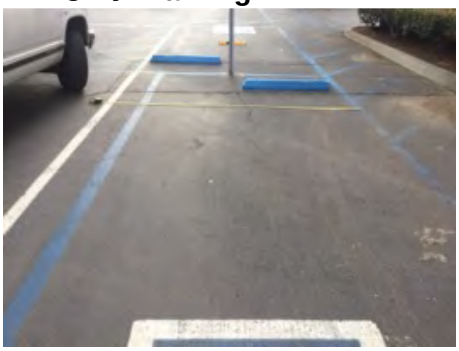
Quantity: 1 each

Comment #: CH-09 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $350
Category Parking **Precedence** 1 **Year** 1 **Cost with GC (30%):** $455



Deficiency: Site Elements — Parking
Accessible Car Stall — Width

The accessible car stall is less than 108 inches (9 ft. or 2743 mm) wide.

Measurement: 101 inches

Recommended Remediation:

Repaint the car stall markings to provide compliant width. Dimensions to be measured to centerline. Black out the double stall lines and repaint the outside white one blue. ADA only requires 8 feet.

Facility: City Hall
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-502.2

Quantity: 1 each

Comment #: CH-10 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $4,500
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $5,850

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Counter Slope

The running slope in the direction of travel exceeds 1:20 or 5%.

Measurement: 15.9 % grade

Recommended Remediation:

Remove and dispose of non compliant materials. Regrade and replace cement. To fix the gutter the curb must be replaced. Counter slope shall connect to an accessible route. Both shall not exceed 1:20(5%) maximum Counter slope shall connect to an accessible route. Both shall not exceed 1:20 (5%) maximum grade.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 406.6
2016 CBC: 2016 CBC 11B-403.3

Quantity: 300 sq ft

Comment #: CH-11 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $360
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $468

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Detectable Warning

There is no detectable warning surface (truncated dome mat) at the flush transition between the pedestrian and vehicular right-of-ways.

Measurement: 1 count

Recommended Remediation:

Install a detectable warning surface compliant with 2016 CBC 11B-705, across the entire width of the flush transition between pedestrian and vehicular right-of-ways.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Parking Adjacent

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-406.5.12

Quantity: 1 each

Comment #: CH-12 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $600
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $780

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Cross Slope

The cross slope exceeds the allowable 1:48 (2.0%) grade.

Measurement: 2.8 % grade

Recommended Remediation:

Remove and dispose of materials and replace and re-grade to provide an accessible curb ramp.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Parking Adjacent

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 405.3
2016 CBC: 2016 CBC 11B-406.5.7

Quantity: 40 sq ft

Comment #: CH-13 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $3,000
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $3,900

Deficiency: Site Elements — Exterior Access Route
Slope — Cross Slope

The cross slope of the POT exceeds 1:48 (2.0 %) perpendicular to the direction of travel.

Measurement: 3.3 % grade

Recommended Remediation:

Remove and dispose of noncompliant materials. Regrade and replace cement. From the tree to the curb ramp at the court yard entrance.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Parking Adjacent

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2/403.3

Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $644

Deficiency: Site Elements — Exterior Access Route
Horizontal Openings — Width

The horizontal openings in the direction of the path of travel exceed the allowable 0.5 inches.

Measurement: 1 inches

Recommended Remediation:

Recaulk the expansion joints.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Entrance Courtyard

Code References:
1991 ADAAG: 4.5.4
2010 ADAS: 302.3
2016 CBC: 2016 CBC 11B-302.3

Quantity: 33 ln ft

Comment #: CH-16 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $3,000

Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $3,900

Deficiency: Site Elements — Exterior Access Route
Slope — Cross Slope at Drain

The cross slope at the drain exceeds the allowable 1:48 or 2% parallel to the direction of travel.

Measurement: 3.5 % grade

Recommended Remediation:

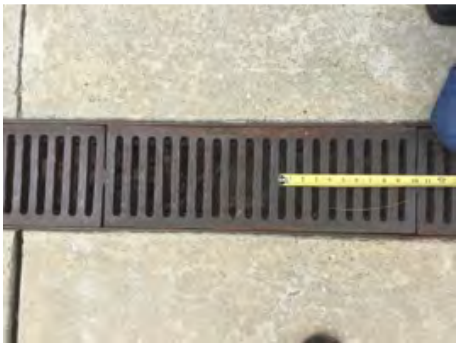
Remove and dispose of noncompliant materials. Regrade, raise the drain and replace cement.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Entrance Courtyard

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2/403.3
2016 CBC: 2016 CBC 11B-403.3

Quantity: 200 sq ft

Comment #: CH-17 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $650
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $845



Deficiency: Site Elements — Exterior Access Route
Grate — Horizontal Openings

The horizontal openings, at the grate, in the direction of the path of travel exceed the allowable 0.5 inches.

Measurement: .75 inches

Recommended Remediation:

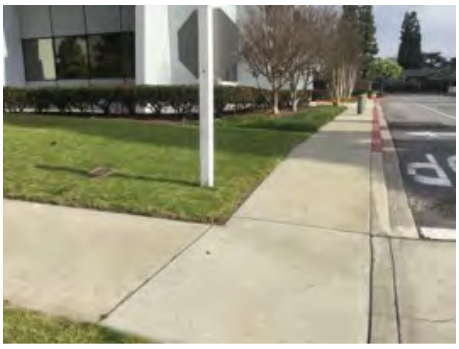
Replace the drainage grates.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: Entrance Courtyard

Code References:
1991 ADAAG: 4.5.4
2010 ADAS: 302.3
2016 CBC: 2016 CBC 11B-302.3

Quantity: 20 ln ft

Comment #: CH-18 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $2,883
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $3,748



Deficiency: Site Elements — Exterior Access Route
Signage — Directional Signage

The site entry point does not include directional signage indicating the accessible entrance to the facility.

Measurement: 1 count

Recommended Remediation:

Install directional signage that includes the ISA at the site arrival point and each POT fork along the route to the accessible entrance.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: East Site Arrival Point

Code References:
1991 ADAAG: 4.1.3 (16B)

Quantity: 60 sq ft

Comment #: CH-20 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $8,376

Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $10,889

Deficiency: Site Elements — Exterior Access Route
Clearance — Width at Obstruction

A 48 inch width circulation path is not provided.

Measurement: 27 inches

Recommended Remediation:

Install a 48 inch wide minimum path around the obstruction(s).

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: East Site Arrival Point

Code References:
1991 ADAAG: 4.3.3
2010 ADAS: 403.5.1 (Ex)
2016 CBC: 2016 CBC 11B-403.5.1 Exception 1

Quantity: 60 sq ft

Comment #: CH-21 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $4,200

Category **Exterior Access** **Precedence 1** **Year 1** **Cost with GC (30%):** $5,460

Deficiency: Site Elements — Exterior Access Route
Slope — Cross Slope

The cross slope of the POT exceeds 1:48 (2.0 %) perpendicular to the direction of travel.

Measurement: 5.7 % grade

Recommended Remediation:

Remove and dispose of noncompliant materials. Regrade and replace cement. Create level path around the curb ramp.

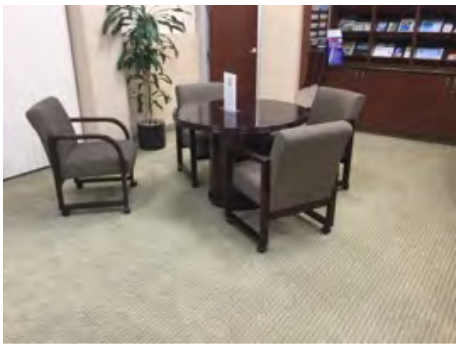
Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: East Site Arrival Point

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2/403.3
2016 CBC: 2016 CBC 11B-403.3

Quantity: 280 sq ft

Comment #: CH-26 **Priority: 4** **Severity: C** **Estimated Direct Cost:** $8,608

Category **Sales/Service** **Precedence 8** **Year 3** **Cost with GC (30%):** $11,190



Deficiency: Goods and Services — Sales/Service Counters
Forward Approach — Depth

The table does not extend the minimum allowable distance of 19 inches under the table

Measurement: 11 inches

Recommended Remediation:

Provide a new table that has a compliant 19 inches of toe clearance. 30" wide x 27" clear for knee table shall be maximum 34" above finish floor. 30 inch wide x 27 inch clear for knee space. the table shall be maximum 34 inches above finished floor.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Counter

Code References:
1991 ADAAG: 4.32.4/7.2
2010 ADAS: 904.4
2016 CBC: 2016 CBC 11B-306.2.3/904.4

Quantity: 2 each

Comment #: CH-22 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $6,000
Category Exterior Access **Precedence** 1 **Year** 1 **Cost with GC (30%):** $7,800

Deficiency: Site Elements — Exterior Access Route
Slope — Cross Slope

The cross slope of the POT exceeds 1:48 (2.0 %) perpendicular to the direction of travel.

Measurement: 3.7 % grade

Recommended Remediation:

Remove and dispose of noncompliant materials. Regrade and replace cement. Tree roots have lifted the sidewalk all the way from the corner to the curb ramp. Remove tree roots.

Facility: City Hall
Floor/Area: Path of Travel
Room/Spot: East Site Arrival Point

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2/403.3
2016 CBC: 2016 CBC 11B-403.3

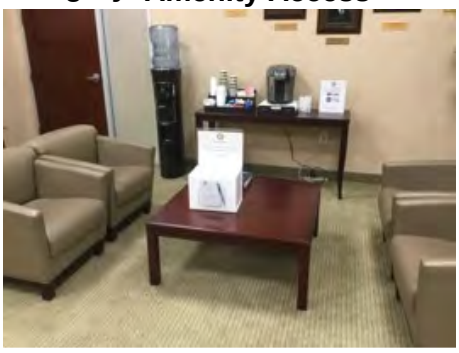
Comment #: CH-42 **Priority:** 4 **Severity:** C **Estimated Direct Cost:** $642
Category Amenity Access **Precedence** 8 **Year** 3 **Cost with GC (30%):** $835



Deficiency: Rooms and Spaces — Amenity Access
Path of Travel — Clear Width

There is no compliant path of travel with a minimum clear width of 36 inches between facility entrance and the available amenity.

Measurement: 24 inches

Recommended Remediation:

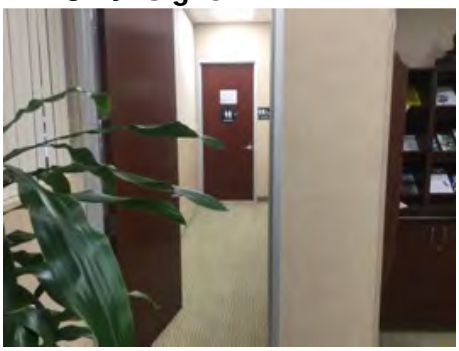
Rearrange the furniture so that a compliant clear path of minimum 36 inches is maintained between the facility entrance and the water cooler.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Water Cooler

Code References:
1991 ADAAG: 4.3.8
2010 ADAS: 403.5.1
2016 CBC: 2016 CBC 11B-403.5.1

Quantity: 1 each

Comment #: CH-24 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $961
Category Signs **Precedence** 8 **Year** 3 **Cost with GC (30%):** $1,249



Deficiency: Entrance Signs
Geometric Signs Location

No geometric sign exists at the entrance to the restroom facility.

Measurement: 1 count

Recommended Remediation:

Install restroom geometric signs at the entrance. Install on the outer door into the restroom hallway. Install restroom geometric signs and tactile signs on the outer door into the restroom hallway.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Restrooms

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A

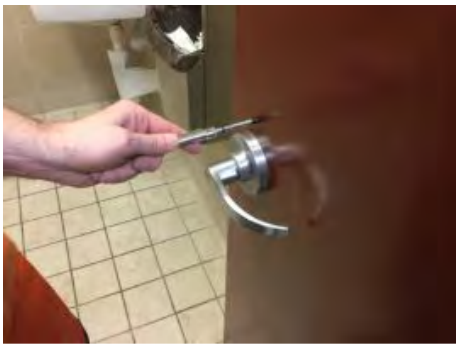
Comment #: CH-27 **Priority:** 3 **Severity:** A **Estimated Direct Cost:** $90
Category Entrance **Precedence** 8 **Year** 3 **Cost with GC (30%):** $117



Deficiency: Public Toilet Rooms — Entrance
Door Operation — Opening Force

The force required to operate the door exceeds the allowable 5 lbf.

Measurement: 10 lbf

Recommended Remediation:

Adjust or replace the door closers.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Restrooms

Code References:
1991 ADAAG: 4.13.11
2010 ADAS: 404.2.9
2016 CBC: 2016 CBC 11B-404.2.9.4

Quantity: 1 each

Comment #: CH-28 **Priority:** 3 **Severity:** C **Estimated Direct Cost:** $90
Category Room and Space **Precedence** 8 **Year** 3 **Cost with GC (30%):** $117

Deficiency: Public Toilet Rooms — Room and Space
Urinal — Clear Width

The clear width provided between privacy partitions is less than the allowable 30 inches (762 mm).

Measurement: 30.5 inches

Recommended Remediation:

Remove the urinal privacy partition and convert restroom into a single use by adding compliant locking mechanism on the door.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Restrooms

Code References:
1991 ADAAG: 4.18.3

Comment #: CH-30 **Priority:** 3 **Severity:** C **Estimated Direct Cost:** $4,000
Category Toilet Compartment **Precedence** 8 **Year** 3 **Cost with GC (30%):** $5,200

Deficiency: Public Toilet Rooms — Toilet Compartment
Grab Bars (Both) — General

There are no grab bars in the accessible restroom stall.

Measurement: 2 count

Recommended Remediation:

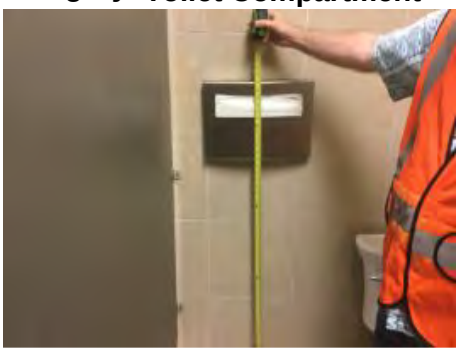
Add grab bars that are compliant with 2016 CBC 11B-604.5.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Restrooms

Code References:
1991 ADAAG: 4.17.6
2010 ADAS: 609.3
2016 CBC: 2016 CBC 11B-604.5

Quantity: 2 each

Comment #: CH-31 **Priority:** 3 **Severity:** C **Estimated Direct Cost:** $2,500
Category Toilet Compartment **Precedence** 8 **Year** 3 **Cost with GC (30%):** $3,250



Deficiency: Public Toilet Rooms — Toilet Compartment
Seat Cover Dispenser — Height

The operable part of the toilet seat dispenser is higher than the allowable 40 inches.

Measurement: 52 inches

Recommended Remediation:

Adjust the height of the dispenser so that the highest operable part is less than 40 inches AFF. The dispenser needs to be relocated when the grab bars are installed because it cannot be located above grab bars.

Facility: City Hall
Floor/Area: Lobby
Room/Spot: Restrooms

Code References:

Barrier Detail

The opening force required to open the accessible, hinged, non-fire door is more than 5 pounds.

Location Description	Breakroom 114
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The opening force is 13 pounds.

Resolution

Adjust the closer or replace with a door that requires no more than 5 pounds of force for pushing or pulling the door open. This barrier must be removed in conjunction with barrier ID 394376. The force at the latch, the force to set the door in motion, and the force to fully open the door shall be maximum 5 pounds. These forces do not apply to the force required to retract latch bolts or disengage other devices that hold the door or gate in a closed position.

Barrier Detail

The accessible door with door closer has a sweep period of less than 5 seconds from 90 degrees to a position 12 degrees from latch.

Location Description	Breakroom 114
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The closing speed is 3.17 seconds from 90 degrees to a position 12 degrees from latch.

Resolution

Adjust closer or remove and replace closer to ensure that the door has a closure time of at least 5 seconds within 12 degrees of the latch. This barrier must be removed in conjunction with barrier ID 394375. The cost of this barrier removal is covered under ID 394375 and therefore, the cost of this ID is shown as $0. Door closers and gate closers shall be adjusted so that from an open position of 90 degrees, the time required to move the door to a position of 12 degrees from the latch is 5 seconds minimum.

CBC Chap 11B- 309, 404.2.7, State Fire Marshall Referenced Standard Section 12-10-202(f)

Barrier Detail	CALIFORNIA: The hardware at the accessible door is not compliant.
Location Description	Kitchenette at Engineering Offices
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The door hardware is a knob that requires tight grasping and twisting of hte wrist to operate.

Resolution

Remove hardware and replace with hardware that has a shape that is easy to grasp such as lever, push-type or U-shaped handles. Handles, pulls, latches, locks, and other operable parts on doors and gates shall be compliant. Operable parts of such hardware shall be 34" minimum and 44" maximum above the finish floor or ground. Where sliding doors are in the fully open position, operating hardware shall be exposed and usable from both sides. [EXCEPTIONS: 1. Existing locks shall be permitted in any location at existing glazed doors without stiles, existing overhead rolling doors or grilles, and similar existing doors or grilles that are designed with locks that are activated only at the top or bottom rail. 2. Access gates in barrier walls and fences protecting pools, spas, and hot tubs shall be permitted to have operable parts of the release of latch on self-latching devices at 54" maximum above the finish floor or ground provided the self-latching devices are not also self-locking devices and operated by means of a key, electronic opener, or integral combination lock.] [Advisory 404.2.7 Door and gate hardware. Door hardware that can be operated with a closed fist or a loose grip accommodates the greatest range of users. Hardware that requires simultaneous hand and finger movements require greater dexterity and coordination, and is not recommended.] Lever hardware of lever actuated latches or locks shall be curved with a return to within 1/2 inch of the door. [Advisory 11B-404.2.7 Door and gate hardware. In addition to the requirements of this section, designers should be aware of the Part 12, Section 12-10-202(f) requirement for lever hardware as adopted by the State Fire Marshal. The lever of lever actuated latches or locks must be curved with a return to within ½ inch of the door to prevent catching on the clothing of persons during egress.]

Barrier Detail	Handrails are not compliant.
Location Description	Stairs Near Elevator and East Stair
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The handrail perimeter is 12", the bottom handrail extension is 0" to 10", at the top of the stair the handrail does not extend at a slope to the top riser and the top extension is 6".

Resolution

Install compliant handrails on both sides of the stairway. Inside handrails on switchback or dogleg stairs shall be continuous between runs. Top of gripping surfaces of handrails shall be 34" minimum and 38" maximum vertically above stair nosings. Handrails shall be at a consistent height above ramp surfaces. Clearance between handrail gripping surfaces and adjacent surfaces shall be 1-1/2" minimum. Handrail gripping surfaces shall be continuous along their length and shall not be obstructed along their tops or sides. The bottoms of handrail gripping surfaces shall not be obstructed for more than 20% of their length. Where provided, horizontal projections shall occur 1-1/2" minimum below the bottom of the handrail gripping surface. [EXCEPTION: The distance between horizontal projections and the bottom of the gripping surface shall be permitted to be reduced by 1/8" for each 1/2" of additional handrail perimeter dimension that exceeds 4".] Handrail gripping surfaces with a circular cross section shall have an outside diameter of 1-1/4" minimum and 2" maximum. Handrail gripping surfaces with a non-circular cross section shall have a perimeter dimension of 4" minimum and 6-1/4" maximum, and a cross-section dimension of 2-1/4" maximum. Handrail gripping surfaces and any surfaces adjacent to them shall be free of sharp or abrasive elements and shall have rounded edges. Handrails shall not rotate within their fittings. Handrail gripping surfaces shall extend beyond and in the same direction of stair flights. [EXCEPTIONS: 1. Extensions shall not be required for continuous handrails at the inside turn of switchback or dogleg ramps AND 3. In alterations, full extensions of handrails shall not be required where such extensions would be hazardous due to plan configuration.] At the top of a stair flight, handrails shall extend horizontally above the landing for 12" minimum beginning directly above the first riser nosing. At the bottom of a stair flight, handrails shall extend at the slope of the stair flight for a horizontal distance at least equal to one tread depth beyond the last riser nosing. Extensions shall return to a wall, guard, or the landing surface, or shall be continuous to the handrail of an adjacent stair flight. Removal of this barrier is required if the stairs are part of the required accessible means of egress from the accessible space, per emergency egress plans approved by the administrating local authority.

Tactile means of egress signage is not provided at the latch side of the door. (Applies to designated egress stairways, exit doors, areas of refuge)

Location Description	Doors Leading To Exit on North Side of Building
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A tactile means of egress sign is not provided.

Resolution

Provide compliant means of egress signage at each exit passageway, exit discharge, and exit stairway. Signs at designated egress passageways, stairways, exit doors and areas of refuge shall include tactile signage. Signs shall be installed alongside the door at the latch side. [EXCEPTION: Signs with tactile characters shall be permitted on the push side of doors with closers and without hold-open devices.] Where a tactile sign is provided at double doors with one active leaf, the sign shall be located on the inactive leaf. Where a tactile sign is provided at double doors with two active leafs, the sign shall be located to the right of the right hand door. Where there is no wall space at the latch side of a single door or at the right side of double doors, sign shall be located on the nearest adjacent wall. Where both visual and tactile characters are required, either one sign with both visual and tactile characters, or two separate signs, one with visual, and one with tactile characters, shall be provided. Signs containing tactile characters shall be located so that clear floor space of 18" minimum by 18" minimum, centered on the tactile characters, is provided beyond the arc of any door swing between the closed position and 45 degrees open. Raised characters shall be complaint and shall be duplicated in Braille. Raised characters shall be as follows- Depth: Raised characters shall be 1/32" minimum above their background. Case: Characters shall be uppercase. Style" Characters shall be sans serif. Characters shall not be italic, oblique, script, highly decorative, or of other unusual forms. Character Proportions: Characters shall be selected from fonts where the width of the uppercase letter "O" is 55 % minimum and 110 % maximum of the height of the uppercase letter "I". Character Height. Character height measured vertically from the baseline of the character shall be 5/8" minimum and 2" maximum based on the height of the uppercase letter "I". [EXCEPTION: Where separate raised and visual characters with the same information are provided, raised character height shall be permitted to be 1/2" minimum.]

The sink rim is higher than 34", and does not have knee and toe clearance (does not apply to mop basins, utility sinks, or bar sinks).

Location Description	Kitchenette at Engineering Offices
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The rim of the sink is 37" above the floor and knee and toe clearance is not provided due to the cabinet under the sink.

Resolution

Relocate sink to compliant height with knee and toe clearances. Lavatories and sinks shall be installed with the front of the higher of the rim or counter surface 34" maximum above the finish floor or ground. Knee Clearance: Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Where knee clearance is required under an element as part of a clear floor space, the knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor or ground. Between 9" and 27" above the finish floor or ground, the knee clearance shall be permitted to reduce at a rate of 1" in depth for each 6" in height. Knee clearance shall be 30" wide minimum. Toe Clearance: Space under an element between the finish floor or ground and 9" above the finish floor or ground shall be considered toe clearance. Toe clearance shall extend 25" maximum under an element. Where toe clearance is required at an element as part of a clear floor space, the toe clearance shall extend 17" minimum under the element. Space extending greater than 6" beyond the available knee clearance at 9" above the finish floor or ground shall not be considered toe clearance. Toe clearance shall be 30" wide minimum.

Barrier Detail	The lavatory is mounted higher than 34" to the higher of the rim or counter.
Location Description	2nd Floor Men's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The rim of the lavatory is 34-3/16" above the floor.

Resolution

Install the lavatory at a compliant height, and provide knee and toe clearance. Minimum one lavatory in a restroom shall comply. Lavatories and sinks shall be installed with the front of the higher of the rim or counter surface 34" maximum above the finish floor or ground. [EXCEPTIONS: 1. A lavatory in a toilet or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to comply. 2. In residential dwelling unit kitchens, sinks that are adjustable to variable heights, 29" minimum and 36" maximum, shall be permitted where rough-in plumbing permits connections of supply and drain pipes for sinks mounted at the height of 29".] Compliant knee and toe clearance shall be provided. [EXCEPTIONS: 2. A lavatory in a toilet room or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to provide knee and toe clearance. 3. In residential dwelling units, cabinetry shall be permitted under lavatories and kitchen sinks provided that all of the following conditions are met: (a) the cabinetry can be removed without removal or replacement of the fixture; (b) the finish floor extends under the cabinetry; and (c) the walls behind and surrounding the cabinetry are finished. 4. A knee clearance of 24" minimum above the finish floor or ground shall be permitted at lavatories and sinks used primarily by children 6 through 12 years where the rim or counter surface is 31" maximum above the finish floor or ground. 5. A parallel approach complying with 305 shall be permitted to lavatories and sinks used primarily by children 5 years and younger. 6. The dip of the overflow shall not be considered in determining knee and toe clearances. 7. No more than one bowl of a multi-bowl sink shall be required to provide knee and toe clearance.] Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance and shall comply. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Floor or ground surfaces of a clear floor or ground space shall comply. Changes in level are not permitted. [EXCEPTION: Slopes not steeper than 1:48 shall be permitted.] The clear floor or ground space shall be 30" minimum by 48" minimum. Unless otherwise specified, clear floor or ground space shall be permitted to include compliant clear space. Unless otherwise specified, clear floor or ground space shall be positioned for either forward or parallel approach to an element. One full unobstructed side of the clear floor or ground space shall adjoin an accessible route or adjoin another clear floor or ground space. Where a clear floor or ground space is located in an alcove or otherwise confined on all or part of three sides, additional maneuvering clearance shall be provided. Alcoves shall be 36" wide minimum where the depth exceeds 24". Alcoves shall be 60" wide minimum where the depth exceeds 15".

Barrier Detail	A wheelchair stall is not provided in a multi-user restroom.
Location Description	2nd Floor Men's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A wheelchair stall is not provided in the multi-user restroom.

Resolution

Provide a compliant wheelchair stall with compliant elements in the multi-user restroom. Wheelchair accessible compartments with floor mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 59" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments with wall mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 56" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments for children's use (ages 3 through 12) shall be 60" wide minimum measured perpendicular to the side wall, and 59" deep minimum for wall hung and floor mounted water closets measured perpendicular to the rear wall.In addition, clear space of minimum 30" by 48" must be provided within the clearance area for transfer from a wheelchair. The water closet shall be positioned with a wall or partition to the rear and to one side. The centerline of the water closet shall be 16 minimum to 18" maximum from the side wall or partition. Water closets shall be arranged for a left-hand or right-hand approach. The required clearance around the water closet shall be permitted to overlap the water closet, associated grab bars, dispensers, sanitary napkin disposal units, coat hooks, shelves, accessible routes, clear floor space and clearances required at other fixtures, and the turning space. No other fixtures or obstructions, such as lavatories, shall be located within the required water closet clearance. Install a flush control on the open side of the water closet. Flush controls shall be hand operated or automatic. Hand operated flush controls shall be within a compliant reach range. Install compliant grab bars. Horizontal grab bars shall be installed at a consistent height above finish floor to the top of the gripping surface. The top of the gripping surface shall be minimum 33" and maximum 36" above finish floor. The rear wall grab bar shall be 36" long minimum and extend from the centerline of the water closet 12" minimum on one side and 24" minimum on the other side. [EXCEPTIONS: 1. The rear grab bar shall be permitted to be 24" long minimum, centered on the water closet, where wall space does not permit a length of 36" minimum due to the location of a recessed fixture adjacent to the water closet. 2. Where an administrative authority requires flush controls for flush valves to be located in a position that conflicts with the location of the rear grab bar, then the rear grab bar shall be permitted to be split or shifted to the open side of the toilet area.] The side wall grab bar shall be 42" long minimum, located 12" maximum from the rear wall and extending 54" minimum from the rear wall. Toilet paper dispensers shall be 7" minimum and 9" maximum in front of the water closet, measured to the centerline of the dispenser. The outlet of the dispenser shall be 15" minimum and 48" maximum above the finish floor and shall not be located behind grab bars. Where located below the side grab bar, the top of projecting toilet paper dispensers shall be located 1-1/2" minimum below the grab bar. Where located above the side grab bar, the bottom of the projecting toilet paper dispenser shall be located 12" minimum above the top of the gripping surface of the grab bar. Dispensers shall not be of a type that controls delivery or that does not allow continuous paper flow. [ADVISORY: It is advisable, but not required, to use the specifications for children where children are the primary users of the restroom. Guidance in applying the specifications for children according to the age group served reflects the differences in the size, stature, and reach ranges of children ages 3 to 12. The specifications chosen should correspond to the age of the primary user group. The specifications of one age group should be applied consistently in the installation of a water closet and related elements. Water Closet Centerline: Ages 3 and 4- 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 18". Toilet Seat Height: Ages 3 and 4- 11" to 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 17". Grab Bar Height: Ages 3 and 4- 18" to 20"; Ages 5 through 8- 20" to 25"; Ages 9 through 12- 25" to 27"; Dispenser Height: Ages 3 and 4- 14"; Ages 5 through 8- 14" to 17"; Ages 9 through 12- 17" to 19"]. Toilet compartment doors for wheelchair stalls, including door hardware, shall comply except that if the approach is to the latch side of the compartment door, clearance between the door side of the compartment and any obstruction shall be 42" minimum. Doors shall be located in the front partition or in the side wall or partition farthest from the water closet. Where located in the front partition, the door opening shall be 4" maximum from the side wall or partition farthest from the water closet. Where located in the side wall or partition, the door opening shall be 4" maximum from the front partition. The wheelchair stall door shall be self-closing. A compliant door pull shall be placed on both sides of the door near the latch. Toilet compartment doors shall not swing into the minimum required compartment area.Install door pulls near the latch on each side of wheelchair stall door. Handles, pulls, latches, locks, and other operable parts on doors and gates shall be compliant. Operable parts of such hardware shall be 34" minimum and 48" maximum above the finish floor or ground.

CALIFORNIA: The men's restroom does not have compliant signage at the door.

Location Description	2nd Floor Men's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

A geometric sign is not provided on the door and a tactile sign is not provided on the latch side of the door.

Resolution

Install compliant signage. The men's restroom/bathing room geometric symbol shall be an equilateral triangle 1/4" thick, with edges 12" long and a vertex pointing upward. The triangle shall contrast with the door or doorway, either light on dark or dark on light. Each doorway leading to men's restrooms and bathing rooms shall have a geometric symbol mounted min. 58"-max. 60" above finish floor or ground, measured to the centerline of the symbol. Where a door is provided, the geometric symbol sign shall be located within 1" of the vertical centerline of the door. The edges of the geometric symbol signs shall be rounded, chafered, or eased. The corners of the geometric sign shall have minimum 1/8" radius. Compliant signage with the International Symbol of Accessibility (ISA) and tactile characters indicating men's shall be provided. The ISA shall be a white figure on a blue background. The blue shall be Color #15090 in Federal Standard 595B. [EXCEPTION: The enforcing agency may approve other colors of light-on-dark or dark-on-light contrast.] Signage with the International Symbol of Accessibility and Braille shall be located on the latch side of the doorway [EXCEPTION: Signs with tactile characters are permitted on the push sides of doors with closers and without hold-open devices]. Clear space of 18" minimum by 18" minimum shall be provided at the centerline of the tactile characters; the centerline of the tactile characters shall be minimum 9" distance outside of door swing. Tactile characters on signs shall be located 48" minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60" maximum above the finish floor or ground surface, measured from the baseline of the highest tactile character. Raised characters shall be complaint and shall be duplicated in Braille. Raised characters shall be as follows: Depth. Raised characters shall be 1/32" minimum above their background. Case - Characters shall be uppercase. Style- Characters shall not be italic, oblique, script, highly decorative, or of other unusual forms. Character Proportions - Characters shall be selected from fonts where the width of the uppercase letter "O" is 55 % minimum and 110 % maximum of the height of the uppercase letter "I". Character Height- Character height measured vertically from the baseline of the character shall be 5/8" minimum and 2" maximum based on the height of the uppercase letter "I". [EXCEPTION: Where separate raised and visual characters with the same information are provided, raised character height shall be permitted to be 1/2" minimum.] The visual characters of the sign shall be installed at minimum 40" above finish floor.

Assembly	Restroom
Type	Restroom/Bathroom - Lavatory
ADA Standard	606.2 and 606.3
Barrier Detail	The lavatory is mounted higher than 34" to the higher of the rim or counter.
Location Description	2nd Floor Women's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The rim of the lavatory is 34-3/8" above the floor.

Resolution

Install the lavatory at a compliant height, and provide knee and toe clearance. Minimum one lavatory in a restroom shall comply. Lavatories and sinks shall be installed with the front of the higher of the rim or counter surface 34" maximum above the finish floor or ground. [EXCEPTIONS: 1. A lavatory in a toilet or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to comply. 2. In residential dwelling unit kitchens, sinks that are adjustable to variable heights, 29" minimum and 36" maximum, shall be permitted where rough-in plumbing permits connections of supply and drain pipes for sinks mounted at the height of 29".] Compliant knee and toe clearance shall be provided. [EXCEPTIONS: 2. A lavatory in a toilet room or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to provide knee and toe clearance. 3. In residential dwelling units, cabinetry shall be permitted under lavatories and kitchen sinks provided that all of the following conditions are met: (a) the cabinetry can be removed without removal or replacement of the fixture; (b) the finish floor extends under the cabinetry; and (c) the walls behind and surrounding the cabinetry are finished. 4. A knee clearance of 24" minimum above the finish floor or ground shall be permitted at lavatories and sinks used primarily by children 6 through 12 years where the rim or counter surface is 31" maximum above the finish floor or ground. 5. A parallel approach complying with 305 shall be permitted to lavatories and sinks used primarily by children 5 years and younger. 6. The dip of the overflow shall not be considered in determining knee and toe clearances. 7. No more than one bowl of a multi-bowl sink shall be required to provide knee and toe clearance.] Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance and shall comply. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Floor or ground surfaces of a clear floor or ground space shall comply. Changes in level are not permitted. [EXCEPTION: Slopes not steeper than 1:48 shall be permitted.] The clear floor or ground space shall be 30" minimum by 48" minimum. Unless otherwise specified, clear floor or ground space shall be permitted to include compliant clear space. Unless otherwise specified, clear floor or ground space shall be positioned for either forward or parallel approach to an element. One full unobstructed side of the clear floor or ground space shall adjoin an accessible route or adjoin another clear floor or ground space. Where a clear floor or ground space is located in an alcove or otherwise confined on all or part of three sides, additional maneuvering clearance shall be provided. Alcoves shall be 36" wide minimum where the depth exceeds 24". Alcoves shall be 60" wide minimum where the depth exceeds 15".

Barrier Detail

The mirror is mounted higher than 40" above finish floor to the bottom of the reflective surface, where it is installed above a lavatory or counter.

Location Description	2nd Floor Women's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The bottom of the reflective surface of the mirror is 40-3/4" above the floor.

Resolution

Remove and lower the mirror to a compliant height. Where mirrors are provided, at least one shall comply. Mirrors located above lavatories or countertops shall be installed with the bottom edge of the reflecting surface 40" maximum above the finish floor or ground. Mirrors not located above lavatories or countertops shall be installed with the bottom edge of the reflecting surface 35" maximum above the finish floor or ground. [ADVISORY: A single full-length mirror can accommodate a greater number of people, including children. In order for mirrors to be usable by people who are ambulatory and people who use wheelchairs, the top edge of mirrors should be 74" minimum from the floor or ground.]

CALIFORNIA: The women's restroom does not have compliant signage at the door.

Location Description	2nd Floor Women's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

A geometric sign is not provided on the door and a tactile sign is not provided on the latch side of the door.

Resolution

Install compliant signage at the restroom entrance. Women’s toilet and bathing facilities shall be identified by a circle, ¼ inch thick and 12 inches in diameter. The circle symbol shall contrast with the door, either light on a dark background or dark on a light background. Each doorway leading to restrooms and bathing rooms shall have a geometric symbol mounted min. 58"-max. 60" above finish floor or ground, measured to the centerline of the symbol. Where a door is provided, the geometric symbol sign shall be located within 1" of the vertical centerline of the door. The edges of the geometric symbol signs shall be rounded, chafered, or eased. The corners of the geometric sign shall have minimum 1/8" radius. Compliant signage with the International Symbol of Accessibility (ISA) and tactile characters indicating women's shall be provided. The ISA shall be a white figure on a blue background. The blue shall be Color #15090 in Federal Standard 595B. [EXCEPTION: The enforcing agency may approve other colors of light-on-dark or dark-on-light contrast.] Signage with the International Symbol of Accessibility and Braille shall be located on the latch side of the doorway [EXCEPTION: SIgns with tactile characters are permitted on the push sides of doors with closers and without hold-open devices]. Clear space of 18" minimum by 18" minimum shall be provided at the centerline of the tactile characters; the centerline of the tactile characters shall be minimum 9" distance outside of door swing. Tactile characters on signs shall be located 48" minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60" maximum above the finish floor or ground surface, measured from the baseline of the highest tactile character. Raised characters shall be complaint and shall be duplicated in Braille. Raised characters shall be as follows: Depth. Raised characters shall be 1/32" minimum above their background. Case - Characters shall be uppercase. Style- Characters shall not be italic, oblique, script, highly decorative, or of other unusual forms. Character Proportions - Characters shall be selected from fonts where the width of the uppercase letter "O" is 55 % minimum and 110 % maximum of the height of the uppercase letter "I". Character Height- Character height measured vertically from the baseline of the character shall be 5/8" minimum and 2" maximum based on the height of the uppercase letter "I". [EXCEPTION: Where separate raised and visual characters with the same information are provided, raised character height shall be permitted to be 1/2" minimum.] The visual characters of the sign shall be installed at minimum 40" above finish floor.

Barrier Detail	A wheelchair stall is not provided in a multi-user restroom.
Location Description	2nd Floor Women's Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A wheelchair stall is not provided in a multi-user restroom.

Resolution

Provide a compliant wheelchair stall with compliant elements in the multi-user restroom. Wheelchair accessible compartments with floor mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 59" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments with wall mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 56" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments for children's use (ages 3 through 12) shall be 60" wide minimum measured perpendicular to the side wall, and 59" deep minimum for wall hung and floor mounted water closets measured perpendicular to the rear wall.In addition, clear space of minimum 30" by 48" must be provided within the clearance area for transfer from a wheelchair. The water closet shall be positioned with a wall or partition to the rear and to one side. The centerline of the water closet shall be 16 minimum to 18" maximum from the side wall or partition. Water closets shall be arranged for a left-hand or right-hand approach. The required clearance around the water closet shall be permitted to overlap the water closet, associated grab bars, dispensers, sanitary napkin disposal units, coat hooks, shelves, accessible routes, clear floor space and clearances required at other fixtures, and the turning space. No other fixtures or obstructions, such as lavatories, shall be located within the required water closet clearance. Install a flush control on the open side of the water closet. Flush controls shall be hand operated or automatic. Hand operated flush controls shall be within a compliant reach range. Install compliant grab bars. Horizontal grab bars shall be installed at a consistent height above finish floor to the top of the gripping surface. The top of the gripping surface shall be minimum 33" and maximum 36" above finish floor. The rear wall grab bar shall be 36" long minimum and extend from the centerline of the water closet 12" minimum on one side and 24" minimum on the other side. [EXCEPTIONS: 1. The rear grab bar shall be permitted to be 24" long minimum, centered on the water closet, where wall space does not permit a length of 36" minimum due to the location of a recessed fixture adjacent to the water closet. 2. Where an administrative authority requires flush controls for flush valves to be located in a position that conflicts with the location of the rear grab bar, then the rear grab bar shall be permitted to be split or shifted to the open side of the toilet area.] The side wall grab bar shall be 42" long minimum, located 12" maximum from the rear wall and extending 54" minimum from the rear wall. Toilet paper dispensers shall be 7" minimum and 9" maximum in front of the water closet, measured to the centerline of the dispenser. The outlet of the dispenser shall be 15" minimum and 48" maximum above the finish floor and shall not be located behind grab bars. Where located below the side grab bar, the top of projecting toilet paper dispensers shall be located 1-1/2" minimum below the grab bar. Where located above the side grab bar, the bottom of the projecting toilet paper dispenser shall be located 12" minimum above the top of the gripping surface of the grab bar. Dispensers shall not be of a type that controls delivery or that does not allow continuous paper flow. [ADVISORY: It is advisable, but not required, to use the specifications for children where children are the primary users of the restroom. Guidance in applying the specifications for children according to the age group served reflects the differences in the size, stature, and reach ranges of children ages 3 to 12. The specifications chosen should correspond to the age of the primary user group. The specifications of one age group should be applied consistently in the installation of a water closet and related elements. Water Closet Centerline: Ages 3 and 4- 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 18". Toilet Seat Height: Ages 3 and 4- 11" to 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 17". Grab Bar Height: Ages 3 and 4- 18" to 20"; Ages 5 through 8- 20" to 25"; Ages 9 through 12- 25" to 27"; Dispenser Height: Ages 3 and 4- 14"; Ages 5 through 8- 14" to 17"; Ages 9 through 12- 17" to 19"]. Toilet compartment doors for wheelchair stalls, including door hardware, shall comply except that if the approach is to the latch side of the compartment door, clearance between the door side of the compartment and any obstruction shall be 42" minimum. Doors shall be located in the front partition or in the side wall or partition farthest from the water closet. Where located in the front partition, the door opening shall be 4" maximum from the side wall or partition farthest from the water closet. Where located in the side wall or partition, the door opening shall be 4" maximum from the front partition. The wheelchair stall door shall be self-closing. A compliant door pull shall be placed on both sides of the door near the latch. Toilet compartment doors shall not swing into the minimum required compartment area.Install door pulls near the latch on each side of wheelchair stall door. Handles, pulls, latches, locks, and other operable parts on doors and gates shall be compliant. Operable parts of such hardware shall be 34" minimum and 48" maximum above the finish floor or ground.

Barrier Detail

CALIFORNIA: The sink does not have the required clear floor space of minimum 30" by minimum 48" for a forward approach with knee and toe clearance.

Location Description	Breakroom 114
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The knee clearance at the sink is 26-1/4" above the floor to the bottom of hte sink, the clear space is obstructed by stored items and requires opening doors to access. The sink room is 35 1/2 inches above the floor..

Resolution

Relocate the lavatory to provide minimum 30" by minimum 48" clear floor space positioned for a forward approach to the lavatory. Compliant knee and toe clearance shall be provided. [EXCEPTIONS: 2. A lavatory in a toilet room or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to provide knee and toe clearance. 3. In residential dwelling units, cabinetry shall be permitted under lavatories and kitchen sinks provided that all of the following conditions are met: (a) the cabinetry can be removed without removal or replacement of the fixture; (b) the finish floor extends under the cabinetry; and (c) the walls behind and surrounding the cabinetry are finished. 4. A knee clearance of 24" minimum above the finish floor or ground shall be permitted at lavatories and sinks used primarily by children 6 through 12 years where the rim or counter surface is 31" maximum above the finish floor or ground. 5. A parallel approach complying with 305 shall be permitted to lavatories and sinks used primarily by children 5 years and younger. 6. The dip of the overflow shall not be considered in determining knee and toe clearances. 7. No more than one bowl of a multi-bowl sink shall be required to provide knee and toe clearance.] Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance and shall comply. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Floor or ground surfaces of a clear floor or ground space shall comply with 302. Changes in level are not permitted. [EXCEPTION: Slopes not steeper than 1:48 shall be permitted.] Unless otherwise specified, clear floor or ground space shall be permitted to include compliant clear space. Unless otherwise specified, clear floor or ground space shall be positioned for either forward or parallel approach to an element. One full unobstructed side of the clear floor or ground space shall adjoin an accessible route or adjoin another clear floor or ground space. Where a clear floor or ground space is located in an alcove or otherwise confined on all or part of three sides, additional maneuvering clearance shall be provided. Alcoves shall be 36" wide minimum where the depth exceeds 24". Alcoves shall be 60" wide minimum where the depth exceeds 15". Where the accessible sink is located adjacent a side partition or wall, the sink shall be minimum 18" from the side partition/wall to centerline of sink

Assembly	Interior Access Route
Type	Drinking Fountain/Water Cooler
ADA Standard	California Building Code Chap 11B-211, 602
Barrier Detail	CALIFORNIA: The minimum number of drinking fountains is not provided.
Location Description	Drinking Fountain Near Restrooms 2nd Floor
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A standing height drinking fountain is not provided.

Resolution

Install an accessible drinking fountain(s). Where drinking fountains are provided on an exterior site, on a floor, or within a secured area, they shall be compliant. [EXCEPTION: In detention or correctional facilities, drinking fountains only serving non-accessible holding or housing cells are not required to comply.] No fewer than two levels of drinking fountains shall be provided: wheelchair height and standing height. When two drinking fountains are provided, one drinking fountain shall comply with wheelchair unit requirements, and one drinking fountain shall comply with standing unit requirements. [EXCEPTION: Where a single hi-lo drinking fountain is provided, it shall be permitted to be substituted for two separate drinking fountains.] [ADVISORY: The 2019 California Plumbing Code (CPC), Table 4-1 provides minimum plumbing fixture requirements for new buildings, and changes of occupancy or use in an existing building resulting in increased occupant load. CPC Table 4-1 should be consulted in conjunction with the accessibility requirements.] Where more than the minimum number of drinking fountains are provided, 50 percent of the total number of drinking fountains provided shall comply with wheelchair level fountains, and 50 percent of the total number of drinking fountains provided shall comply with standing level drinking fountains. [EXCEPTION: Where 50 percent of the drinking fountains yields a fraction, 50 percent shall be permitted to be rounded up or down provided that the total number of drinking fountains equals 100 percent of drinking fountains.] WHEELCHAIR DRINKING FOUNTAINS: Spout outlets shall be 36 inches maximum above the finish floor or ground. The spout shall be located 15 inches minimum from the vertical support and 5 inches maximum from the front edge of the unit, including bumpers. The spout shall provide a flow of water 4 inches high minimum and shall be located 5" maximum from the front of the unit. The angle of the water stream shall be measured horizontally relative to the front face of the unit. Where spouts are located less than 3 inches of the front of the unit, the angle of the water stream shall be 30 degrees maximum. Where spouts are located between 3 and 5 inches maximum from the front of the unit, the angle of the water stream shall be 15 degrees maximum. [ADVISORY: The purpose of requiring the drinking fountain spout to produce a flow of water 4 inches high minimum is so that a cup can be inserted under the flow of water to provide a drink of water for an individual who, because of a disability, would otherwise be incapable of using the drinking fountain.] Wall- and post-mounted cantilevered drinking fountains shall be 18 inches minimum and 19 inches maximum in depth. Operable parts shall be placed within one or more of the allowable reach ranges Operable parts shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate operable parts shall be 5 pounds (22.2 N) maximum. The flow of water shall be activated by a manually operated system that is front mounted or side mounted and located within 6 inches of the front edge of the fountain or an automatic electronically controlled device. Wheelchair level drinking fountains shall be located so that a clear space is positioned at the drinking fountain for a forward approach and centered on the unit. Clear space shall be minimum 30 inches by minimum 48 inches, and maximum 2.08% in all directions and a firm and stable surface. Knee and toe clearance minimum 30 inches wide shall be provided. [EXCEPTION: A parallel approach shall be permitted at units for children's use where the spout is 30 inches maximum above the finish floor or ground and is 3-1/2 inches maximum from the front edge of the unit, including bumpers.] Knee clearance shall be 11 inches deep minimum at 9 inches above the finish floor or ground, and 8 inches deep minimum at 27 inches above the finish floor or ground. Between 9 inches and 27 inches above the finish floor or ground, the knee clearance shall be permitted to reduce at a rate of 1 inch in depth for each 6 inches in height. Toe clearance shall be the space between the finish floor or ground and 9 inches above the finish floor or ground. Toe clearance depth shall be 17 inches minimum under the drinking fountain. STANDING LEVEL DRINKING FOUNTAIN: Spout outlets of drinking fountains for standing persons shall be 38 inches minimum and 43 inches maximum above the finish floor or ground. ALL DRINKING FOUNTAINS: All drinking fountains shall either be located completely within alcoves, positioned completely between wing walls, or otherwise positioned so as not to encroach into pedestrian ways. The protected area within which a drinking fountain is located shall be 32 inches wide minimum and 18 inches deep minimum, and shall comply. When used, wing walls or barriers shall project horizontally at least as far as the drinking fountain and to within 6 inches vertically from the floor or ground surface.

CALIFORNIA: Visible and audible signal fixtures indicating which car is answering the call and the car's direction of travel are not compliant or are not provided.

Location Description	Elevator
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The visual indicators are centered 75" above the floor.

Resolution

Provide visual and audible signal fixtures at each hoistway entrance to indicate which car is answering a call and the car's direction of travel. Where in-car signals are provided, they must be visible from the floor area adjacent to the hall call buttons. [Exception: Visual and audible signals shall not be required at each destination-oriented elevator where a visible and audible signal is provided indicating the elevator car designation information.] Visual signal fixtures shall be centered at 72" minimum above the finish floor. The visible signal elements shall be minimum 2-1/2" high by minimum 2-1/2" wide, measured along the vertical centerline of the element. Signals shall be visible from the floor area adjacent to the hall call button. [Exception: Destination-oriented elevators are permitted to have signals visible from the floor area adjacent to the hoistway entrance. Audible signals shall sound once for the up direction and twice for the down direction, or shall have verbal annunciators that indicate the direction of elevator car travel. Audible signals shall have a frequency of 1500 Hz maximum. Verbal annunciators shall have a frequency of 300 Hz minimum and 3000 Hz maximum. The audible signal and verbal annunciator shall be 10 dB minimum above ambient, but shall not exceed 80 dB, measured at the hall call button. [Exception: Destination-oriented elevators shall not be required to comply provided that the audible tone and verbal announcement is the same as those given at the call button or call button keypad.]

Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The highest operable parts of the range hood, microwave oven, and oven are 54" to 70" above the floor.

Resolution

Locate the control so that the highest operable part is within at least one of the allowable reach ranges, and does not impede on the knee clearance, if required. Provide clear floor space at each control and operating mechanism. Clear floor space minimum 30" by minimum 48" shall be oriented for a forward or a parallel approach. Where a forward reach is unobstructed, the high forward reach shall be 48" maximum and the low forward reach shall be 15" minimum above the finish floor or ground. the element for a distance not less than the required reach depth over the obstruction. The high forward reach shall be 48" maximum where the reach depth is 20" maximum. Where the reach depth exceeds 20", the high forward reach shall be 44" maximum and the reach depth shall be 25" maximum. Where a clear floor or ground space allows a parallel approach to an element and the side reach is unobstructed, the high side reach shall be 48" maximum and the low side reach shall be 15" minimum above the finish floor or ground. [EXCEPTION: An obstruction shall be permitted between the clear floor or ground space and the element where the depth of the obstruction is 10" maximum. 2. Operable parts of fuel dispensers shall be permitted to be 54" maximum measured from the surface of the vehicular way where fuel dispensers are installed on existing curbs.] Where a clear floor or ground space allows a parallel approach to an element and the high side reach is over an obstruction, the height of the obstruction shall be 34" maximum and the depth of the obstruction shall be 24" maximum. The high side reach shall be 48" maximum for a reach depth of 10" maximum. Where the reach depth exceeds 10", the high side reach shall be 46" maximum for a reach depth of 24" maximum. Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance and shall comply . Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Where knee clearance is required under an element as part of a clear floor space, the knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor or ground. Between 9" and 27" above the finish floor or ground, the knee clearance shall be permitted to reduce at a rate of 1" in depth for each 6" in height. Knee clearance shall be 30" wide minimum. [ADVISORY for Children's Forward or Side Reach Ranges: High reach (maximum): 36" for ages 3 to 4; 40" for ages 5 to 8; and 44" for ages 9 to 12. Low reach (minimum): 20" for ages 3 to 4; 18" for ages 5 to 8; and 16" for ages 9 to 12.]

Comment #: CC-04 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $400
Category Parking **Precedence** 2 **Year** 1 **Cost with GC (30%):** $520

Deficiency: Site Elements — Parking
ISA Marking — Old ISA Marking

The ISA for the old Accessible stall is faded.

Measurement: 1 count

Recommended Remediation:

Remove the existing ISA. A potential solution to this lot is to remove the lone van accessible stall and restripe old stall and access aisle to be van accessible and compliant. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: Council Chambers
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 1 each

Comment #: CC-05 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $500
Category Parking **Precedence** 2 **Year** 1 **Cost with GC (30%):** $650

Deficiency: Site Elements — Parking
Signage — Height

The bottom of the sign is lower than 60 inches (1524 mm) above the finished floor.

Measurement: 35 inches

Recommended Remediation:

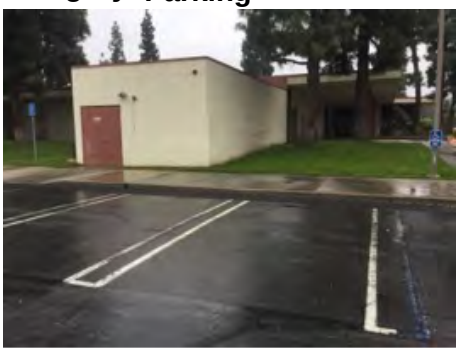
Adjust sign to a compliant height.

Facility: Council Chambers
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.6
2016 CBC: 2016 CBC 11B-502.6

Quantity: 1 each

Comment #: CC-06 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $1,000
Category Parking **Precedence** 2 **Year** 1 **Cost with GC (30%):** $1,300



Deficiency: Site Elements — Parking
Identification Signs — Minimum Fine

There is no sign indicating the minimum fine for parking in accessible stall without required placard.

Measurement: 2 count

Recommended Remediation:

Install sign below the sign with the ISA symbol that states "Minimum Fine $250".

Facility: Council Chambers
Floor/Area: Parking Lot
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A

Quantity: 2 each

Comment #: CC-07 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $360
Category Exterior Access **Precedence** 2 **Year** 1 **Cost with GC (30%):** $468

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Detectable Warning

There is no detectable warning surface (truncated dome mat) at the flush transition between the pedestrian and vehicular right-of-ways.

Measurement: 5 feet

Recommended Remediation:

Install a detectable warning surface compliant with 2016 CBC 11B-705, across the entire width of the flush transition between pedestrian and vehicular right-of-ways.

Facility: Council Chambers
Floor/Area: Parking Lot
Room/Spot: Path of Travel

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A **Quantity:** 5 ln ft
2016 CBC: 2016 CBC 11B-406.5.12

Comment #: CC-08 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $2,250
Category Exterior Access **Precedence** 2 **Year** 1 **Cost with GC (30%):** $2,925

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Running Slope

The running slope of the curb ramp exceeds the allowable 1:12 (8.33%) grade. Additional ramp features are noncompliant.

Measurement: 9.3 % grade

Recommended Remediation:

Remove and dispose of noncompliant curb ramp and regrade and replace with a parallel curb ramp. Include a compliant path of travel with cross slope less than 2% between adjacent paths.

Facility: Council Chambers
Floor/Area: Parking Lot
Room/Spot: Path of Travel

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.2 **Quantity:** 150 sq ft

City of Industry Council Chambers INTERIOR

Assembly	Entrance to Building
Type	Building Entrance-Door
ADA Standard	CBD Chap 11B-404.2.9

Barrier Detail

CALIFORNIA: The non-fire, hinged accessible exterior door takes more than 5#s of pressure to operate.

Location Description	Council Chamber Exterior Exit
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The opening force is 15 pounds.

Resolution

Adjust the closer or replace with an exterior non-fire door that requires no more 5 pounds of force for pushing or pulling the door open. This barrier must be removed in conjunction with barrier ID 394089. The force for pushing or pulling open a door or gate other than fire doors shall be as follows: 1. Interior hinged doors and gates: 5 pounds (22.2 N) maximum. 2. Sliding or folding doors: 5 pounds (22.2 N) maximum. These forces do not apply to the force required to retract latch bolts or disengage other devices that hold the door or gate in a closed position. Note: Fire doors shall have a minimum opening force allowable by the appropriate administrative authority.

ADA Standard	404.2.8

Barrier Detail

The accessible door with door closer has a sweep period of less than 5 seconds from 90 degrees to a position 12 degrees from latch.

Location Description	Council Chamber Exterior Exit
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The closing speed is 2.46 seconds from the 90 degrees position to a position 12 degrees from the latch.

Resolution

Adjust closer or remove and replace closer to ensure that the door has a closure time of at least 5 seconds within 12 degrees of the latch. This barrier must be removed in conjunction with barrier ID 394088. The cost of this barrier removal is covered under ID 394088 and therefore, the cost of this ID is shown as $0. Door closers and gate closers shall be adjusted so that from an open position of 90 degrees, the time required to move the door to a position of 12 degrees from the latch is 5 seconds minimum.

Assembly	Interior Access Route
Type	Interior Access Route
ADA Standard	403.3
Barrier Detail	The interior accessible route has non-compliant slopes.
Location Description	Council Chambers
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The accessible route to the podium has cross slopes up to 6.4%.

Resolution

The floor surface should be graded to maximum 1:20 (5%) running slope and maximum 1:50 (2%) cross slope. An accessible route has maximum 1:20 (5%) running slope and maximum 1:50 (2%) cross slope. [EXCEPTION: Cross slopes not exceeding 1:48 (2.08%) are permitted.] The clear width of walking surfaces shall be 36" minimum. [EXCEPTION: The clear width shall be permitted to be reduced to 32" minimum for a length of 24" maximum provided that reduced width segments are separated by segments that are 48" long minimum and 36" wide minimum.] Where grading to maximum running slope of 1:20 (5% running slope) is not possible, provide a compliant ramped surface within the walkway with maximum slope 1:12 (8.33%) and maximum ramp run rise of 6" without handrails. If a ramped surface with running slopes greater than 1:20 (5%) and maximum 1:12 (8.33%) rises more than 6", handrails are required. The cost estimate for this barrier removal is based on grading the running slope to maximum 1:20 (5%). The quantity and order of magnitude cost estimate provided for this barrier are limited to the extent of the area identified as non-compliant. Additional costs that may be associated with removal of the barrier are not included.

Barrier Detail	The ramp run rises 6" or greater but has no handrails.
Location Description	Council Chambers
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The ramp has a rise of approximately 27" and does not have handrails. Per the exception for assembly areas handrails are only required on one side of the ramp.

Resolution

Install compliant handrails on each side of ramp.Handrails are required on ramp runs with a rise greater than 6". Handrails are not required on walking surfaces with running slopes less than 1:20. Handrails shall be provided on both sides of ramps. [EXCEPTION: In assembly areas, handrails shall not be required on both sides of aisle ramps where a handrail is provided at either side or within the aisle width.] Handrails shall be continuous within the full length of each ramp run. Inside handrails on ramps shall be continuous between runs. [EXCEPTION: In assembly areas, handrails on ramps shall not be required to be continuous in aisles serving seating.] Handrails shall be at a consistent height above the ramp on both sides of the ramp. Tops of gripping surfaces of handrails shall be 34" minimum and 38" maximum vertically above ramp surfaces. [ADVISORY: The requirements for ramp handrails are for adults. When children are the principal users in a building or facility (e.g., elementary schools), a second set of handrails at an appropriate height can assist them and aid in preventing accidents. A maximum height of 28", measured to the top of the gripping surface from the ramp surface or stair nosing, is recommended for handrails designed for children. Sufficient vertical clearance between upper and lower handrails, 9" minimum, should be provided to help prevent entrapment.] Clearance between handrail gripping surfaces and adjacent surfaces shall be 1-1/2" minimum. Handrail gripping surfaces shall be continuous along their length and shall not be obstructed along their tops or sides. The bottoms of handrail gripping surfaces shall not be obstructed for more than 20% of their length. Where provided, horizontal projections shall occur 1-1/2" minimum below the bottom of the handrail gripping surface. [EXCEPTIONS: 1. Where handrails are provided along walking surfaces with slopes not steeper than 1:20, the bottoms of handrail gripping surfaces shall be permitted to be obstructed along their entire length where they are integral to crash rails or bumper guards. 2. The distance between horizontal projections and the bottom of the gripping surface shall be permitted to be reduced by 1/8" for each 1/2" of additional handrail perimeter dimension that exceeds 4".] Handrail gripping surfaces with a circular cross section shall have an outside diameter of 1-1/4" minimum and 2" maximum. Handrail gripping surfaces with a non-circular cross section shall have a perimeter dimension of 4" minimum and 6-1/4" maximum, and a cross-section dimension of 2-1/4" maximum. Handrail gripping surfaces and any surfaces adjacent to them shall be free of sharp or abrasive elements and shall have rounded edges. Handrails shall not rotate within their fittings. Handrail gripping surfaces shall extend beyond and in the same direction of ramp runs. [EXCEPTIONS: 1. Extensions shall not be required for continuous handrails at the inside turn of switchback or dogleg ramps AND 3. In alterations, full extensions of handrails shall not be required where such extensions would be hazardous due to plan configuration.] Ramp handrails shall extend horizontally above the landing for 12" minimum beyond the top and bottom of ramp runs. Extensions shall return to a wall, guard, or the landing surface, or shall be continuous to the handrail of an adjacent ramp run. Edge Protection: A curb or barrier shall be provided that prevents the passage of a 4" diameter sphere, where any portion of the sphere is within 4" of the finish floor or ground surface, or the surface of the ramp shall extend 12" minimum beyond the handrail. [EXCEPTIONS: 1. Edge protection is not required on ramps that are not required to have handrails and curb ramps with flares. 2. Edge protection is not required on the sides of ramp landings servings an adjoining ramp run. 3. Edge protection shall not be required on the sides of ramp landings having a vertical drop-off of ½" maximum within 10" horizontally of the minimum landing area.]

Barrier Detail	Means of egress exit signs do not have tactile lettering.
Location Description	Council Chamber Exterior Exit
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A tactile means of egress sign is not provided.

Resolution

Remove and replace signage with compliant signage. Means of egress require tactile signage (Applies to designated egress stairways, exit doors, areas of refuge) Signs at exit doors shall include tactile signage. Signs shall be installed alongside the door at the latch side. Where a tactile sign is provided at double doors with one active leaf, the sign shall be located on the inactive leaf. Where a tactile sign is provided at double doors with two active leafs, the sign shall be located to the right of the right hand door. Where there is no wall space at the latch side of a single door or at the right side of double doors, sign shall be located on the nearest adjacent wall. Signs containing tactile characters shall be located so that a clear floor space of 18" inches minimum by 18" minimum, centered on the tactile characters, is provided beyond the arc of any door swing between the closed position and 45 degrees open. Tactile sign characters shall be mounted minimum height of 48" and maximum height of 60" from finish floor. Visual characters shall be a minimum height of 40" from finish floor. Where both visual and tactile characters are required, either one sign with both visual and tactile characters, or two separate signs, one with visual, and one with tactile characters, shall be provided. Raised characters shall be complaint and shall be duplicated in Braille. Raised characters shall be as follows: Depth. Raised characters shall be 1/32" minimum above their background. Case. Characters shall be uppercase. Style. Characters shall be sans serif. Characters shall not be italic, oblique, script, highly decorative, or of other unusual forms. Character Proportions. Characters shall be selected from fonts where the width of the uppercase letter "O" is 55% minimum and 110 % maximum of the height of the uppercase letter "I". Character Height. Character height measured vertically from the baseline of the character shall be 5/8" minimum and 2" maximum based on the height of the uppercase letter "I". [EXCEPTION: Where separate raised and visual characters with the same information are provided, raised character height shall be permitted to be 1/2" minimum.]

Barrier Detail	Assembly areas do not provide wheelchair spaces.
Location Description	Council Chambers
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The assembly area has 48 total seats requiring 2 wheelchair spaces. No wheelchair spaces are provided. The floors have slopes up to 10.4%.

Resolution

Wheelchair spaces shall be provided. A single wheelchair space is minimum 36" wide. Where two wheelchair spaces adjoin, the wheelchair spaces shall be minimum 33" wide. When approached from the front or rear, wheelchair spaces shall be minimum 48" deep. Wheelchair spaces approached from the side shall be minimum 60" deep. One side of the wheelchair space shall connect to, but be separate from, an accessible route and shall not overlap the circulation path. In row seating, at least one companion seat shall be provided adjacent to each required wheelchair space. Number of Wheelchair Spaces in Assembly Areas Number of Seats- Minimum Number of Required Wheelchair Spaces: 4 to 25 requires 1; 26 to 50 requires 2; 51 to 150 requires 4; 151 to 300 requires 5; 301 to 500 requires 6; 501 to 5000 requires 6, plus 1 for each 150, or fraction thereof, between 501 through 5000; 5001 and over requires 36, plus 1 for each 200, or fraction thereof, over 5000. Wheelchair spaces shall provide compliant lines of sight. In providing lines of sight, wheelchair spaces shall be dispersed. Wheelchair spaces shall provide spectators with choices of seating locations and viewing angles that are substantially equivalent to, or better than, the choices of seating locations and viewing angles available to all other spectators. When the number of wheelchair spaces required has been met, further dispersion shall not be required. Wheelchair spaces shall be dispersed horizontally. [EXCEPTIONS: 1. Horizontal dispersion shall not be required in assembly areas with 300 or fewer seats if the companion seats required and wheelchair spaces are located within the 2nd or 3rd quartile of the total row length. Intermediate aisles shall be included in determining the total row length. If the row length in the 2nd and 3rd quartile of a row is insufficient to accommodate the required number of companion seats and wheelchair spaces, the additional companion seats and wheelchair spaces shall be permitted to be located in the 1st and 4th quartile of the row. 2. In row seating, two wheelchair spaces shall be permitted to be located side-by-side.] Wheelchair spaces shall be dispersed vertically at varying distances from the screen, performance area, or playing field. In addition, wheelchair spaces shall be located in each balcony or mezzanine that is located on an accessible route. [EXCEPTIONS: 1. Vertical dispersion shall not be required in assembly areas with 300 or fewer seats if the wheelchair spaces provide viewing angles that are equivalent to, or better than, the average viewing angle provided in the facility.]

Barrier Detail	An assistive listening system is required, but not provided.
Location Description	Council Chambers
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

An assisted listening system with assisted listening devices is not not provided. The assembly area has 48 total seats requiring 2 assisted listening devices.

Resolution

Each assembly area required to provide assistive listening systems shall provide signs informing patrons of the availability of the assistive listening system. Assistive listening signs shall comply and shall include the International Symbol of Access for Hearing Loss. [EXCEPTION: Where ticket offices or windows are provided, signs shall not be required at each assembly area provided that signs are displayed at each ticket office or window informing patrons of the availability of assistive listening systems.] Receivers required for use with an assistive listening system shall include a 1/8" standard mono jack. Receivers required to be hearing-aid compatible shall interface with telecoils in hearing aids through the provision of neck loops. Neck loops and headsets that can be worn as neck loops are compatible with hearing aids. Receivers that are not compatible include earbuds, which may require removal of hearing aids, earphones, and headsets that must be worn over the ear, which can create disruptive interference in the transmission and can be uncomfortable for people wearing hearing aids. Assistive listening systems shall be capable of providing a sound pressure level of 110 dB minimum and 118 dB maximum with a dynamic range on the volume control of 50 dB. The signal-to-noise ratio for internally generated noise in assistive listening systems shall be 18 dB minimum. Peak clipping shall not exceed 18 dB of clipping relative to the peaks of speech. In each assembly area where audible communication is integral to the use of the space, an assistive listening system shall be provided. [EXCEPTION: Other than in courtrooms, assistive listening systems shall not be required where audio amplification is not provided.] Receivers shall be provided for assistive listening systems in each assembly area. Twenty-five percent minimum of receivers provided, but no fewer than two, shall be hearing-aid compatible. [EXCEPTIONS: 1. Where a building contains more than one assembly area and the assembly areas required to provide assistive listening systems are under one management, the total number of required receivers shall be permitted to be calculated according to the total number of seats in the assembly areas in the building provided that all receivers are usable with all systems. 2. Where all seats in an assembly area are served by an induction loop assistive listening system, the minimum number of receivers required to be hearing-aid compatible shall not be required to be provided.] Capacity of Seating in Assembly Area: 50 or less Minimum Number of Required Receivers: 2 Minimum Number of Required Receivers Required to be Hearing-aid Compatible: 2 Capacity of Seating in Assembly Area: 51 to 200 Minimum Number of Required Receivers: 2, plus 1 per 25 seats over 50 seats, or fraction thereof. Minimum Number of Required Receivers Required to be Hearing-aid Compatible: 2 Capacity of Seating in Assembly Area: 201 to 500 Minimum Number of Required Receivers: 2, plus 1 per 25 seats over 50 seats, or fraction thereof. Minimum Number of Required Receivers Required to be Hearing-aid Compatible: 1 per 4 receivers, or fraction thereof Capacity of Seating in Assembly Area: 501 to 1000 Minimum Number of Required Receivers: 20, plus 1 per 33 seats over 500 seats, or fraction thereof. Minimum Number of Required Receivers Required to be Hearing-aid Compatible: 1 per 4 receivers, or fraction thereof . Capacity of Seating in Assembly Area: 1001 to 2000 Minimum Number of Required Receivers: 35, plus 1 per 50 seats over 1000 seats, or fraction thereof. Minimum Number of Required Receivers Required to be Hearing-aid Compatible: 1 per 4 receivers, or fraction thereof Capacity of Seating in Assembly Area: 2001 and over Minimum Number of Required Receivers: 55 plus 1 per 100 seats over 2000 seats, or fraction thereof. Minimum Number of Required Receivers Required to be Hearing-aid Compatible: 1 per 4 receivers, or fraction thereof

ADVISORY: The work surface height is not compliant. Knee and toe clearances are not provided.

Location Description	Council Chambers Podium
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The top of the podium surface is 39" above the floor.

Resolution

ADVISORY: Provide work surface tables at a compliant height. The tops of work surfaces shall be 28" minimum and 34" maximum above the finish floor or ground. A clear floor space 30" minimum by 48" minimum, positioned for a forward approach with the 30" dimension paralleling the edge of the work surface, shall be provided. Knee and toe clearance shall be provided. Knee Clearance: Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Where knee clearance is required under an element as part of a clear floor space, the knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor or ground. Between 9" and 27" above the finish floor or ground, the knee clearance shall be permitted to reduce at a rate of 1" in depth for each 6" in height. Knee clearance shall be 30" wide minimum. Toe Clearance: Space under an element between the finish floor or ground and 9" above the finish floor or ground shall be considered toe clearance. Toe clearance shall extend 25" maximum under an element. Where toe clearance is required at an element as part of a clear floor space, the toe clearance shall extend 17" minimum under the element. Space extending greater than 6" beyond the available knee clearance at 9" above the finish floor or ground shall not be considered toe clearance. Toe clearance shall be 30" wide minimum. Examples of work surfaces include writing surfaces, study carrels, student laboratory stations, baby changing, other tables or fixtures for personal grooming.

Barrier Detail	A wheelchair stall is not provided in a multi-user restroom.
Location Description	Men's Restroom
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A wheelchair stall is not provided in the multi-user restroom.

Resolution

Provide a compliant wheelchair stall with compliant elements in the multi-user restroom. Wheelchair accessible compartments with floor mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 59" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments with wall mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 56" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments for children's use (ages 3 through 12) shall be 60" wide minimum measured perpendicular to the side wall, and 59" deep minimum for wall hung and floor mounted water closets measured perpendicular to the rear wall.In addition, clear space of minimum 30" by 48" must be provided within the clearance area for transfer from a wheelchair. The water closet shall be positioned with a wall or partition to the rear and to one side. The centerline of the water closet shall be 16 minimum to 18" maximum from the side wall or partition. Water closets shall be arranged for a left-hand or right-hand approach. The required clearance around the water closet shall be permitted to overlap the water closet, associated grab bars, dispensers, sanitary napkin disposal units, coat hooks, shelves, accessible routes, clear floor space and clearances required at other fixtures, and the turning space. No other fixtures or obstructions, such as lavatories, shall be located within the required water closet clearance. Install a flush control on the open side of the water closet. Flush controls shall be hand operated or automatic. Hand operated flush controls shall be within a compliant reach range. Install compliant grab bars. Horizontal grab bars shall be installed at a consistent height above finish floor to the top of the gripping surface. The top of the gripping surface shall be minimum 33" and maximum 36" above finish floor. The rear wall grab bar shall be 36" long minimum and extend from the centerline of the water closet 12" minimum on one side and 24" minimum on the other side. [EXCEPTIONS: 1. The rear grab bar shall be permitted to be 24" long minimum, centered on the water closet, where wall space does not permit a length of 36" minimum due to the location of a recessed fixture adjacent to the water closet. 2. Where an administrative authority requires flush controls for flush valves to be located in a position that conflicts with the location of the rear grab bar, then the rear grab bar shall be permitted to be split or shifted to the open side of the toilet area.] The side wall grab bar shall be 42" long minimum, located 12" maximum from the rear wall and extending 54" minimum from the rear wall. Toilet paper dispensers shall be 7" minimum and 9" maximum in front of the water closet, measured to the centerline of the dispenser. The outlet of the dispenser shall be 15" minimum and 48" maximum above the finish floor and shall not be located behind grab bars. Where located below the side grab bar, the top of projecting toilet paper dispensers shall be located 1-1/2" minimum below the grab bar. Where located above the side grab bar, the bottom of the projecting toilet paper dispenser shall be located 12" minimum above the top of the gripping surface of the grab bar. Dispensers shall not be of a type that controls delivery or that does not allow continuous paper flow. [ADVISORY: It is advisable, but not required, to use the specifications for children where children are the primary users of the restroom. Guidance in applying the specifications for children according to the age group served reflects the differences in the size, stature, and reach ranges of children ages 3 to 12. The specifications chosen should correspond to the age of the primary user group. The specifications of one age group should be applied consistently in the installation of a water closet and related elements. Water Closet Centerline: Ages 3 and 4- 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 18". Toilet Seat Height: Ages 3 and 4- 11" to 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 17". Grab Bar Height: Ages 3 and 4- 18" to 20"; Ages 5 through 8- 20" to 25"; Ages 9 through 12- 25" to 27"; Dispenser Height: Ages 3 and 4- 14"; Ages 5 through 8- 14" to 17"; Ages 9 through 12- 17" to 19"]. Toilet compartment doors for wheelchair stalls, including door hardware, shall comply except that if the approach is to the latch side of the compartment door, clearance between the door side of the compartment and any obstruction shall be 42" minimum. Doors shall be located in the front partition or in the side wall or partition farthest from the water closet. Where located in the front partition, the door opening shall be 4" maximum from the side wall or partition farthest from the water closet. Where located in the side wall or partition, the door opening shall be 4" maximum from the front partition. The wheelchair stall door shall be self-closing. A compliant door pull shall be placed on both sides of the door near the latch. Toilet compartment doors shall not swing into the minimum required compartment area.Install door pulls near the latch on each side of wheelchair stall door. Handles, pulls, latches, locks, and other operable parts on doors and gates shall be compliant. Operable parts of such hardware shall be 34" minimum and 48" maximum above the finish floor or ground.

Barrier Detail

CALIFORNIA: The men's restroom does not have compliant signage at the door.

Location Description	Men's Restroom
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

A geometric sign is not provided on the door and a tactile sign is not provided on the latch side of the door.

Resolution

Install compliant signage. The men's restroom/bathing room geometric symbol shall be an equilateral triangle 1/4" thick, with edges 12" long and a vertex pointing upward. The triangle shall contrast with the door or doorway, either light on dark or dark on light. Each doorway leading to men's restrooms and bathing rooms shall have a geometric symbol mounted min. 58"-max. 60" above finish floor or ground, measured to the centerline of the symbol. Where a door is provided, the geometric symbol sign shall be located within 1" of the vertical centerline of the door. The edges of the geometric symbol signs shall be rounded, chafered, or eased. The corners of the geometric sign shall have minimum 1/8" radius. Compliant signage with the International Symbol of Accessibility (ISA) and tactile characters indicating men's shall be provided. The ISA shall be a white figure on a blue background. The blue shall be Color #15090 in Federal Standard 595B. [EXCEPTION: The enforcing agency may approve other colors of light-on-dark or dark-on-light contrast.] Signage with the International Symbol of Accessibility and Braille shall be located on the latch side of the doorway [EXCEPTION: Signs with tactile characters are permitted on the push sides of doors with closers and without hold-open devices]. Clear space of 18" minimum by 18" minimum shall be provided at the centerline of the tactile characters; the centerline of the tactile characters shall be minimum 9" distance outside of door swing. Tactile characters on signs shall be located 48" minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60" maximum above the finish floor or ground surface, measured from the baseline of the highest tactile character. Raised characters shall be complaint and shall be duplicated in Braille. Raised characters shall be as follows: Depth. Raised characters shall be 1/32" minimum above their background. Case - Characters shall be uppercase. Style- Characters shall not be italic, oblique, script, highly decorative, or of other unusual forms. Character Proportions - Characters shall be selected from fonts where the width of the uppercase letter "O" is 55 % minimum and 110 % maximum of the height of the uppercase letter "I". Character Height- Character height measured vertically from the baseline of the character shall be 5/8" minimum and 2" maximum based on the height of the uppercase letter "I". [EXCEPTION: Where separate raised and visual characters with the same information are provided, raised character height shall be permitted to be 1/2" minimum.] The visual characters of the sign shall be installed at minimum 40" above finish floor.

Location Description	Women's Restroom
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The coat hook is 57" above the floor.

Resolution

Install the coat hook within an allowable reach range. Unobstructed Forward Reach: Where a forward reach is unobstructed, the high forward reach shall be 48" maximum and the low forward reach shall be 15" minimum above the finish floor or ground. Obstructed High Forward Reach: Where a high forward reach is over an obstruction, the clear floor space shall extend beneath the element for a distance not less than the required reach depth over the obstruction. The high forward reach shall be 48" maximum where the reach depth is 20" maximum. Where the reach depth exceeds 20", the high forward reach shall be 44" maximum and the reach depth shall be 25" maximum. Unobstructed Side Reach: Where a clear floor or ground space allows a parallel approach to an element and the side reach is unobstructed, the high side reach shall be 48" maximum and the low side reach shall be 15" minimum above the finish floor or ground. [EXCEPTION: An obstruction shall be permitted between the clear floor or ground space and the element where the depth of the obstruction is 10" maximum.] Obstructed High Side Reach: Where a clear floor or ground space allows a parallel approach to an element and the high side reach is over an obstruction, the height of the obstruction shall be 34" maximum and the depth of the obstruction shall be 24" maximum. The high side reach shall be 48" maximum for a reach depth of 10" maximum. Where the reach depth exceeds 10", the high side reach shall be 46" maximum for a reach depth of 24" maximum. [ADVISORY for Children's Forward or Side Reach Ranges: High reach (maximum): 36" for ages 3 to 4; 40" for ages 5 to 8; and 44" for ages 9 to 12. Low reach (minimum): 20" for ages 3 to 4; 18" for ages 5 to 8; and 16" for ages 9 to 12.]

The force required to open the interior, hinged, non-fire door is more than 5 pounds.

Location Description	Women's Restroom
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The opening force is 15 pounds.

Resolution

Adjust closer or replace with an closer that requires no more 5 pounds of force to stop the door motion. This barrier must be removed in conjunction with barrier ID 394101. The cost of this barrier removal is covered under ID 394101 and therefore, the cost of this ID is shown as $0. The maximum force for pushing or pulling open a door shall be for interior hinged doors: 5 lbs (22.2N). The force for pushing or pulling open a door or gate other than fire doors shall be as follows: 1. Interior hinged doors and gates: 5 pounds (22.2 N) maximum. 2. Sliding or folding doors: 5 pounds (22.2 N) maximum. These forces do not apply to the force required to retract latch bolts or disengage other devices that hold the door or gate in a closed position. Note: Fire doors shall have a minimum opening force allowable by the appropriate administrative authority.

CALIFORNIA: The lavatory does not have the required knee and toe clearance.

Location Description	Women's Restroom
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The lavatory apron and knee clearance is 26-1/4" above the floor.

Resolution

Provide at least 10% but no fewer than one lavatory with compliant knee and toe clearance. The lavatory shall maintain the maximum allowable height of 34" to the rim of the sink. The maximum allowable exterior bowl depth is 6-1/2". A compliant clear floor space of minimum 30" wide centered on the lavatory and minimum 48" deep, positioned for a forward approach, shall be provided. Space under an element between 9" and 29" above the finish floor or ground shall be considered knee clearance and shall comply. Knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor. The bottom of the front of the lavatory shall be minimum 29" above the finish floor. Knee clearance reduction is not allowed. Toe clearance shall be minimum 25" horizontal depth between the finish floor and 9" AFF. Knee and toe clearance shall be 30" wide minimum and centered on the lavatory. A compliant clear floor space, positioned for a forward approach, and compliant knee and toe clearance shall be provided. [EXCEPTIONS: 1. Toe clearance shall extend 19" maximum under lavatories 2. A lavatory in a toilet room or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to provide knee and toe clearance. 3. In residential dwelling units, cabinetry shall be permitted under lavatories and kitchen sinks provided that all of the following conditions are met: (a) the cabinetry can be removed without removal or replacement of the fixture; (b) the finish floor extends under the cabinetry; and (c) the walls behind and surrounding the cabinetry are finished. 4. A knee clearance of 24" minimum above the finish floor or ground shall be permitted at lavatories and sinks used primarily by children 6 through 12 years where the rim or counter surface is 31" maximum above the finish floor or ground. 5. A parallel approach complying with 305 shall be permitted to lavatories and sinks used primarily by children 5 years and younger.6. The dip of the overflow shall not be considered in determining knee and toe clearances. 7. No more than one bowl of a multi-bowl sink shall be required to provide knee and toe clearance.]

Barrier Detail	A wheelchair stall is not provided in a multi-user restroom.
Location Description	Women's Restroom
Observed	Sep 27, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	A wheelchair stall is not provided in the multi-user restroom.

Resolution

Provide a compliant wheelchair stall with compliant elements in the multi-user restroom. Wheelchair accessible compartments with floor mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 59" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments with wall mounted water closets shall be 60" wide minimum measured perpendicular to the side wall and 56" deep minimum, measured perpendicular to the rear wall. Wheelchair accessible compartments for children's use (ages 3 through 12) shall be 60" wide minimum measured perpendicular to the side wall, and 59" deep minimum for wall hung and floor mounted water closets measured perpendicular to the rear wall.In addition, clear space of minimum 30" by 48" must be provided within the clearance area for transfer from a wheelchair. The water closet shall be positioned with a wall or partition to the rear and to one side. The centerline of the water closet shall be 16 minimum to 18" maximum from the side wall or partition. Water closets shall be arranged for a left-hand or right-hand approach. The required clearance around the water closet shall be permitted to overlap the water closet, associated grab bars, dispensers, sanitary napkin disposal units, coat hooks, shelves, accessible routes, clear floor space and clearances required at other fixtures, and the turning space. No other fixtures or obstructions, such as lavatories, shall be located within the required water closet clearance. Install a flush control on the open side of the water closet. Flush controls shall be hand operated or automatic. Hand operated flush controls shall be within a compliant reach range. Install compliant grab bars. Horizontal grab bars shall be installed at a consistent height above finish floor to the top of the gripping surface. The top of the gripping surface shall be minimum 33" and maximum 36" above finish floor. The rear wall grab bar shall be 36" long minimum and extend from the centerline of the water closet 12" minimum on one side and 24" minimum on the other side. [EXCEPTIONS: 1. The rear grab bar shall be permitted to be 24" long minimum, centered on the water closet, where wall space does not permit a length of 36" minimum due to the location of a recessed fixture adjacent to the water closet. 2. Where an administrative authority requires flush controls for flush valves to be located in a position that conflicts with the location of the rear grab bar, then the rear grab bar shall be permitted to be split or shifted to the open side of the toilet area.] The side wall grab bar shall be 42" long minimum, located 12" maximum from the rear wall and extending 54" minimum from the rear wall. Toilet paper dispensers shall be 7" minimum and 9" maximum in front of the water closet, measured to the centerline of the dispenser. The outlet of the dispenser shall be 15" minimum and 48" maximum above the finish floor and shall not be located behind grab bars. Where located below the side grab bar, the top of projecting toilet paper dispensers shall be located 1-1/2" minimum below the grab bar. Where located above the side grab bar, the bottom of the projecting toilet paper dispenser shall be located 12" minimum above the top of the gripping surface of the grab bar. Dispensers shall not be of a type that controls delivery or that does not allow continuous paper flow. [ADVISORY: It is advisable, but not required, to use the specifications for children where children are the primary users of the restroom. Guidance in applying the specifications for children according to the age group served reflects the differences in the size, stature, and reach ranges of children ages 3 to 12. The specifications chosen should correspond to the age of the primary user group. The specifications of one age group should be applied consistently in the installation of a water closet and related elements. Water Closet Centerline: Ages 3 and 4- 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 18". Toilet Seat Height: Ages 3 and 4- 11" to 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 17". Grab Bar Height: Ages 3 and 4- 18" to 20"; Ages 5 through 8- 20" to 25"; Ages 9 through 12- 25" to 27"; Dispenser Height: Ages 3 and 4- 14"; Ages 5 through 8- 14" to 17"; Ages 9 through 12- 17" to 19"]. Toilet compartment doors for wheelchair stalls, including door hardware, shall comply except that if the approach is to the latch side of the compartment door, clearance between the door side of the compartment and any obstruction shall be 42" minimum. Doors shall be located in the front partition or in the side wall or partition farthest from the water closet. Where located in the front partition, the door opening shall be 4" maximum from the side wall or partition farthest from the water closet. Where located in the side wall or partition, the door opening shall be 4" maximum from the front partition. The wheelchair stall door shall be self-closing. A compliant door pull shall be placed on both sides of the door near the latch. Toilet compartment doors shall not swing into the minimum required compartment area.Install door pulls near the latch on each side of wheelchair stall door. Handles, pulls, latches, locks, and other operable parts on doors and gates shall be compliant. Operable parts of such hardware shall be 34" minimum and 48" maximum above the finish floor or ground.

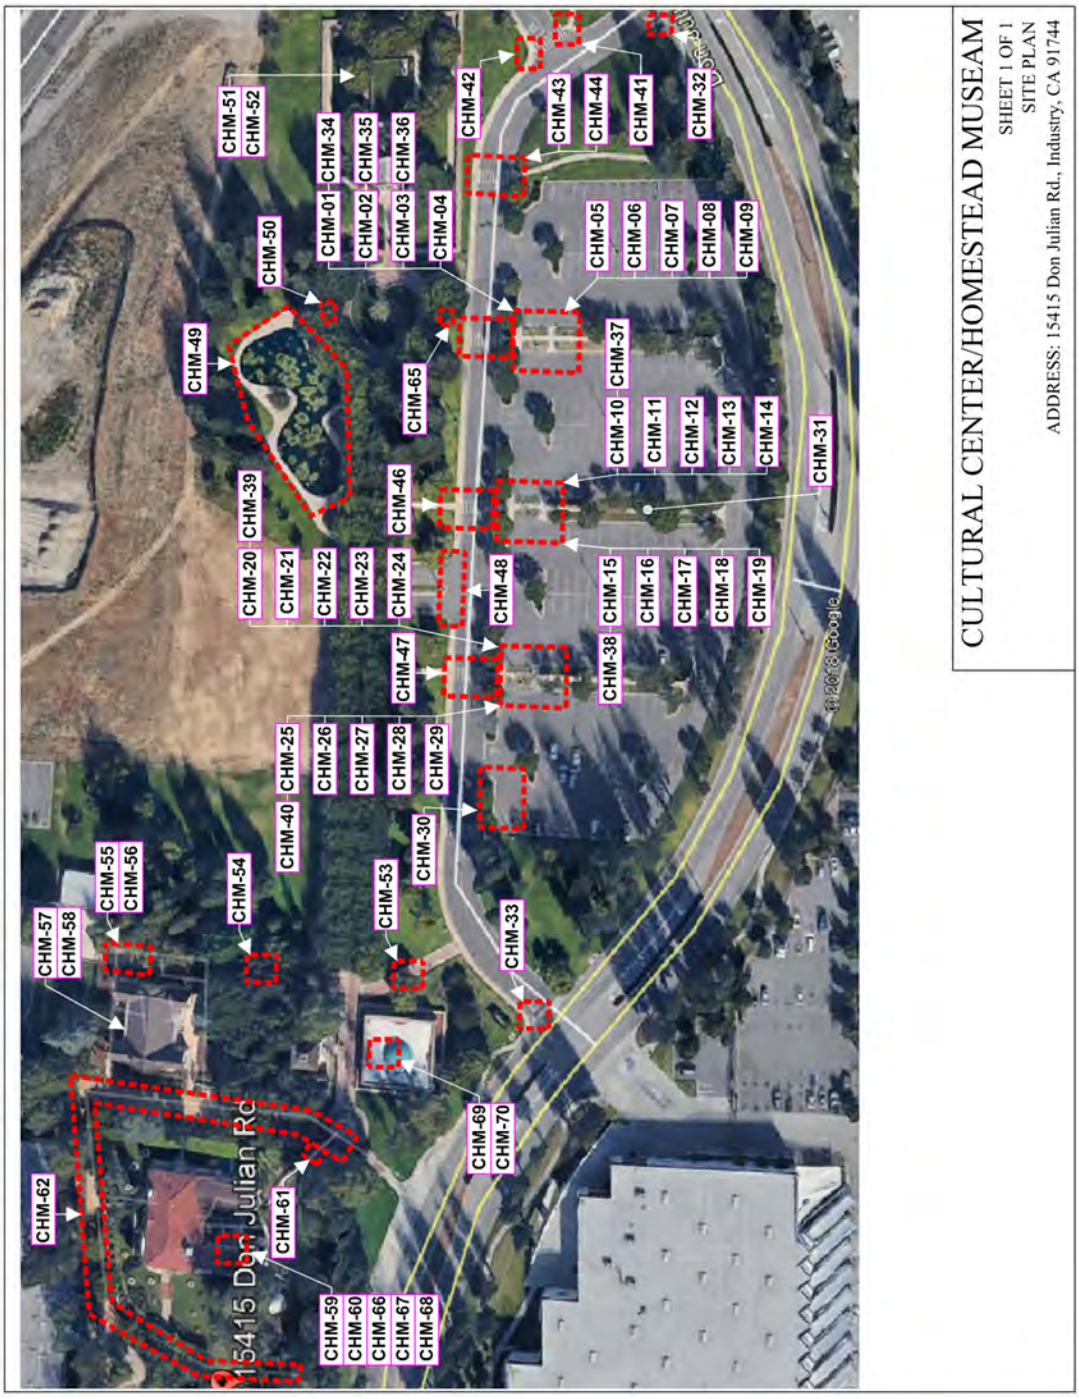
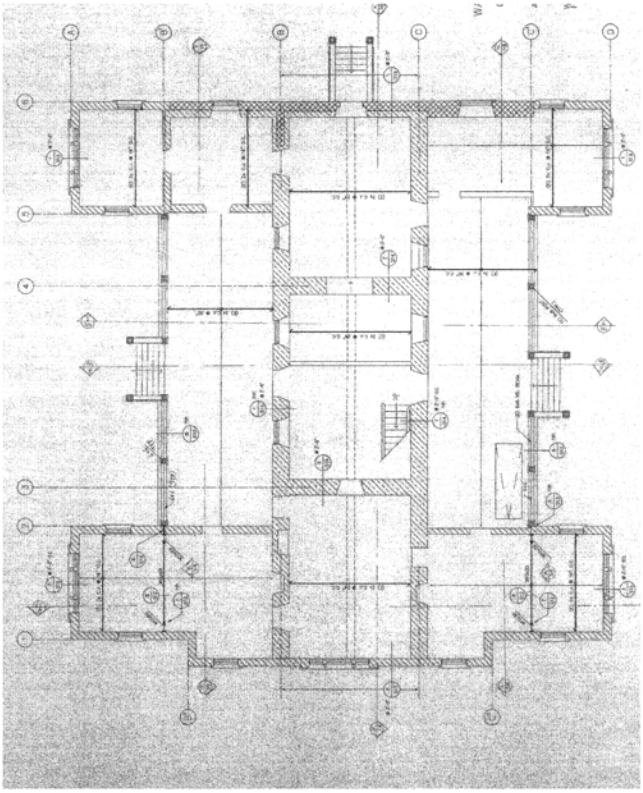
CULTURAL HOMESTEAD MUSEUM

Facility Site Plan:



Facility Floor Plan:

CULTURAL CENTER/HOMESTEAD MUSEAM
SHEET 2 OF 2
FLOOR PLAN
ADDRESS: 15415 Don Julian Rd., Industry, CA 91744



FACILITY: CULTURAL HOMESTEAD MUSEUM

Facility Description:

Facility was constructed in the year 1919 .

Facility Address: 15415 Don Julian Rd.

This facility is used for the following programs:

Historic Building Tours
Private and Public Events

Comment #: CHM-01 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,500

Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Access Aisles — Width

The provided access aisle width is less than the minimum 60 inches.

Measurement: 56 inches

Recommended Remediation:

Reconfigure spaces by repainting lines. Dimensions to be measured to centerline. Keep access aisle out of the gutter to maintain maximum 2% cross slope. (See site plan for locations)

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.2
2016 CBC: 2016 CBC 11B-502.3.1

Quantity: 2 each

Comment #: CHM-02 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,500

Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Access Aisles — Hatched Line: Asphalt

The hatched lines on asphalt within the border line of the access aisle faded.

Measurement: 2 count

Recommended Remediation:

For asphalt, recommend providing white hatched striping inside of a blue borderline. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.6
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 2 each

Comment #: CHM-03 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,500

Category **Parking** **Precedence 7** **Year 3** **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Access Aisles — "No Parking"

The words "No Parking" in the access aisle have faded so that they are not contrasting with the ground surface.

Measurement: 2 count

Recommended Remediation:

Mark access aisles 'No Parking' or repaint existing markings to provide contrast compliant with local requirements. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 2 each

Comment #: CHM-04 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,500

Category **Parking** **Precedence 7** **Year 3** **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Identification Signs — Minimum Fine

There is no sign indicating the minimum fine for parking in accessible stall without required placard. Bottom of the lowest sign should be 60 inches minimum above parking paving.

Measurement: 3 count

Recommended Remediation:

Install sign below the sign with the ISA symbol that states "Minimum Fine $250". Raise signs so that the bottom of the sign is higher than 60 inches above the ground.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.6
2016 CBC: 2016 CBC 11B-502.6.2

Quantity: 3 each

Comment #: CHM-34 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $240

Category **Exterior Access** **Precedence 7** **Year 3** **Cost with GC (30%):** $312

Deficiency: Site Elements — Exterior Access Route
Slope — Running Slope

The running slope, parallel to the path of travel, exceeds the allowable 5% grade.

Measurement: 12.1 % grade

Recommended Remediation:

Remove and dispose of noncompliant route materials and replace and re-grade so that the running slope does not exceed 5%.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2/403.3
2016 CBC: 2016 CBC 11B-403.3

Quantity: 16 sq ft

Comment #: CHM-35 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $1,800

Category **Exterior Access** **Precedence 7** **Year 3** **Cost with GC (30%):** $2,340

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Detectable Warning

There is no detectable warning surface (truncated dome mat) at the flush transition between the pedestrian and vehicular right-of-ways.

Measurement: 5 count

Recommended Remediation:

Install a detectable warning surface compliant with 2016 CBC 11B-705, across the entire width of the flush transition between pedestrian and vehicular right-of-ways.

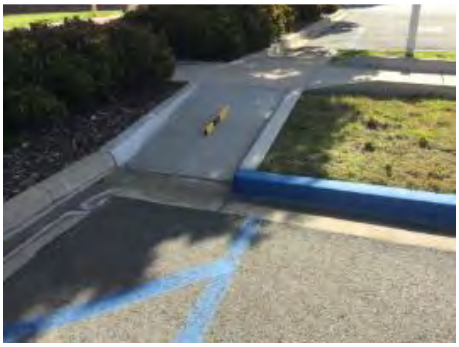
Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-406.5.12

Quantity: 5 each

Comment #: CHM-36 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $4,500

Category Exterior Access **Precedence 7** **Year 3** **Cost with GC (30%):** $5,850



Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Running Slope

The running slope of the curb ramp exceeds the allowable 8.33% maximum grade.

Measurement: 15.8 % grade

Recommended Remediation:

Remove and dispose of materials and replace and re-grade to provide an accessible curb ramp. Drop the entire path to eliminate excessive running slope.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.2

Comment #: CHM-06 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,200

Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $1,560

Deficiency: Site Elements — Parking
ISA Marking — Contrast

The ISA symbol has deteriorated and no longer provides contrast with the ground surface.

Measurement: 3 count

Recommended Remediation:

Repaint the ISA. Striping shall be maintained per CBC 11B-108 and ADA CFR 25.133.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A

Quantity: 2 each

Comment #: CHM-27 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,500

Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Access Aisles — "No Parking"

The words "No Parking" in the access aisle have faded so that they are not contrasting with the ground surface.

Measurement: 2 count

Recommended Remediation:

Mark access aisles 'No Parking' or repaint existing markings to provide contrast compliant with local requirements. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 2 each

Comment #: CHM-28 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,500
Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $1,950

Deficiency: Site Elements — Parking
Identification Signs — Minimum Fine

There is no sign indicating the minimum fine for parking in accessible stall without required placard. Bottom of the lowest sign should be 60 inches minimum above parking paving.

Measurement: 3 count

Recommended Remediation:

Install sign below the sign with the ISA symbol that states "Minimum Fine $250". Raise signs so that the bottom of the sign is higher than 60 inches above the ground.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.6
2016 CBC: 2016 CBC 11B-502.6.2

Quantity: 3 each

Comment #: CHM-29 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $1,200
Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $1,560

Deficiency: Site Elements — Parking
ISA Marking — Contrast

The ISA symbol has deteriorated and no longer provides contrast with the ground surface.

Measurement: 3 count

Recommended Remediation:

Repaint the ISA. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

Quantity: 3 each

Comment #: CHM-30 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $750

Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $975

Deficiency: Site Elements — Parking
Path of Travel — General

There is no path of travel from the accessible parking to the facility entrance.

Measurement: 1 count

Recommended Remediation:

A) Remove the features designating this as an accessible stall. There are already 18 additional Accessible parking spaces which is more than minimum requirement.
B) Or, Relocate so that the provided stall is connected to an accessible route.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 206.2.2
2016 CBC: 2016 CBC 11B-502.7

Quantity: 1 each

Comment #: CHM-31 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $2,250

Category Parking **Precedence 7** **Year 3** **Cost with GC (30%):** $2,925

Deficiency: Site Elements — Parking
Van Accessibility — Count

One access space in every six access spaces (or portion of 6) is not van accessible.

Measurement: 0 count

Recommended Remediation:

Reconfigure spaces by repainting lines. Include signage indicating van accessible spaces. With 18 Accessible spaces, minimum 3 van accessible Spaces are required. Verify if this met the old code, this is only required to be updated when restriped.

Facility: Cultural Homestead
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:

2016 CBC: 2016 CBC 11B-402.2

Quantity: 100 sq ft

Comment #: CHM-62 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $36,000
Category Exterior Access **Precedence 7** **Year 3** **Cost with GC (30%):** $46,800

Deficiency: Site Elements — Exterior Access Route
Surface Continuity — Vertical Displacement

There exists a height difference between concrete slabs of equal to or greater than 1/4 inch.

Measurement: 1.5 inches

Recommended Remediation:

Compress and pack decomposed granite so that the walkway transitions are flush. Approximately 12,000 sq ft. The drain placement near the concrete paths make it difficult to maintain decomposed granite. Maintain a 1:48 slope maximum in any direction.

Facility: Cultural Homestead
Floor/Area: Museum
Room/Spot: All Grounds

Code References:
1991 ADAAG: 4.5.2
2010 ADAS: 303.2/303.3
2016 CBC: 2016 CBC 11B-303.2

Quantity: ? sq ft

Comment #: CHM-63 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $900
Category Exterior Access **Precedence 7** **Year 3** **Cost with GC (30%):** $1,170

Deficiency: Site Elements — Exterior Access Route
Protrusion — Vertical Clearance

Tree branches overhang the pedestrian pathway and obstruct the clear 80 inches of required vertical clearance.

Measurement: 64 inches

Recommended Remediation:

Trim the tree branches so that a vertical clearance of minimum 80 inches is maintained along all pedestrian pathways.

Facility: Cultural Homestead
Floor/Area: Museum
Room/Spot: All Grounds

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-307.2

Quantity: 10 each

Comment #: CHM-64 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $0

Category Exterior Access **Precedence 7** **Year 3** **Cost with GC (30%):** $0

Deficiency: Site Elements — Exterior Access Route
Ramps — Safe Return

The stairs do not provide compliant handrails with extensions that provide a safe return.

Measurement: 1.5 inches

Recommended Remediation:

Provide a safe return for the handrail extensions. Include warning stripes for the adjacent stairs at the east entrance. No image available for the stairs because of workers.

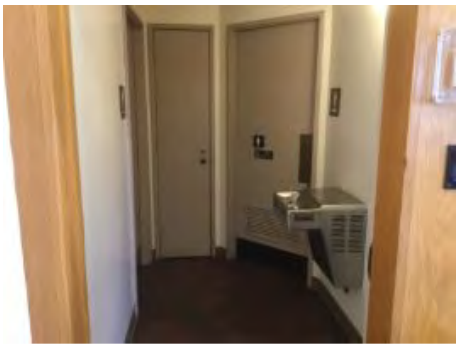
Facility: Cultural Homestead
Floor/Area: Museum
Room/Spot: Workman House Ramp

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.8/505
2016 CBC: 2016 CBC 11B-505.10.1

Quantity: 1 each

Comment #: CHM-70 **Priority: 2** **Severity: C** **Estimated Direct Cost:** $5,000

Category General **Precedence 8** **Year 3** **Cost with GC (30%):** $6,500



Deficiency: Public Toilet Rooms — General Accessibility
Clearance Space — General

The available space provided for the restrooms is not adequate clearance space. Additional features are noncompliant including lack of accessible stalls and hi/lo drinking fountains.

Measurement: 1 count

Recommended Remediation:

The entire restroom needs to be demolished and an accessible restroom needs to be engineered in its place. A) Recommend making both restrooms gender neutral. B) Reconfigure 1 restroom to be accessible. C) Provide signage at non-accessible restroom directing to accessible restroom. D) Provide ISA on accessible restroom.

Facility: Cultural Homestead
Floor/Area: Museum
Room/Spot: Homestead Museum

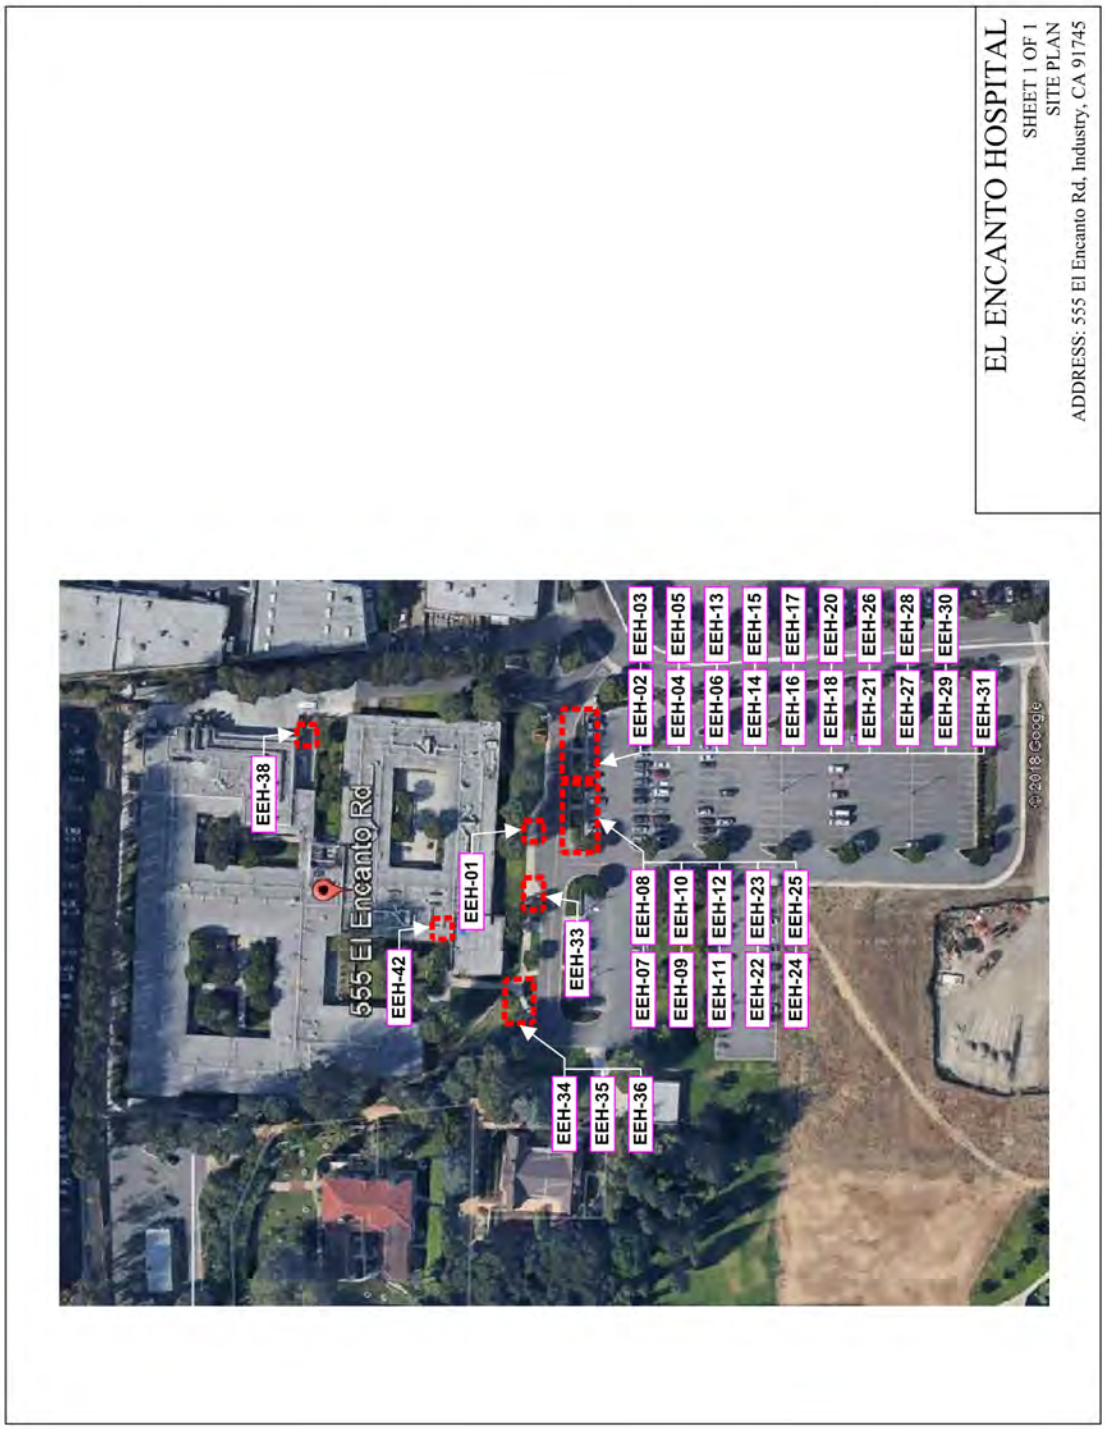
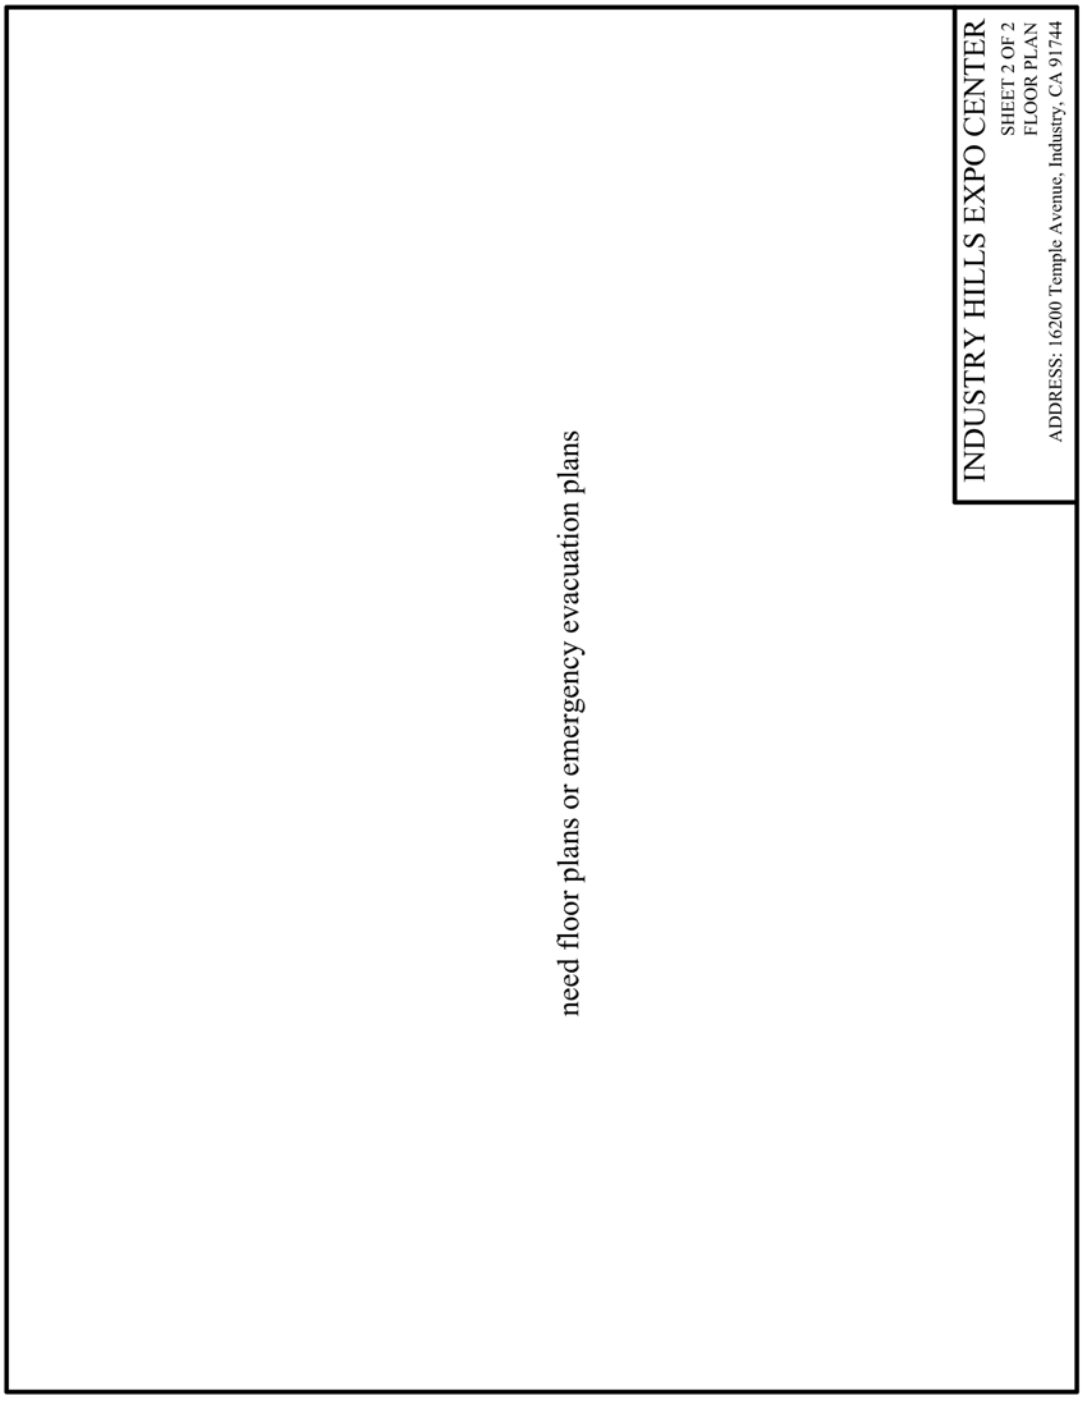
EL ENCANTO HOSPITAL

Facility Site Plan:



Facility Floor Plan:



FACILITY: EL ENCANTO HOSPITAL

Facility Description:

Facility was constructed in the year 555 El .

Facility Address: 1963

This facility is used for the following programs:

Skilled nursing facilities offering a wide variety of healthcare and nursing services including comprehensive subacute and skilled nursing care, as well as long term residential care.

Comment #: EEH-01 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $500

Category Parking **Precedence 4** **Year 1** **Cost with GC (30%):** $650

Deficiency: Site Elements — Parking
Tow Away Signage — Verbiage

The verbiage on the "tow-away" sign is not compliant with 2016 CBC 11B-502.8.2.

Measurement: 1 count

Recommended Remediation:

Remove and replace the current sign with a Caltrans R-100B sign, and provide reclaim vehicle information as a permanent part of the sign. An additional sign shall be posted either; 1) in a conspicuous place at each entrance to an off-street parking facility or 2) immediately adjacent to on-site accessible parking and visible from each parking space.

Facility: El Encanto Hospital
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 208.2
2016 CBC: 2016 CBC 11B-502.8.2

Category Exterior Access **Precedence 4** **Year 1** **Cost with GC (30%):** $468

Deficiency: Site Elements — Exterior Access Route
Curb Ramp — Detectable Warning

There is no detectable warning surface (truncated dome mat) at the flush transition between the pedestrian and vehicular right-of-ways.

Measurement: 1 count

Recommended Remediation:

Install a detectable warning surface compliant with 2016 CBC 11B-705, across the entire width of the flush transition between pedestrian and vehicular right-of-ways.

Facility: El Encanto Hospital
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-406.5.12

Quantity: 1 each

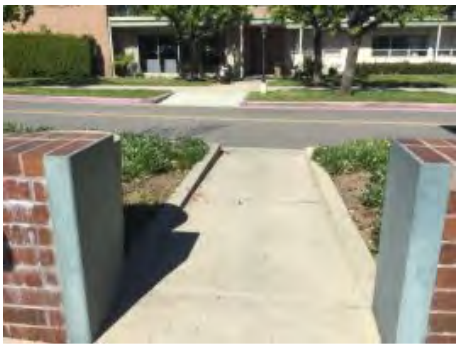
Comment #: EEH-31 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $0

Category Exterior Access **Precedence 4** **Year 1** **Cost with GC (30%):** $0



Deficiency: Site Elements — Exterior Access Route
Surface — Cross Walk Striping

The curb ramps are not immediately adjacent and there is no cross walk striping defining the path of travel.

Measurement: 1 count

Recommended Remediation:

Create a cross walk striping to opposite ramp to facility entrance.

Facility: El Encanto Hospital
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:

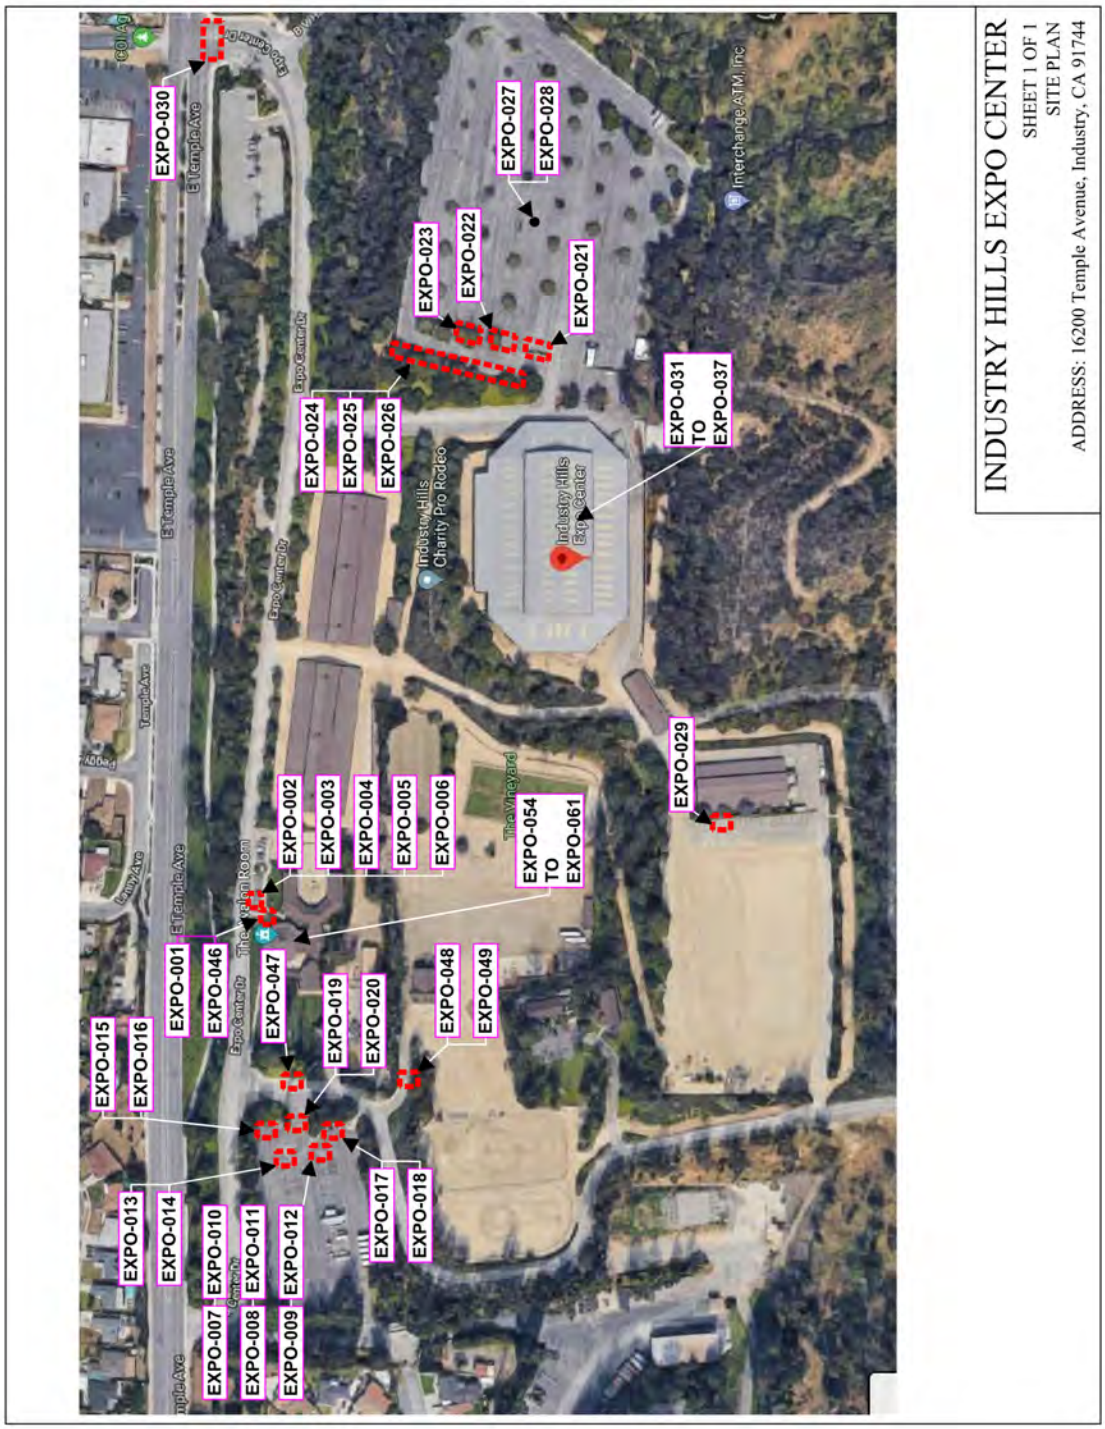
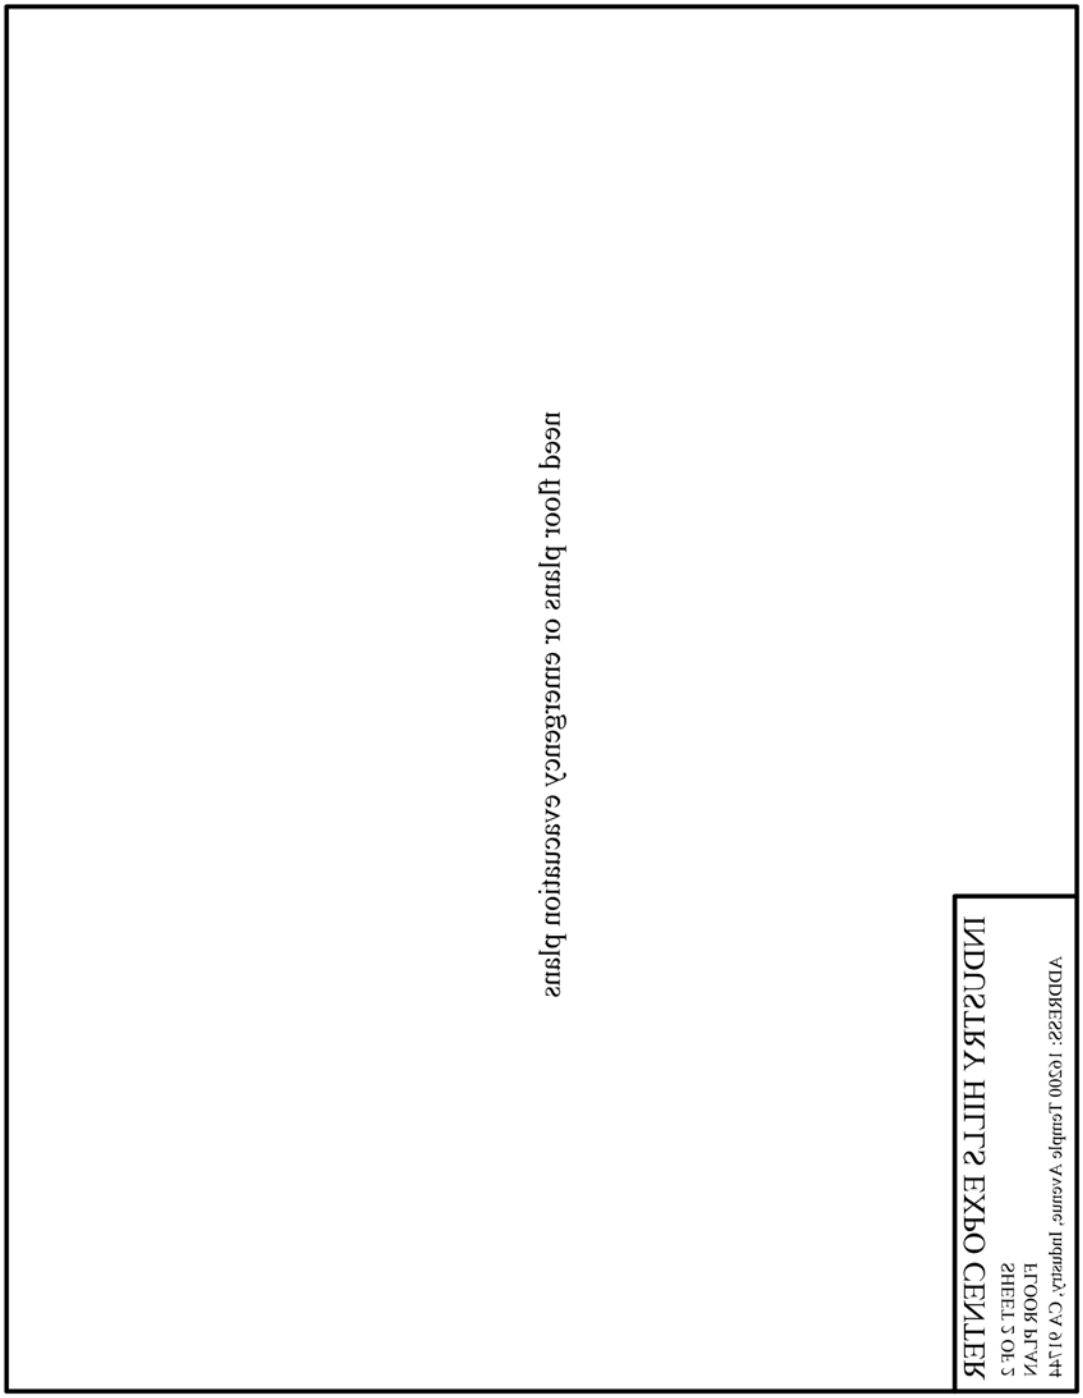
EXPO CENTER

Facility Site Plan:



Facility Floor Plan:



FACILITY: EXPO CENTER

Facility Description:

Facility was constructed in the year 1982 .

Facility Address: 16200 Temple Avenue

This facility is used for the following programs:

Equestrian Center
Private Banquets/Parties/Events
Open-air stadium (horse shows, rodeo, soccer, boxing, motorcycles, dog shows, competitions, etc.)
Office building for facility office staff

Comment #: EXPO-148 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $0

Category **Seating** **Precedence 8** **Year 3** **Cost with GC (30%):** $0

Deficiency: Rooms and Spaces — Seating
Assembly Areas — Wheelchair Space:

There are not an adequate number of wheelchair spaces provided. See standards for acceptable amount of seating.

Measurement: 4 count

Recommended Remediation:

Reconfigure available seating to provide an adequate number of wheelchair accessible spaces. There needs to be 51 wheel chair designated spaces including a companion seat. As per the brochure stating 5000 spectator occupancy and table CBC 11B-221.2.1.1. Each section needs a raised seating area. Verify with fire marshal about whether or not companion seating can be made at the wall along the path with railing. This is the more economical solution.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Bleachers

Code References:
1991 ADAAG: 4.1.3(9) (a)
2010 ADAS: 221.2.1.1
2016 CBC: 2016 CBC 11B-221.2.1.1

Quantity: 51 each

Comment #: EXPO-031 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $15

Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $20

Deficiency: Site Elements — Exterior Access Route
Ramps — Running Slope

The ramp has no space limitations and the running slope, parallel to the path of travel exceeds the allowable 8.33% grade.

Measurement: 9.6 % grade

Recommended Remediation:

Relocate the ramp so that the slope does not exceed the allowable 8.33%. Modular ramp

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Accessible Seating Ramp

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.7
2016 CBC: 2016 CBC 11B-405.2

Quantity: 1 each

Comment #: EXPO-032 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $500

Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $650

Deficiency: Site Elements — Exterior Access Route
Ramps — Handrail Extensions

The handrail extensions do not extend 12" minimum before turning to terminate.

Measurement: 2 count

Recommended Remediation:

Alter the handrails extensions are not parallel to the ground. Handrails must be level over the ramp landing.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Accessible Seating Ramp

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.8/505
2016 CBC: 2016 CBC 11B-505.10

Quantity: 2 ln ft

Comment #: EXPO-033 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $450

Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $585

Deficiency: Site Elements — Exterior Access Route
Drop-off — Guardrails

An abrupt drop-off exists that is greater 30 inches, and the guardrail openings allow for a 4 inch diameter sphere to pass through.

Measurement: 1 count

Recommended Remediation:

Add a guardrail and edge protection that does not allow the passing of a 4 inch diameter sphere.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Bleachers

Code References:
1991 ADAAG:
2010 ADAS: 206.4.3
2016 CBC: 2016 CBC 1015.2, 2016 CBC 1015.4

Quantity: 18 ln ft

Comment #: EXPO-034 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $4,620
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $6,006

Deficiency: Site Elements — Exterior Access Route
Stairs — Warning Stripes

Warning stripes are not provided at all treads and/or the upper approach.

Measurement: 0 count

Recommended Remediation:

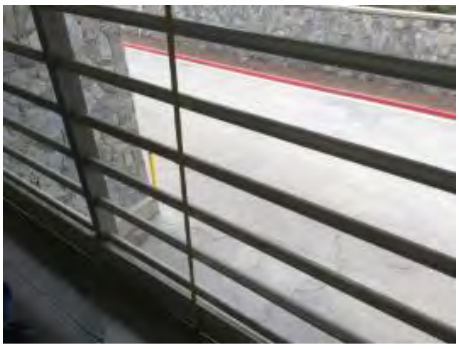
Add contrasting stripes between 2 and 4 inches wide across the entire width of each tread and/or the upper approach. Bleachers require warning stripes. Approx. 4 feet per step.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Bleachers

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-504.4.1

Quantity: 154 each

Comment #: EXPO-142 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $18,750
Category **Interior Access** **Precedence 8** **Year 3** **Cost with GC (30%):** $24,375



Deficiency: Rooms and Spaces — Interior Access Route
Drop-off — Guardrails

An abrupt drop-off exists that is greater 30 inches, and the guardrail openings allow for a 4 inch diameter sphere to pass through.

Measurement: 6.5 inches

Recommended Remediation:

Add a guardrail and edge protection that does not allow the passing of a 4 inch diameter sphere. Attach mesh backing is the most economical option.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Bleachers

Code References:
1991 ADAAG:
2010 ADAS: 206.4.3
2016 CBC: 2016 CBC 1015.2, 2016 CBC 1015.4

Quantity: 750 ln ft

Comment #: EXPO-035 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $0

Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $0

Deficiency: Site Elements — Exterior Access Route
General Accessibility — Public Areas

If the public are allowed in the announcer's booth than there must be accessible features.

Measurement: 1 count

Recommended Remediation:

Provide a wheelchair lift.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Announcer Booth

Code References:
1991 ADAAG:
2010 ADAS: 206.4.1
2016 CBC: 2016 CBC 11B-206.1

Quantity: 1 each

Comment #: EXPO-036 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $45,000

Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $58,500

Deficiency: Site Elements — Exterior Access Route
Protrusion — Vertical Clearance

Object/s located on the accessible circulation path that are less than 80 inches high and greater than 27 inches protrude more than 4 inches into the path.

Measurement: 79 inches

Recommended Remediation:

Provide cane detectable barriers all along the underside of the bleachers. Approximately 500 linear feet. Existing partitions are acceptable, or relocate picnic benches so they are not located under bleachers.

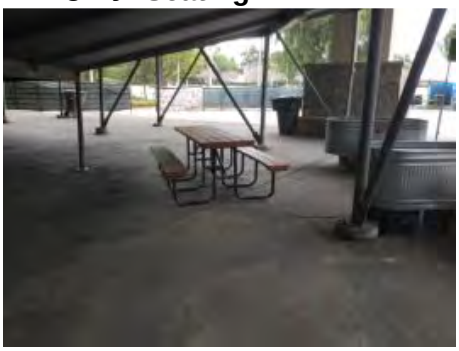
Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Tables Under Bleachers

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-307.2

Quantity: 500 ln ft

Comment #: EXPO-149 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $3,900

Category **Seating** **Precedence 8** **Year 3** **Cost with GC (30%):** $5,070



Deficiency: Rooms and Spaces — Seating
Dining and Work — General Accessibility

A minimum of 5% (with at least 1) of the total seating and standing space is not accessible for use of people in wheelchairs.

Measurement: 0 inches

Recommended Remediation:

Add an accessible table or work surface that provides compliant knee space. Need minimum 5 wheelchair seating spaces. Get 3 new picnic tables with seating.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Tables Under Bleachers

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2
2016 CBC: 2016 CBC 11B-902.2

Quantity: 3 each

Comment #: EXPO-037 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $2,880

Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $3,744

Deficiency: Site Elements — Exterior Access Route
Protrusion — Vertical Clearance

Object/s located on the accessible circulation path that are less than 80 inches high and greater than 27 inches protrude more than 4 inches into the path.

Measurement: 79 count

Recommended Remediation:

Provide cane detectable barriers all along the underside of the bleachers at angled support beams. Approximately 32 locations, or create a barrier so no one can walk under bleachers. All angled beams. At 32 locations.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Tables Under Bleachers

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-307.2

Quantity: 32 each

Comment #: EXPO-038 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $768
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $998

Deficiency: Site Elements — Exterior Access Route
Stairs — Warning Stripes

Warning stripes are not provided at all treads and/or the upper approach.

Measurement: 16 count

Recommended Remediation:

Add contrasting stripes between 2 and 4 inches wide across the entire width of each tread and/or the upper approach.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Both Stairs

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-504.4.1

Quantity: 128 ln ft

Comment #: EXPO-039 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $1,840
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $2,392

Deficiency: Site Elements — Exterior Access Route
Stairs — Handrails

The stairs do not provide compliant handrails.

Measurement: 2 count

Recommended Remediation:

Modify handrails as needed to provide compliant handrails and extensions. Curbs must be included in stair case. Extend the handrails on both stair cases.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Exterior Access Route

Code References:
1991 ADAAG: N/A
2010 ADAS: 505.2
2016 CBC: 2016 CBC 11B-505.4

Quantity: 16 ln ft

Comment #: EXPO-040 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $1,440
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $1,872

Deficiency: Site Elements — Exterior Access Route
Surface Continuity — Vertical Displacement

There exists a height difference between concrete slabs of equal to or greater than 1/4 inch.

Measurement: .75 inches

Recommended Remediation:

Grind or Bevel concrete to provide a difference in height of no greater than 1/4 inch while maintaining 1:48 slope maximum in any direction.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Exterior Access Route

Code References:
1991 ADAAG: 4.5.2
2010 ADAS: 303.2/303.3
2016 CBC: 2016 CBC 11B-303.2

Quantity: 16 sq ft

Comment #: EXPO-041 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $28,286
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $36,772

Deficiency: Site Elements — Exterior Access Route
Ramps — Landings: Bottom

There is no landing provided at the bottom of the ramp with a cross slope of maximum 2.0%, a length of 6 feet and a width equal to that of the ramp.

Measurement: 5.3 % grade

Recommended Remediation:

Alter ramp landing to provide level platform of 60 inches for the full width of the ramp. Include handrail extensions.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Exterior Access Route

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.7
2016 CBC: 2016 CBC 11B-405.7

Quantity: 40 sq ft

Comment #: EXPO-042 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $28,286
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $36,772

Deficiency: Site Elements — Exterior Access Route
Ramps — Edge Protection

Edge protection is not provided full length of ramp at both sides.

Measurement: 0 count

Recommended Remediation:

Must provide wheel guide in line with the handrails.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Exterior Access Route

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.9
2016 CBC: 2016 CBC 11B-405.9

Quantity: 130 ln ft

Comment #: EXPO-043 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $1,300
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $1,690

Deficiency: Site Elements — Exterior Access Route
Drop-off — Guardrails

An abrupt drop-off exists that is greater 30 inches, and the guardrail openings allow for a 4 inch diameter sphere to pass through.

Measurement: 1 count

Recommended Remediation:

Add a guardrail and edge protection that does not allow the passing of a 4 inch diameter sphere. Provide guardrail, 42 inch minimum height, along the entire outside of the ramp.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Exterior Access Route

Code References:
1991 ADAAG:
2010 ADAS: 206.4.1
2016 CBC: 2016 CBC 1015.2, 2016 CBC 1015.4

Quantity: 52 ln ft

Comment #: EXPO-150 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $5,200
Category **Seating** **Precedence 8** **Year 3** **Cost with GC (30%):** $6,760

Deficiency: Rooms and Spaces — Seating
Dining and Work — General Accessibility

A minimum of 5% (with at least 1) of the total seating and standing space is not accessible for use of people in wheelchairs.

Measurement: 0 count

Recommended Remediation:

Add an accessible table or work surface that provides compliant knee space. Provide 4 accessible seating locations based on existing seating count of 76 available seats. If seats are added, the ADA ratio must be maintained.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Picnic Area

Code References:
1991 ADAAG: 4.3.7
2010 ADAS: 402.2
2016 CBC: 2016 CBC 11B-902.2

Quantity: 4 each

Comment #: EXPO-044 **Priority: 1** **Severity: A** **Estimated Direct Cost:** $11,500
Category **Exterior Access** **Precedence 6** **Year 3** **Cost with GC (30%):** $14,950

Deficiency: Site Elements — Exterior Access Route
Stairs — Handrail Extensions

The handrail extensions do not extend 12" minimum before turning to terminate.

Measurement: 4 feet

Recommended Remediation:

Remove and replace the handrails. Provide extensions at the top at bottom of the stairs that extend 12 inches parallel to the ground beyond the last tread.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Stairs

Code References:
1991 ADAAG: N/A
2010 ADAS: 505.1
2016 CBC: 2016 CBC 11B-505.10

Quantity: 100 ln ft

Comment #: EXPO-062 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $961

Category **Signs** **Precedence 8** **Year 3** **Cost with GC (30%):** $1,249

Deficiency: Public Toilet Rooms — Signs
Geometric Sign — Contrast

Color of door sign does not provide visual contrast with the color of the door.

Measurement: 1 count

Recommended Remediation:

Remove and replace door sign. New door signs shall provide visual contrast with the color of the door

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A
2016 CBC: 2016 CBC 11B-703.6.2

Quantity: 1 each

Comment #: EXPO-063 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $961

Category **Signs** **Precedence 8** **Year 3** **Cost with GC (30%):** $1,249

Deficiency: Public Toilet Rooms — Signs
Tactile Sign — General

A tactile wall sign, identifying the public restroom, is not provided.

Measurement: 1 count

Recommended Remediation:

Install new tactile wall sign providing raised character text and Braille. Locate sign at latch side of door.

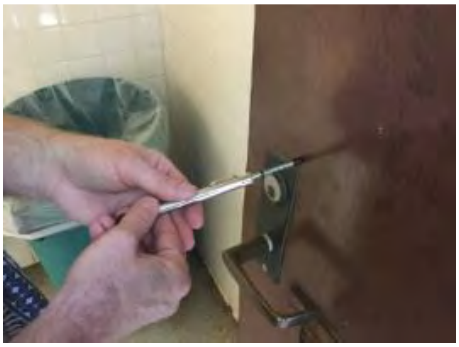
Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.1.3(16(a))
2010 ADAS: 216.2/703.4.1&2
2016 CBC: 2016 CBC 11B-703.1

Quantity: 1 each

Comment #: EXPO-064 **Priority: 3** **Severity: A** **Estimated Direct Cost:** $90

Category **Entrance** **Precedence 8** **Year 3** **Cost with GC (30%):** $117



Deficiency: Public Toilet Rooms — Entrance
Door Operation — Opening Force

The force required to operate the door exceeds the allowable 5 lbf.

Measurement: 11 lbf

Recommended Remediation:

Adjust or replace the door closers.

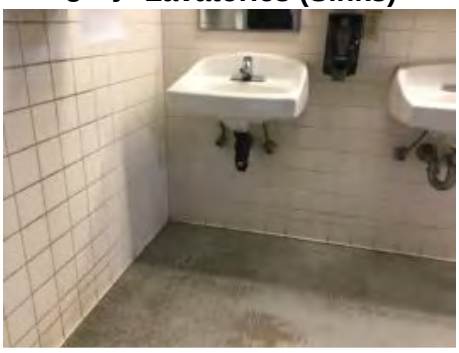
Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.13.11
2010 ADAS: 404.2.9
2016 CBC: 2016 CBC 11B-404.2.9.4

Quantity: 1 each

Comment #: EXPO-065 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $90

Category **Lavatories (Sinks)** **Precedence 8** **Year 3** **Cost with GC (30%):** $117



Deficiency: Public Toilet Rooms — Lavatories (Sinks)
Exposed Pipes — Pipe Insulation

c

Measurement: 1 count

Recommended Remediation:

Install new insulation to cover pipes.

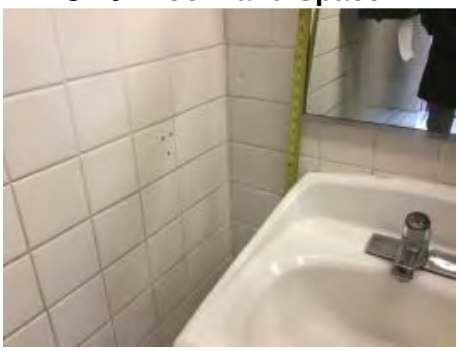
Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.24.6
2010 ADAS: 606.5
2016 CBC: 2016 CBC 11B-606.5

Quantity: 1 each

Comment #: EXPO-066 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $1,200

Category **Room and Space** **Precedence 8** **Year 3** **Cost with GC (30%):** $1,560



Deficiency: Public Toilet Rooms — Room and Space
Mirror — Height

The bottom edge of the reflecting surface of a mirror over the lavatory or countertop is higher than the allowable 40 inches above the floor.

Measurement: 40.5 inches

Recommended Remediation:

Lower mirror or install another mirror with bottom edge of reflective surface 35" maximum above finish floor.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: N/A
2010 ADAS: 603.3
2016 CBC: 2016 CBC 11B-603.3

Quantity: 1 each

Comment #: EXPO-067 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $90

Category **Dispensers** **Precedence 8** **Year 3** **Cost with GC (30%):** $117

Deficiency: Public Toilet Rooms — Dispensers
Paper Towel — Protrusion

Bottom of paper towel dispenser is greater than 27" above finish floor and projects greater than 4" from wall.

Measurement: 42 inches

Recommended Remediation:

Replace with semi-recessed or recessed paper towel dispenser or extend waste receptacle, which is below, outward so maximum 4" projection beyond.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.4.1
2010 ADAS: 404.2.9
2016 CBC: 2016 CBC 11B-307.2

Quantity: 1 each

Comment #: EXPO-068 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $90

Category **General** **Precedence 8** **Year 3** **Cost with GC (30%):** $117

Deficiency: Public Toilet Rooms — General Accessibility — Accessory Count — Ambulatory

There are a minimum of 6 total toilet compartments and urinals and the number of ambulatory compartments is not equal to the number of accessible compartments.

Measurement: 0 count

Recommended Remediation:

Provide an ambulatory compartment with compliant grab bars and an outward swinging stall door.

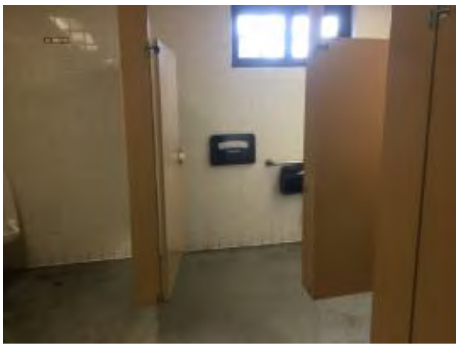
Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG:
2010 ADAS:
2016 CBC: 2016 CBC 11B-213.3.1

Quantity: 1 each

Comment #: EXPO-069 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $250

Category **Stall Door** **Precedence 8** **Year 3** **Cost with GC (30%):** $325



Deficiency: Public Toilet Rooms — Stall Door — Closer — Self-closing

The accessible stall door is not self-closing.

Measurement: 1 count

Recommended Remediation:

Replace self-closing hinges.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.13.10
2010 ADAS: 404.2.8.1
2016 CBC: 2016 CBC 11B-604.8.1.2

Quantity: 1 each

Comment #: EXPO-070 **Priority: 3** **Severity: C** **Estimated Direct Cost:** $90
Category **Stall Door** **Precedence 8** **Year 3** **Cost with GC (30%):** $117

Deficiency: Public Toilet Rooms — Stall Door Hardware — Lock

The accessible stall door lock is not operable with one hand and/or requires tight grasping, pinching or twisting of the wrist to operate.

Measurement: 1 count

Recommended Remediation:

Replace stall door locks. Provide sliding lock not rotating lock.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.13.9
2010 ADAS: 309/404.2.7 **Quantity:** 1 each
2016 CBC: 2016 CBC 11B-604.8.1.2, 2016 CBC 11B-404.2.7

Comment #: EXPO-071 **Priority: 3** **Severity: B** **Estimated Direct Cost:** $1,000
Category **Toilet Compartment** **Precedence 8** **Year 3** **Cost with GC (30%):** $1,300

Deficiency: Public Toilet Rooms — Toilet Compartment Grab Bars (Both) — Clearance

The rear grab bar does not provide minimum allowable space of 1 1/2 inches between the bottom of the grab bar and any protruding objects below.

Measurement: .75 inches

Recommended Remediation:

Relocate the grab bar. Lower the toilet paper dispenser and/or raise the rear grab bar.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.17.6
2010 ADAS: 609.3 **Quantity:** 1 each
2016 CBC: 2016 CBC 11B-609.3

Comment #: EXPO-072 **Priority: 5** **Severity: D** **Estimated Direct Cost:** $2,500
Category **Toilet Compartment** **Precedence 8** **Year 3** **Cost with GC (30%):** $3,250

Deficiency: Public Toilet Rooms — Toilet Compartment
Seat Cover Dispenser — Height

The operable part of the toilet seat dispenser is higher than the allowable 40 inches.

Measurement: 44 inches

Recommended Remediation:

Adjust the height of the dispenser so that the highest operable part is less than 40 inches AFF. This meets the federal requirements.

Facility: Expo Center
Floor/Area: El Patio Cafe
Room/Spot: Men's Restroom

Code References:
1991 ADAAG: 4.23.7

Deficiency: Site Elements — Parking
Identification Signs — Minimum Fine

There is no sign indicating the minimum fine for parking in accessible stall without required placard. Bottom of the lowest sign should be 60 inches minimum above parking paving.

Measurement: 2 count

Recommended Remediation:

Install sign below the sign with the ISA symbol that states "Minimum Fine $250".

Facility: Expo Center
Floor/Area: Avalon Room and Pavilion
Room/Spot: Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.6
2016 CBC: 2016 CBC 11B-502.6.2

Quantity: 2 each

Comment #: EXPO-014 **Priority: 1** **Severity: B** **Estimated Direct Cost:** $2,000

Category **Parking** **Precedence 6** **Year 2** **Cost with GC (30%):** $2,600

Deficiency: Site Elements — Parking
Accessible Stall — Slope

The slope of the accessible parking spaces and aisles are steeper than the allowable 2.0%

Measurement: 2.8 % grade

Recommended Remediation:

Re-grade accessible surfaces so that the slope does not exceed 2.0%. Include striping, ISA, and access aisle.

Facility: Expo Center
Floor/Area: Avalon Room and Pavilion
Room/Spot: Parking

Code References:
1991 ADAAG: N/A

Category Parking **Precedence 6** **Year 2** **Cost with GC (30%):** $455

Deficiency: Site Elements — Parking
Space Count — General

There are not enough accessible parking spaces designated as per Table 11B-208.2.

Measurement: 0 count

Recommended Remediation:

14 spaces counted (See Site Plan). Regrade replace and restripe including ISA blue stall striping and access aisle and a connection to a path of travel towards the entrance that does not go behind other vehicles.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 208.2
2016 CBC: 2016 CBC 11B-208.2

Quantity: 126 sq ft

Comment #: EXPO-025 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $350
Category Parking **Precedence 6** **Year 2** **Cost with GC (30%):** $455

Deficiency: Site Elements — Parking
Space Count — General

There are not enough accessible parking spaces designated as per Table 11B-208.2.

Measurement: 0 count

Recommended Remediation:

Restripe and re sign including blue stall striping ISA and access aisles. Create path of travel in front of vehicle spaces to entrance. And signs. When you move spaces due to access aisle installation make sure new spaces are compliant with CBC 11B.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 208.2
2016 CBC: 2016 CBC 11B-208.2

Comment #: EXPO-026 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $67,500
Category Parking **Precedence 6** **Year 2** **Cost with GC (30%):** $87,750

Deficiency: Site Elements — Parking
Path of Travel — General

There is no path of travel from the accessible parking to the facility entrance.

Measurement: 8 count

Recommended Remediation:

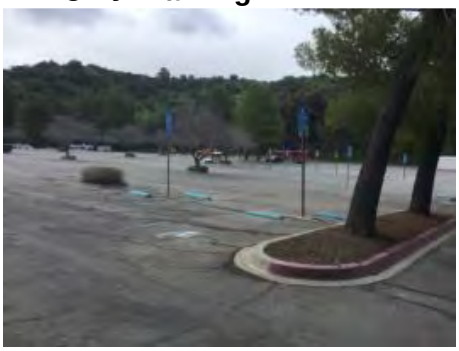
Compliant curb ramps (approx. 8) needed at each access aisle. And a compliant concrete route to the facility entrance (ticket checker). Route to be placed in front of spaces because they cannot go behind other parked vehicles per CBC 11B.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 206.2.2
2016 CBC: 2016 CBC 11B-502.7

Quantity: 1500 sq ft

Comment #: EXPO-027 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $2,250
Category Parking **Precedence 6** **Year 2** **Cost with GC (30%):** $2,925



Deficiency: Site Elements — Parking
Van Accessibility — Count

One access space in every six access spaces (or portion of 6) is not van accessible.

Measurement: 0 count

Recommended Remediation:

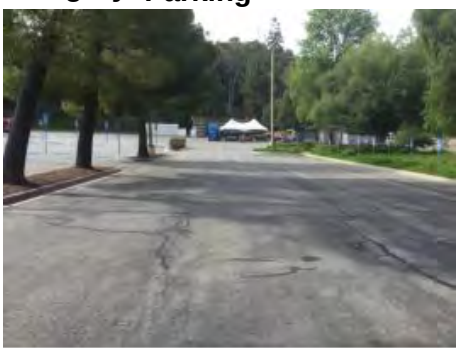
Reconfigure spaces by repainting lines. Include signage indicating van accessible spaces. 48 total accessible parking spaces existing. Of which only 5 are van accessible. Minimum 8 are required.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 208.2
2016 CBC: 2016 CBC 11B-208.2.4

Quantity: 3 each

Comment #: EXPO-028 **Priority: 1** **Severity: C** **Estimated Direct Cost:** $17,500
Category Parking **Precedence 6** **Year 2** **Cost with GC (30%):** $22,750



Deficiency: Site Elements — Parking
Space Count — General

There are not enough accessible parking spaces designated as per Table 11B-208.2.

Measurement: 50 count

Recommended Remediation:

Reengineer the parking lot to provide compliant accessible parking. There are 750 total spaces in the lot. 50 accessible spaces are required.

Facility: Expo Center
Floor/Area: Grand Arena
Room/Spot: Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 208.2

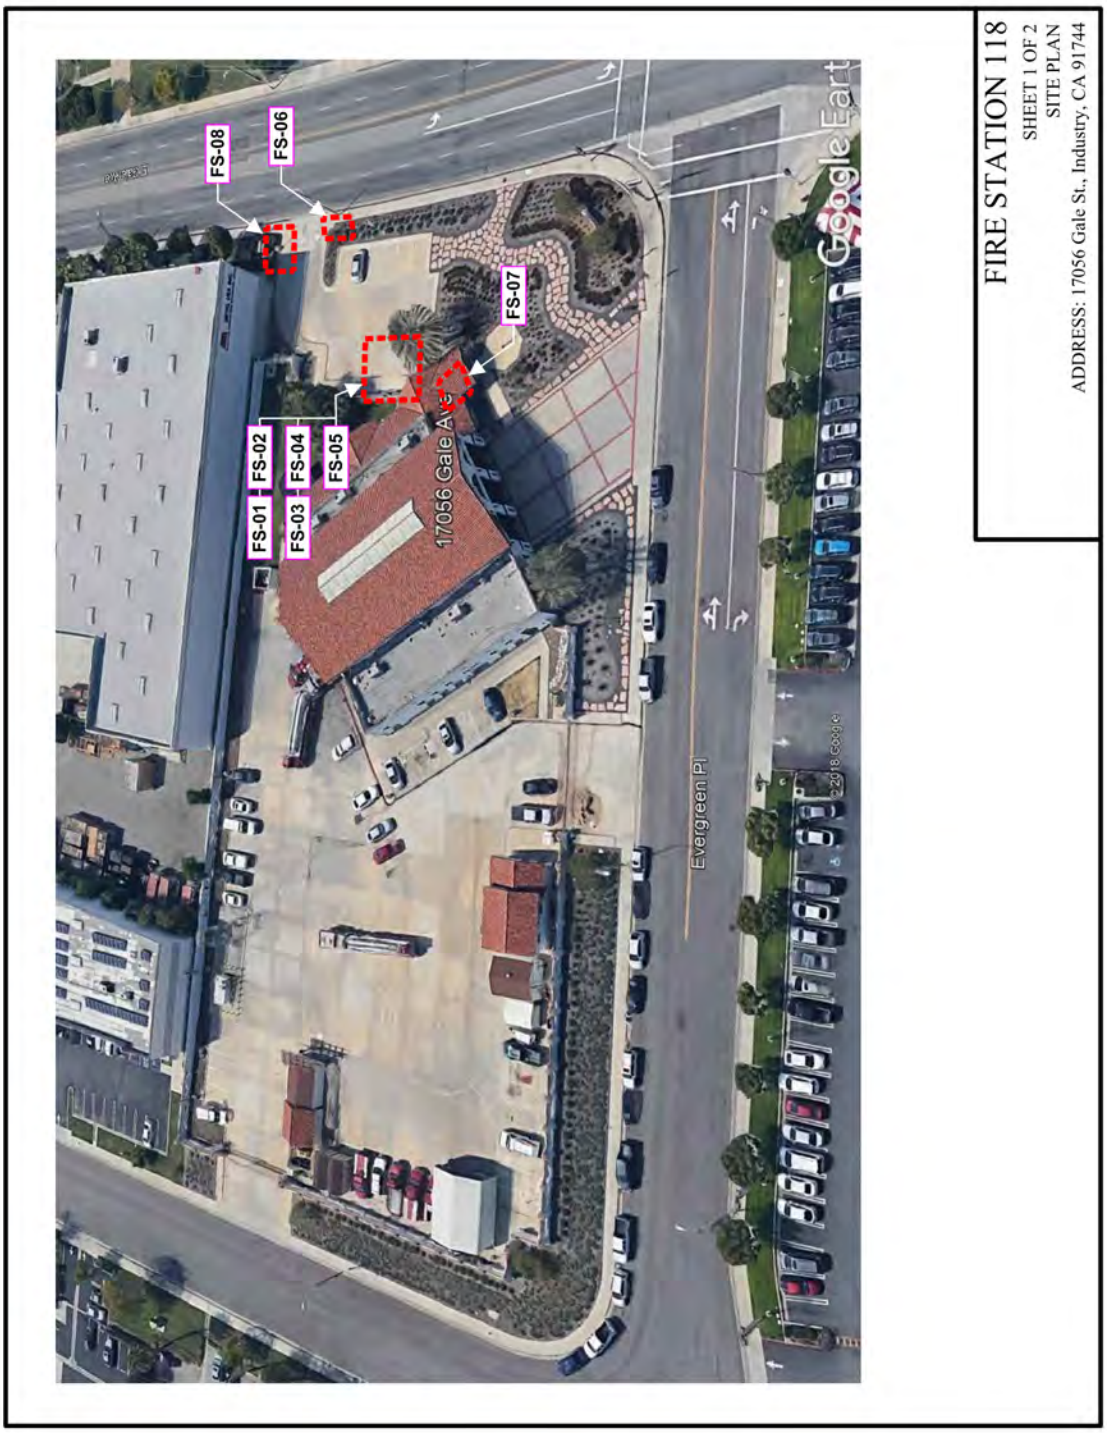
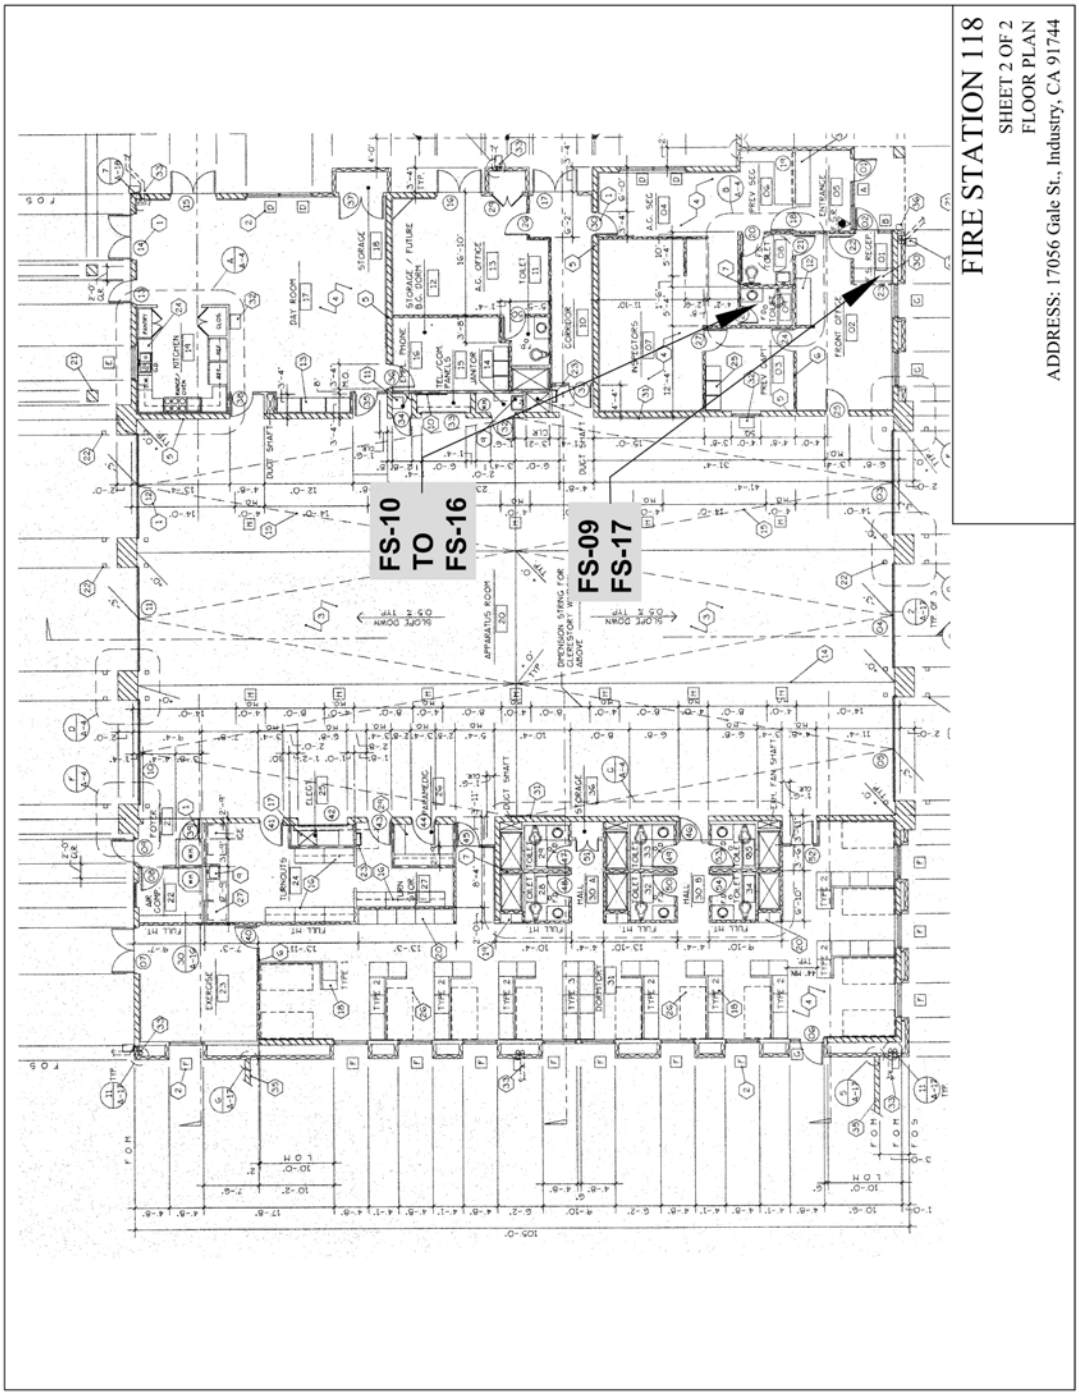
FIRE STATION

Facility Site Plan:



Facility Floor Plan:



FACILITY: FIRE STATION

Facility Description:

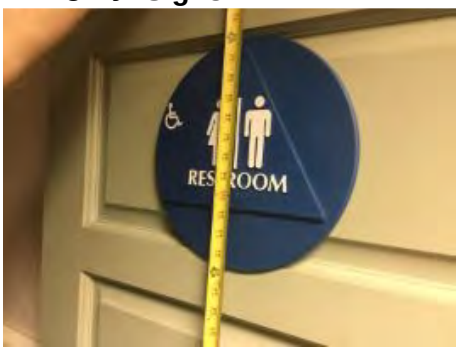
Facility was constructed in the year 1995 .

Facility Address: 17056 Gale St.

This facility is used for the following programs:

Fire Station

Comment #: FS-10 **Priority:** 5 **Severity:** D **Estimated Direct Cost:** $961
Category Signs **Precedence** 8 **Year** 3 **Cost with GC (30%):** $1,249



Deficiency: Public Toilet Rooms — Signs
Geometric Sign — Contrast and Height

The geometric symbols do not contrast with eachother. Additionally, the center of the geometric sign exceeds the allowable 60 inches AFF.

Measurement: 66 inches

Recommended Remediation:

Install a new geometric sign in which the triangle contrasts with the circle and the ircle contrasts with the door. Install with the center of the sign at a height between 58 inches and 60 inches AFF.

Facility: Fire Station
Floor/Area: Lobby
Room/Spot: Unisex Restroom

Code References:
1991 ADAAG: N/A
2010 ADAS: N/A **Quantity:** 1 each
2016 CBC: 2016 CBC 11B-703.7.2.6.3, 2016 CBC 11B-703.7.2.6

Comment #: FS-11 **Priority:** 2 **Severity:** B **Estimated Direct Cost:** $0
Category Room and Space **Precedence** 8 **Year** 3 **Cost with GC (30%):** $0

Deficiency: Public Toilet Rooms — Room and Space
Clearance Space — Width

The width of the turning space provided is less than the allowable 60 inches minimum. Additionally, 18 inches minimum latch side pull clearance at the door is not provided.

Measurement: 48 inches

Recommended Remediation:

Remove the cabinet to provide compliant turn around space and latch side clearance.

Facility: Fire Station
Floor/Area: Lobby
Room/Spot: Unisex Restroom

Code References:
1991 ADAAG: 4.16.2
2010 ADAS: 604.2/604.8 **Quantity:** 1 each
2016 CBC: 2016 CBC 11B-304.3.2, 2016 CBC 11B-404.2.4.1

Comment #: FS-12 **Priority:** 3 **Severity:** C **Estimated Direct Cost:** $3,200
Category Toilet Compartment **Precedence** 8 **Year** 3 **Cost with GC (30%):** $4,160

Deficiency: Public Toilet Rooms — Toilet Compartment
Water Closet (Toilet) — Location

The center line of the toilet is either less than 17 inches or greater than 18 inches from the side wall or partition. The rear grab bar is aligned with misaligned toilet.

Measurement: 20.5 inches

Recommended Remediation:

Move the toilet and relocate the rear grab bar to compliant location for new toilet location.

Facility: Fire Station
Floor/Area: Lobby
Room/Spot: Unisex Restroom

Code References:
1991 ADAAG: 4.16.2
2010 ADAS: 604.2
2016 CBC: 2016 CBC 11B-604.2

Quantity: 1 each

Comment #: FS-13 **Priority:** 3 **Severity:** B **Estimated Direct Cost:** $2,000
Category Toilet Compartment **Precedence** 8 **Year** 3 **Cost with GC (30%):** $2,600

Deficiency: Public Toilet Rooms — Toilet Compartment
Side Grab Bar — Clearance

A minimum of 12 inch clearance above the grab bar is not provided.

Measurement: 1.5 inches

Recommended Remediation:

Relocate the seat cover dispenser so that it does not obstruct the clear space around the grab bar.

Facility: Fire Station
Floor/Area: Lobby
Room/Spot: Unisex Restroom

Code References:
1991 ADAAG: 4.17.6
2010 ADAS: 609.3
2016 CBC: 2016 CBC 11B-609.3

Comment #: FS-07 **Priority:** 1 **Severity:** B **Estimated Direct Cost:** $270
Category Exterior Access **Precedence** 3 **Year** 1 **Cost with GC (30%):** $351

Deficiency: Site Elements — Exterior Access Route
Slope — Running Slope

The running slope, parallel to the path of travel, exceeds the allowable 5% grade.

Measurement: 7.3 % grade

Recommended Remediation:

Add ramp features such as edge protection, level landings, and handrails.

Facility: Fire Station
Floor/Area: Path of Travel
Room/Spot: Ramp to Guest Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 405.2 **Quantity:** 18 ln ft
2016 CBC: 2016 CBC 11B-402.2

Comment #: FS-01 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $5,000
Category Parking **Precedence** 3 **Year** 1 **Cost with GC (30%):** $6,500

Deficiency: Site Elements — Parking
Curb Ramp — Curb Ramp

The access aisle does not maintain a clear width of 5 feet (60 inches) level surface due to the curb ramp encroachment.

Measurement: 0 feet

Recommended Remediation:

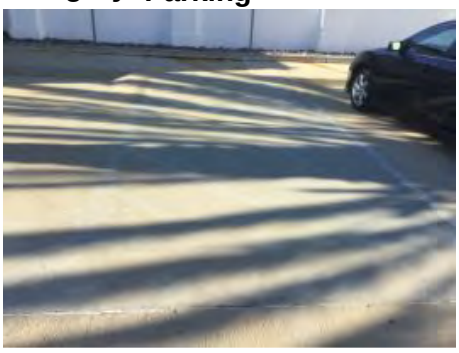
The built curb ramp cannot extend into the access aisle. Solution is to demolish and make a parallel curb ramp at the sidewalk.

Facility: Fire Station
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG:
2010 ADAS:
2016 CBC: 2016 CBC 11B-502.3.1

Quantity: 1 each

Comment #: FS-02 **Priority:** 1 **Severity:** C **Estimated Direct Cost:** $750
Category Parking **Precedence** 3 **Year** 1 **Cost with GC (30%):** $975



Deficiency: Site Elements — Parking
Access Aisles — "No Parking"

The access aisle does not provide the words "No Parking" in minimum 12 inch (305 mm) high lettering visible from the adjacent vehicular way.

Measurement: 1 count

Recommended Remediation:

Mark access aisles 'No Parking' or repaint existing markings to provide contrast compliant with local requirements. Accessible stalls and access aisles must be maintained per 11B-108, and ADA CFR 35.133.

Facility: Fire Station
Floor/Area: Parking
Room/Spot: Accessible Parking

Code References:
1991 ADAAG: N/A
2010 ADAS: 502.3.3
2016 CBC: 2016 CBC 11B-502.3.3

CALIFORNIA: The non-fire, hinged accessible exterior door takes more than 5#s of pressure to operate.

Location Description	Fire Station Business Entrance
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The opening force is 8 pounds.

Resolution

Adjust the closer or replace with an exterior non-fire door that requires no more 5 pounds of force for pushing or pulling the door open. This barrier must be removed in conjunction with barrier ID 394454. The cost of this barrier removal is covered under ID 394454 and therefore, the cost of this ID is shown as $0. The force for pushing or pulling open a door or gate other than fire doors shall be as follows: 1. Interior hinged doors and gates: 5 pounds (22.2 N) maximum. 2. Sliding or folding doors: 5 pounds (22.2 N) maximum. These forces do not apply to the force required to retract latch bolts or disengage other devices that hold the door or gate in a closed position. Note: Fire doors shall have a minimum opening force allowable by the appropriate administrative authority.

Relocate sink to compliant height with knee and toe clearances. Lavatories and sinks shall be installed with the front of the higher of the rim or counter surface 34" maximum above the finish floor or ground. Knee Clearance: Space under an element between 9" and 27" above the finish floor or ground shall be considered knee clearance. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Where knee clearance is required under an element as part of a clear floor space, the knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor or ground. Between 9" and 27" above the finish floor or ground, the knee clearance shall be permitted to reduce at a rate of 1" in depth for each 6" in height. Knee clearance shall be 30" wide minimum. Toe Clearance: Space under an element between the finish floor or ground and 9" above the finish floor or ground shall be considered toe clearance. Toe clearance shall extend 25" maximum under an element. Where toe clearance is required at an element as part of a clear floor space, the toe clearance shall extend 17" minimum under the element. Space extending greater than 6" beyond the available knee clearance at 9" above the finish floor or ground shall not be considered toe clearance. Toe clearance shall be 30" wide minimum.

Type	Service Counter
ADA Standard	CBC Chap 11B-306, 904.4

Barrier Detail

CALIFORNIA: The service counter does not have 36" long section that is 34" maximum above finished floor that is oriented for a parallel approach, or the service counter does not have a 36" long section that is 34" maximum above the finished floor, with knee and toe clearance oriented for a forward approach.

Location Description	East Region Administration Lobby
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The top of the service counter is 44" above the floor.

Resolution

Provide either a compliant parallel or a compliant forward approach to the counter. For a parallel approach, a portion of service counter must be 36" minimum long and 34" maximum above finished floor. Clear space of minimum 30" wide and minimum 48" long shall be located adjacent to the compliant portion of the counter, and oriented for a parallel approach, with the 48" dimension adjacent to the compliant portion. [EXCEPTION: Where the provided counter surface is less then 36" long, the entire counter surface shall be 34" high maximum above the finish floor.] For a forward approach, a portion of the service counter must be 36" long and 34" high maximum, with knee and toe clearance. Knee and toe clearance shall be provided for a forward approach. Clear floor space minimum 30" wide and minimum 48" long shall be provided on the compliant portion of the counter, and oriented for a forward approach. Clear space at the counter shall be maximum 2.08% in all directions and a firm and stable surface. Knee clearance shall be the space under an element between 9" and 27" above the finish floor or ground. Knee clearance shall extend 25" maximum under an element at 9" above the finish floor or ground. Where knee clearance is required under an element as part of a clear floor space, the knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor or ground. Between 9" and 27" above the finish floor or ground, the knee clearance shall be permitted to reduce at a rate of 1" in depth for each 6" in height. Knee clearance shall be 30" wide minimum. Space under an element between the finish floor or ground and 9" above the finish floor or ground shall be considered toe clearance. Toe clearance shall extend 25" maximum under an element. Where toe clearance is required at an element as part of a clear floor space, the toe clearance shall extend 17" minimum under the element .Space extending greater than 6" beyond the available knee clearance at 9" above the finish floor or ground shall not be considered toe clearance. Toe clearance shall be 30" wide minimum.

CALIFORNIA: The lavatory does not have the required knee and toe clearance.

Location Description	East Region Administration Lobby Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	The knee clearance at the lavatory is 6" deep at 27" above the floor.

Resolution

Provide at least 10% but no fewer than one lavatory with compliant knee and toe clearance. The lavatory shall maintain the maximum allowable height of 34" to the rim of the sink. The maximum allowable exterior bowl depth is 6-1/2". A compliant clear floor space of minimum 30" wide centered on the lavatory and minimum 48" deep, positioned for a forward approach, shall be provided. Space under an element between 9" and 29" above the finish floor or ground shall be considered knee clearance and shall comply. Knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor. The bottom of the front of the lavatory shall be minimum 29" above the finish floor. Knee clearance reduction is not allowed. Toe clearance shall be minimum 25" horizontal depth between the finish floor and 9" AFF. Knee and toe clearance shall be 30" wide minimum and centered on the lavatory. A compliant clear floor space, positioned for a forward approach, and compliant knee and toe clearance shall be provided. [EXCEPTIONS: 1. Toe clearance shall extend 19" maximum under lavatories 2. A lavatory in a toilet room or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to provide knee and toe clearance. 3. In residential dwelling units, cabinetry shall be permitted under lavatories and kitchen sinks provided that all of the following conditions are met: (a) the cabinetry can be removed without removal or replacement of the fixture; (b) the finish floor extends under the cabinetry; and (c) the walls behind and surrounding the cabinetry are finished. 4. A knee clearance of 24" minimum above the finish floor or ground shall be permitted at lavatories and sinks used primarily by children 6 through 12 years where the rim or counter surface is 31" maximum above the finish floor or ground. 5. A parallel approach complying with 305 shall be permitted to lavatories and sinks used primarily by children 5 years and younger.6. The dip of the overflow shall not be considered in determining knee and toe clearances. 7. No more than one bowl of a multi-bowl sink shall be required to provide knee and toe clearance.]

Assembly	Restroom
Type	Restroom/Bathroom - Water Closet
ADA Standard	604.5.2
Barrier Detail	The rear grab bar at the water closet is not compliant.
Location Description	East Region Administration Lobby Restroom
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The rear grab bar extends 19-1/2" from the centerline of the water closet on the open side.

Resolution

Remove and install a compliant rear grab bar. The rear wall grab bar shall be 36" long minimum and extend from the centerline of the water closet 12" minimum on the closed side and 24" minimum on the open side. [EXCEPTIONS: 1. The rear grab bar shall be permitted to be 24" long minimum, centered on the water closet, where wall space does not permit a length of 36" minimum due to the location of a recessed fixture adjacent to the water closet. 2. Where an administrative authority requires flush controls for flush valves to be located in a position that conflicts with the location of the rear grab bar, then the rear grab bar shall be permitted to be split or shifted to the open side of the toilet area.] Grab bars shall be installed in a horizontal position, 33" minimum and 36" maximum above the finish floor measured to the top of the gripping surface, except that at water closets for children's use, grab bars shall be installed in a horizontal position 18" minimum and 27" maximum above the finish floor measured to the top of the gripping surface. A continuous grab bar is allowable in lieu of rear and side grab bars. [ADVISORY: It is advisable, but not required, to use the specifications for children where children are the primary users of the restroom. Guidance in applying the specifications for children according to the age group served reflects the differences in the size, stature, and reach ranges of children ages 3 to 12. The specifications chosen should correspond to the age of the primary user group. The specifications of one age group should be applied consistently in the installation of a water closet and related elements. Water Closet Centerline: Ages 3 and 4- 12"; Ages 5 through 8- 12" to 15"; Ages 9 through 12- 15" to 18". Where not all restrooms in the facility are accessible, the provided signage at accessible restrooms does not have the International Symbol of Accessibility.

Location Description	Restroom Vestibule Door
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com
Site Conditions	Directional signage is not provided to the accessible restrooms.

Resolution

Mount compliant signage on the wall at the latch side of the restroom door at a compliant height. All signs for accessible restrooms, including directional signs indicating the restroom location, shall comply with the requirement for the International Symbol of Accessibility, where not all restrooms in the facility are accessible. Signage shall include raised letters and Braille, either one sign with both visual and tactile characters, or two separate signs, one with visual, and one with tactile characters, shall be provided. Tactile characters on signs shall be located 48" minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60" maximum above the finish floor or ground surface, measured from the baseline of the highest tactile character. Accessible restrooms shall have signs with the International Symbol of Accessibility. Where a tactile sign is provided at a door, the sign shall be located alongside the door at the latch side. Where a tactile sign is provided at double doors with one active leaf, the sign shall be located on the inactive leaf. Where a tactile sign is provided at double doors with two active leafs, the sign shall be located to the right of the right hand door. Where there is no wall space at the latch side of a single door or at the right side of double doors, signs shall be located on the nearest adjacent wall. Signs containing tactile characters shall be located so that a clear floor space of 18" minimum by 18" minimum, centered on the tactile characters, is provided beyond the arc of any door swing between the closed position and 45 degree open position. [EXCEPTION: Signs with tactile characters shall be permitted on the push side of doors with closers and without hold-open devices.] Raised characters shall be as follows: Depth: Raised characters shall be 1/32" minimum above their background. Case: Characters shall be uppercase. Style: Characters shall be sans serif. Characters shall not be italic, oblique, script, highly decorative, or of other unusual forms. Character Proportions: Characters shall be selected from fonts where the width of the uppercase letter "O" is 55 % minimum and 110 % maximum of the height of the uppercase letter "I". Character Height: Character height measured vertically from the baseline of the character shall be 5/8" minimum and 2" maximum based on the height of the uppercase letter "I". [EXCEPTION: Where separate raised and visual characters with the same information are provided, raised character height shall be permitted to be 1/2" minimum.] The visual characters of the sign shall be installed at minimum 40" above finish floor.

Barrier Detail	The entire restroom is not compliant due to limited room dimensions.
Location Description	Single User Restrooms
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The restroom is not accessible all 4 single user restrooms are the same. The turning space is 51" maximum, the clear space at the water closet measured perpendicular from the side wall to the vanity, the clearance in front of the water closet is 43-1/4", the shower is 34-1/4" deep with a 6" step, the lavatory does not have knee and toe clearance, the door does not have compliant maneuvering clearance, grab bars are not provided at the water closet or shower, the accessories are not compliant, the signage is not compliant, and the floor has a 2.7% slope.

Resolution

Redesign the single user restroom to allow for a larger restroom with compliant dimensions for all restroom fixtures, including an accessible route into the restroom and clear space at fixtures. This barrier must be removed in conjunction with barrier ID 394480. Provide compliant restroom fixtures. The water closet shall be positioned with a wall or partition to the rear and to one side. Clearance around a water closet shall be 60" minimum measured perpendicular from the side wall and 56" minimum measured perpendicular from the rear wall. A minimum 60" wide and 48' deep maneuvering space shall be provided in front of the water closet. [Exception: In residential dwelling units required to be mobility accessible, maneuvering space in front of the water closet shall be a minimum 60" wide and 36" deep.] The centerline of the water closet shall be 17" minimum to 18" maximum from the side wall or partition. The water closet seat height shall be 17" minimum to 19" maximum above finished floor. Water closets shall be arranged for a left-hand or right-hand approach, with the flush on the open side. The required clearance around the water closet shall be permitted to overlap the water closet, associated grab bars, dispensers, sanitary napkin disposal units, coat hooks, shelves, accessible routes, clear floor space and clearances required at other fixtures, and the turning space. No other fixtures or obstructions shall be located within the required water closet clearance. [Exception: In residential dwelling units, a lavatory shall be permitted on the rear wall 18" minimum from the water closet centerline where the clearance at the water closet is 66" minimum measured perpendicular from the rear wall.] The side wall grab bar shall be 42 inches long minimum, located 12 inches maximum from the rear wall and extending 54 inches minimum from the rear wall with the front end positioned 24 inches minimum in front of the water closet. The rear wall grab bar shall be 36" long minimum and extend from the centerline of the water closet 12" minimum on the closed side and 24" minimum on the open side. [EXCEPTIONS: 1. The rear grab bar shall be permitted to be 24" long minimum, centered on the water closet, where wall space does not permit a length of 36" minimum due to the location of a recessed fixture adjacent to the water closet. 2. Where an administrative authority requires flush controls for flush valves to be located in a position that conflicts with the location of the rear grab bar, then the rear grab bar shall be permitted to be split or shifted to the open side of the toilet area.] Grab bars should be installed in a horizontal position 33 inches to 36 inches maximum above the finish floor measured to the top of the gripping surface. Projecting fixtures/dispensers above grab bars shall be located minimum 12" above horizontal grab bars and minimum of 1-1/2" below horizontal grab bars. Toilet paper dispensers shall be 7" minimum and 9" maximum in front of the water closet, measured to the centerline of the dispenser. The outlet of the dispenser shall be below the grab bar and 19" minimum above the finish floor. The toilet paper dispenser shall not be located behind grab bars. The top of projecting toilet paper dispensers shall be located 1-1/2" minimum below the grab bar. Dispensers shall not be of a type that controls delivery or that does not allow continuous paper flow. The lavatory shall maintain the maximum allowable height of 34" to the rim of the sink. The maximum allowable exterior bowl depth is 6-1/2". A compliant clear floor space of minimum 30" wide centered on the lavatory and minimum 48" deep, positioned for a forward approach, shall be provided. One full unobstructed side of the clear floor or ground space shall adjoin an accessible route or adjoin another clear floor or ground space. Where a clear floor or ground space is located in an alcove or otherwise confined on all or part of three sides, additional maneuvering clearance shall be provided. Alcoves shall be 36" wide minimum where the depth exceeds 24". Alcoves shall be 60" wide minimum where the depth exceeds 15". Space under an element between 9" and 29" above the finish floor or ground shall be considered knee clearance and shall comply. Knee clearance shall be 11" deep minimum at 9" above the finish floor or ground, and 8" deep minimum at 27" above the finish floor. The bottom of the front of the lavatory shall be minimum 29" above the finish floor. Knee clearance reduction is not allowed. Toe clearance shall be minimum 25" horizontal depth between the finish floor and 9" AFF. Knee and toe clearance shall be 30" wide minimum and centered on the lavatory. A compliant clear floor space, positioned for a forward approach, and compliant knee and toe clearance shall be provided. [EXCEPTIONS: 1. Toe clearance shall extend 19” maximum under lavatories 2. A lavatory in a toilet room or bathing facility for a single occupant accessed only through a private office and not for common use or public use shall not be required to provide knee and toe clearance. 3. In residential dwelling units, cabinetry shall be permitted under lavatories and kitchen sinks provided that all of the following conditions are met: (a) the cabinetry can be removed without removal or replacement of the fixture; (b) the finish floor extends under the cabinetry; and (c) the walls behind and surrounding the cabinetry are finished. 4. A knee clearance of 24" minimum above the finish floor or ground shall be permitted at lavatories and sinks used primarily by children 6 through 12 years where the rim or counter surface is 31" maximum above the finish floor or ground. 5. A parallel approach complying with 305 shall be permitted to lavatories and sinks used primarily by children 5 years and younger.6. The dip of the overflow shall not be considered in determining knee and toe clearances. 7. No more than one bowl of a multi-bowl sink shall be required to provide knee and toe clearance.] The centerline of the lavatory shall be a minimum of 18" from the side wall or side partition, where the accessible lavatory is located adjacent the side wall /side. Floor or ground surfaces of a clear floor or ground space shall comply with 302. Changes in level are not permitted. [EXCEPTION: Slopes not steeper than 1:48 shall be permitted.] Provide a turning space within the restroom. Provide a turning space within the restroom. Turning space shall be either a circular space or a T- shaped space. The circular turning space shall be a space of 60" diameter minimum. The space shall be permitted to include knee and toe clearance. The T-shaped turning space shall be a T-shaped space within a 60" square minimum with arms and base 36" wide minimum. Each arm of the T shall be clear of obstructions 12" minimum in each direction and the base shall be clear of obstructions 24" minimum. The space shall be permitted to include knee and toe clearance only at the end of either the base or one arm. Floor or ground surfaces of a turning space shall be level. Changes in level are not permitted. [EXCEPTION: Slopes not steeper than 1:48 shall be permitted.] [Advisory 304.2: Floor or Ground Surface Exception: Turning space "changes in level" refers to surfaces with slopes and to surfaces with abrupt rise

Submittal - November 1, 2024

Exception: Turning space" changes in level" refers to surfaces with slopes and to surfaces with abrupt rise exceeding 1/4". Such changes in level are prohibited in required clear floor and ground spaces, turning spaces, and in similar spaces where people using wheelchairs and other mobility devices must park their mobility aides, such as in wheelchair spaces, or maneuver to use elements such as at doors, fixtures, and telephones.] At least one of each type of fixture, element, control or dispenser in each toilet room shall be accessible, within allowable reach ranges. Where accessory dispensers, including towel dispensers, sanitary napkins, waste receptacles, or other accessories are provided, all operable parts and/or openings for the user including coin slots shall be maximum 40" above finish floor. [EXCEPTION: Does not apply to baby changing tables.] The bottom of the reflective surface of mirrors, not including the frame, shall be 40" maximum above finish floor when above lavatories and counters, and 35" maximum when not above sinks and counters. [ADVISORY: the top edge of the reflective surface of mirrors should be 74" minimum from finished floor.] Provide clear floor space 36" wide minimum and 60" long minimum at the open face of the compartment, with the long side open for the full width. In standard roll-in type shower compartments, operable parts of controls and faucets shall be installed on the back wall of the compartment adjacent to the seat wall 19" minimum and 27" maximum from the seat wall; and shall be located above the grab bar, but no higher than 48" above the shower floor, with their centerline 39" to 41" above the shower floor. In alternate roll-in type shower compartments, operable parts of controls and faucets shall be installed on the side wall of the compartment adjacent to the seat wall 19" minimum and 27" maximum from the seat wall; and shall be located above the grab bar, but no higher than 48" above the shower floor, with their centerline at 39" to 41" above the shower floor. All controls and faucets shall be a single lever design, and require less than 5 lbs of force to operate. Where 2 or more shower stalls within the same functional area are accessible, at least one shall be the "opposite hand" from the other (left handed controls versus right handed controls). A shower spray unit with a hose 59" long minimum that can be used both as a fixed-position shower head and as a hand-held shower shall be provided. The shower spray unit shall have an on/off control with a non-positive shut-off. If an adjustable-height shower head on a vertical bar is used, the bar shall be installed so as not to obstruct the use of grab bars. Grab bars shall be located 33" minimum to 36" maximum above the finished floor. Grab bars with circular cross sections shall have an outside diameter of 1¼" minimum and 2" maximum. Grab bars with non-circular cross sections shall have a cross-section dimension of 2" maximum and a perimeter dimension of 4" minimum and 4.8" maximum. The space between the wall and the grab bar shall be 1-1/2" minimum. The space between the grab bar and projecting objects above shall be 12" minimum. The space between the grab bar and projecting objects below shall be 1-1/2" minimum. Shower spray units shall deliver water that is 120°F (49°C) maximum. [EXCEPTION: Where subject to excessive vandalism, two fixed shower heads shall be permitted instead of a hand-held spray unit in facilities that are not medical care facilities, long-term care facilities, transient lodging guest rooms, or residential dwelling units.] Each shower head shall be installed so it can be operated independently of the other and shall have swivel angle adjustments, both vertically and horizontally. One shower head shall be located at a height of 48" maximum above the shower finish floor. The shower spray unit shall deliver water with same pressure as shower head. Provide a compliant folding seat. The shower seat shall be rectangular or L-shaped. All seats shall have the inside edge 2-1/2" maximum from the seat wall. The side edge of all seats shall be 1-1/2" from the adjacent rear wall. The forward edge of the rectangular seat shall extend 15" minimum to 16" maximum from the seat wall. At the narrower part of the L-shaped seat, the inside edge shall be 2-1/2" maximum from the seat wall, and the outside/front edge 15" minimum and 16" maximum from the seat wall. At the wider part of the L-shaped seat closer to the rear wall, the rear edge of the "L" portion of the seat shall be 1-1/2" maximum from the rear wall and the outside/front edge shall be 22" minimum and 23" maximum from the seat wall. The top of the seat shall be 17" minimum and 19" maximum above the finish floor. Enclosures for shower compartments shall not obstruct controls, faucets, and shower spray units or obstruct transfer from wheelchairs onto shower seats. Floor or ground surfaces of showers shall be sloped 1:48 maximum in any direction. Where drains are provided, grate openings shall be ¼" maximum and flush with the floor surface. Where a soap dish is provided, it shall be located on the control wall at 40" maximum above the shower floor, and within the reach limits from the seat.

Barrier Detail

Less than 50% of multiple single user toilet rooms clustered at a single location are accessible.

Location Description	Single User Restrooms
Observed	Sep 28, 2023 by Abel.Machado@bureauveritas.com

Site Conditions

The cluster of 4 restrooms includes 3 Men's and 1 Women's singe user restrooms requiring that 2 Men's and 1 Women's restroom be accessible. No restrooms are accessible.

Resolution

Provide minimum 50% accessible single user toilet rooms in each cluster of single user toilet rooms. This barrier must be removed in conjunction with barrier ID 394473. The cost of this barrier removal is covered under ID 394473 and therefore, the cost of this ID is shown as $0.

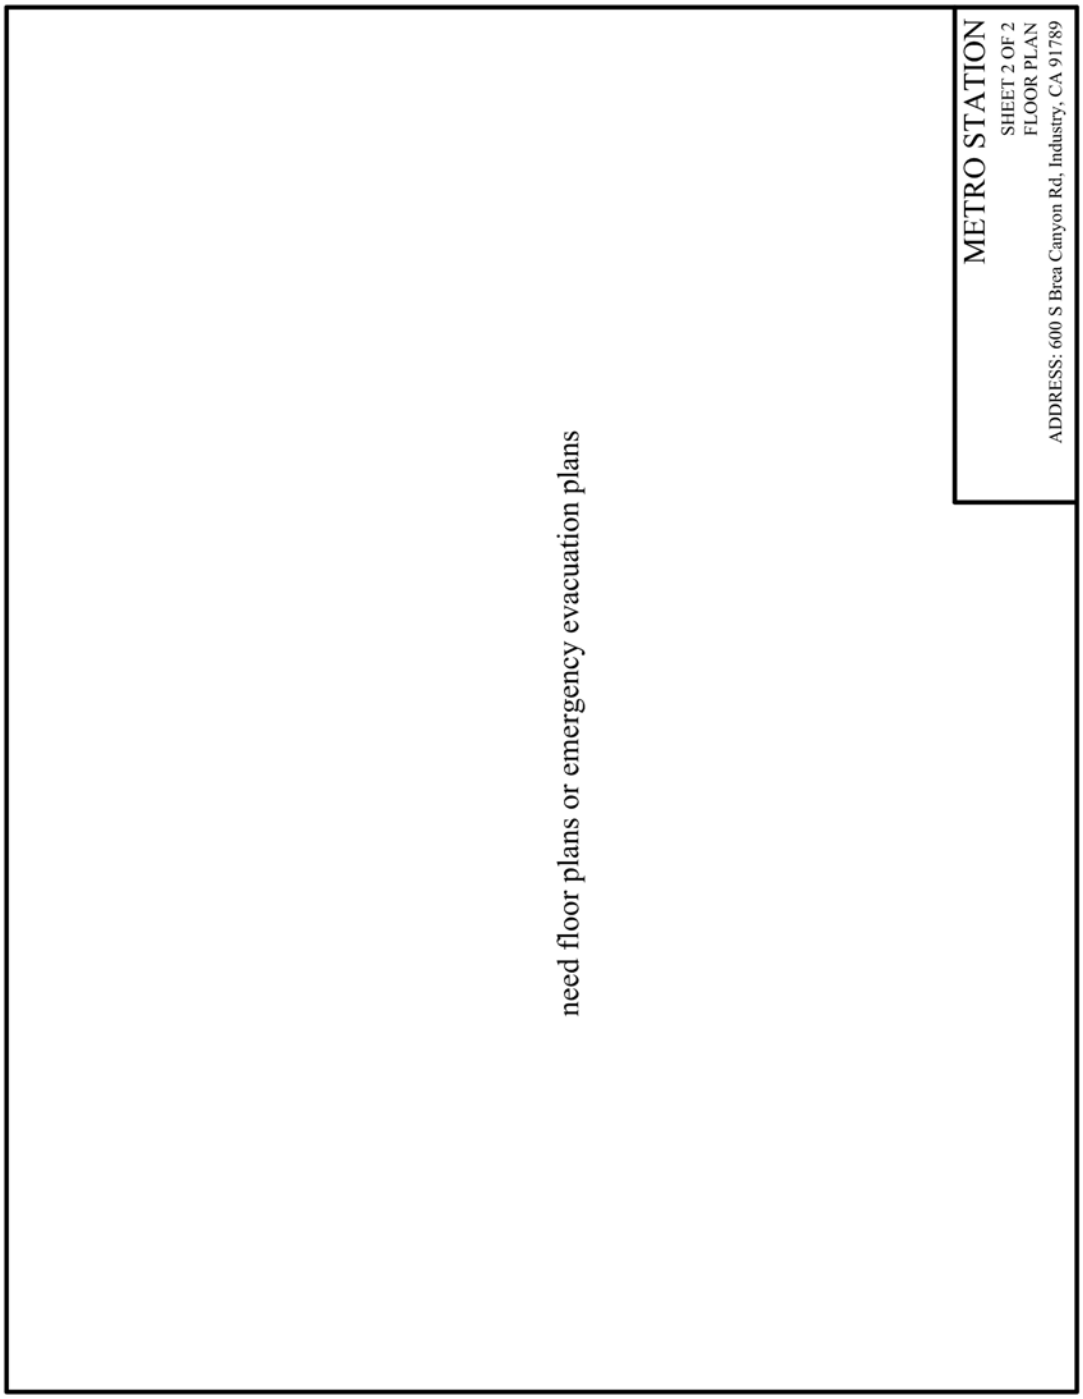
METRO STATION

Facility Site Plan:

Facility Floor Plan:



FACILITY: METRO STATION

Facility Description:

Facility was constructed in the year 2013 .

Facility Address: 600 S Brea Canyon Rd

This facility is used for the following programs:

Metro Station
Metrolink and Foothill Transit Parking
PV Solar Power Generation
EV Charging

Comment #: MS-24 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $2,000
Category Elevator **Precedence** 5 **Year** 1 **Cost with GC (30%):** $2,600

Deficiency: Site Elements Elevator
Service

Elevator was not in service at time of site visit but it could not be determined if this was an isolated or temporary interruption in service.

Measurement:

Recommended Remediation:

Failure to take prompt action to effect repairs could constitute a violation of Federal laws and these requirements.

Facility: Metro Station
Floor/Area: Parking Structure
Room/Spot: Level 1

Code References:
1991 ADAAG:
2010 ADAS:
2016 CBC:

Quantity: 1 each

Comment #: MS-25 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $500
Category Parking **Precedence** 5 **Year** 1 **Cost with GC (30%):** $650

Deficiency: Site Elements Parking
Tow Away Sign General

There is no "Unauthorized Parking Sign" sign at the entrance to the off-street parking.

Measurement: 1 count

Recommended Remediation:

Install "Unauthorized Parking Sign" sign. Install sign at either; 1) a conspicuous place at each entrance to an off-street parking facility OR 2) immediately adjacent to on-site accessible parking and visible from each parking space.

Facility: Metro Station
Floor/Area: Site Entrance 2
Room/Spot: Vehicular Entrance

Perpendicular Curb — Landing Slope

The slope of the landing at the top of the curb ramp is greater than 1:48 (2.0%) in any direction.

Measurement: 3.2 % grade

Recommended Remediation:

Replace curb ramp and landing. Obstructed by storm drain manhole adjacent to top landing.

Facility: Metro Station
Floor/Area: Site Entrance 1
Room/Spot: Vehicular Entrance

Code References:
1991 ADAAG:
2010 ADAS:
2016 CBC: 11B-406.5.3

Quantity: 500 SF

Comment #: MS-04 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $540
Category Accessible Route **Precedence** 5 **Year** 1 **Cost with GC (30%):** $702

Deficiency: Site Elements — Accessible Route
Continuity - accessible — Route

Route is not closed off to persons with visual impairements. Dead end at west side of gate, leading to wall.

Measurement:

Recommended Remediation:

Provide cane detectable pedestrian barrier.

Facility: Metro Station
Floor/Area: Site Entrance 1
Room/Spot: Vehicular Entrance

Code References:
1991 ADAAG:
2010 ADAS:
2016 CBC:

Quantity: 6 FT

Comment #: MS-05 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $360
Category Accessible Route **Precedence** 5 **Year** 1 **Cost with GC (30%):** $468

Deficiency: Site Elements — Accessible Route
Flush transition

Depth of detectable warning is not 36 in min

Measurement: 17 inches

Recommended Remediation:

Replace detactable warning tile with a 36 in by 48 in tile. Located at flush transition at north side of parking structure entrance-east entrance.

Facility: Metro Station
Floor/Area: Parking Structure
Room/Spot: Perimeter

Code References:
1991 ADAAG:
2010 ADAS:
2016 CBC:

Quantity: 1 Each

Comment #: MS-63 **Priority:** 1 **Severity:** A **Estimated Direct Cost:** $34,920
Category Ramps **Precedence** 5 **Year** 1 **Cost with GC (30%):** $45,396

Deficiency: Site Elements — Ramps
Slopes — Running Slope

The running slope of the ramp is steeper than 1:12 (8.33%). Grade varies from 7.9 to 8.9% throughout ramp runs.

Measurement: 8.9 % grade

Recommended Remediation:

Perform survey of each ramp run's top and bottom landing elevations to determine if 8.33% is achieveable at each of the ramp runs. Repair concrete surface to 8.33% if achievable or remove and replace incorrectable legs of ramp.

Facility: Metro Station
Floor/Area: Ramp at south west corner
Room/Spot:
Ramp at south west corner of site
Code References:
1991 ADAAG:

Findings: **Precedence:** 1d

The street light pole blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement inches

Recommendations:
Relocate Street Light pole

Quantity: Each
Estimated Cost: $0.00
Cost with GC (30%): $0.00

Category: Dimensions

2019 CBC: CBC 11B-810.2.2 Noncompliant
2010 ADA: 810.2.2 Noncompliant

Findings: **Precedence:** 13c

The boarding and alighted does not provide a firm, stable and slip-resistant area minimum 96 inches deep by 60 inches wide.

Depth 52 inches

Width 60 inches

Recommendations:
Widen sidewalk to expand boarding area to 8 feet deep by 5 feet wide.

Quantity: 3120 Square Inches
Estimated Cost: $468.00
Cost with GC (30%): $608.40

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Compliant

Findings: **Precedence:** 13c

The provided bench blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 37 inches

Recommendations:
Relocate bench to behind pedestrian path.

Quantity: 1 Each
Estimated Cost: $105.00
Cost with GC (30%): $136.50

Category: Bus Signs

2019 CBC: 11B-810.4
2010 ADA: 810.4, 703.5.1 Not Applicable

Findings: **Precedence:** 13c

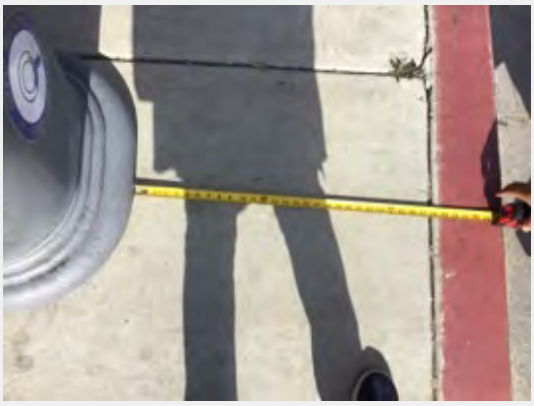
The characters on the bus sign do not have a non-glare finish and/or provide contrast with their background.

Measurement Yes or No

Recommendations:
Replace Bus Stop Sign

Quantity: Each
Estimated Cost: $0.00
Cost with GC (30%): $0.00

Category: Site Conditions



2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Noncompliant

Findings: **Precedence:** 13c

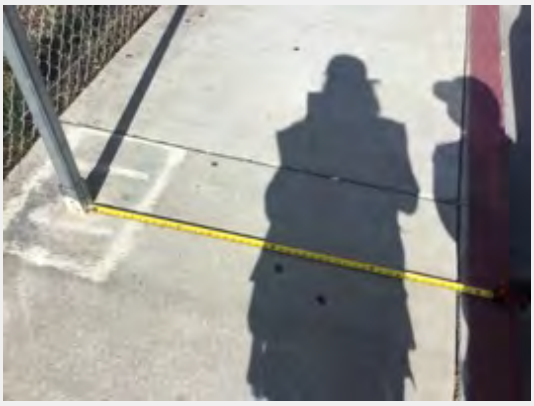
The provided trash receptacle blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 28 inches

Recommendations:
Relocate Trash Can

Quantity: 1 Each
Estimated Cost: $15.00
Cost with GC (30%): $19.50

Category: Site Conditions



2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Compliant

Findings: **Precedence:** 13c

The bus stop sign blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 46 inches

Recommendations:
Relocate Sign

Quantity: 1 Each
Estimated Cost: $180.00
Cost with GC (30%): $0.00

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Compliant

Findings: **Precedence:** 13c

The street light pole blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 38 inches

Recommendations:
Relocate Street Light pole

Quantity: 1 Each
Estimated Cost: $8,500.00
Cost with GC (30%): $11,050.00

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Noncompliant

Findings: **Precedence:** 1a

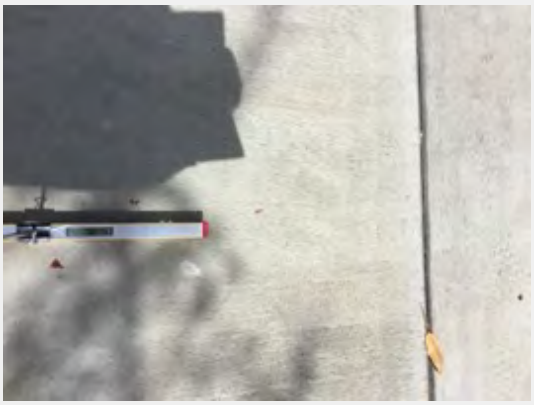
The provided bench blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 25 inches

Recommendations:
Relocate bench to behind pedestrian path.

Quantity: 1 Each
Estimated Cost: $1,800.00
Cost with GC (30%): $136.50

Category: Slope-



2019 CBC: CBC 11B-810.2.4 Noncompliant
2010 ADA: 810.2.4 Noncompliant

Findings: **Precedence:** 1a

The slope, perpendicular to the roadway, of the boarding and alighted area exceeds the allowable 2.0% grade.

Measurement	7.8	Percent

Recommendations:
Remove and replace concrete to provide 2% slope

Quantity: 5760 Square Inches
Estimated Cost: $4,600.00
Cost with GC (30%): $0.00

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Noncompliant

Findings: **Precedence:** 1a

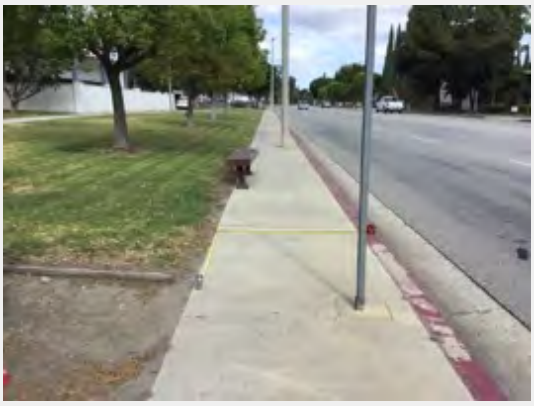
The provided trash receptacle blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement	9	inches

Recommendations:
Relocate Trash Can

Quantity: 1 Each
Estimated Cost: $30.00
Cost with GC (30%): $19.50

Category: Dimensions



2019 CBC: CBC 11B-810.2.2 Noncompliant

Widen sidewalk to expand boarding area to 8 feet deep by 5 feet wide.

Quantity: 3600 Square Inches
Estimated Cost: $540.00
Cost with GC (30%): $702.00

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Compliant

Findings: **Precedence:** 11c

The provided bench blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement	43	inches

Recommendations:

Relocate bench to behind pedestrian path.

Quantity: 1 Each
Estimated Cost: $105.00
Cost with GC (30%): $136.50

Category: Slope-

2019 CBC: CBC 11B-810.2.4 Noncompliant
2010 ADA: 810.2.4 Noncompliant

Findings: **Precedence:** 11c

The slope, perpendicular to the roadway, of the boarding and alighted area exceeds the allowable 2.0% grade.

Measurement	2.9	Percent

Recommendations:

Remove and replace concrete to provide 2% slope

Quantity: 3600 Square Inches
Estimated Cost: $540.00
Cost with GC (30%): $0.00

Category: Site Conditions

Findings: **Precedence:** 11c

The provided trash receptacle blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement inches

Recommendations:
Relocate Trash Can

Quantity: Each
Estimated Cost: $0.00
Cost with GC (30%): $0.00

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Noncompliant

Category: Site Conditions

Findings: **Precedence:** 11c

The provided trash receptacle is located within designated wheelchair space.

Measurement Yes or No

Recommendations:
Relocate Trash Can

Quantity: Each
Estimated Cost: $0.00
Cost with GC (30%): $0.00

2019 CBC: CBC 11B-810.3 Noncompliant
2010 ADA: 810.3 Not Applicable

2010 ADA: 403.5.1 Compliant

Findings: **Precedence:** 1b

The provided bench blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 44 inches

Recommendations:
Relocate bench to behind pedestrian path.

Quantity: 2 Each
Estimated Cost: $1,800.00
Cost with GC (30%): $273.00

Category: Slope-

2019 CBC: CBC 11B-810.2.4 Noncompliant
2010 ADA: 810.2.4 Noncompliant

Findings: **Precedence:** 1b

The slope, perpendicular to the roadway, of the boarding and alighted area exceeds the allowable 2.0% grade.

Measurement 2.9 Percent

Recommendations:
Remove and replace concrete to provide 2% slope

Quantity: 3600 Square Inches
Estimated Cost: $4,600.00
Cost with GC (30%): $0.00

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Noncompliant

Findings: **Precedence:** 1b

The provided trash receptacle blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement 25 inches

Recommendations:
Relocate Trash Can

Quantity: 1 Each
Estimated Cost: $30.00
Cost with GC (30%): $19.50

Category: Dimensions

2019 CBC: CBC 11B-810.2.2 Noncompliant
2010 ADA: 810.2.2 Noncompliant

Findings: **Precedence:** 1a

The boarding and alighted does not provide a firm, stable and slip-resistant area minimum 96 inches deep by 60 inches wide.

Depth	60	inches
Width	60	inches

Recommendations:

Widen sidewalk to expand boarding area to 8 feet deep by 5 feet wide.

Quantity: 3600 Square Inches
Estimated Cost: $2,400.00
Cost with GC (30%):

Category: Site Conditions

2019 CBC: CBC 11B-403.5.1 Exception 3 Noncompliant
2010 ADA: 403.5.1 Compliant

Findings: **Precedence:** 1a

The provided bench blocks the accessible route so that it is less than 48 inches wide, and/or impedes the clear space of the boarding and alighted area.

Measurement	43	inches

Recommendations:

Relocate bench to behind pedestrian path.

Quantity: 1 Each
Estimated Cost: $1,800.00
Cost with GC (30%): $136.50

Category: Slope-

2019 CBC: CBC 11B-810.2.4 Noncompliant
2010 ADA: 810.2.4 Noncompliant

Findings: **Precedence:** 1a

The slope, perpendicular to the roadway, of the boarding and alighted area exceeds the allowable 2.0% grade.

Measurement	2.6	Percent

Recommendations:

Remove and replace concrete to provide 2% slope

Quantity: 3600 Square Inches
Estimated Cost: $4,600.00
Cost with GC (30%): $0.00

Category: Site Conditions

APPENDIX N-2: CURB RAMPS

Total Curb Ramp Cost Estimate Summary Table:

	Estimated Costs	Estimated Cost with GC (30%)
Year 1	$0	$0
Year 2	$81,480	$105,924
Year 3	$352,620	$458,406
Year 4	$323,760	$420,888
Year 5	$339,805	$441,747
Total	**$1,097,665**	**$1,426,965**

Street: Albatross Rd — Cost Estimate Total: $8,040

Ramp ID: R-085

Priority: 2
Precedence: 4c
Year: 3
Estimated Direct Cost: $4,020
Cost with GC (30%): $4,432
Subsection: 6C

Findings
The Running Slope Exceeds 8.33 % Grade
A 48x48 inch Level Landing is Not Provided
The Gutter Slope Exceeds 5.0 % Grade
The Ramp Transitions are Not Flush

Recomendation
Demolish and dispose of existing ramp and materials. Replace with ADA compliant curb ramp. Ensure a level landing of minimum 48x48 inches is provided.

Street: Albatross Rd
Cross Street: Almahurst St
GPS: 33.991315, -117.923818

Year: 4 — **Subsection:** 11D
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

Subsection: 6D

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

Street: Azusa Ave
Cross Street: Puente Hills Mall
GPS Coordinates: 33.995676 -117.931074

Intersection ID: SI-067

Priority: 3 **Estimated Direct Cost:** $5,400
Precedence: 04d **Cost with GC (30%):** $7,020
Year: 3 **Subsection:** 6D
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD

Priority: 4 **Estimated Direct Cost:** $5,400
Precedence: 11c **Cost with GC (30%):** $7,020
Year: 5 **Subsection:** 13C
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

Street: Crossroads Pkwy S
Cross Street: Crossroads Campus
GPS Coordinates: 34.03099 -118.011508

Intersection ID: SI-107

Priority: 4 **Estimated Direct Cost:** $4,500
Precedence: 11c **Cost with GC (30%):** $5,850
Year: 5 **Subsection:** 13C
Findings: Compliant audible signals are not provided at the signalized intersection.

Recommendations:
Replace/install audible signals at intersection crosswalks. Where pedestrian signals are provided at pedestrian street crossings, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

Year: 3
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Estimated Direct Cost: $5,400
Cost with GC (30%): $7,020
Subsection: 5A

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

GPS Coordinates: 33.995527 -117.906564

Intersection ID: SI-065

Priority: 3 **Estimated Direct Cost:** $5,400
Precedence: 07a **Cost with GC (30%):** $7,020
Year: 3 **Subsection:** 5A

Precedence: 11d **Cost with GC (30%):** $1,625
Year: 5 **Subsection:** 13D
Findings: Compliant pedestrian push buttons are not provided at the signalized intersection.

Recommendations:
Replace push buttons at intersection crosswalks. Push buttons must be 2 inches minimum in diameter, require less than 5 pounds force to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15 inches AFF and maximum height of 48 inches AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5.

GPS Coordinates: -118.03726 34.03014

Intersection ID: SI-153

Priority: 4 **Estimated Direct Cost:** $1,250
Precedence: 11d **Cost with GC (30%):** $1,625

Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

GPS Coordinates: 34.001206 -117.911085

Intersection ID: SI-131

Street: Rowland St
Cross Street: Lawson St

Priority: 4 **Estimated Direct Cost:** $5,400
Precedence: 13c **Cost with GC (30%):** $7,020
Year: 5 **Subsection:** 4C
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

GPS Coordinates: 34.001206 -117.911085

Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

GPS Coordinates: 34.054686 -118.00087

Street: Turnbull Canyon Rd

Cost Estimate Total: $42,300

Intersection ID: SI-071

Priority: 4
Precedence: 01d
Year: 2
Estimated Direct Cost: $5,400
Cost with GC (30%): $7,020
Subsection: 9D

Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

Precedence: 11c **Cost with GC (30%):** $7,020
Year: 5 **Subsection:** 13C
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Recommendations:
Replace push buttons and audible signals at intersection crosswalks. Push buttons must be 2" minimum in diameter, require less than 5 lbf to operate, shall not require grasping, pinching, or twisting of the wrist to operate and be mounted between the minimum height of 15" AFF and maximum height of 48" AFF. Push buttons shall be mounted in a location compliant with ADAS X02.5. Where pedestrian signals are provided, they shall include accessible pedestrian signals and pedestrian pushbuttons complying with sections 4E.08 through 4E.13 of the MUTCD.

GPS Coordinates: -118.02586 34.0288801

Intersection ID: SI-170

Street: Workman Mill Rd
Cross Street: Crossroads Pkwy

Priority: 4
Precedence: 11c
Year: 5
Findings: Both compliant pedestrian push buttons and audible signals are not provided at the signalized intersection.

Estimated Direct Cost: $5,400
Cost with GC (30%): $7,020
Subsection: 13C

Recommendations:
Replace push buttons and audible signals at intersection crosswalks.
