## Program Terms and Conditions:

1. Participants are limited to IPUC and its electric customers with all associated utility accounts in good standing.
2. The Utilities Director or designee reserves the right to temporarily suspend the EE Program, or any component thereof, at any time. However, cancelation of or any permanent modifications to the EE Program must be approved by way of IPUC action.
3. Payments issued under EE Program Categories are limited to the availability of funds on a two-fiscal year basis.
4. Independent of the EE Program payment, eligible energy efficiency projects must be cost effective from the customer's perspective based upon the value of total estimated energy savings over the life of the installed measures. The installed equipment must be used for the effective useful life of the product(s) or for a period of five years, whichever is less.
5. EE Program payment requests must be submitted by the applicant, in writing, within 120 days of issuance of the pre-approval notice to prevent cancellation of the funding reservation. Written requests must be accompanied by sufficient information to document project costs and must include, at a minimum, a copy of the dated sales receipt. The sales receipt is subject to verification and must note all necessary information to properly identify the qualifying product/equipment/materials, including, but not limited to: make/model, vendor, date, and price per qualifying unit. IPUC might also conduct a post-inspection to verify the installation of the energy efficiency measure.
6. EE Program applications are subject to pre- and post-installation inspections. Customer agrees to fully cooperate with any authorized agents of IPUC for the purpose of such inspections. Customers who are not in compliance with terms and conditions of the EE Program, or to have provided false or inaccurate information on the EE Program application will be billed for a pro-rated amount of the rebate, or the full amount of the rebate, as may be appropriate.
7. All equipment installed must be new (not used, refurbished, or available for resale); used at the service address listed on the EE Program application; replace existing, operational, less energy-efficiency equipment; and utilize the same fuel source as existing equipment (electric for electric, not gas for electric).
8. With the exception of utility-side projects, rebates/incentives are based on product cost only. Labor, equipment rentals, taxes and non-material costs are excluded.
9. Rebate checks will only be issued and mailed to the IPUC customer listed on the application for service or as indicated in an official notification subsequently submitted to IPUC in writing following the initial application for service.
10. IPUC does not endorse or recommend specific products or dealers and disclaims any warranty, whether expressed or implied, regarding the equipment installed, or for any material or labor associated with its installation, maintenance, repair, safety, satisfactory performance, or any energy savings associated with its use.

## Agreement and Certification

If your products qualify for rebate, IPUC representative may schedule an in-home inspection to verify products list above are installed. If selected, one of IPUC's Energy Management Contractors will come to your home to your residence and verify the installation of products.

I agree to defend, indemnify, protect and hold IPUC and its agents, officers, and employees harmless from and against any and all claims asserted or liability established for damages or injuries to any person or property which arises from or are connected with or are caused by the acts or omissions of the customer or from conditions on the customer's property; provided, however, that customer's duty to indemnify and hold harmless shall not include any claims or liability arising from the willful misconduct of IPUC, its agents, officers, or employees in performing the work or services or supplying materials or equipment to the customer.
