## **City of Industry Approves Delhaven Community Center to Host its Camp at Tonner Canyon**

### ***Delhaven Community Center Holds Camps for Both Children and Special Needs Adults***

City of Industry, CA – The Industry City Council recently approved Delhaven Community Center (DCC) to use the City’s land in Tonner Canyon to hold their annual Summer Camp. DCC has been hosting these annual Summer camps for the past 45 years, however this year the facility where it is traditionally held is no longer able to accommodate the event. DCC approached the City of Industry and the Sheriff’s Youth Activities League about the possibility of using a portion of Tonner Canyon (the same area where Camp COURAGE is annually held).

“The City is proud to work in collaboration with the YAL to create a viable solution for Delhaven to continue to do its great work in the community serving children and special needs adults,” said Acting City Manager Troy Helling.

Delhaven operates both Residential Summer Camps and Summer Day Camps. The Summer Camps are open to children and to special needs adults served by DCC. The camp that will be hosted in Tonner Canyon will be the Mountain Summer Camp for special needs adults.

“When we were faced with price hikes and a lack of proper accessibility at our regular location, the City of Industry and the YAL were amazing with providing us a solution to sustain our camp,” said Tim Seal, Executive Director of the Delhaven Community Center. “This was the first time in 45 years that we were faced with potentially canceling our camp, so this contribution and we tremendously thank the City of Industry for working with us on a solution.”

The camp is being held beginning September 10 through October 14. Campers will enjoy a variety of nature studies, hikes, crafts, dances, star gazing, sports, water activities, a variety of special events, and more. The Tonner Canyon camp facility is perfect for the special population as it is flat, has all amenities within a close distance, includes both indoor and outdoor facilities, and is close to Delhaven’s facilities.
