

# IPU Energy Audit Program Application (Large General Service)

The program provides eligible large general service customers with an onsite energy audit that is designed to potentially improve energy operating efficiency and reduce load requirements. Large general service customers are eligible for one ASHRAE Level I, II, or III energy audit at no cost once every two years. Customers will be provided with a free energy audit report that provides potential energy saving measures for their business. The program is provided on a first-come, first-served basis until program funds are depleted. This program may be modified or terminated without prior notice.

Energy Efficiency Related Projects Interested (Check all that apply)		<input type="checkbox"/> LED Lighting <input type="checkbox"/> Refrigeration Controls/Motors <input type="checkbox"/> Other (Specify):		<input type="checkbox"/> VFD Air Compressor <input type="checkbox"/> HVAC	

## Program Terms and Conditions:

1. Participants are limited to IPU and its electric customers with all associated utility accounts in good standing.
2. The Utilities Director or designee reserves the right to temporarily suspend the EE Program, or any component thereof, at any time. However, cancelation of or any permanent modifications to the EE Program must be approved by way of IPU action.
3. Independent of the EE Program payment, eligible energy efficiency projects must be cost effective from the customer's perspective based upon the value of total estimated energy savings over the life of the installed measures. The installed equipment must be used for the effective useful life of the product(s) or for a period of five years, whichever is less.
4. Demand reduction and direct energy savings attributable to energy efficiency will be evaluated by IPU's engineering consulting firm using accepted industry calculations or energy model. Savings calculations must include product specifications, hours of operations, the derivation of baseline conditions and all other assumptions used to support estimates.

# IPU Energy Audit Program Application (Large General Service)

5. All equipment installed must be new (not used, refurbished, or available for resale); used at the service address listed on the EE Program application; replace existing, operational, less energy-efficiency equipment; and utilize the same fuel source as existing equipment (electric for electric, not gas for electric).
6. IPU does not endorse or recommend specific products or dealers and disclaims any warranty, whether expressed or implied, regarding the equipment installed, or for any material or labor associated with its installation, maintenance, repair, safety, satisfactory performance, or any energy savings associated with its use.

## **Agreement and Certification**

If you qualify for this program, IPU representative will coordinate and schedule an onsite energy audit to perform the above listed items. One of IPU's Energy Management Contractors will come to your business to perform an audit of your energy use and identify areas where you can save energy. You will be provided with an energy audit report at no cost.

I agree to defend, indemnify, protect and hold IPU and its agents, officers, and employees harmless from and against any and all claims asserted or liability established for damages or injuries to any person or property which arises from or are connected with or are caused by the acts or omissions of the customer or from conditions on the customer's property; provided, however, that customer's duty to indemnify and hold harmless shall not include any claims or liability arising from the willful misconduct of IPU, its agents, officers, or employees in performing the work or services or supplying materials or equipment to the customer.
